# LAND REVENUE ADMINISTRATION REPORT, PART I, 

 OF THBbOMBAY PRESIDENCY INCLDDING SIND,<br>FOR THE YEAR 1904-1905.

## INDEX TO THE LAND REVENUE ADMINISTRATION REPORT, PART I, OF THE PRESIDENCY PROPER, FOR THE YEAR 1901-1905.

## No. A. C. 6949.

## From

> The ACCOUNTANT-GENERAL, Bombay;

To

## The SECRETARY то GOVERNMENT, Revenue Department, Bombay.

Bombay, the 28th February 1906.
Sir,
In accordance with paragraph 6 of Government Resolution, Revenue Department, No. 2420, dated the 8th April 1903, I have the honour to submit herewith a statement showing the interest due at $3 \frac{1}{2}$ per cent. on the total monthly outstanding balances of tagai advances for the whole Presidency as compared with the interest actually received during the revenue year 1904.05.

I have the honour to be,
Sir,
Your most obedient servant,
F. C. HARRISON,

Accountant-General.

Statement showing the Interest due at $3 \mathbf{1}$ per cent. on the Total Monthly Oulstanding Balances of Takávi Advances for the wohole Presidency as compared with the Interest actually received duriug the Revenue year 1904-05.

## LAND REVENUE ADMINISTRATION REPORT, PART I, FOR I'HE PRESIDENCY PROPER.

The following are the reports for the year 1904-1905 of the three divisions of the Presidency Proper. The usual Appendices are attached.

## 2. Season.

## NORTHERN DIVISION.

Some of the principal features of the season have been degcribed at the commencement of Part II of the Land Revenue Administration Report submitted to Government. The monsoon was erratic. The rainfall was on the whole insufficient, except in Thána, and caused great anxiety at the outset. In Gujarát there was a long break in the rains of nearly a month and a half which seriously affected the growing kharif crops. This break was followed by heavy rain due to a cyclonic storm which saved the situation, then rapidly becoming grave, and averted the danger of a total failure of crops.

Rice and rabi crops suffered on account of the insufficiency of moisture in the soil and the absence of rain in October and November. October was marked by abnormal heat in the Nortbern Gujarat, which shrivelled up the cotton plants in goradu (light) soils and reduced the yield in black soils. Irrigation was extensively resorted to, but the water-supply in wells and tanks had run short.

Fodder was scanty only in Broach and a portion of the Surat District, and had to be imported from Khándesh.

Locusts appeared in a part of the Panch Mabáls, but no appreciable damage was done to the kharif crops. In Thána they did some damage to young seedlings.

Plague was prevalent more or less in all the districts, but to a lesser extent, and was of a milder type than usual.

Cholera broke out in 2 tálukás of the Thána District and caused 251 deaths. There was small-pox in 2 tálukás of the Panch Maháls and in the city of Ahmedabad.

Cattle disease (rinderpest) prevailed for a short time in some tálukás, but the mortality was nowhere great.

## CENTRAL DIVISION.

The early rain was generally insufficient except in the Násik District where it was seasonable, yet the outturn was normal. In the other districts of the division the scanty rainfall prevented sowing of the early crops except in the Mawali portions of the Poona District. The seedlings in that part were damaged by locusts. For the kharff season the rain was insufficient in the Ahmednagar District, and famine was expected in Sátára and Sholápur Districts, when a good fall in September relieved the situation to some extent. In the rest of the division the rainfall was favourable. In the Násik and Poona Districts the outturn was good and in Khándesh normal.

As for the rabi crops the rain was generally sufficient and seasonable, but later on the rains held off and consequently the yield was poor in the Poona, Sátúra and Sholápur Districts.

On the whole the division barely escaped a famine. Locusts appeared in Khándesh, Poona, Sátára and Sholápur Districts, but the damage done did not reach any appreciable extent. Measures were taken to destroy the hoppers.

Plague was prevalent in all the districts.

## SOUTHERN DIVISION.

The season and the outturn of crops were fair to normal in the greater part of the division. In the remaining tract which is liable to chronic famine, viz., the whole of the district of Bijapur, the Athni, Gokak and Parasgad Tailukás of Belgaum, and the Navalgund T'aluka including the Nargund Petha in Dhárwár, the rainfall though on the whole sufficient for the sowing both of kharif and rabi crops was insufficient for their development, and the outturn was consequently extremely poor; but owing to the previous good season and the surplus stock of food-grains and the profits derived from the high prices of cotton the rayats were able to tide over what would otherwise have been a year of some difficulty. There was, however, emigration from the Bijápur District into the Nizam's dominions.

The operations for the destruction of locust eggs and hoppers which had Jbeen commenced in the rains of 1904 having been carried on vigorously in Kolába and Ratnágiri, there was no damage to crops of food-grains during the year under report. But the betel and cocoanut gardeus which had been damaged by swarms of locusts in 1903-1904 will take some years to improve and regain their former condition.

For the first time a band of about a dozen wild elephants entered Kánara villages from the Mysore jungle and caused some damage to rice crops.

There was plague, oholera and small-pox in almost all the districts.
Fodder-supply was sufficient in grass-growing tracts ; in tracts where kadbi (jowári stalks) is used as fodder it had to be replenished by importation from the Nizam's territory. Water-supply was sufficient except in the Navalgund Taluka and the town and neighbourhood of Dharwár.

Cattle diseases such as anthrax, black quarter and foot and mouth appeared among cattle in almost all the districts, but they were confined to very few villages and the mortality was small.

## 3. Gross Revenue.

## NORTHERN DIVISION.

(Column 6 of Appendix I.)
The gross revenue shows a decrease of Rs. 25,574. The details of variations by districts are as under :-

In Ahmedabad the decrease is mainly due to the cancellation of assessment on bhátha lảnds liable to frequent shifting and their transfer to the head "Unassessed"; in Kaira and the Panch Mabáls to the acquisition of lands for public and special purposes in the talukas of Mehmadabad, Matar, Nadiád and Dohad; in Broach to revision survey rates in the Amod Táluka; and in Thana to the reduction of assessment on lands transferred to the forest. The increase in Surat is due to the fixing of assessment on unassessed lands brought under cultivation.

## CENTRAL DIVISION.

There was an increase of Rs. $1,47,714$ in the gross revenue, due chiefly to revision settlement in the tálukás of Táloda, Nandurbár, Pimpalner and Dhulia (inám villages) of the Kbándesh District. The decrease in Násik, Poona and Sátára was mainly due to reduction of assessment on lands appropriated to public purposes.

## SOUTHERN DIVISION.

3. The gross revenue.of the division (Rs. $1,04,00,064$ ) shows a decrease of Rs. 2,120.

The noticeable variations are the reduction of the assessment of Rs. 6,009 ou lands taken up for forest in Kánara, the reduction by Rs. 1,303 of the survey assessment of the alienated villages of Kasírde in the Deogad Taluka of the Ratnagiri District under Government Resolution, Kevenue Department, No. 5505, dated 13th August 1903, and the inclusion for the first time in the Government jamábandi of the assessment of Rs. 4,683 of the twelve villages in the Rajápur Taluka which are enjoyed by the Chief of Baodaj as Political inám.

## 4. Alienations.

> (Column 9 of Appendix I.)
> NORTHERN DIVISION.

There was a net increase of Rs. 8,180 under this head during the year under report. This was chiefly due to restoration of forfeited holdings in the Kaira District on inám tenure. The details are as under :Decrease.

The decrease in Broach is due to reduction of assessment on inám lands at the revision survey in the Amod Táluka ; in Ahmedabad and Surat it is due to forfeiture for non-payment of quit-rent, and in Thána to the remuneration of the paitils having been fised according to the revision survey assessment.

CENTRAL DIVISION.
There was a net decrease of Rs. 31,654 under this head, principally due to the fact that kadim cash allowances in alienated villages of the Ahmednagar District which were formerly paid direct by the inámdárs to the holders are now recovered by Government from the former and paid to the latter from Government treasury. These amounts have been treated in the accounts as judi recoverable from the inámdárs and deducted from the revenue hitherto shown as alienated.

## SOUTHERN DIVISION.

The profits with alienees (Rs. 16,54,165) show an increase of Rs. 1,407.
The variations are small in all the districts except Ratnágiri where the net increase is Rs. 1,796 and is made up as follows:-

## Gross decrease.

## 5. Net Government Revenue. <br> (Column 13 of Appendix 1.) NORTHERN DIVISION.

The net ordinary fixed revenue shows an increase of Rs. $1,58,629$ over that of the preceding year. The variations by districts are shown below :-

| Ahmedabad Kaira <br> Panch Maháls | Increase. |  |  |  | Rs. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | ... | ... | ... | ... | 59,889 |
|  | ... | ... | ... |  | 1,06,892 |
|  | ... | ... | ... |  | 2,107 |
|  |  |  |  | . | 1,68,838 |
| Decrease. |  |  |  |  |  |
| Broach | ... | ... |  | ... | ... | 592 |
| Surat | ... | ... | $\cdots$ | ... | 5,289 |
| Thána | ... | ... | ... | ... | 4,398 |
|  |  |  |  | -. | 10,209 |

The chief causes of increase and decrease are as under :-
Oauses of increase.

## CENTRAL DIVISION.

There was an increase of Rs. 1,34,594 under this head, due mainly to the evision settlement in Khándesh District. The increase in the Ahmednagar District for the most part corresponds to the decrease under the head "Alienation," and is so far only nominal.

## SOUTHERN DIVISION.

The realizable ordinary fixed land revenue (Rs. $85,49,207$ ) shows a decrease of Rs. 6,520 which is shared by all the districts except Bijápur and Ratnágiri. In Bijápur there was a small increase of Rs. ' 365 and in Ratnágiri of Rs. 1,660 , mainly due to the lapse of the alienated village of Gaokhadi in the Rajápur T'aluka referred to in paragraph 4.

In Belgaum, Dhárwár and Kánara large areas of land were either relinquished by the occupants or were declared forfeited. This occurred chiefly in the Sámpgaon and Khánápur Tálukís of Belgaum, the Dhárwár and Kalghátgi Tálukás of Dhárwár and the Haliyál Táluka of Kánara, and was mainly due to the bad effects of the malarial climate, ravages from wild boar, and frequent appearance of plague.

It is worthy of notice that in the district of Bijapur and other parts equally liable to famine there has been no decrease in the amount of realizable revenue.

## 6. Miscellaneous Revenue. <br> (Column 16 of Appendix 1.) <br> NORTHERN DIVISION.

The miscellaneous land revenue as included in the taleband amounted to Rs. $3,94,559$ in the year under report against Rs. $5,13,571$ in the preceding year. Thus there was a net decrease of Rs. 1,19,012. In Ahmedabad the decrease is noticeable under the heads "Occasional items of fixed revenue," "Sale of occupancy rights," "Produce of trees," "Grass and grazing," "Miscellaneous products," "Unauthorized cultivation or occupation," "Fines for appropriating land to purposes unconnected with agriculture," and "Notice fees;" in Kaira under "Occasional items of fixed revenue," "Unauthorized cultivation or occupation," and "Notice fees;" and in Broach under "Occasional items of fixed revenue," "Sale of occupancy rights," "Produce of trees," and "Notice fees." The Panch Makáls shows an increase under "Produce of trees;" Surat and Thána under " Occasional items of fixed revenue," "Sale of occupancy," "Grass and grazing," and "Unauthorized cultivation or occupation;" and in Tbána also under "Fines for appropriating land to purposes unconnected with agriculture."

## CENTRAL DIVISION.

There was a net decrease of Rs. 71,844 under this head (column 16 of Appendix No. 1). It occurred principally under the following heads in the districts uoted:-

1. Occasional items of fised revenue
2. Land taken up for cultivation
3. Sale of land or occupancy rights
4. Revenue from trees
... Násik and Sátára.
... Ahmednagar and Násik.
... ... Sholapar.
5. Fine for appropriating lands to purposes Khándesh, Násik, Sátára and unconnected with agriculture. Sholápur.
6. Notice fees ... ... ... Ahmednagar, Sátára and Sholápur.
7. Penalty under soction 148 of the Land Násiľ and Sátaru. Revenue Code.

## SOUTHERN DIVISION.

The miscellaneous land revenue included in taleband which had increased from Rs. 1,78,948 in 1902-1903 to Rs. 2,09,994 in 1903-1904 fell to Rs. 1,93,185, decrease of Rs, $16, \mathrm{~s} 09$.

The rariations by districts are :-
Increase.

|  |  |  |  |  | Rs. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| ${ }^{\text {Bijappur }}$ | ... | ... | ... | ... | 816 |
| Dharwar | ... | ... | ... | ... | 6,782 |
| Ratnagiri | ... | ... | ... | ... | 1,801 |
|  |  |  |  |  | 9,399 |

## Decrease.

|  |  |  |  |  | Rs. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Belgaum | ... | ... | $\ldots$ | ... | 14,009 |
| Kınára | ... | ... | ... | ... | 6,10 |
| Kolába | $\ldots$ | ... | ... | ... | 5,593 |
| Net decreass | ... | ... | ... | ... | $\begin{aligned} & 26,208 \\ & \mathbf{1 6 , 5 0 9} \end{aligned}$ |

In Bijápur there were increased receipts on account of the sale of occupancy rights which did more than compensate a considerable decrease under the beads "Revenue from grass and grazing" and " Notice fees." The fall of grazing revenue was due to deficient rainfall and the opening of the furests to free grazing. In Dhárwár the increase is due to the realizations of ground rent on account of the gold mines in the Gadag Taluka and to increased receipts of grazing fees. In Ratnagiri the increase is due to greater receipts of the price of occupancy rights sold in Málwan and Rájápur Tálukás.

The decrease in Belgaum is cousiderable. It is mainly under "Oceasional items of fixed revenue" and "Revenue from authorized cultivation in unassessed land" in the Chikodi and Athni Tálukís. The decrease under the latter head was in the Athni Taluka where kuran lands which had been given out for cultivation were again reserved for the growth of grass.

In Kánara the decrease was under "Sale of occupancy rights" and "Revenue from grazing." The decrease under the former head was in the Siddápur Táluka. In this Tháluka a large number of applications for the sale of waste lands which had been in arrears were disposed of in 1903-1904, whereas there was no such special circumstance in the year under report and the usual amount of occupancy price was realized. The decrease under the latter bead was due to the crediting of the whole of the grazing fee receipts in the coast tilukís to the Forest Department instead of $\frac{3}{4}$ ths as hitherto, under an arrangement come to between the Collector and Conservator, which is being separately reported on.

In Kolába the decrease was mainly due to less amount of occupancy price being realized in the year under report.

As compared with the previous year, there was an increase under this head in all the districts of the division except the Panch Maháls. Remissions on account of the failure of crops were as under:-

## Rs.

| Ahmediabad | ... | ... | ... | ... | 1,97,791 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Kaira | ... | ... | ... | ... | 3,84,772 |
| Broach | $\cdots$ | ... | ... | ... | 1,93,156 |
| Surat | ... | ... | ... | ... | 1,82,995 |
| ${ }_{\text {Thana }}^{\text {Thana }}$ | $\ldots$ |  | ... | ... | 52,640 |
| The Panch |  | ... | ... | ... | 217 |

## CENTRAL DIVISION.

As compared with the previous year's figures there was an increase under this bead in all the districts of this division. The causes for which remissions were granted during the year under report were as follows:-

|  | Introduction or revision of survey settlement |  |  |  | Rs. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | ... | 76,367 |
|  | Suspension of se | ment | ... | ... | ... | 82,625 |
|  | Poverty of rayat |  |  |  | ... | 1,129 |
|  | I and taken up for | pecial | blic |  | ... | 818 |
|  | Remiseion of wa |  | ... | ... | ... | 57,873 |
|  | Failure of crops |  | ... |  | ... | 1,16,410 |
| 7. | Other causes | ... | ... | .. | ... | 40,853 |
|  |  |  |  |  | ... | 3,75,075 |

Almost all the remissions under the first head were granted in Ahmednagar, Khándesh and Sholápur. l'oona, Khándesh and Násik are responsible for the amounts slown against "Remission of water-rate." Remissions on account of "Failure of crops" were largest in Sholápur. The amount shown against "Suspension of settlement" was due to postponement of the levy of revised assessment in the Málegaon and Báglan Tálukás of the Násik District.

## SOUTHERN DIVISION.

Remissions of land revenue granted during the year and brought in the year's accounts amount to Rs. 60,973. Besides about Rs. 9,472 in Belgaum and Rs. $38, 〔 86$ in Bijapur were remitted during the year though not brought to account. The bulk of the remissions was in the Bijapur District, in the Athni, Gokak and Parasgad Tálukás of Belgaum and in the Navalgund Táluka of Dhárwár. They were granted in accordance with the principles laid down in Governmont Resolution, Revenue Department, No. 6985, dated 13th September 1801.

Excluding the usual remission of Rs. 299-4.0 granted for life to the Bilgi Ráni, the remissions in Kánara are small and are due to ordinary causes. Much the greater portion of the remissions in Kolába is on accuunt of the introduction of the survey settlement, and of those in Ratnagiri occurs in the Deogad Táluka and granted in accordance with the orders contained in Government Resolution, Reverue Department, No. 3718, dated 2nd June 1902.

> 8. Suspensions. (Column 27 of Appendix I.) NORTHERN DIVISION.

The amount of land revenue suspended in the division was as under:-

All this was on account of the failure of crops. CENTRAL DIVISION.
Under the orders in paragraph 2 of Government Resolution No. 7538, dated the 18th September 1900, Revenue Department, column 27 of Appendix I has been opened to show the outstandings for which suspension has been granted. The figures in column 27 show that 77 per cent. of the balance for the current year, i. e., 1904-1905, has been suspended with sanction. There are still for the в $221-3$
year under report over 6 lakhs uncollected not suspended; the largest amounts are in Poona, over two lákhs, and Sátára, over two lákbs and a balf. In both these districts there were large arrears from former years, most of which have remained uncollected. There were also large balances from former years in Ahmednagar, but a comparatively small amount of revenue not suspended during the year under report remained uncollected, while in Sholapur no unsuspended balance is reported. It is not possible, of course, that much can be done this year, and the Commissioner has no doubt the Collectors are alive to the necessity of recovering unsuspended arrears as soon as a normal season occurs.

## SOUTHERN DIVISION.

The amount of demand suspended during the year was Rs. $7,26,537$. The details by districts are given in column 27 of Appendix I. The bulk of the suspensions was in the tracts mentioned in paragraph 7, which suffered from failure of crops on a large scale and was granted in accordance with the instructions contained in Government Resolution No. 6985 of 13th September 1904. The Collector of Bijípur reported in his No. 3357 of 6th May 1905, printed in the preamble of Government Resolution No. 4467 of 1st June 1905, that Rs. $3,75,000$ would have to be suspended ; but the amount aotually suspended was Rs. 3,37,364, the remaining sum having been collected before the orders of suspension were passed, the inquiries that were made being more elaborate than were required by the rules.

In Kánara no amount was suspended ; in Kolaba the amount was small and was on account of loss by fire in one táluka. In Ratnágiri a sum of Rs. 5,006 was suspended on account of the damage done by locusts to garden and rice crops.

## 9. Revenue for collection.

## (Columns 19, 22 and 23 of Appendix I.)

## NORTHERN DIVISION.

The amount of revenue for collection on account of the year under report was Rs. $84,88,950$ (column 19) as compared with Rs. $94,80,394$ in the preceding year. The decrease is mainly due to the grant of remissions.

## CENTRAL DIVISION.

The amount for collection (after granting remissions) for the year under report (column 19) decreased by Rs. 1,51,106 and that on account of the years previous to 1904-1905 (column 22) increased by Rs. 48,538. The result (column 23) was a net decrease of about one lákb.

## SOUTHERN DIVISION.

The nominal gross amount of revenue for the year under report was Rs. $86,81,419$ (column 19) against Rs. $87,09,468$ in the previous year. Excluding the amount suspended (column 27), the amount for actual recovery was Rs. 79,54,882 (columns 19-27).

Out of Rs. 2,99,467 (column 20 of Appendix I) outstanding at the end of 1903-1904, Rs. 48,019 (column 21) were remitted as irrecoverable, leaving a balance of Rs. 2,51,448 for collection. The amounts remitted in Belgaum, Dhárwár and Ratnágiri are comparatively large. The bulk of the amount remitted in the Belgaum District was in the Athni Táluka which was affected by scarcity, and the bulk of the amount remitted in the Dhárwár District was in the Dhárwár and Kalghátgi Tálukás and is ascribed by the Collector to decrease of population owing to plague. The amount remitted in Ratnagiri is only nominal, as it represents the espenses of management of khoti villages which bave lapsed to Government.

## 10. Collections.

## (Columns 24, 25 and 26 of Appendix I.)

## NORTHERN DIVISION.

The total amount realized out of the current year's demand, viz., Rs. 55,27,761 (Ks. $84,88,950$ minus Rs. $29,61,189$ suspensions $=\mathrm{Ks} .5 \overline{5}, 27,761$ ), ${ }^{\bullet}$ was Rs. $53,07,961$ or $96^{\circ} 02$ per cent. as compared with 96.28 per cent. during the previous year.

## CENTRAL DIVISION.

Out of the total revenue for collection a sum of Rs. 95,24, 477 was collected.

The total of the revenue collected on account of the year under report and on account of the outstandings of previous years nearly reached the figure of the yearly demand in Khándesh only. In Ahmednagar and Poona the collections are nearly half the demand, and in the other three districts two-thirds nearly, but in view of the poor season through which the division passed the collections seem to be fair on the whole.

## SOUTHERN DIVISION.

Out of Rs. 79,54,882 for collection for the year under report and Rs. 2,51,448 for previous years, as stated in paragraph 9, Rs. 77,42,438 and Rs. 72,753 or $97 \cdot 3$ and $28 \cdot 9$ per cent. respectively were collected. The percentages of collection by districts over the amounts for collection are -
For curreat year.
Columns $19-27$ and 24.

| Belgaum | -* | - 0 | 94-2 | 34. |
| :---: | :---: | :---: | :---: | :---: |
| Bijápur | . 0 | ... | 95.0) | 44 |
| Dharwar | ... | ... | 97-9 | 72 |
| Kánara | ... | ** | $99 \cdot 5$ | 65 |
| Kolába | ... | ... | $99 \cdot 9$ | 90 |
| Ratnagiri | -•• | ... | 97.0 | 6 |

The small percentages of Ratnágiri for current and previous years are due to arrears of khoti villages under attachment that are liable to lapse to Government after 12 years being shown in the demand for collection.

## 11. Balance.

## (Columns 27-30 of Appendix I and Appendix II.)

## NORTHERN DIVISION.

A large balance of Rs. $40,96,488$ was outstanding at the close of the year, of which Rs. $31,90,989$ (inclusive of Rs. 29,61,189 suspensions) were on account of the year under report and Rs. $9,15,499$ on account of previous years. The prospects of recovery of this amount are exhibited in Appendix II in which Re. $28,18,595$ are shown as recoverable, Rs. 12,30,164 as irrecoverable, and Rs. 47,729 as an amount the recovery of which is uncertain. Of the amount shown as irrecoverable, Kaira is responsible for three-fourths. Next comes Surat. The circumstances of the Kaira District have been reported to Goverument, and in Government Resolution No. 393, dated 16th January 1906, Revenue Department, some of the long-standing arrears of which there is no prospect of collecting have been ordered to be written off.

Out of the outstanding of Rs. $31,80,989$ belonging to the year under report Rs. 29,61,189 were authorized suspenions. Thus out of the amount set down for collection during the year, Rs. 2,19,800 remained uncollected and constituted unauthorized arrears. Kaira alone contributes more than half of this amount. The rest is shared by Ahmedabad, Thána, Broach and the Pancl Mahals, and is attributable to the unfavourableness of the season. Notwithstanding liberal suspensions and remissions which amounted to about two-thirds of the demand, the heavy unauthorized arrears at the end of the year in the

Kaira District do not seem to be justifiable, except in the Mátar Táluka where famine conditions prevailed and famine works were opened. Surat is the only district which has no unauthorized arrears.

## CENTRAL DIVISION.

Appendix No. II shows the amount of balances that remained outstanding on the 1st August 1905. Of the balances for collection, viz., Rs. 34,42,844, about 23 per cent. only are estimated to be irrecoverable. The Commissioner thinks it desirable that, if and when the present press of work admits of it, prompt steps should be taken to write off all that is really irrecoverable. Perhaps an opportunity might be taken to forfeit and re-grant a good deal of land on restricted tenure. As regards, however, the suspended arrears some of these will, whether reported as recoverable or not, be liable for remission under the new rules; some have already been remitted.

## SOUTHERN DIVISION.

The outstanding balances of land revenue on account of the year under report and on account of previous years amounted to Rs. 9,38,981 (columns 27, 28 of Appendis I) and Rs. 1,78,695 (column 29 of Appendix I) or 10.8 and 71 per cent. respectively of the amounts of demand as shown in columns 19 and 22 of Appendis I. Out of the 10.8 per cent. 8.3 per cent. represents the amount suspended and 2.5 per cent. was unrecovered. The prospects of recovery of the total balanee of Rs. 11,17,676 are shown in Appendix II, the amount which can be recovered being estimated at Rs. $8,85,369$, the amount irrecoverable at Rs. $1,41,749$, and the amount as to which it is doubtful whether it will be recovered or not at Rs. 90,558 .

Looking to the character of the season of 1905-1906 it is doubtful whether the amount of Rs. $8,85,369$ expected to be recovered will be wholly recovered. The uncertainty of recovering R.s. 90,558 will also be increased.

As to the amounts shown as irrecoverable in column 7 of Appendix II that against Belgaum (Rs. 9,472) and a large portion of that (Rs. 61,657) shown against Bijápur have been remitted already though not brought to account during the year under report. The large amount of Rs. 53,530 shown against Ratnagiri represents the expenses of management of khoti villages which have lapsed to Government and are to be written off after formal sanction.

## 12. Takavi Advances, Recoveries and Balances.

## (Appendix III.)

## NORTHERN DIVISION.

Details of advances under Acts XIX of 1883 and XII of 1884 are given in Appendix III. The total advances made under the two Acts amounted to Rs. 1,05,870 and Rs. 7,71,417 respectively against Rs. 46,221 and Rs. 1,52,376 in the preceding year, showing a total increase of Rs. 6,78,690"under both Acts, the increase under the Agriculturists' Loans Act being much larger. The increase is due to the unfavourable season and the consequent necessity to help needy rayats. The advances under the Land Improvement Loans Act were all made for the construction of wells and inprovements of land. Those under the Agriculturists' Loaus Act were given for the purchase of seed, cattle and fodder and for assisting cultivators in rebuilding thẹir houses destrojed by fire.

Including the unrecovered balances of advances made in past years the total amount outstanding under both the Acts was Rs. 44,61,322. Out of this Rs. 4,95,718 were due in the jear under report, and Rs. 19,78,748 were arrears of past years. Of the former amount Rs. 1,24,340 were collected and Rs, 503 were written off as irrecoverable; of the latter amount Rs. 1,83,327 were collected and Rs, 5,747 were written off.

The percentage of collection on demand in the year under report was as given below:-

|  |  |  |  | 1883. | 1885. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Abmedabad | ... | ... | ... | ${ }^{6} \cdot 38$ | $5 \cdot 02$ |
| Kaira | ... | ... | ... | 3.52 | 3.20 |
| Panch Mahals | ... | . | ... | 39.55 | 28.19 |
| Broach | ... | ... | ... | 12.77 | $11 \cdot 77$ |
| Surat | ... | $\cdots$ | ... | $51 \cdot 39$ | 34.13 |
| Thána | ... | ... | $\cdots$ | 76.89 | 80.70 |
| Division | ... | ... | ... | 18.46 | $11 \cdot 11$ |

This compares unfavourably with the preceding year which showed 35 and 46 per cent. for the two Acts respectively, but the season was unfavourable and necessitated the grant of suspensions and remissions of land revenue in every district.

The information required by paragraph 5 of the Government of India's letter No. 2155-321-7, dated the 3rd October 1901, regarding the net financial results to the State of its agricultural loans business during the year under report and each of the preceding five years is given below:-

CENTRAL DIVISION.
The total amount advanced as takávi during the year under report was Rs. $5,51,970$, of which Rs. 2,41,548 were given to land-holders for the improvement of their lands and for the construction of wells; the remainder Rs. 3,10,422 was distributed for the purchase of seed and cattle.

The percentage of collections on demand in the year under report was as given below:-

| Ahmednagar | ... | : |  |  |  | $\mathrm{Ac}_{1834 .}^{\mathrm{sct} \mathrm{XII}}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | ... | ... | $4 \cdot 3$ | $3 \cdot 6$ |
|  | ... |  | ... | -.. | $63 \cdot 6$ | $31 \cdot 8$ |
| Násil | ... |  | ... | ... | $25 \cdot 6$ | $22 \cdot 1$ |
| Poona | ... |  | $\cdots$ | ... | 11.7 | 8.8 |
| Sétara | ... |  | $\ldots$ | $\ldots$ | 16.4 | $9 \cdot 1$ |
| Sholapur | ... |  | ... | ... | 17.2. | 11.8 |
| Division | ... |  | ... | ... | 13.8, | 10.3 |

Government Resolution, Financial Department, No. 1941, dated the 6th June 1905, directed that tagai instalments which could not be recovered should be formally postponed. If this has been done and corrections have been made in the accounts the percentage of collections should not have been so low. Presumably, höwever, amounts so postponed have been included among instalments due in the year under report. The attention of the Collectors will be drawn to the matter.

A small sum in Ahmednagar is reported to have been appropriated to purposes other than those for which advances were made and a small sum in Sholapur is reported to have been not yet utilized. It is probable that the information in these matters is incomplete.

The following statement shows the net financial results to the State of its agricultural loans business during the year under report and each of the five preceding years:-

| Y ${ }^{\text {ara }}$ | Total amount of advances mado. |  | Total recovories made. |  | Interest recovered. |  | Amounts written off. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { Act XIX } \\ \text { of } \\ 1883 . \end{gathered}$ | $\begin{gathered} \text { Act XII } \\ \text { of } \\ 1884 . \end{gathered}$ | $\begin{gathered} \text { Act XIX } \\ \text { of } \\ 1883 . \end{gathered}$ | $\begin{gathered} \text { Act XII } \\ \text { of } \\ 1884 . \end{gathered}$ | $\begin{gathered} \text { Act XIX } \\ \text { of } \\ 1883 . \end{gathered}$ | Act XII of 1884. | $\begin{gathered} \text { Act XIX } \\ \text { of } \\ 1883 . \end{gathered}$ | $\begin{gathered} \text { Act XII } \\ \text { of } \\ 188.4 . \end{gathered}$ |
|  | R8, | Rs. | Rs. | R. | Rs. | Rs. | Rs, | Rs. |
| - 1st Angust 1899 .. | 20,01,507 | 3,41,619 |  |  |  |  | ... |  |
| $1890 \cdot 1900$... ... | 15,07,330 | 23,40,747 | 1,72,979 | 64,463 | 3i, 817 | 3,648 |  | 558 |
| 1900-1901 ... | 5,49,714 | 23,49,146 | 2,50,549 | 2,56,912 | 42,261 | 3,347 | 224 | 3,817 |
| 1901-1902 | 4,12,445 | 12,46,902 | 2,81,249 | 7,37,720 | 65,520 | 7,922 | 257 | 1,31,655 |
| 1902-1903 ... ... | 2,08,173 | 7,24,136 | 4,36,687 | 11,35,223 | 83,394 | 28,199 | 4,753 | 9,40,249 |
| 1908-1904 | - 89,218 | 1,88,845 | 5,82,743 | 10,23,444 | 1,09,518 | 36,883 | 24,756 | 2,89,584 |
| 1904-1905 | 2,41,548 | 3,10,422 | 2,50,612 | 2,53,483 | 49,468 | 12,029 | 1,819 | 3,12,551 |
| Total ... | 50,09,965 | 75,01,717 | 19,74,719 | 34,70,645 | 3,76,008 | 92,078 | 31,800 | 16,88,422 |

It will appear from the above table that while the business under the Improvement Act has left some profit to the State that under the Agriculturists' Loans Act has so far produced a heavy loss.

## SOUTHERN DIVISION.

The total amount advanced as takávi during the year under report was Rs. $\mathbf{3 , 0 2 , 2 9 4}$ (column 6), of which Rs. 2,09,230 was given for land improvement and Rs. 93,064 for the purchase of seed and cattle. The corresponding figures for the previous year were respectively Rs. $2,51,993$ and 76,834 .

The bulk of the amount advanced under the Land Improvement Loans Act, viz., Rs. 2,02,950, was spent in the Belgaum, Bijapur and Dhárwár Districts.

The opening balance of outstandings (column 11) was Rs. $39,88,443$, the advances during the year were Rs. $3,02,294$, and the collections and remissions Rs. $5,55,605$ and Rs. 59,283 respectively. The closing balance which was Rs. $36,75,849$ was thus reduced by about three lákhs. The amount collected, however, bears a small ratio to the amount due for recovery. The result of the division taken as a whole is as shown below :-

| On account of past years On account of current year | Duo for recovery (colamns 8 and $9+4$ ) |  | Collections mins 12 and | Percent age. |
| :---: | :---: | :---: | :---: | :---: |
|  | . 0 | 16,72,386 | 3,17,172 | 19 |
|  | ... | 5,49,044 | 2,23,755 | 41 |
|  |  | 22,21,430 | 5,40,927 | 24 |

The details under the two Acts and for the different districts are as given below:-

|  | Act XIX of 1883. |  | Act XII of 188\%. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Preriong | Current yar'b demand. | Previous arrears, | Carrent year?s deunand. |
|  | - Percentages of |  | f collection. |  |
| Belgaum ... Affected tálukás of Athni, | 4 | 4.5 | 12 | 12 |
| The rest of the district ... | 29 | 54. | 44 | 69 |
| The affected district of Bijigur $\quad \ldots$ | ${ }_{26} 2$ | 29 | 24 | 6 |
| Dhárwar ... Affected táluka of Naval- | 26 | 20 | 23 | 9 |
| The rest of the district ... | 76 | 86 | 76 |  |
| Coast Districts of Kánara, Kolába and Ratnágiri. | 53 | 87 | 72 | 70 |

If the amount of arrears bad been reduced as suggested by Government at the close of paragraph 4 of Government Resolution No. 80 of 6 th January 1905, reviewing the revenue settlement report of 1902-1903, the percentage of collection
would necessarily have been much larger. The Commissioner has issued necessary instructions under the above resolution (vide Government Resolution, Financial Department, No. 2405, dated 20th July 1905), and Government have issued clear instructions in Government Resolutions (Financial Department) Nos. 2738 of 16th August 1905 and 4279 of 14th December 1905 to order suspensions. The Collectors will be asked to bring Government orders into force and adjust the accounts accordingly.

The outstandings at the close of the year under report on account of instale ments under the Agriculturists' Loans Act due in 1904-1905 and previous years amount to a little over Rs. 43,000 and $4,87,000$ respectively. In view of the successive bad seasons for several years past there is no doubt that a portion of these amounts will have to be remitted or written off. In view, however, of the conditions of the coast districts which were more or less normal during the past years and also of the parts of the Belgaum and Dharwár Districts which did not suffer from famine, the progress made in the collection of the advances cannot, in the absence of explanation, be said to be satisfactory. This is especially the case in the following talukás for which the demands and collections were as shown below:-

The following statement'exhibits the net financial results to the State of its agricultural lonns business during the year 1904-1905 and each of the five
preceding years:preceding years:-

## 13. Areas. <br> (Appendix IV.) <br> NORTHERN DIVISION.

The distribution of area of Government land and alienated land under the several heads "Assessed" and " Unoccupied" is shown in Jamábandi Return No. V. The area of Government and alienated land under occupation during the year under report was $5,642,608$ acres (column 12) against 5,629,179 acres of the preceding year, showing a net increase of 13,429 acres.

The variations which result in this net increase are as given below :-

There is an increase in all the districts of the division except Surat and Thána. In Ahmedabad, Kaira, the Panch Maháls and Broach the increase was due to unoccupied land having been taken up for cultivation. In Kaira it was also due to restoration of forfeited occupancies and in the Panch Maháls to unassessed land being brought under the plough and assessed. The decrease in Surat and Thána is due to forfeiture of occupancies for non-payment of land revenue.

## CENTRAL DIVISION.

Appendix No. IV shows the distribution of land according to use in each of the six districts. A comparison of the cultivable occupied area. (column 12) in 1904-1905 with the corresponding area for the previous year shows an increase of $1,26,197$ acres. Khándesh alone shows au increase due to revision survey. As regards the remaining five districts there is a decrease due to transfer of land to public purposes in Sholápur and to forfeitures in the other four districts.

SOUTHERN DIVISION.
The area of occupied assessed land ( $1,05,91,612$ acres) is less than the corresponding figure for the previous year by 1,056 acres.

Large areas of occupied land, viz, about 2,900 acres in Belgaum, 4,6C0 acres in Dhárwar and 2,100 acres in Kánara, were either relinquished by the occupants or declared forfeited for default in paying Government revenue. This occurred ohiefly in the Belgaum, Sampgron and Khanápur Tálukás of Belgaum, the Dhárwár and Kalghatgi Tálukás of Dhárwár and the Haliyál Táluka of Kánara. The area of unoccupied land taken up for cultivation was small. T'here has been gross increase in the area of occupied land. But this was nominal, being due to the survey of inám villages in the Belgaum and Dhárwir and correction of survey records in the Ratnágiri Districts.

The throwing up of large areas of land and forfeitures of the same are mainly in the area where the climate is malarious and consequent diminution of the population oring to malarious fevers and plague.

Practically very little land was thrown up in the open country (desh) in spite of the scarcity due to the failure of crops on a large scale. On the contrary some 2,500 acres of land were newly taken up for cultivation in the Bijápur District.

## 14. Holdings.

## (Appendix V.) NORTHERN DIVISION.

Appendix No. $V$ shows the number and extent of Government holdings and those held in inám in perpetuity or for life or lives in survejed Government rayatwári villages including the Narvádári and Bhágdári villages of the Kaira, Broach and Surat Districts.

The following figures show the contrast between the number of holdings in the year under report and that for the preceding year:-

|  |  |  | Government holdinge | Inam holdings continuable in perpetuity. | Inám holdings held for life or lives. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1904-1905 | ..' | .." | 299,882 | 113.293 | 3 |
| 1903-1904 | ... | ... | 299,271 | 112,308 | 3 |
| Increabe | ... | ** | 611 | 985 | ...... |

The increase in the number of Government and alienated holdings is due to the restoration of forfeited lands and the taking up of unoccupied and unassessed land. The increase is most in the Kaira District.

## CENTRAL DIVISION.

Appendix No. V shows the number and extent of Government and alienated holdings in surveyed Government rayatwari villages. As compared with the previous year's figures there was in 1904-1905 a net increase of 4,487 in the number of Government holdings and also of 825 in that of alienated holdings held in perpetuity, while there was a decrease of 9 in the number of alienated holdings held for life or lives. The fluctuations are mainly due to the usual causes, vis., transfer, occupation of new lands, etc., and introduction of survey in outbandi villages in the Khándesh district.

SOUTHERN DIVISION.
The variations in the holdings are as shown below :-

|  |  |  | Goverament holdings. | Inám holdings continnsble in perpetuity. | Inám boldings held for life or livea. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{aligned} & 1904-1905 \\ & 1903-1904 \end{aligned}$ | $\cdots$ | $\cdots$ | -3,20.072 | 51,052 | 26 |
|  |  |  | 3,18,535 | 51,419 | 26 |
|  |  |  | $\begin{array}{r} 1,537 \\ \text { (Increase) } \end{array}$ | $\begin{gathered} 367 \\ \text { (Decrease) } \end{gathered}$ | „..... |

The variations of any importance in the number of Government holdings are in Belgaum, Dluarwár, Kolába and Ratnágiri. In the first two districts there was a decrease of 257 and 432 , due chiefly to relinquishments and forfeitures of land. In the Kolába and Ratnágiri Districts there was an increase of 1,494 and 608 respeatively, in Kolába owing to the correction of wrong figures supplied by the Mahad Taluka last year and in Ratnágiri owing to the lapse of khoti villages to Government.

в 221-5

The decrease in the number of alienated holdings continuable in perpetuity has mainly occurred in the Belgaum District and is ascribed to the absorption of the smaller holdings into the larger ones.

## 15. Non-rayatwari Holdings.

## (Appendix VI.) <br> NORTHERN DIVISION.

Appendix No. VI shows the number and extent of villages and estates held on tenures other than rayatwári and of unsurveyed Government villages. No change has taken place in the number of estates and that of holders as compared with the preceding year. The increase in the area of holdings is due to correction of mistakes in the tálukdári villages of Shivrájpur and Dabba of the Kálol Táluka in the Panch Mahals. The decrease in the revenue is due to the reduction of jama in certain tálukdári villages of the Viramgám and Dhandhuka Tálukás of the Ahmedabad District.

CENTRAL DIVISION.
Appendix No. VI relates to estates and villages held on tenures other than ' rayatwári. There was a decrease of 39 villages and 55 holders out of the Udhad jamabándi tenure in the Khándesh District owing to the introduction of original survey in those villages.

## SOUTHERN DIVISION.

The following figures show the variations in the year under report:-

|  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | ---: | ---: | ---: |
| $1904-1905$ | $\ldots$ | $\ldots$ | $\ldots$ | Column 3, No. of <br> holdings. | Column 6, Area. | Colnmn 7, Govern. <br> ment rovenve. |
| $1903-1904$ | $\ldots$ | $\ldots$ | $\ldots$ | 4,605 | $38,66,749$ | $11,83,590$ |
|  |  | $\ldots, 467$ | $38,82,904$ | $12,00,421$ |  |  |

The increase in the number of holdings is due to the partition of khoti estates in the Ratnágiri District and the decrease in the area and reveuue is due to the lapse of the khoti and inám villages in the same district.

## 16. Average Incidence of Land Revenue. <br> (Appendix VII.) NORTHERN DIVISION.

Appendix No. VII gives the average incidence of land revenue and assessment per head of population and per acre respectively. The figures representing incidence of land revenue per head of population in the surveyed Government rayatwári villages are given below :-

|  |  |  |  | Rs. a. p. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Ahmedabad |  | ... | ... | ... |  | 0 |
| Kaira ... | $\ldots$ | ... | ... | -.. |  | 511 |
| Panch Maháls | ... | ... | ... | ... |  | 3 |
| Broach | ... | ... | ... | ... |  | 1 |
| Surat | ... | ... | ... | ... |  | 11 |
| Thána ... |  |  |  |  |  | 0 |

The incidence has decreased in all the districts of the division except the Panch Maháls where it has slightly risen from Re. 1-5-0 to Re. 1-5-3. The decrease is due chiefly to the large amount of remissions granted as shown in paragraph 7.

In surveyed alienated villages the incidence per head of population varied from Re, 0-1-7 in Kaira to Rs. 3-1-5 in Surat.

## CENTRAL DIVISION.

Appendis No. VII shows the average incidence of land revenue per head of population (column 15) and per acre of fully assessed area (column 19). There are insignificant decreases of 5 pies in the incidence per head of population (column 15) and of 6 pies in the incidence (column 20) of land revenue on the net cropped area.

## SOUTHERN DIVISTON.

There is practically no variation except in the incidence of land revenue on net cropped Government occupied land which was Re. 1-9-4 per acre in the year under report against Re. 1-8-0 in the preceding year. The increase in the incidence is due to considerable areas of land having been left unsown owing to deficient rainfall. But this comparison is not worth much, as the increase of net cropped area does not always mean a good outturn nor does the decrease of such area mean a poor outturn.

## 17. Coercive Processes.

## (Appendix VIII.)

## NORTHERN DIVISION.

Appendix No. VIII shows in details the extent of coercion employed in eaoh district of the division for the recovery of arrears of land revenue.

The number of notices issued and the amount of arrears for which they were issued were 28,701 and Ks. $5,31,248$ against 97,024 and Rs. 15,64,744 respectively in 1903-1904. The number has considerably decreased, being 6.95 per cent. of the holdings compared with $23 \cdot 57$ in the preceding year. There is a marked decrease in all the districts of the division.

Penalty under section 148 of the Land Revenue Code was levied in 308 cases, of which Surat alone contributed 216, but the Collector reports that it was due to contumacy on the part of cultivators well able to pay Government dues. As compared with the preceding year this form of coercion was less resorted to in Kaira, Panch Maháls, Broach and Thána during the year under report. The slight increase in Almedabad calls for no remarks. Looking to the liberal grant of remissions and suspensions and the large amount of unauthorized arrears in some portions of the division there would appear to be unnecessary caution in resorting to coercive processes when the defaulter is really able to pay Government dues, which is likely to encourage contumacy.

The number of cases of distraint of moveable property has considerably decreased in all the districts of the division except Broach and Surat where the increase was from 24 to 105 and 27 to 167 respectively. In Broach the total amount realised by sales was only about $1 / 6$ th of the amount of arrears for which distraints and sales had been ordered. In Thána it was $1 / 4$ th.

There were only five cases (two in Ahmedabad and three in Broach) of distraint of immoveable property other than the land for which land revenue was due.

Forfeiture of occupancies decreased on the whole. In Ahmedabad the decrense was striking, the number falling from 2,183 to 261 , while there was a slight increase in Broach, and the reason assigned is the contumacy of the people. The decrease in other districts calls for no remarks.

Arrests under section 157, Land Revenue Code, were made in Broach, Surat and Thána. In Broach 12 persons were arrested, of whom 9 were released after a detention of 3 to 19 days and they all paid up the arrears due. The remaining three were sent to the Civil jail at Surat. In Surat four arrests were made. None of these had to be sent to the Civil jail and the amount of arrears was paid after a detention of only a fer hours. In Thána there were three arrests: two paid up the arrears after going to the Civil jail; the third had to be released after the expiry of six months and the arrears (Rs. 86) could not be recovered. The man is reported to be notorious for contumacy.

## CENTRAL DIVISION.

Appendix No. VIII shows the extent of coercive processes adopted for the realization of land revenue. The number of notices of forfeiture (column 16) in the Khándesh District was the largest. The extent of land forfeited was the largest in the Nasik District during the year under report as in the previous year.

A comparison of the figures in column 16 with column 17 shows that in the districts of Ahmednagar, Kbándesh, Násik and Poona issue of notices of proposed forfeiture of the occupancy was sufficient in the majorily of cases to procure the payment of the sums due.

No recourse seems to have been had to section 148 in Abmednagar, apparently owing to the bad season.

## SOU'THERN DIVISION.

The number of notices issued under section 152 and of those served were 18,659 and 18,228 against 23,167 and 23,058 respectively in the preceding year. The Commissioner doubts if the figures representing the number of notices served are correct, inasmuch as they bear almost a cent. per cent. ratio to the number of notices issued. The reduction in the issue of notices is most marked in Belgaum, Bijápur and Ratnágiri. In Kolába there is a slight decrease, but still the number is very large, about 7,800, and it is doubtful whether the principle that notices need not be issued in cases where it is not proposed to employ compulsory process is at all observed in this district. This large number of notices, combined with the fact that there were 706 notices under section 153 while forfeiture was actually declared in only 60 cases, shoms laxity on the part of village and táluka officers in making collections at the times fixed. In Dhárwár there is an increase in the number of notices issued, which was 3,748 against 3,334 in the preceding year. This increase has not been explained by the Collector.

The amount of penalty imposed under section 148 in Kinara (Rs. 753) is as in the previous year much larger (rather more than double) than the amount for all the other five districts put together (Rs, 370), whereas in Kolába where the number of notices was the largest the amount of penalty imposed under section 148 was only Rs. 10. This shows that the provisions of section 148 were strictly enforced in Kánara, while in Kolába there was laxity.

Distraints of moveable property were resorted to, as also declaration of forfeitures, more largely in the year under report than in the preceding year.

In Belgaum there was only one case of distraint of moveable property, and
 in Dhárwár only 5, while in Bijápur there were as many as 79. Looking to the unsuspended arrears (columns $28+29$ of Appendix I) in the three aistricts, as noted in the margin, the Commissioner is inclined to think that in Belgaum at least the compulsory process used was much milder than was necessary for collection.

The causes of forfeiture have been explained in paragraph 5. The figures for Dhárwár in columns 16 and 17 of Appendix VIII show that in all of the 504 cuses in which notices were issued under section 153 forfeiture was declared.

## 18. Miscellaneous Land Revenue not included in the Taleband. NORTHERN DIVISION.

Miscellaneous land revenue not included in the taleband, such as "Recordroom receipts," "Proceeds of sales of useless articles," "Revenue fines," etc., as shown in column 31 of Appendix I, amounted to Rs. 11,864 in the year under report against Rs. 11,913 in the previous year. The items are fluctuating and call for no remarks.

Rs. 24,887, were received on account of interest. Of this Rs. 85 were on account of interest on revenue from lands held under leases and the remainder on account of interest on tagavi advances. 'I'he decrease of Rs. 61,628 in tagavi interest as compared with the previous year is due to a corresponding decrease in the collection of tagávi instalments during the year.

The details of assessed and unassessed land given out for babul plantation in the Ahmedabad, Kaira and Surat Districts are as under :-

Acres.
Land under plantation at the beginning of the 2,716 besides unmeasured bhátha year in Daskroi, Dholka, Sunand and Chikhli. land of the Khari at Jhanu and Bhuvaldi.

```
Adl-
    Land given out in the year under report in three
        4 7 5
        villages of the Nariad Taluka.
                                Total 3,191

                                    and Bhuvaldi.
```

The sale of trees on land, the leases of which have expired, is still in progress. 3:31 acres at Santhál in the Dholka Táluka of Ahmedabad leased for five years brought in a revenue of Rs. 5,600-13-0 to Government. No waste land was given for bibul plantation during the year under report in any other district except Kaira.

## CENTRAL DIVISION.

A comparison of the figures in column 31 of Appendix I shows that there was a net decrease of Rs. 7,829 under this head. Khándesh alone contributed largely to this decrease, and Ahmednagar to a small amount, while there was an increase in all the remaining four districts.

## SOUTHERN DIVISION.

Miscellaneous revenue not iucluded in taleband such as "Record-room receipts," "Proceeds of sale of useless articles," "Revenue fines," etc., as shown in column 31 of Appendix I amounted to Rs. 17,399 in the year under report against Rs. 20,692 in the preceding year. The items are fluctuating, and the variations therefore need no explanation.

A sum of Rs. 2,27,517 was received on account of tributes and succession nazarána from jáhágirdárs, of which Rs. 66,932 were received in Belgaum, Rs. 5,282 in Bijápur, and Rs. $1,55,303$ in Dhárwár.

The receipts under the head of interest on takávi advances amounted to Rs. 1,07,002 as detailed in column 16 of Appendix III. Besides these receipts interest to the amount of Rs. 22 and Rs. 11 was levied in Kánara and Ratnágiri respectively on arrears of ábkári revenue.

## 19. Refunds.

## NORTHERN DIVISION.

Refunds amounting to Rs. 10,951 were made during the year under report The figures by districts are as under:-

Most of these refunds were due to over-collections.and to the refund of deposits paid at auction sales which were not confirmed.

B 221-6

## LAND REVENUE ADMINISTRATION REPORT, PART I, SIND.

The following is the report for the year 1504-05 of Sind. The usual Appendices are attached.

## 2.-Season.

The senson was on the whole an unfavourable one. Except for two or three days in June, the river did not reach the minimum irrigational level till the first week of August: from the middle of August began a fall that, except for slight variations, continued uninterrupted up to the end of the season. The rainfall during the hot weather was everywhere scanty. The fall in January was copious, but was follorred by unprecedentedly severe frosts which caused a vast devastation among the rabi crops. The net result of these unfavourable conditions was a contraction in cultivated area of about 4 lákbs of acres and a decrease in the revenue demand of over 6 lákhs of rupees. Remissions, which last year aggregated to 3 lakhs of rupees, increased this year to over 6 lákhs.

The public health was generally good except for the plague which paid its periodical visit to the town of Karáchi and some towns and villages of the Hyderabad district and broke fresh ground by appearing in the towns of Jacobabad and Kohri in Upper Sind and a few villages of the Lar, the southern parts of the Karíchi district.

Scarcity of fodder was felt in many places and in some mortality among cattle from this cause was reported. Cattle disease is reported only from the Karáchi and Thar and Párkar districts. In the former 23 cases of Charbon Symtomatique, all of which proved fatal, occurred in two tálukas; 173 cases of Pleuro Pueumonia among goats in one tíluka and 13 cases of Glanders in the town of Karáchi. In the latter, 400 cases of Pleuro Pneumonia occurred in one táluka ouly.

## 3.-Gross Revenue.

## (Column 6 of Appendix I.)

The net iucrease of half a lákh under this head is due partly to fluctuations, in consequence of the employment of different modes of irrigation, in the amount of assessment charged on occupied cultivated lands and in the average rute deduced therefrom for the purpose of calculating the assessment on fallow and unoccupied cultivable land and partly to certain areas in the Hyderabad and Thar and Parkar districts which were previously treated as uncultivable having been surveyed and classed as cultivable, the assessment chargeable on them being added under the head 'gross revenues'. The large decrease of $2 \frac{1}{2}$ lákhs in the Lárkána district is mostly due to a smaller area of alluvial land having beon brought under cultivation than in the preceding year owing to the unfavourable inundation.

## 4.-Alienations.

(Column 9 of Appendix I.)
The decrease of about balf a lakh under this head is entirely due to the resumption of jaigirs on the death of the holders.

## 5.-Net Government Revenue. <br> (Column 13 of Appendix I.)

As compared with the figures of the preceding year, there is a decrease under this head of over $6 \frac{1}{2}$ lákbs which is due to the low inundation of the year. The decrease is noticeable in every district, but it is not so heary in the

Hyderabad and Thar and Parkar districts as elsewhere. In these two districts the loss occasioned was practically retrieved by the additional revenue realised on the nery lands given out on the Dad, Nasrat, Jamrao and Hiral canals.

A sum of Rs. 81,000 is included in column 13 of Appendix I on account of hakabo (water rate) on alienated lands in addition to Rs. $1,42,000$ on account of water cess charged on the Jamrao lands. Both these items are credited to the Public Works Department. They show a decrease of Rs. 9,000 and Rs. 13,000 respectively owing, in the case of the former, to decreased cultivation in jágir lands in consequence of the unfavourable inundation and of the latter to a shrinkage of cultivation on the Jamrao not as a result of decreased supply of water, for the Jamrao system is scarcely ever affected by the fluctuation of the inundation, but of the exhaustion of land owing to overwatering. The matter has been fully commented on in the administration report of the Colonization Offcer submitted to Government with the Commissioner's memorandum No. 3656, dated the 25th October 1905, and is under consideration as regards remedial measures to be taken to check further decrease of cultivation.

## 6.-Miscellaneous Government Revenue as in Taleband.

## (Oolumn 16 of Appendix I.)

The increase of Rs. 43,916 under this head is due mostly to increased occupancy fees having been realised in the Thar and Párkar district. The small increases in the Upper Sind Frontier and Lárkána districts are attributed in the former to larger proceeds from unauthorized cultivation and in the latter to increased collections under the head of occupancy fees. Apparently the increase in Lárkana represents fees for land sold in past years, as the realizations from malkano for the current year show a falling off. The decrease in the Karáchi district is due chiefly to the receipts from the sale of plots in the town of Karáchi having fallen from Rs. 4,333 in 1903-04 to Rs. 415 in the year under report. In the remaining two districts the decrease is accounted for by the fact that, owing to want of water, a smaller quantity of land was disposed of than in the previous year.

## 7.-Remissions.

## (Column 20 of Appendix I.)

As remarked in paragraph 2, a much larger amount of revenue was remitted this year than in 1903-04. In addition to the amount given in the Appendix, a sum of close ori Rs. $3 \frac{3}{4}$ lakhs was remitted after the expiry of the year in the Karáchi, Sukkur, Lárkána, Thar and Párkar and Upper Sind Frontier districts, the aggregate amount remitted thus rising to about 10 lakhs against $4 \frac{2}{3}$ lákhs in the previous year. Nearly $2 \frac{1}{2}$ lakks were remitted on account of insufficiency of water, against a little over half a lákh in 1903-04. For the same reason remissions on time-expired fallow numbers forfeited to Government amounted this year to Rs. $1,10,000$ instead of only Rs. 62,000 in the past year, while the almost total failure of crops caused by want of sufficient hot-weather rains necessitated the remission of the whole revenue demand of the desert portion of the Thär and Párkar district and the Kohistan talluka of the Karáchi district, amounting respectively to Rs. 80,000 and Rs. 3,890 . An additional sum of close on 4 lákhs was remitted on account of damage caused to the crops by the unusually severe frosts of January 1905. Remissions due to dammage to crops from locusts and other insects and to loss caused by floods, amounted this year to Rs. 43,000 and Rs. 3,000 respectively against Rs. 24,000 and Rs. 16,000 in 1903-04.

## 8.-Suspensions.

## (Column 33 of Appendix I.)

As explained last year suspensions of the whole or of a portion of the revenue of a tract are seldom granted in Sind. Postponements of recovery
of revenue are granted in individual cases on the applications of the persons concerned. The amounts so postponed for the current year amounted to Rs. $1,20,351$ against Rs. $1,32,994$ in the previous year. As these figures are included in balances outstanding at the end of the year they will be dealt with in paragraph 11 below.

## 9.-Revenue for collection. <br> (Column 21 of Appendix I.)

Thare was naturally a falling off under this head owing to the unfavourable inundation. The heavy remissions reduced the amount for recovery still further, and it finally stood at Rs. 86 lákhs against $95 \frac{1}{2}$ lákhs last year. These figures are inclusive of the remissions which could not be adjusted before the end of the year, and if these remissions are also deducted, the figures stand as Rs. $82 \frac{1}{4}$ lákhs and Rs. $933_{3}^{2}$ lákhs respectively for the two years. Adding the previous years' balances the amount for collection in the year of report was $95 \frac{1}{2}$ lakks against 104 lákhs in 1903-04.

## 10.-Collections.

## (Column 32 of Appendix I.)

The total collections of the current year's revenue amounted to Rs. $77 \frac{3}{3}$ lákbs out of a total demand of 86 lákbs or 90.5 per cent. against 92 per cent. in the previous year. The collections of the previous years' balances do not compare favourably with similar collections made last year, the percentage having decreased from 44 per cent. to 40 per cent. in the year under report. But considering the circumstances of the year it will be conceded that the results are not unsatisfactory. It must be observed that, although under the Sind Revenue system remissions of revenue for failure of crops are freely granted, the actual loss to the Zamindar is considerably larger than is covered by the remission, and consequently cases often arise, especially in, bad years, where the landholders are unable to pay in full the assessment due on lands on which remission is not claimed or is not allowed under the rules. The application of pressure in such cases cannot fail to cause embarrassment to the land-holder concerned, and postpouement of the recovery of the revenue is the only advisable course to take in the circumstances.

Under Government Resolution No. 5420, dated 22nd August 1890, collec-
Statoment A.
tions of land revenue, not including village cess, together with the miscellaneous items not included in the jamábandi, are to be compared with the collections shown in the Accountant General's books. The difference amounts to Rs. 19,894-12-4 and is explained in the statement noted in the margin.

The discrepancies are due principally to errors requiring adjustments in the Hyderabad and Thar and Párkar districts, owing to the collections on account of boundary marks recovered from occupants in the Jamrao tract haviog been excluded from the figures of jamábandi return No. I. Most of the amounts shown as overcollections appertain to the Hyderabad and Karáchi districts.

## 11.-Balances. <br> (Columns 33-36 of Appendix I and Appendix II.)

The total outstanding balances at the close of the year (including previous years' balances) amounted to Rs. 13,91,825 against Rs. 11,81,922 at the end of 1903-04. The amount is no doubt large; but it includes (a) remissions to the estent of Rs. 3,70,586 which could not be adjusted before the close of the year, and (b) a sum of Rs. 1,59,531 representing irrecoverable balances of past and current years which have since been written off. If both these items are deducted, the balance is reduced to Rs. $8,61,708$, of which Rs. $8,48,232$ is recoverable and Rs. 13,476 irrecoverable. The bulk of the latter item belongs to the Sukkur district and the Collector is in correspondence with his subordinates for the purpose of having it written off. Of the former Rs. 59,813 have since been recovered, leaving a net unrecovered balance of Rs. 7,88,419, of which Rs. $3,53,647$ belong to the current year and Rs. $4,04,772$ to past years.

Out of the net balance shown above, (a) a sum of Rs. 2,55,946 is under postponement granted by due authority, (b) Rs. 41,543 are under correspondence for postponemeut, (c) Rs, 1,93,221 are due by the Manager, Incumbered Estates in Sind, (d) Rs. 2,66,220 are in the course of recovery, and (e) Rs. 31,489 are mostly due, on account of occupancy fees, for recovery in future years. Compared with the previous year's figures, under the same heads, all the above heads show a decrease except ( $a$ ); but if ( $a$ ) and ( $b$ ) are combined a decrease is observable here too. The falling off in the amount due by the Manager is due to special efforts made to reduce the balances in pursuance of the remarks made on the administration report of that department for 1903-04, and, considering the state of the year, is most satisfactory. Escluding this item and the amount shown under (e) the remainder is due for the most part in the Karáchi district (Rs. 99,670), Upper Sind Frontier (Rs. 1,56,993), Hyderabad district (Rs. $1,36,271$ ) and Thar and Párkar (Rs. 67,905). The Karáchi district is the poorest in the province and has severely suffered for some years past. The Collector and the Commissioner are of opinion that until the condition of the zamindárs is materially improved no greater severity in collecting revenue should be used than at present. The Deputy Commissioner, Upper Sind Frontier, attributes the heaviness of the arrears in his district in a great measure to contumacy on the part of the land-holders. Many of the defaulters are large land-holders by no means in a condition of poverty. Such men deserve no longer to be treated with leniency, and a firm but judicious application of section 148 of the Land Revenue Code ought to remedy matters. No special cause is assigned for the non-recovery of arrears in the Hyderabad and Thar and Párkar districts. But they do not exceed the normal amount of balances that might be expected in a year such as the one under report, and might be put down to the inability of tha defaulters concerned to pay in consequence of the effects of the bad inundation and the severe frosts.

The above deals with the combined balances of the year of report and those of the past years. Taking the past years' arrears alone, it will be seen that out of the total balance with which the year opened (viz. Rs. 11,81,922) a sum of Rs. $3,89,091$ was collected in the year under report and Rs. $2,19,157$ were written off, leaving a balance at the end of the year 1904-05 of Rs. 5,73,674. Of this Rs. 1,51,333 have been written off and Rs. 5,558 bave been recovered after the close of the year under report, leaving Rs. $4,16,783$, of which again Rs. 12,011 are irrecoverable and likely to be written off soon, the net recoverable balance being thus reduced to Rs. 4,04,772 as shown in the opening portion of this paragraph.

The bulk of the revenue shown above as having been written off belonged to the Karáchi district, where successive jears of misfortune had crippled the resources of the Delta Zamindárs to such an extent that there was absolutely no hope of the recovery of the arrears. The writing off was sanctioned by Mr. Morison under a carefully prepared scheme of Mr. Barrow's.

Taking the adverse conditions of the year into account, Government will, the Commissioner feels confident, agree that more than what has actually been done to wards the collection of the arrears was not possible, except porbaps in the Upper Sind Frontier district, where a little extra pressure might have resulted in the recovery of a few more thousands. Under the Land Revenue Code the current year's revenue constitutes the first charge on the land, and in a year of indifferent inundation, when the outturn of crops is everywhere less than normal, the general experience is that little is left with the ordinary.land-holder, after paying the curreat year's assessment and providing for his own maintenance and the maintenance of his family and cattle, to pay the arrears from. The district officers are, however, fully alive to the subject and, as the year now current bas proved to be a prosperous one, Government may fully expect to find a substantial reduction of arrears, otherwise than by writting off, in the nest report.

As required by Government Resolution No. 5140, dated the 22nd July 1890, previous year's balances, which were shown as recoverable in Appendix II, and which were not recovered during the year under report, have to be separately accounted for. Such balances amounted to Rs. 4,10,330, of which

- Statement B.

Rs. 5,558 were recovered after the close of the year, leaving a balance of Rs. $4,01,772$ as accounted for in a separate statement.*

## 12.-Takávi Advances.

## (Appendix III.)

Appendix III shows the details of takávi advauces. The total amount advanced during the year under report is Rs. 4, 16,894 under the Land Improvement Loans Act and Rs. 2,38,998 under the Agriculturists' Loans Act against Rs. $3,35,860$ and Rs. $2,30,830$ in 1903-04. The increase must be ascribed partly to the extra demand created by the excellent inundation of the current yoar 1905-06, and partly to the bad inundation of the year under report, owing to which the cultivators were probably unable to save up enough seed for the following year's operations. The advances under the Land Improvement Loans Act were all made for the construction of wells, excavation and repairs of karias and bunds, and improvement of land, such as levelling of mounds and clearing of jungle. Those under the Agriculturists' Loans Act were made for the purchase of seed and cattle.

Out of the total amount adranced, including the unrecovered balances of advancos made in past years, viz. Rs. $22,19,060$, a sum of Rs. $4,24,249$ was collected and Rs. 401 were remitted during the y jear. The balance includes an amount of Rs. 12, 12,550 , which does not fall due till 1905-06 and future years. The remainder, Rs. 5,51,860, is composed of Rs. $3,60,803$ on account of arrears from previous years and Rs. $1,91,057$ falling due during the year under report. Of the former a sum of Rs. $1,36,986$ bas been remitted in the Karáchi district after the close of the year for the same reasons as bave been assigned for the writing off of previous years' balances of land revenue (vide paragraph 11 above) and Rs. 9,291 composed partly of the previous years' arrears and partly of the amount recoverable in the year of report have since been recovered. The

## Statement 0.

 marginally noted statement shows how the remaining arrears are accounted for.The remission above referred to has much reduced the large balance which used to appear year after year against the Karáchi district, so that Upper Sind Frontier is now the district which owes the largest amount. The recovery of the balance in full was not of course to be expected in a year of bad inundation; but, having regard to the Deputy Commissioner, Upper Sind Frontier's opinion given in a preceding paragraph, and the opinion held by Mr. Mules and discussed in paragraph 1, Part II, of the Land Revenue Administration Report for Sind, the Commissioner cannot help thinking that, in the Upper Sind Frontier district, at any rate, the accumulation of arrears is due more to contumacy on the part of the borrowers than to real inability on their part to pay. The Deputy Commissioner is being directed to see that, except in really deserving cases, no further postponement of the recorery is allowed.

The information required by paragraph 5 of the Government of Ivdia's letter No. 2155-321-7, dated the 3rd October 1901, regarding the amount of

Statement D. agricultural loan business is embodied in the statement noted in the margin.

## 13.-Area.

## (Appendix IV.)

The comparatively slight clange in the total area requires no explanation. There is again a net decrease in the unassessed area of the province (columns 4 and 5) owing to certain lands, chiefly in the Sukkur and Hyderabad districts, having been broken up into assessed survey numbers and added to the cultivable area (column 10). The increase in the unassessed area in the Upper Sind Frontier, Lárkina, Karáchi and the Thar and Párkar districts is due to the transfer of certain unsurveyed areas, which were temporarily brought under cultivation last year, from column 10 (cultivable assessed) to this head, owing to their not having been cultivated this year for want of water.

The areas taken up and relinquished in each district of the province during the jear under report are shown below:-

B 221-50

| No. | District. | Arens taken up. |  |  | Area thrown up,includingfallowing fallows. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Unoccupied land taken op. | Unaskessed land brought into occurpation and absessind. | Total. |  |
| 1 | 2 | 3 | 4 | 5 | 0 |
| 1234456 | Upper Sind Frontier Sukkur <br> Lárkína <br> Hyderabad Karáchi Thar and Párkar <br> Total for 1904-05 <br> Total for 1903-04 ... | Acres. | Acres. | Acres. | Acres. |
|  |  | 9,251 | 817 | 10,069 | 653 |
|  |  | 11,779 | 202 | 11,981 | 420 |
|  |  | 3,687 | 103 | 3,799. | 95 |
|  |  | 33,937 | 2S,240 | 62,177 | 4,4:0 |
|  |  | 5,932 | 1,619 | 7,551 | 5 |
|  |  | 54,855 | 962 | 55,817 | 6,687 |
|  |  | 119,441 | 31,943 | 151,351 | 12,320 |
|  |  | 217,318 | 10,507 | 227,885 | 12,202 |

Owing to the inundation having been poor, the demand for land was naturally less keen than in the previous year, and the area taken up has therefore fallen short of the previous year's figure almost everywhere, in spite of the fact that there was an increase in the allotments made on the canals in the jurisdiction of the Colonization Officer, Jamráo Canal. A small increase is observable in the Sukkur district, and is due to new lands having been taken up on the Mahiwab during the year under report. The area shown in column 6 as thrown up in the Hyderabad and Thar and Parkar districts is chiefly composed of land relinquished by occupants on the Hiral, Dad and Nasrat Canals, with a view to their being brought under the square survey system. In the Upper Sind Frontier and Karachi districts there is a decrease in the relinquished area, owing to the fact that in consequence of the bad inundation of the year, there was a limited scope for the operation of the rule by which new lands in those districts are granted on the relinquishment of old occupancies. The decrease in the Sukkur and Lárkána districts is nominal and calls for no remark.

The information required by Government Resolution No. 8294, dated 20th November 1899, is given in the subjoined table :-

| District. | Area of land granted free. | Land granted on payment of malknio. |  | Lard sold by auction. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Area | Annount obtained. | Area, | Amount obtaiued. |
|  | Acres. | Acres. | Rs. | Acres. | Rs. |
| Upper Sind Frontier | 7,349 | 2,055 | 3,525 | ... | ... |
| Sukkur ... | 1,811 | 9,376 | 29,742 | ... | ... |
| Lárkína ... | 2,828 | 897 | 2,191 | 65 | 800 |
| Hyderabad ... | 18,605 | 25,015 | 67,543 | 409 | 1,8:0 |
| Karáchi | 2,613 | 2,996 | 6,655 | 1,141 | 6,165 |
| Thar and Párkar | 12,063 | 43,269 | 1,92,224 | 487 | 10,028 |
| Total | 45,269 | 83,608 | 3,01,880 | 2,102 | 18,813 |

The difference, 20,405 acres, observable between the total of the areas shown in this statement and the total given in column 5 of the preceding statement is due to the inclusion, in the latter, of fallow forfeited and relinquished lands restored to the original occupauts on payment of arrears or otherwise.

Free grants preponderate again in the Hyderabad, Thar and Párkar and Upper Sind Frontier districts. In the two former districts they mostly comprise, as in last year, (1) areas returned, after resurvey on the square system, to the original occupants who had relinquished them for the purpose, and (2) areas given out on condition of importing foreign cultivators. Most of the land granted free in the Upper Sind Frontier district was given on restricted tenure.

The proceeds from malkano have increased, although there is a decrease in the area given out on payment of occupancy price. This zesult is mainly due to lands on the new canals (Jamrao, Hiral, and Nasrat) in the Hyderabad and Thar and Parkar districts having realised larger prices than in the preceding year.

## 14.-Holdings and their extent.

## (Appendix V.) $_{\text {. }}$

The decrease in the number of khalsa holdings is contributed by the Karáchi and Lárkána districts, and is principally due to a reduction in temporary holdings (khas, mokal and unauthorised) in consequence of the unfavourable inundation. The increase in the number of inam holdings in perpetuity occurs in the Hyderabad and Tbar and Párkar districts, and is due in the case of the Hyderabad district to the inclusion in this return of certain garden grants which being previously situated in alienated villages used to be shown in Appendix VI, but which, owing to the jaghir concerned having now become Government, have this year been transferred to Appendix V. In the case of the Thar and Párkar district the increase is due to certain alienations, which have hitherto been inadvertently included in Appendix VI, having this year been shown under their proper head. The decrease in the number of holdings for life is due to lapses.

## 15.-Non-rayatwari Tenures.

## (Appendix VI.)

The decrease in the number of holdings shown in this appendix is due to the reasons given in the preceding paragraph as accounting for the increase in the number of iaám holding in Government villages.

## 16.-Average Incidence of Land Revenue. <br> (Appendix VII.)

The average incidence of land revenue per head of population and per acre bas fallen under almost all the heads (columns 19, 31 and 36 ), owing to the unfavourable inundation of the year. The small increase of 2 pies in the incidence of land revenue per acre on cultivated area (column 32) is due to ordinary fluctuations.

## 17.- Coercive Processes. <br> (Appendix VIII.)

There is a decrease in the number of notices issued, everywhere except in the Upper Sind Frontier district. The increase in this district is ascribed by the Deputy Commissioner to the failure to pay land revenue on the prescribed dates, owing to the prevalence of plague at Jacobabad, that being the only táluka in which there is an increase. Among the more severe forms of processes, penalties under section 148, Land Revenue Code, and forfeitures were resorted to in a much larger number of cases this year than in 1903-04. The increase in the former is confined to the Larkána sub-division of the Larkána district where the Commissioner is satisfied the circumstances quite justified the adoption of this measure. The fact is that the provisions of section 148 of the Land Rerenue Code have never been used in this province except in the case of a small percentage of the really contumacious khátedárs. A reference to Appendix VIII of the previous reports will show that in the Lower Sind Districts they are practically unknown except for a solitary case or two appearing against the Karichi district. The subject has been discussed in paragraph 1 of Part II of the Land Revenue Admiaistration Report submitted by Mr. Morison, in whose views the present Commissioner entirely concurs, and orders in accordance therewith wore issued by him in November last.

A very great majority of the forfeitures are nominal, having been resorted to in the operation of the Sind fallow rules.

## 18. -Miscellaneous Revenue not included in the Taleband.

The revenue under this head increased from Rs. 38,282 in 1903-04 to Rs. 42,118 in the year under report. The increase is mostly due to the receipts from interest on loans made under Acts XIX of 1883 and XII of 1834 having
risen from Rs, 37,278 to Rs. 41,681 . risen from Rs. 37,278 to Rs. 41,681 .

## Ansual Reports.

Land Revenue, Administration Report, Part I, of the Bombay Presidency, inclading Sind, for the year $2904-05$.

No. 10001.

## Revenue Departyent.

Bombay Castle, 22ad October 1906.
Letter from the Accountant General, No. A.c.-6949, dated 20th February 1906-Submitting, with reference to paragraph 6 of Government Resolution No. 2420, dated 8th April 1908, a statement showing for the revenue year 1904-05 the interest due at $3 \frac{1}{2}$ per cent. on the total monthly outstanding balances of takavi adrances for the whole Presidency as compared with the interest actually received.
Letter from the Commissioner, S. D., No. 594, dated 14th February 1906.

Letter from the Commissioner, C. D., No. V.r.-711, dated 13th March 1906.

Letter from the Commissioner, N. $\mathrm{D}_{2}$ No. 1056, dated 16th March 1906.
Letter from the Commissioner in Sind, No. 856, dated 9th April 1906.

Submitting the Land Revenue Administration Reports, Part I, of their respective charges for the year 1904-05.

Resolutron.-The conditions of the cultivating season have been fuily described in the Land Revenue Administration Reports, reviewed by Government in their Resolution No. 8956, dated 18th September 1906. It is sufficient to observe here that both throughout the greater part of the Presidency and in Sind the season was decidedly unfavourable.
2. The result is reflected in the statistics attached to the reports at present under consideratiou. In the Presidency Divisions the total net balance of revenue for collection, on account both of the year of report and of former years, (excluding remissions and sums written off as irrecoverable), amounted to Rs. 314 lákbs; and the actual collections up to 31 st July 1905 amounted to some Rs. 228 lakhs. Of the outstanding balance of Rs. 86.5 láikhs, nearly Rs. 58 lákhs out of the revenue due in the year of repert represent suspensions by authority, while the total outstandings of the year not so suspended amounted to about Rs. 10.5 lákhs, and in addition there were over Rs. 18 lákhs due for recovery on account of former years. The total realised amounted to some 5 lakhs less than were due for the year of report alune, after deduction of the Rs. 58 lákhs suspended and Rs. 19 lákhs remitted. The Commissioners expected that, given normal conditions, some Rs, 55 lákhs out of the total outstandings would be ultimately recoverable, that over Ris. 23 lakkhs would have to be remitted or written off as irrecoverable, and that the recovery of nearly Rs. $8 \cdot 5$ lakhs was doubtful. In view of the exceedingly unfavourable character of the season of 1905-06 in the Deccan and Karnátak, and local failures, particalarly of the rice crops, in Gujarát, these anticipations are of little more than acadenic interest. The whole question requires comprehensive treatment, and it will come under consideration in consultation with the Commissioners as soon as the conditions of the current season are clearly established. [a Sind nearly Rs. 96 lakhs of revenue were due for recovery at the beginning of the year of report, the realisations at the end of the year amounted to less than Rs. 82 lakhs, or about 4 lakhs less than the total due for the year under review alone; and of the total outstanding talance of soms hs. 14 lakhs it is expected that Fis. $\overline{5} \cdot 4$ lakhs will not be recoverable.
s. Whether these results ean be regarded as altogether satisfactory is a matter on which it is exceedingly dilticult to form a judgment. The unauthorised arrears, that is to say, the arrears remaining notwithstanding the grant of لliberal suspensions and remissions, are considerable. The Commissioners,
N. and S. Divisions, are evidently not satisfied that the measures taken for realisation of sums undoubtedly recoverable without hardship were quite adequate in all districts. It has already been noticed with reference to Part II of the Commissioners' Land Revenue Administration Reports that there was during 1904-05 some continuance of that spirit of contumacy which has for the last few years, especially in certain districts, proved an obstacle to the recovery of revenue payable without real difficulty. In the districts where this spirit has been most in evidence, the measures taken appear to have been sufficient. Elsewhere perhaps more might have been done to realise within the year in which they became due, amounts of which the payment was not postponed by authority, and similar comment might have been expected from the Commissioner, C. D., regarding the large amount of unsuspended arrears in his charge, particularly in the districts of Satíra and Poona. If the inquiries prescribed by the rules for suspension and remission of revenue are properly carried out, and timely announcement made of the proportion of assessment to be remitted or suspended, Collectors should be able to apply with some confidence such of the provisions of the Land Revenue Code as the necessity may indicate for the realisation of dues of which payment is wilfully withheld. On the other hand, the dificulties of the situation must not be ignored. The working of the suspension and remission rules could not be expected to be perfect immediately after their introduction, and considerable circumspection is necessary in dealing with defaulters believed to be contumacious, lest mistakes should be made, and undue pressure exerted against persons unable to pay without bardship. Where contumacy is clear, pressure must bs applied firmly and without hesitation. But where a doubt exists, the benefit of it. particularly in a poor season, must necessarily be given to the defaulter. In showing leniency, the judgwent of revenue officers may not in every instance have been infallible. But the Governor in Council is conscious that no subject has received their anxious attention more closely than the collection of revenue, and he is satisfied that none of it remains in arrears owing to carelessness or slackness. One thing is clear that in no district was there any exhibition of unnecessary severity. Coercive processes were of course numerous compared with the pre-famine period. But until the people at large again realise that unsuspended revenue bas to be paid punctually and in full, this feature of revenue administration must continue in evidence. After all the extent of such process is still insignificant in relation to the total revenue collections and the yast number of revenue payers.
4. The percentages of collection to demand on account of takávi balunces are at first sight, according to the Commissioners' figures, hardly satisfactory. It appears, however, that allowance has not been made for the postponecoent of arrear instalments not recoverable in the year of report, and if this had been done, a better percentage of collection would no doubt have been apparent. The total amount of recoveries, including interest, was Rs. $15 \%$ lákhs, appreciably less than the amount, Ks. 1.7.3 lakhs, advanced during the year. The awount of the balance of adrances outstanding at the beginning of the year of report increased somewhat by the lst August 1905 in the case of the Northern Division, but the total figures for the Presidency show a slight reduction at the close of the year. Some Rs. 3.8 lákbs were written off, and it was of course necessary to grant, or continue, considerable postponements, for which in future allowance should be made in calculating the percentage of collection. It is not clear what amount of pressure was exercised in the matter of recovery. Attention is recommended to paragraph 4 of Government Resolution No. 30, dated 6th January 1905, where it is directed that while postponements may be granted with some freedom in the case of advances made for land improvement, prompt settlenient of debts should ordinarily be insisted on in the case of loans under Act XII of 1884. Remission of debts under either Act should, as observed in the review of Part II of the Land Levenue Administration Reports for 1904-05, be allowed only on the clearest evidence of necessity.

In Sind Rs. 6.55 lakhs were advanced during the year. The amount recovered was, including interest, about Rs. $4 \cdot 66$ lákhs, and the outstanding balarce increased during the year from Ks. 15.63 to Rs, 17.94 lálhs. The

Commissioner observes that in one district at least much of the arrears is due to contumacy rather than inability to pay, an unsatisfactory feature. It is observed, however, that further postponement of recovery has been forbidden except in cases where the necessity for it is clearly established.
5. The remainder of the reports calls for no special remarks, but it may be noticed as satisfactory that despite the unfavourable season there was some increase in the acreage of occupied land in both the Northern and Ceatral Divisions, while the extent of the decrease in this respect in the Southern Division and Sind was insignificant.
