LAND REVENUE ADMINISTRATION REPORT OF THE BOMBAY PRESIDENCY INCLUDING SIND FOR THE YEAR 1924-25

A-PRESIDENCY PROPER

- II. L. PAINTER, Esqr., I.C.S., Commissioner, Northern Division.
- G. W. HATCH, Esqr., I.C.S., Commissioner, Central Division.
- L. J. MOUNTFORD, Esqr., C.B.E., I.C.S., Commissioner, Southern Division.
- R. D. BELL, Esqr., C.I.E., I.C.S., Commissioner, Bombay Suburban Division.

1. SEASON

Northern Division

The season of 1924-25 was on the whole satisfactory. The rainfall in Ahmedabad, Surat and Thana was a few inches below, and in the remaining districts of the Division a few inches above the average of the last five years as shown in the following table :--

Name of District.				Rainfall i	n 1924-25.	Average rainfall of the last five years.		
99 - 177 - 177 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187 - 187				Inches.	Cents.	Inches.	Cents.	
Ahmedabad	••			25	97	26	25	
Kaira	••	••		29	89	27	••	
Panch Mahals	••	••		34 '	35	33	98	
Broach	••	••		29	77	27	38	
Surat	••	••		48	1	55	8	
Thana	••	••		81	8	84	3	

The monsoon set in in the middle of June and sowing operations were commenced. There was general rainfall in the second and fourth week of July and it was very beneficial to the crops. Rain in August and -. September was seasonable and sufficient and materially helped the transplantation of rice. There was practically no rain in October and the season ended sooner than usual. In Thana rain was below the average, but it being well distributed throughout the district the yield of rice, which is the staple food of the district, was not less than 11 annas. The average outturn of crops in the Gujarat districts varied from 7 to 11 annas. In Broach cotton yielded a 12-anna crop and agriculturists made good profits.

During the third week of January there was excessive cold and the

minimum temperature then recorded was as shown in the margin. No appreciable damag: was, however, done. Water Supply.—The supply of water for drinking and domestic purposes was sufficient in all the Gujarat districts except in the Bhal villages of Dholka and Dhandhuka Talukas of the Ahmedabad district. Scarcity of water was felt during summer in parts of the Panch Mahals district and the people, as usual, met the situation by digging kachha wells.

To improve the water supply of the Bhal tract villages of Dholka and Dhandhuka Talukas Government sanctioned a special tank excavation grant of Rs. 50,000 under Government telegram No. 2499-A-24 dated 19th March 1925. In all 21 tanks (13 in Dhandhuka and 8 in Dholka) were taken up for excavation. The work was started in April but four tanks in Dholka and an equal number in Dhandhuka remained incomplete. They will be taken up again in January next when some more tanks will also be taken up. The total amount spent during the year out of the special grant referred to above was as under :--

									\mathbf{R}	3 . `		
On excavation Cost of establishment									29,1	12		
									1,296			
							-			30,4	08	
	-				-							

In Thana the supply of water was sufficient except in villages in the hilly tracts where scarcity of drinking water was felt in the hot weather. The usual grant of Rs. 32,009 sanctioned in Government Resolution, General Department, No. 2429 dated 17th April 1924, for the improvement of village water supply was supplemented by a special grant of Rs. 60,000 under Government Resolution, General Department, No. 812/24 dated 16th April 1924. After allotting Rs. 1,500 to the Bombay Suburban district the balance was distributed among the districts of this Division as shown below :--

				Rs.
Ahmedabad			• •	18,000
Kaira	• •	••	••	33,000

2

Boring by large machines has been most successful in the Viramgam Taluka of the Ahmedabad cistrict, which is naturally suited to this form of water supply. New borings were started at Dhandhuka and Utelia in the Bhal Tract and are still in progress.

Cattle and Fodder.—Fodder was sufficient in all the districts of the Division.

Rinderpest, foot and mouth disease and Hæmorrhagic Septicæmia appeared more or less in all the districts of the Division and carried off 3,165 animals. The Veterinary Assistants gave timely help and advice. The number of attacks and deaths and the number of inoculated cattle during the year were as shown below :--

Number of cattle	attacked		••	9,256
Do.	died		••	3,165
Do.	inoculated	·	••	6,132
Do.	died out of the	hose inoculated	••	39

Public Health.—The public health was generally good, except for small-pox which appeared in the districts of Kaira, Broach and Surat, and plague and cholera, which visited the Thana district. The mortality from these diseases was as shown below :—

	•		Mortality from				
	Name of D	listrict.	Small-pox.	Cholera.	Plague.

Thana	•••		 1	12	166		

Central Division

The monsoon commenced towards the middle of June in the districts of Ahmednagar, West Khandesh, Nasik and in some of the talukas of East Khandesh, Poona, Satara and Sholapur Districts. The rainfall was however insufficient for the sowing of kharif in parts of East Khandesh, Satara and Poona Districts. The rain in July was general and sufficient throughout the Division except in the Poona and Satara Districts and at the end of the month sowing operations had been completed generally and the seedlings were thriving. The rain in August also was sufficient in all districts except some parts of Sholapur and Poona. In September and in the early part of October there was fairly general rain all over the Division, but none in the month of November except in the Nasik District with the result that in some parts of the Division the rabi crops suffered. There was a partial failure in the Satara and Poona Districts; elsewhere the season was on the whole a good one.

Towards the end of January and beginning of February cold winds had a damaging effect on the crops in some districts. In West Khandesh the annewari of wheat in certain areas in the Tapti Valley was reduced Water Supply.—The supply of water for drinking and domestic purposes was sufficient in all the Gujarat districts except in the Bhal villages of Dholka and Dhandhuka Talukas of the Ahmedabad district. Scarcity of water was felt during summer in parts of the Panch Mahals district and the people, as usual, met the situation by digging kachha wells.

Central Division

The monsoon commenced towards the middle of June in the districts of Ahmednagar, West Khandesh, Nasik and in some of the talukas of East Khandesh, Poona, Satara and Sholapur Districts. The rainfall was however insufficient for the sowing of kharif in parts of East Khandesh, Satara and Poona Districts. The rain in July was general and sufficient throughout the Division except in the Poona and Satara Districts and at the end of the month sowing operations had been completed generally and the seedlings were thriving. The rain in August also was sufficient in all districts except some parts of Sholapur and Poona. In September and in the early part of October there was fairly general rain all over the Division, but none in the month of November except in the Nasik District with the result that in some parts of the Division the rabi crops suffered. There was a partial failure in the Satara and Poona Districts; elsewhere the season was on the whole a good one.

Towards the end of January and beginning of February cold winds had a damaging effect on the crops in some districts. In West Khandesh the annewari of wheat in certain areas in the Tapti Valley was reduced from about 14 to 12 annas. In East Khandesh the annewari of crops in a few villages of the Yawal and Chopda Talukas was reduced by one and three annas respectively below the normal.

In Nasik the crops which suffered were grapes, brinjals, lucerne, chillies, bagait wheat and gram. In Ahmednagar there was damage to the crops by frost in Rahuri and Akola Talukas, where remissions amounting to Rs. 713 and 66 were granted.

2. The conditions in the different districts are detailed below :---

Ahmednagar.—The rains in June and July were sufficient to enable agriculturists to undertake kharif sowings in all parts except in Rahuri, Shrigonda and Kopargaon Talukas where there was no kharif sowing. The outturn of kharif crops was good except in Newasa, Karjat and Nagar, Talukas where it was poor owing to a continued break in August and in the first half of September.

The rainfall in September was general and sufficient for rabi sowing. But this was followed by a break in October and November and the rabi outturn was not as good as expected. The cotton crop was generally good. The season was generally better than that of the previous year. In six villages only the annewari was less than 6 annas and there was no village where the crops were 4 annas or less; no difficulty was experienced in recovering the amounts put down for collection.

East Khandesh.—The monsoon opened towards the middle of June, but the rainfall was not sufficient in all talukas. The rainfall in July though in defect of the average was just enough for completion of sowing operations. The rain in August was up to the requirements of the crops and they progressed well. There was good rain in the month of September and rabi sowings were commenced. The rain in this month as well as in October was rather in excess of the average. There was no rain in November. The condition of rabi crops however remained good. The anna valuation of both kharif and rabi crops ranged from 9 to 12 annas.

West Khandesh.—There was sufficient rain for kharif sowings in the latter half of June all over the district except in the Sindkheda Taluka where it was meagre. In July the situation seemed threatening at first but it was saved by the rain that fell from 20th to the close of the month. More rain was however needed, especially in the Nandurbar, Sakri, Sindkheda and Shahada talukas. The rain in the first week of August though not heavy was general; it was erratic in the second week and opportune and sufficient in the third and fourth weeks. The rains in September and October were general and regular and kept the crops in good condition except in the Sindkheda taluka where more rain was required. November passed without any rain. The rainfall between 9th and 15th December was beneficial to standing crops. The season was on the whole favourable except in the Sindkheda Taluka where the rainfall was badly distributed.

Nasik.—The rainfall was insufficient in the months of June and July except in the hilly parts of the district and this fact retarded sowing operations to a certain extent, but the rain in August and especially that in September saved the situation and rabi was extensively sown even in kharif lands. There was sufficient moisture for rabi sowing and crops germinated well, and were at one time very promising, but there was no rain afterwards and the general out-turn was less than normal. The combined annewari was consequently 6 to 12 annas except in some villages of Yeola Taluka where it was 5 annas.

Poona.—The rainfall in June was sufficient for sowing operations in the hilly portions of the District, whereas in the Deshi parts it was partial and insufficient. The rain in July and August was also scanty. The result was that kharif crops in the eastern part of Haveli suffered much, and were more or less a failure in Sirur, Bhimthadi and Indapur talukas and in the Dhond Peta. In September there was sufficient rainfall all over the District for the sowing of rabi and at one time the situation looked very hopeful for rabi crops, but the subsequent rains failed and the rabi out-turn on the whole proved poor.

Satara.—The rain was deficient and not well distributed in the month of June especially in some parts of northern and eastern divisions where the kharif sowing was consequently delayed. There was however sufficient rain in the month of July and sowing operations were completed everywhere except in Man, the eastern and southern parts of Khatav and the eastern part of Khandala.

The break in the first fortnight of August was beneficial to the crops in the west, but harmful in other parts, especially in Tasgaon where young kharif crops began to wither. The rain in the second fortnight was sufficient and well-distributed everywhere including the Man Taluka and the parts of Khatav and Khandala Mahal mentioned above. The agriculturists then commenced rabi sowing in Man Taluka as no kharif crop had been sown there. The rain in September was sufficient and opportune for kharif crops as well as for rabi sowing. Owing to timely rain in October the rabi crops were in good condition. There was however no rain in November and December, and the rabi crop suffered much in various parts of the District. The out-turn of rabi was on the whole less than that of kharif owing to the failure of the late rains; however the agricultural situation was fairly good except in the Man and Khatav Talukas and the eastern part of Khandala Mahal where both crops failed.

Sholapur.—The early rains were sufficient for kharif sowing but kharif crops failed in some Talukas for want of rain in August. There was general and sufficient rain in September for rabi sowings throughout the district. Owing to the holding off of rains during October and November, it was feared that the rabi crops would fail, but the unexpected rains in December helped the rabi crops and the situation was saved. The anna valuation of crops generally ranged between 6 and 12 annas and there were only 41 villages where the annewari was between 4 to 6, and 37 below 4 annas. Cattle and Fodder.—The condition of cattle was fairly good except for the fact that rinder-pest and foot and mouth diseases prevailed for a time. The following are the figures of attacks and deaths :—

	•	Attacks.	Deaths.
		4,172	1,558
· ·	••	5,021	2,550
		4,859	1,996
		9,404	4,327
	.,	4,896	637
		1,358	375
••	••	3,461	835
	· · · · · · · · · · · · · · · · · · ·		Attacks. 4,172 5,021 4,859 9,404 4,896 1,358

The supply of fodder was sufficient. At Jalgaon in the East Khandesh District kadbi could be had at Rs. 7 to 8 per 100 bundles and grass at Rs. 7 per 1,000 bundles in May and June. In the Poona District there was a fall in the price of kadbi due to a fairly good yield of the Jowari crop in the district. In Satara City prices of kadbi ranged between Rs. 3 and Rs. 10 per 100 sheaves.

Water Supply.—There was no complaint of the shortage of drinking water except in parts of the Bhusaval and Jamner Talukas and in Jalgaon City in the East Khandesh district, in the Satpuras and Nandurbar taluka of the West Khandesh District, in some villages in the Javli taluka of the Satara District and in the Dhond Peta of the Poona District. The water supply was inadequate in the beginning in the eastern and sourthern parts of the Satara District and in the Medha and Kedamb valleys of the Javli Taluka, but it improved with the later rains. The inadequacy of the supply of water was felt in the hot weather in some parts and 'hels' were dug to supplement the wells, and as usual grants were given by Government for improvement of water supply where necessary and supplemented by contributions by the District Local Board.

Public Health.—Plague, cholera and small-pox prevailed more or less in all districts and the mortality under each head was as shown below :—

		Plague.	_Small-pox.	Cholera.
Ahmednagar		 206	77	363
East Khandesh		 2,080	304	1,256
West Khandesh		 3 0	143	182
Nasik		 4	183	560
Poona	••	 24	· 94	144
Satara		 1,672	157	398
Sholapur		 971	675	389

Inoculation was resorted to in the West Khandesh and Satara districts --particularly in the towns of Wai and Karad where 3,776 and 5,011 pe.sons were inoculated. On the whole public health was fairly good.

Southern Division

Good pre-monsoon showers fell in Belgaum and Mallad tract of Dharwar and facilitated the preparation of lands for kharif sowing. Rains of June and July were well distributed over the whole of the Division and favoured kharif sowing except in parts of Kanara where heavy rains retarded sowing of paddy. There was serious damage in Honawar and Kumta and relief was granted in deserving cases from Government grants supplemented by popular contributions. August and September rains were general. There was no rain in October. Crops fared well till the middle of November when the deficiency of rain was felt above ghats. Failure of rains and unfavourable eastern winds in the succeeding months marred the prospects in the above-ghat districts, especially in Dharwar and Bijapur where cotton had been sown extensively. The crops in Konkan were good.

Phenomenal tides in June damaged embanked lands in Kolaba.

Supply of fodder and drinking water was adequate. Plague, small-pox and cholera prevailed in all the three above-ghat districts and cattle disease all over the Division.

Bombay Suburban Division

The total rainfall for the season was 60 inches being 15 inches less than in the previous year. Nevertheless there was a full normal crop of rice, grass and garden products and there was no deficiency of water supply.

Cattle and Fodder.—The fodder supply was sufficient. There were 27 attacks and 20 deaths from rinder-pest. No inoculation was performed as the disease soon disappeared. The increase in the number of milch cattle has continued in consequence of the demand for milk in Bombay. The number has further increased, because many buffalo owners of Bombay have come to settle in Salsette on account of cheaper land and fodder.

Public Health.—The public health was good. Sporadic cases of plague and small-pox occurred, but there was no epidemic of any kind.

Those parts of the district where suburban development has proceeded, are generally considered more healthy than Bombay. Malaria is getting less virulent in those areas where development is in progress. The real malarial parts are thinly inhabited by jungle tribes who still consider liquor a better antidote than quinine, although quinine is distributed to the poor villagers. It is hoped that reorganisation and extension of Local Self Government in Salsette which is under consideration will result in this problem being properly tackled, although malaria will not permanently disappear from Salsette without underground drainage.

The chief need of the suburban areas is the reservation of sufficient spaces and play grounds to develop the taste for open air exercise which is lacking in the case of most of the Indian communities.

2.0

2. LAND REVENUE

• Rs. 35,784 on account of Local Fund cess on assessment of Talukdari lands for 1923-24 were ordered to be recovered in 1924-25 (*ride* G. R. No. 9752 dated 3rd April 1924).

† Rs. 103 on account of over collections in previous year have been adjusted against the authorized arrears of 1923-24.

^{*} Rs. 13 were shown by mistake as unauthorized arrears of 1923-24 in last year's return. The correct figure is now shown.

* The difference of Ke. 1 in column 3 against Belgaum is due to an error detected by the Collector after the close and submission of taluka accounts to the Commissioner.

[†] Rs. 35,521 in column 2 against Kolaba consists of last year's suspension of Rs. 746 plus arrears of Rs. 34,755 due to Igatpuri concession rules in Panvel and Karjat talukas having been erroneously followed meterd of Bhivandi concessions (vide Commissioner's No. 5. K. V.-25 of 7th July 1924, addressed to Government, R.D.)

The Jamabandi was completed within the appointed time in all talukas except Dharwar (in Dharwar) and Dandeli, Kulgi, Virnoli and Kirvatti forest mahals (Kanara) where there was some delay which calls for no special explanation.

Bombay Suburban Division

The jamabandi or audit of the last year's account was made by the Collector, Bombay Suburban District.

.

There is an arrear of Rs. 4,403-8-0. The talatis were during the collection time busy with the compilation of material for the revision settlement. There are also peculiar difficulties of collection in this district, owing to the residence of occupants in Bombay and frequent sales of small areas of land.

The following summary gives a comparison of the revenue collections, etc., with those of the previous year.

Item No.	Perticulars.	Curent year, i.e., 1924-25.	Past year 1923-24.	Increase.	Decrease.

3. GROSS REVENUE

(Column 3 of Appendix I)

Northern Division

The gross fixed revenue of the Division shows a net increase of Rs. 47,681 as detailed below:--

					Rs.
Ahmedabad	••	••		••	+29,339
Kaira	••	• •	•	••	+11,208
Panch Mahals Broach	••	••		••	+ 263
Surat	••	••		••	+ 842
Thana	••	••		••	+ 951 + 5078
	••	••		••	+ 5,078
		•			47,681

The increase in Ahmedabad is due to increase in assessments at the Second Revision Settlement of the Talukdari villages in Dholka and Dhandhuka Talukas of the district; this was not taken into account last year though it ought to have been. The increase in Kaira is mainly due to the fact that in the accounts of the Thasra Taluka the jama paid by the Talukdar of Janod was wrongly shown last year instead of the assessment of the village. The increase in other districts is due to the fixing of assessment on unassessed land given out for cultivation and to the levy of non-agricultural assessment on lands brought under non-agricultural uses.

12

Central Division

The gross fixed land revenue (Rs. 1,72,95,889) shows a net increase of Rs. 1,16,134 which is contributed by all the districts as shown below:—

				Ks.
Ahmednagar	••	• •	••	+ 98,938
East Khandes	h	••	••	+ 3,978
West Khandes	h.	••	••	+ 3,763
Nasik		••	••	+ 1,654
Poona	• •	••	••	+ 3,647
Satara	••	••	•••	+ 2,906
Sholapur	••	••	••	+ 1,248
				Contrast of Contrast of Contrast of Contrast

Total .. 1,16,134

The increase in Ahmednagar, East Khandesh, West Khandesh and Satara districts was mainly due to the revised assessments introduced in the second revision survey settlement in Government and inam villages in certain talukas of those districts. The increase in Nasik, Poona and Sholapur districts was chiefly confined to revenue from non-agricultural assessment. Forest and other lands were granted for cultivation in the districts of Poona, Satara and Sholapur and this also contributed to the increase of gross revenue in those districts.

Southern Division

The gross fixed land revenue Rs. 1,17,01,687 shows a net increase of Rs. 6,512 as follows :--

				Rs.
Belgaum	••	••		60
Bijapur	••	••	• •	490
Dharwar	••	••		2,871
Kanara '	••	••	• •	1,927
Kolaba	•	• •	••	804
Ratnagiri	••	••	• •	360
•				

Total .. 6,512

The increase in Belgaum, Dharwar and Kolaba is mainly due to levy of non-agricultural assessment; in Bijapur to the revision of building assessment; in Kanara partly to the levy of non-agricultural a sessment and partly to assessment on disforested land, and in Ratnagiri to unassessed waste land being assessed and given out for cultivation.

Bombay Suburban Division

The gross fixed revenue of the district shows a net increase of Rs. 2,220 which is due to increase in non-agricultural assessment levied on building plots.

4. ALIENATIONS

(Column 5 of Appendix I)

Northern Division

There was a net decrease of Rs. 5,348 under this head as shown below :---

				Rs.
Ahmedabad	••	• • '		- 4,493
Kaira	••	• •	••	- 239
Panch Mahals	••	••	••	·- 4
Broach	••	• •	••	- 329
Surat		••	• •	- 249
Thana	••	•••	••	- 34
		\mathbf{Net}	••	- 5,348

The decrease in Ahmedabad is mainly due to the transfer of inam lands in the village of Dholera in Dhandhuka taluka from the head "Alienated" to the head "Free or Specially reduced" consequent on the decision in Dholera suit (G.R., L.D., No. 1439 dated 23rd July 1923) and partly to forfeiture of inam land. The decrease in Kaira was due to the acquisition of personal inam lands and that in Broach to the resumption of the excess service lands of inferior village servants. In Surat a fall in the miscellaneous land revenue of a sharakati village and the resumption of the excess service lands of inferior village servants account for the decrease. The small drop in the Panch Mahals and Thana calls for no remarks.

Central Division

There was a net increase of Rs. 9,478. The figures for the different districts are :---

				Rs.
Ahmednagar	••	·		+ 12,218
East Khandesh	••	••		+ 937
West Khandesh	••	••		+ 2,542
Nasik	••	••	••	+ 2,852
Poona	••	• •	••	- 1,283
Satara	••	•••		- 3,528
Sholapur	••	••		- 4,260
				, ,
				+ 9,478

The increase was considerable only in the district of Ahmednagar where it was mainly due to the increase in assessment on account of the introduction of the revised settlement in the Kopargaon taluka and in certain dumala villages of Shrigonda and Newasa talukas. In the Nasik district it was due to the introduction of revision settlement in dumala villages. The decrease in the Poona district was due to the levy of enhanced judi on certain Patil Inam lands and to some inam lands being submerged in the Mulshi lake of the Tata Power Co.

Resumption of shetsanadi lands and of a few other inam lands was responsible for the decrease in the Sholapur district.

In the Satara district the decrease was due to some inam lands being made khalsa.

There was a n	et decrea	ise of Rs. 35	2 as shown	below :-	-
					Rs.
Belgaum	••	••	••		+ 118
Bijapur	• •	••			- 34
Dharwar	• •	••			+ 513
Kanara	••	••	••		No change.
- Kolaba		•••	••		- 894
Ratnagiri	••	• •	••		- 55
-					
					-352

Southern Division

The increase in Belgaum and Dharwar is mainly due to rectification of errors in the accounts and the decrease in Kolaba to the abolition of the Isafat tenure. The small decrease in Bijapur and Ratnagiri calls for no remarks.

Bombay Suburban Division

The decrease is due to acquisition of alienated land for development purposes.

5. NET GOVERNMENT REVENUE

(Columns 8, 9 and 10 of Appendix I)

Northern Division

There was a net increase of Rs. 42,704 under this head as detailed below :---

					Rs.
Ahmedabad	1 ்		••	• •	+ 16,061
Kaira	••	••	••	••	+ 11,741
Panch Mah	als.	••	••	••	+ 2,409
Broach	••	••.	••	••	+ 5,409
Surat	••	••		••	+ 2,054
Thana	••	••	• •		+ 5,030
			NT 4		1 49 704
			Net	• •	+42,704

The increase was mostly due to giving out unoccupied land for cultivation and in Surat and Thana to increase in revenue from non-agricultural assessment.

Central Division

There was a net increase in fixed revenue of Rs. 1,11,406 as detailed below :--

			•	Rs.
Ahmednagar			+	85,192
East Khandesh			+	3,934
West Khandesh			+	5,954
Nasik		٠.		615
Poona		••	+	4,879
Satara			·· +	6,282
Sholapur	••	••	•• +	5,780
			-	
			-+-	1,11,406

The causes of increase are the same as those given under paragraph 3 above. Nasik shows a slight decrease which was mainly due to the increase in the difference between the assessment and judi in dumala villages on account of the introduction of revision settlements.

Southern Division

There was a net increase of fixed revenue of Rs. 12,876 as detailed below :--

				Rs.
Belgaum		••	• •	+ 506
Bijapur		••	• •	+ 896
Dharwar	••	••	• •	+ 5,443
Kanara			• •	+ 3,514
Kolaba	r •	••		+ 1,879
Ratnagiri	• •		••	+ 638
		m		
		Total	••	+12,876

The increase in Belgaum, Kanara and Ratnagiri is due to unassessed waste land given out for cultivation; in Bijapur and Dharwar partly to inam lands made khalsa and partly to waste lands given out for cultivation; and in Kolaba partly to the levy of non-agricultural assessment and partly to the abolition of the Isafat tenure.

Bombay Suburban Division

The decrease in column 8 is due to the acquisition of occupied land for development purposes.

The increase in column 10 is due to the levy of non-agricultural assessment on building plots.

.

5A. NON-AGRICULTURAL ASSESSMENT

(Column 10 of Appendix I)

Southern Division

The total non-agricultural assessment derived was Rs. 45,247 as shown below :---

				Rs.
Belgaum	••	••	••	2,948
Bijapur	• •	••	· • •	10,863
Dharwar	••	••	••	15,032
Kanara	• •	• •	••	2,325
Kolaba		••	• •	13,008
Ratnagiri	••	• • •	۰.	1,071
		T	otal	45,247

6. MISCELLANEOUS LAND REVENUE

(Column 11 of Appendix I)

Northern Division

There was a net increase of Rs. 1,87,795 as shown below :-

1

				•	Rs.
Ahmedabad	• •			· • •	+ 1,44,633
Kaira	• •				+ 20,199
Panch Mahals	• •	• •		••	+ 33,591 -
Broach	•• *	• •		••	- 27,004
Surat	• •			• •	+ 8,807
Thana	••			••	+ 7,569
			Net	• •	+ 1,87,795

The increase in Ahmedabad was due to the sale of occupancy rights of lands which had previously been cultivated under yearly leases in Modasa, Prantij and Dholka talukas and to realizations from the sale of babul trees in the South Daskroi taluka. The increase in other districts was mainly due to larger realizations from the sale of trees, grass, fruits and occupancy rights of land. The decrease in Broach followed lower bids for Bet lands than in the preceding year.

Central Division

There was a net decrease of Rs. 4,770. The districts of East Khandesh, Nasik and Sholapur showed a decrease whereas in the remaining districts there was an increase. The figures for the different districts are :--

			-	Ks.
Ahmednagar	••	••	• •	+24.964
🖉 East Khandesh		•••	• •	- 35,745
West Khandesh	••	• •		+45,191
Nasik	•••	• **	· •	- 58,949
Poona	-	••	·· .	+27,243
Satara	••	••	••	+ 7,440
Sholapur			••	14,914
-				
				- 4,770 -

The decrease was chiefly due to the following causes :-

- (1) A fall in the sale-proceeds of gaonthan plots and land for cultivation in the East Khandesh district.
- (2) A fall in the amount of fine under sections 61 and 66, Land Revenue Code, and of the sale-proceeds of occupancy rights and grass in the Nasik district.
- (3) Smaller realizations on account of conversion of cantonment tenure into an ordinary tenure in the Sholapur district.

The increase was due to greater revenue under the following heads :---

- (1) Sale-proceeds of Tarwad, recovery of arrears of non-agricultural assessment, $\frac{1}{4}$ fine and rent from Belapur Syndicate in the Ahmednagar District.
- (2) Grazing fees in the Ahmednagar and Poona districts.
- (3) Penalty under section 135F of the Land Revenue Code and levy of fines under section 66, Land Revenue Code, in the Poona district.
- (4) Revovery of arrears of scale judi in the Ahmednagar and Satara districts.
- (5) Sale-proceeds of the occupancy rights of Government land in Ahmednagar, Satara and West Khandesh districts.
- (6) Recovery of the arrears of assessment in respect of the Chikurda-Deshmukhi watan which lapsed to Government in 1923.

Southern Division

There was a net increase of Rs. 43,806 as shown below :-

	•			Rs.
Belgaum	••		••	49,325
Bijapur	••	• •		- 39,235
Dharwar	••		••	58,410
Kanara	••	••	••	- 13,539
Kolaba	••	••	••	- 9,435
Ratnagiri			••	— 1,720
	•	Total	••	43,800

° ⊒ 1291—3

٠

17

The increase in Belgaum and Dharwar is due to levy of occupancy price on lands given out for cultivation.

The decrease in Kanara, Bijapur, Kolaba and Ratnagiri is due to smaller receipts from sales of occupancy rights of Government lands.

Bombay Suburban Division

The large increase of Rs. 26,043 is due partly to the recovery of past authorised arrears of land revenue, but mainly to revenue from nonagricultural assessment on short term leases. This item of revenue tends to go up as people have a tendency of allowing huts and sheds to be erected unauthorisedly in agricultural lands with the object of getting rent.

7. REMISSIONS

(Column 22 of Appendix I) .

Northern Division

Class (a)

Rs.

19,280) Remissions on account of revision settlements or the suspension of settlements	(1)
3,877) Remissions of jama of the Dholera es ate in the Dhandhuka Taluka of the Ahmedabad District	(2)
931) Adjustment made against jama recoverable from the Talukdars of Bawaliari in the Dhandhuka Taluka of the Ahmedabad District on account of compensation to be paid to them for the abolition of Custom dues under Act XIX of 1844 (vide G.R.' `No. 2896 dated 16th July 1869)	(3)
24,904) Remissions on account of water logging in the Surat District (G.R. No. 3044 dated 6th May 1902)	(4)
1,200) Adjustment made against Jama recoverable from the Talukdars of Limdi and Golana in the Jhalod Mahal of the Panch Mahals District on account of opium compensation granted to them (G.R. No. 9307 dated 8th October 1912)	(5)

Total for S.	D	923	488	443	1,397	1,993	5,244	67,298

Bombay Suburban Division

The total remission for the year is Rs. 752 out of which Rs. 66 are on account of land forfeited for non-payment of land revenue and the remaining amount is on account of the demand cancelled.

8. SUSPENSIONS

(Column 23 of Appendix I)

Northern Division

The total suspended revenue at the end of the year under report amounted to Rs. 6,05,255 as against Rs. 22,23,266 at the end of the previous year.

Suspensions granted under the Suspension and Remission Rules are shown by districts as follows :—

	Name of District.				Suspensions out of current revenue of the year.	Amount re-suspended.	Total.
Ahmedab	ad	••	••	••	Rs. 10,355	Rs. 3,10,592	Rs. 3,20,947

Thana	••	••	. ••	••	274	••••	. 274
			2	lotal	30,760	б,74,495	6,05,255

Central Division

The suspensions granted during the year under report amounted to Rs. 26,02,018 as against Rs. 46,30,209 in the preceding year. The decrease is noticed in all districts except East Khandesh where there were no suspensions. The reason of the decrease was that there were generally better crops in 1924-25 than in 1923-24. The following are the details of suspensions required by Government Circular No. P.— 63 dated 4th March 1925, Revenue Department:—

	District.	×		Suspension out of the current revenue of the year.	Amount re-suspended.	Total,
Ahmednagar	••	••	•••	Rs. 6,194	Rs. 6,44,060	Rs. 6,50,254
East Khandesh	••		••		••••	••••
West Khandesh	••		••	2,742	26,993	29,735
Nasik	••		••	\$7,888	2,61,582	2,99,470
Poona	••			2,54,058	4,89,915	7,43,973
Satara	••	••	••	1,32,554	4,57,883	5,90,437
Sholapur	••	••	••	89,364	1,91,338	2,80,702
		Total		5,22,800	20,71,771	25,94,571

The details of other suspended revenue are as given below :---

Rupees 255 (West Khandesh)—on account of rent and fine for encroachments on Government land the recovery of which was postponed pending decision of appeals.

Rupees 7,192 (Nasik)-Miscellaneous land revenue postponed till the decision of an appeal.

Southern Division

The suspended revenue at the end of the year amounted to Rs. 14,40,131 as against Rs. 24,43,279 of the previous year. This includes Rs. 1,22,598 on account of current year's land revenue and Rs. 13,00,036 re-suspended out of previous year's revenue owing to scarcity. The details are as noted below :--

•		District.			Suspensions out of current year's revenue.	Amount re-suspended.	Total.
					Rs.	Rs.	R₹.
Belgaum	•• .	•• .	••		30,714	1,41,774	1,72,488
Bijapur	••	••	••	•••	88,678	9,52,664	10,41,342
Dharwar		.:	••			2,05,496	2,05,496
Kanara	••	••	••		1,949		1,949
Kolaba		••	••		1,257	102	1,359
Ratnagiri	••	••			···· •		••••
			т	otal	1,22,598	13, 00,036	14,22,634

The remaining suspended revenue of Rs. 17,497 is on account of japti expenses of attached khoti villages in Ratnagiri.

Eombay Suburban Livision

After the issue of full rate order for non-agricultural assessment in the case of unauthorised or unsatisfactory buildings, occupants frequently comply with the Salsette rules and obtain concession rates. During such negotiations the full rate orders are suspended, and that is why the figure in this column tends to swell. Eventually the demand is reduced or cancelled.

9. REVENUE FOR COLLECTION

(Column 21 minus columns 22 and 23 of Appendix I)

Northern Division

The net consolidated demand (exclusive of remissions and suspensions) during the year under report amounted to Rs. 1,32,59,195 as against Rs. 89,95,718 during the previous year; the increase was due to the more favourable nature of this season than of the preceding one.

Central Division

The total consolidated revenue due for collection including Local Fund cess and excluding remissions and suspensions was Rs. 1,76,22,302.

Southern Division

The total consolidated land revenue for collection, excluding collections in previous years, of the current revenue and remissions and suspensions was Rs. 1,19,12,895.

Bombay Suburban Division

The total consolidated revenue due for collection, excluding collections in the previous years, of the current revenue, and remissions and suspensions was Rs. 1,65,061.

10. COLLECTIONS

(Column 24 of Appendix I)

Northern Division

Out of the net demand of Rs. 1,32,59,195 referred to in paragraph 9 above Rs. 1,32,40,452 were collected, the percentage being the same, 99.8, as in the previous year.

The percentage of collection on the net demand in each district of the Division was as under :--

Ahmedabad	• •	• •	• •	99.8
Kaira	• •	••	••	99-8
Panch Mahals	••	••		100
Broach	••	••	••	100
Surat	• •	••	• • •	100
Thana	••	• •	••	99.3

Central Division

The total collections amounted to Rs. 1,76,13,839, the percentage being $99 \cdot 9$ of the amount put down for collection. The percentage by districts on the total demand is as under :--

Ahmednagar	• •	• •	• •	99.9	
East Khandesh	••	••		99.9	
West Khandesh	•••	• •	г.	99.9	•
Nasik	••	• •	••	100	
Poona			••	99.5	
Satara	••		••	100	
Sholapur	• •	••	••	99.9	
x					

Southern Division

The total collections amounted to Rs. 1,19,07,161, the percentage being 99.9.

The percentages by districts on the total demand are as under :--

Bijapur 99.7 Dharwar .99.9 Kanara 100 Kolaba .99.9	Belgaum	••		••		99 · 9
Dharwar 99.9 Kanara 100 Kolaba 99.9		• •			••	99·7
Kolaba 99.9		• ·	••	••	••	99 · 9
	Kanara		• • •	••	••	
Ratnagiri 100	Kolaba	••	••	••	••	99 · 9
^o	Ratnagiri	••	• •	••	••	100

The collection work is most satisfactory and reflects credit on the depleted taluka establishments.

Bombay Suburban Division

Out of the net demand of Rs. 1,65,061 referred to above Rs. 1,60,657 were collected. The percentage of collection on the net demand was 97.33 as against 99.9 in the preceeding year.

11. BALANCES

. (Column 23 "Suspended" plus column 26 "Unauthorized" of Appendix I)

Northern Division

The balance outstanding at the close of the year was Rs. 6,23,998 (Rs. 6,05,255 authorized *plus* Rs. 18,743 unauthorized) as against Rs. 22,38,722 at the end of 1923-24. Of the unauthorized arrears of Rs. 18,743, Rs. 16,998 were on account of the current year's demand while Rs. 1,745 represent arrears of former years.

Central Division

The outstanding balance at the close of the year was Rs. 26,10,481 (authorized Rs. 26,02,018 and unauthorized arrears Rs. 8,463) against Rs. 46,54,666 on 31st July 1924. Of the unauthorised arrears of Rs. 8,463, Rs. 7,185 represent arrears on account of current year's demand and Rs. 1,278 on account of previous y ars against Rs. 17,033 and Rs. 7,424 respectively outstanding on 31st July 1924.

Southern Division

The balance outstanding at the close of the year was Rs. 14,45,865 (authorised Rs. 14,40,131 *plus* unauthorised Rs. 5,734) against Rs. 24,50,489 on the 31st July 1924. Of the unauthorised arrears of Rs. 5,734, Rs. 2,568 represent arrears on account of current year's demand and Rs. 3,166 on account of former years' arrears against Rs. 2,668 and Rs. 4,542 respectively outstanding on 31st July 1924. Out of the unauthorised arrears, Rs. 147 (in Kolaba) have since been recovered and the balance is reported to be recoverable.

н 1291—4

Bombay Suburban Division

The outstanding balance at the close of the year was as under :---

 Unauthorised, Col. 23 Unauthorised, Col. 26 	•••	Current. Rs. 11,467 4,404	Past. Rs. 9,221	Total. Rs. 20,688 4,404
		15,871	9,221	25,092

The reasons for unauthorised arrears are mainly the usual difficulty of tracing the absentee land-holders.

12. TAKAVI

Northern Division

The amount advanced under both the Acts totalled Rs. 5,182 as against Rs. 1,35,231 during the previous year, the decrease being due to the favourable nature of the season and to the changed policy of Government in making takavi advances. Out of the total outstanding of Rs. 29,52,269 at the beginning of the year Rs. 11,12,036 were recovered, Rs. 13,868 suspended and Rs. 2,683 remitted. Unauthorized arrears at the end of the year amounted to Rs. 32,488 as detailed below: —

•				Rs.
Ahmedabad	•••		· · ·	31,681
Kaira	•••			1
Panch Mahals				232
Broach		••	•••	1
Thana	••	••	• •	573
				32,488

The reasons given for the large unauthorized arrears in the Ahmedabad District are that loans were advanced in that district in former years without due precaution; that owing to successive bad years the borrowers were not able to pay up their debts; that coercive processes are in many cases useless as the borrowers have no property from which the amount could be recovered; and that the enforcement of joint bonds is considered to be unduly harsh. The officers concerned are being exhorted to clear off the unauthorized arrears. There were no unauthorized arrears in Surat. Voluntary payments made during the year amounted to Rs. 54,035. The following table compares operations for the past six years :—

				Advances	Collec	tions.	Amount
	Yeat	r.		made.	Principal.	Interest.	written off.
<u></u>				Rs.	Rs.	Rs	Rs.
1919-20 1920-21 1921-22 1922-23 1923-24 1924-25	··· ··· ··	•••	•••	$1,58,115 \\14,59,251 \\1,14,577 \\11,741 \\1,35,231 \\5,182$	36,90,834 6,40,406 19,86,604 19,43,294 4,73,200 8,12,870	4,94,661 1,32,195 6,30,377 3,87,767 1,59,989 2,99,166	101 380 180 7,069 2,603 2,683

Takavi under the Land Improvement Loans Act (Rs. 1,525) was advanced only in the districts of Kaira, Panch Mahals and Thana; works in progress were inspected by the officers concerned and no case of misappropriation was noticed.

Special Takavi establishments consisting of 2 Aval Karkuns and 16 clerks were entertained according to the scale prescribed in Government Resolution No. 2513 dated 23rd November 1923. The Takavi Aval Karkun of Dhandhuka Taluka in the Ahmedabad District was murderously attacked with a dagger by a takavi defaulter while attaching his movable property, but he recovered under treatment and his assailant was sent to jail.

Central Division

Rs. 1,25,885 were advanced under the two Acts during the year of report against 3,20,891 in the preceding year.

The year opened with an outstanding balance of Rs. 57,88,766 (principal Rs. 55,42,785 and interest Rs. 2,45,981). The following table shows the demand, suspensions, collection, etc., of the year :---

Demand.				Rs.
Principal				15,13,049
Interest			••	5,47,898
				20,60,947
Written off	••		••	2,212
Suspended	••	••		1,70,208
Recovered	••	••	• •	18,55,649
Unauthorized balance	••	••	••	32,878

The unauthorized arrears by districts and the percentage of collection to demand are given below: -

				Rs.	Percentage.
Ahmednag	ar	• •		29,039	92.4
East Khan	desh	••		94	99.8
West Khai	ndesh			695	84.5
Nasik	••	••		••	$98 \cdot 8$
Poona	• •	••	••	2,166	90.7
Satara	••	••	••	257	68.5
Sholapur	••	••	• •	627	89.8

Seventeen cases of misappropriation of loan were detected during the year-2 in the Poona District, 14 in the Satara District and one in the Sholapur District. In 16 of these cases immediate recovery of the whole of the loan was made and steps are being taken for the recovery of the loan in the remaining one case which is in the Poona District.

Year.		Total amount advanced.	Total recoveries (principal).	Interest recovered.	Amount written off.		
				Rs.	Rs.	Rs.	Rs.
1919-20	••	. • •		6,21,595	27,69,142	4,35,847	316

1921-22		••	.:	2,26,555	24,04,515	6,01,065	1,610
1922-23				63,481	22,45,827	7,71,188	1,722
1923-24				3,20,891	16,98,946	5,79,620	1,127
1924-25				1,25,885	13,97,934	4,72,231	2,212

The following table shows advances, recoveries and remissions during this year and the preceding five years :--

Southern Division

The enclosed statements show the takavi transactions during the year ending September 1925.

The year opened with an outstanding balance of Rs. 20,15,923. Advances and collections during the year amounted to Rs. 1,56,569 and Rs. 4,59,871 respectively. The amount collected represents 22.7 per cent. of the debt outstanding at the beginning of the year. The amount due for collection during the year (excluding suspensions) has been entirely collected in all districts except Belgaum and Bijapur where the unauthorised arrears outstanding at the end of the year were Rs. 1,586 and Rs. 21,949 respectively. In Bijapur the arrears are heavy and they are due to failure of the season : Rs. 617 out of the arrears of Rs. 1,586 in Belgaum have since been collected.

In Dharwar Rs. 1,600 were advanced for constructing pig proof walls and it is to be noted with satisfaction that six pig-wall societies were formed in Kalghatgi taluka alone.

In Honavar (Kanara) Rs. 11,360 were advanced free of interest for the reclamation and improvement of lands damaged by floods and for repairing communal bandhs: Rs. 3,425 free of interest for rebuilding houses damaged or washed away by floods: Rs. 23,448 with interest for the purchase of seed and cattle (vide G. R. No. L. 413-7093 dated 31st October 1924). A loan of Rs. 5,000 was advanced on the joint bond system to the villagers of Hungund in Mundgod Petha (Kanara) for erecting a communal pig-proof wall. This is a second scheme of the kind started in the Petha towards improvement of agriculture.

A scheme for enclosing an area of 791 acres by communal wire fence in Nandikatta village of Mundgod Petha has been recommended to be financed by means of a tagai loan of Rs. 10,000 at a reduced rate of interest and this is under the Commissioner's consideration. Another settlement scheme known as 'Andebail scheme' for bringing under cultivation land in three contiguous villages of the Petha by encouraging cultivators to settle on abandoned lands has been inaugurated by Mr. Nilekani and is in the course of being planned and Government have made an offer of a loan of Rs. 27,000, free of interest, for the work (vide G. R., F. D., No. 3083 dated 30th May 1925). This pioneer work is having its effect and other enterprising landlords are also taking steps. This is the result of the policy regarding the "re-population" of Kanara whereby Government has agreed to let out abandoned rice lands at favourable rates in order to secure settlers. On the whole, Mundgod Petha where agriculture had received a set back is now showing signs of revival as the result of liberal policy of Government in granting tagai loans. The popularity of the pig wall or fence is rapidly gaining ground and the Agricultural Department and especially Dr. Mann deserve the entire credit for this.

The subjoined statement shows the takavi works in progress and the satisfactory amount of inspection :--

		Number of		mber of worl	•		
District.		works in progress.	P. Os.	Mamlat dars and Mahalkaris	Special Head Karkuns,	C, Is.	Remarks.
Belgaum	• •	283	• ••		274	• •	•The inspection of works in the flood
Bijapur		216	13	96	66	41	affected area of Honavar Taluka is
Dharwar	•••	124	16	92			still in progress.
Kanara*				·			The amount having been advanced late
Ratnagiri	••	3	3	3			in the season many of the borrowers could not carry out the works before the rains.

There were no works in progress in Kolaba. Nineteen cases of misapplication of loans (1 in Belgaum, 17 in Bijapur and 1 in Dharwar) were detected and in all of them the loans were ordered to be summarily recovered. There is no doubt that the appointment of Special Head Karkuns pays for itself: in Bijapur no less than 17 cases were detected. It may be argued that tagai inspection is part of the Mamlatdar's routine work, but a Mamlatdar nowadays has to try First and Second Class cases (as many Aval Karkuns have only 3rd class powers). Treasury work is becoming more intricate: the number of questions that are sent in by M.L.Cs. often requiring researches into records for years past entail an ever increasing load of work on Mamlatdars, and it is therefore not possible for a Mamlatdar to cope with all his work without assistance where tagai works are numerous.

Bombay Suburban Division

No takavi was advanced in this district.

13. AREA

(Columns 10, 11 and 12 of Appendix III)

Northern Division

There was a net increase of 9,691 acres in the occupied area as shown below :---

						Acres.
	Ahmedabad	••				- 1,358
•	TECHTECO	• • •	••	• •		+5,073
	Panch Mahals	••	••	••		+2,970
	Broach	••	••	••	•• .	+ 1,828
	Surat	••	••	••		+ 396
	Thana	••	••	• •	••	+782
	-					
				Net Total		+ 9,691

The increase is in all districts mainly due to unoccupied land having been taken up for cultivation.

The decrease in Ahmedabad is only technical and is chiefly due to the transfer of lands from columns 10 and 12 to column 9 consequent on the decision in the Dholera suit (Government Resolution, Legal Department, No. 1439 dated 23rd July 1923) and to the correction of mistakes in area found at the detailed survey. In Ahmedabad about 10,000 acres of nominally unoccupied land which had previously been cultivated under yearly leases were taken up as occupancies.

Central Division

In the year of report there was a net increase of 8,660 acres in the occupied area of the Division. The increase or decrease in the different districts was as shown below :---

					Acres.
Ahmednagar	••	••	•		- 778
East Khande	sh	••	· 	•••	+870
West Khand	esh		••	• •	+7,556
Nasik	••	••	••		+1,295
Poona	••	• •	••		-2,247
Satara	••	••	• •		+750
Sholapur	••	• •	••		+1,214
					+8,660

In the Ahmednagar district nearly 1,428 acres of waste land were given out for cultivation, but as against this there was a decrease in the occupied area of 2,206 acres :---

1,265 acres on account of forfeiture of land.

- 941 acres on account of transfer to the Bhandardara Tank and Pravara Left Bank Canal and other non-agricultural purposes.
- 2,206

The decrease in the Poona district was mainly due to the transfer of a considerable portion of occupied area to the Tata works.

The increase in the remaining districts represents the land given out for cultivation from forests and from unassessed waste.

Southern Division

There was a net increase of 9,624 acres in the gross occupied area in the year under report as shown below :—

					Acres.
Belgaum	••	• •		••	1,625
Bijapur	••	••	••	••	1,365
Dharwar	••	••	• •	• •	2,943
Kanara		• •		• •	3,300
Kolaba		• •	••	••	-118
Ratnagiri	• •	• •		••	509
0					

9,624

The increase in Belgaum, Bijapur and Dharwar was mainly due to waste and assigned lands having been taken up for cultivation; in Kanara also it was due to the grant of waste lands for cultivation and forest lands on special term leases; and in Ratnagiri to the grant of unoccupied lands in inam to military officers and soldiers.

The decrease in Kolaba was mainly due to occupied land having been taken up for non-agricultural purposes.

Bombay Suburban Division

There is an increase of 55 acres reported in the gross area of the district which is due to survey corrections.

There is a net decrease of 876 acres under occupied assessed land. It is due chiefly to the acquisition of land for building and industrial development purposes.

14. COERCIVE PROCESSES

(Appendix V)

Northern Division

The following table exhibits the extent of coercion resorted to in different forms for the collection of land revenue :---

Year. 			Number of notices of demand issued under Section 152, Land Reve- nue Code.	Penalty under section 148, Land Revenue Code, Number of Kabjedars.	Distraint and sale of moveable property under Section 154, Land Revenue Code. Number of Kabjedars.	Sale of immoveable property other than land under Section 155, Land Reve- nue Code. Number of cases.	and sale of occupancy under section 153, Land	
								2
			1924 25	••	••		9,193	. 689
1923-24	••	••		5,949	249	27		106

The increase in coercive processes (except forfeiture under section 153, Land Revenue Code) was due to more revenue having to be collected than last year, and the collection of Local Fund Cess on suspended and remitted land revenue also contributed to it.

Out of the 689 cases of penalty under section 148, Land Revenue Code, Ahmedabad and Thana were responsible for 236 and 290 respectively. In Thana this measure is found necessary as a warning to absentee landlords while in Ahmedabad it was resorted to more generally than usual owing to the contumacy of certain defaulters in the South Daskroi Taluka.

Cases of distraint and sale of moveable property were confined to Ahmedabad, Kaira and Surat, while action under section 155, Land Revenue Code, was taken only in one case in Ahmedabad and in two cases in Broach. In Ahmedabad the arrears were paid up before the sale was conducted, while in one case in Broach the defaulter having paid up the arrears the sale was cancelled; property was thus actually sold only in one case, in Broach.

Forfeiture of land was resorted to in all the districts of the Division except Broach, and out of the 58 cases Ahmedabad was responsible for 32. These measures were necessitated owing to the contumacy of certain Talukdars. The forfeited lands of the Talukdar of Noli in the Dhandhuka Taluka were with the sanction of Government subsequently restored to him on payment of the arrears.

In no case was the defaulter arrested or imprisoned.

Central Division

The following table compares the extent to which coercive processes in different forms had to be resorted to for the collection of land revenue in the year of report and in the previous year :---

Year.	Year.		One-fourth fine under Section 148, Land Reve- nue Code.	Distraint and sale of move- able property under Section 154, Land Revenue Code.	property other than	Forfeiture and sale of occupancy under Section 153, Land Revenue Code.
			Number of Kabjedars.	Number of Kabjedars.	Number of cases.	Number of cases.
	•••••	9.924	1,851 2,044	228 316	1 5	186 209

While there was a slight increase in the total number of notices issued under section 152, Land Revenue Code, there was a welcome decline in the number of cases of other forms of coercion,

Southern Division

The following table compares the extent of coercion in different forms employed for collection of land revenue :---

	Year.	i	Number of notices of demand ssued under Section 152, Land Reve- nue Code.	Penalty under Section 148, Land	Distraint and sale of move- able property under Section 154, Land Revenue Code.	Sale of im- moveable property other than land under Section 155, Land Reve- nue Code.	Fcrfeiture and sale of occupancy under Scc- tion 153, Land Reve- nue Code.	
				Number of Kabjedars.	Number of Kabjedars.		Number of cases,	
1924-25 .		•••	1,411	4,877	107		• 192	
1923-24 .			1,660	3,397	137		129	

The decrease in the number of notices under section 152 occurred in all districts except Dharwar and Kolaba. Dharwar and Kanara alone are responsible for the increase in the number of persons proceeded against under section 148. The decrease in the cases of distraint and sale of moveable property under section 154 occurred in Kanara, Kolaba and Ratnagiri.

The number of forfeiture cases under section 153 increased in Belgaum, Bijapur and Dharwar and decreased in Kanara. No such measures were needed in Kolaba and Ratnagiri.

No action under section 155 was found necessary in any district.

Bombay Suburban Division

The peculiar difficulties experienced in this district in the collection of land revenue are that many khatedars live in Bombay, the addresses of some are not known, and changes in address are not reported. As land and property change hands frequently, mutations are varied and voluminous. Intimation of the place, time and amount of payment is sent to every khatedar, whose address is known, a week before the assessment becomes due.

Forfeiture is found to be the most efficacious method of recovery though it is resorted to only in extreme cases. In cases in which land was restored to the occupants, the payment of arrears together with the current demand was made a condition precedent to restoration.

There was no case of arrest under section 157, Land Revenue Code. x 1291-5

15. TRADE AND INDUSTRIES

Northern Division

The outturn of cotton was fairly good and as the prices ruled high agriculturists made good profits. As the Cotton Transport Act continued to be applied to the area south of the Narbada river, adulteration of superior cotton with that of low quality was largely stopped and the agriculturists of the protected area realized high prices.

In Ahmedabad 15 factories were added to the existing number (158) and one was struck off the register leaving 172 at the close of the year. Depression in the mill industry continued and several important firms went into liquidation, but these failures were due rather to mismanagement than to bad trade. There was no important strike of mill-hands. Three serious accidents occurred in the mills causing the loss of 29 lives and injury to about 30 persons.

The Railway line from Dholka to Dhandhuka was opened for passenger and goods traffic early in 1925. It connects Gujarat with Kathiawar, traversing the Bhal region of the Dholka and Dhandhuka Talukas of the Ahmedabad district, and the cotton and wheat trade of these talukas will benefit by its opening.

In Kaira one of the two textile mills at Nadiad worked throughout the year. The Gins and Presses and the Rice and Flour Mills also functioned.

The lime industry in Dohad in the Panch Mahals remained in a fairly prosperous condition, and the Shivrajpur and Bamankua Manganese Mines made steady progress.

In Broach there were 3 mill strikes but better counsels prevailed and a settlement was soon arrived at. The Ginning and Pressing factories worked for nearly 3 months during the cotton season; a new gin was opened at Kareli by the Kareli Co-operative Society and a new press started work at Amod. The river-borne trade at the ports of Broach and Kavi showed some increase both in imports and exports.

Ginning factories in Surat worked satisfactorily. The local silk and embroidery business functioned as usual.

In Thana the depression in trade continued, and the Wadia Woollen Mill closed down and went into liquidation. Trade in timber and bricks continued dull owing to less building activity and the increasing use of reinforced concrete.

Central Division

The cotton crop was on the whole fair in the districts of East Khandesh, West Khandesh, and Ahmednagar. In East Khandesh the outturn was smaller than expected, and in West Khandesh it was below the normal. Prices were lower than in the previous year. The two Spinning and Weaving Mills at Jalgaon and Amalner did well on the whole. The New Laxmi Narayan Cloth Mill at Chalisgaon opened work from 27th May 1925. The new Handloom Kshatriya Spinning and Weaving Company started in Dharangaon is preparing sarees and khadi on a fly shuttle loom.

There were in West Khandesh 52 cotton gins and 25 presses.

The number of ginning factories in the Nasik District was 14 as against 9 in the preceding year. All of these except two in the Baglan taluka had sufficient work.

As regards the cotton industry at Sholapur the Collector remarks :---

"The textile industry as a whole has been undergoing a period of depression since 1922 and matters have now gone from bad to worse. A crisis has now been reached in which the majority of mills in Bombay are faced with the possibility of either working at a loss or closing down altogether. The local mill industry has naturally been affected by this state of affairs, but at this time it is distinctly superior to that in Bombay. Stocks of cloth and yarn with mills here are large but are mostly sold and not unwieldy, and though the future causes some anxiety and margins of profit are difficult to obtain. I see no reason for undue pessimism. The local industry has managed to keep its head above water in spite of the fact that the year under review opened with small margins of profit, slack demand and distinctly poor off-take. The accumulated unsold stocks of Bombay mills also created a feeling of insecurity and affected both the buyer and the seller. Prices since July 1924 have fallen approximately: in cloth 19 per cent. and in yarn 25 per cent. This state of affairs is not likely to improve unless the mills at large centres like Bombay and Ahmedabad work short time. Though the Bombay mills have recently cut down the mill labourers' wages, the local mills have resolved not to take any such step here."

One more mill has been constructed at Sholapur during the year under report and is working with electric power. Four more mills are in contemplation at Barsi, and two out of them are already under construction. The fact that new mills are springing up in East Khandesh and Sholapur shows that the depression in the cotton mill industry experienced in Bombay and elsewhere has not materially affected the industry on this side.

The Belapur Sugar Company which has recently been put in possession of the whole area required commenced the manufacture of sugar on 31st August 1924. During the season which ended in May 1925 the factory produced 2,088 tons of sugar and 1,232 tons of molasses. The latter was almost entirely sold to the Government Distillery at Nasik. The Company's relations with employees and the inhabitants of the neighbouring villages continued to be peaceful.

In Bhimthadi taluka of the Poona district there was an increase in the area under sugar-cane from 4,200 acres to 5,800 acres. The Nira Valley Sugar Factory had to be closed owing to the fall in the price of sugar brought on by heavy imports. The Hanuman Sugar Factory at Fursungi (Haveli taluka) though working on a moderate scale is reported to be in a good condition.

Trade and industries in Poona City suffered to some extent owing to the depression in the money market. The demand for cloth and food grain was moderate. The brass, silk, thread and other factories and the printing presses were busy as usual.

Nasik and Satara are mainly agricultural districts. A more favourable monsoon than that of the preceding year revived the trade in agricultural produce in the Satara district. Large quantities of jaggery, turmeric, and groundnut from the southern talukas, onions from Khandala

1

Mahal, chillies from Khanapur, and eggs from Man and Javli were exported.

Among the smaller industrial works may be mentioned the iron works started by Messrs. Cooper Brothers at Satara Road Station and the Deccan Match Factory of Messrs. Chitale Brothers at Karad.

The town of Yeola (Nasik) is famous for its gold lace industry. The demand for its gold lace articles was, however, slack owing to the partial failure of the cotton crop in Khandesh.

Hand-loom sarees and rough cotton cloth are woven in the West Khandesh district. The Collector, Mr. Knight, observes :---

"My own impression based on my acquaintance with Malegaon in 1916 and 1919 is that the Momin weaver class in Dhulia at any rate is doing better than it used to and is fairly successfully competing with power machinery."

The minor hand-loom industries produced carpets, rough blankets and sarees in the talukas of Junnar, Purandhar and Indapur valued roughly at 2 lakhs of rupees.

The Carpet Factory at Kunhe (Mawal taluka) was in good condition.

The Government Weaving School has now been shifted from Sinnar to Vinchur.

As regards the charka, the Collector of West Khandesh remarks :--

"Efforts to popularize the charka as a spare time industry among the agriculturists have been few and unsuccessful, nor can it be considered an economically sound proposition. The agriculturist certainly would do better with something to occupy his unavoidable periods of leisure other than law suits and weddings. But I question the utility (there is no doubt of his unwillingness) of a mechanical and monotonous occupation like spinning; so far nothing has come of the chicken farming proposals, but some Mahars do weaving fairly successfully."

Oil Mills.—The country oil mills in the Bhimthadi taluka (Poona) had on the whole a busy year. The oil mill at Dhond turned out oil worth Rs. 20,500 and cake valued at Rs. 57,000.

Miscellaneous Industries.—The American Mission at Ahmednagar discontinued their carpet and hand-loom industries a year ago for want of demand. The other branches—metal factory and carpentry department—remained at work. The Automobile and Electric Departments continue to expand.

The trade in timber in Nandurbar, Navapur and Taloda talukas is a big business.

The Tannery at Wanowri (Poona) has been in a position to export leather and hides in large quantities.

The Glass Factory at Talegaon Dabhade worked satisfactorily. It has now commenced to manufacture China earthern wares.

The Ravivarma Press at Karla and the Tikekar Textile Factory and metal works at Tikekarwadi near Sholapur continue to make good progress.

Southern Division

The chief articles of export are (1) cotton, (2) jowari, (3) wheat, (4) rice, (5) timber, (6) betelnut, (7) tobacco and (8) fish.

2. The cotton ginning and pressing factories in Belgaum worked well. Adverse winds in December damaged the cotton crop in Bijapur and thereby caused a depression in trade. In Dharwar the cotton trade suffered on account of partial failure of the crop and a serious boycott of dalals in Gadag. Four ginning mills were newly started in Dharwar (2 in Ranebennur Taluka and 2 in Bankapur Taluka).

3. Jowari and wheat trade in Bijapur was adversely affected by the bad season. The rice trade in Kolaba did well. The timber market in Kanara continued dull, while the betelnut, cardamom and pepper trade was brisk. Tobacco trade in Belgaum was dull. The fish trade in Kolaba did well.

4. There was a slump everywhere in handspinning. Airani "Kamblis" in Dharwar are finding a good market, as also the saris of Ilkal and khans of Guledgud. Saris, dhotis, carpets, etc., are manufactured by the Criminal Tribes Settlers in Bijapur; the prices are reasonable, but the finish is poor as the industry is still in its infancy. The hand-weaving industry in Belgaum is slack on account of the fall in prices of weaving materials. The Gokak Falls Mills did well.

5. The tile factories at Khanapur (Belgaum), Mora (Uran in Kolaba), Malvan (Ratnagiri) and Manaki (Kanara) had a good season as also the bangle industry at Ghodgeri. Building stones of Badami and lime stones of Bagalkot were in much demand. The Sardine oil factory at Honavar was at a stand-still. The mango pulp factory at Ankola produced 26,200 tins of pulp against 100,000 tins in the previous year. Copper and brass pot industries at Alibag and Roha and cart wheel industry at Panvel had a good year. The Vizayadurga button factory (Ratnagiri) did well, the value of the outturn being Rs. 62,000 against Rs. 44,00 of the preceding year. The Sanikatta (Kanara) salt works turned out 2½ lakhs maunds of salt. The salt trade in Kolaba was slack. Of the two nib factories at Malvan one was closed and the other turned out nibs worth about Rs. 33,000.

6. The Tata Company continued to supply electrical energy from their power houses to mills in Bombay. Extension of their lines is still in progress. Licenses under the Indian Electricity Act, 1910, have been given for Gadag, Hubli and Panvel and proposals received for electrification of the towns of Dharwar, Bijapur and Belgaum.

7. Public motor services are largely on the increase. About 100 motor cars are plying in Belgaum on almost all the main roads to the great convenience of the people, and it is necessary to secure larger grants for road repairs if this necessary convenience is not to be hampered at the outset.

Bombay Suburban Division

The three flourishing and outstanding industries in the district at present are Match Factories, Cattle-stables, and building with the ancillary activities of motor transport, quarrying, brick making, lime extraction, milk selling and traffic in grass and fodder. All these are new industries reflecting the development of the suburbs. Besides these, the old industries like the cotton mills of Kurla, the dyeworks at Chembur and Kolikalyan, the cigarette factories in Santa-Cruz and Bandra and the tanneries at Kurla are doing fairly well.

The usual seasonal trades in fresh vegetables, mangoes and fish bring in a lot of money to the gardeners and fishermen of Salsette.

There are four factories in Ambernath Taluka near the station. The Leather-cloth and the Woollen factories of Messrs. Dharamsi Morarji and Co. and the Match Factory of the Western India Match Co. did good work; but the Chemical Factory had a somewhat hard time. This area has not yet developed to the extent that was expected.

16. PRICES

Northern Division

There were only slight variations in the prices of food-stuffs during the year, staples costing from 6 to 9 seers per rupee. The price of salt fell by reason of the reduction of Salt Duty. The price of sugar decrease but that of ghee and milk remained stationary.

Cotton prices ruled high and this greatly benefited the cultivators. In Broach seed cotton rose from Rs. 216 to Rs. 240 per Bhar (24 local maunds of 40 seers). Cotton, which was quoted at Rs. 732 per Bhar in August 1924, declined to Rs. 552 in January 1925 and rose again to Rs. 612 in March; it fell to Rs. 576 in May and remained at that figure till the end of July 1925. In Thana the prices of grass, lime, charcoal and betel leaves were lower than last year.

Central Division

There was a rise in the prices of food grains in the districts of Ahmednagar, West Khandesh, Poona and Satara. This rise was noticeable in the case of wheat and bajri. The rise in prices in the Ahmednagar district was due to heavy export and small import of these grains during the year under report.

In East Khandesh the prices of jowari and wheat rose in the last five months of the year, while the price of bajri which was Re. 1 for 3 s. 8 ch. at the beginning of the year fell to Re. 1 for 4 seers and remained stationary till the end of the year. In the Nasik district there were no remarkable fluctuations in the prices of food-stuffs and other commodities, though the prices of kharif grains showed a slight tendency to rise and those of the rabi grains to fall owing to the unfavourable early rains and favourable late rains.

In Satara there was a slight increase in the prices of food-stuffs, except wheat and Rangoon rice, due to the fact that the rainfall was untimely and insufficient for rabi crops and those crops were also affected by severe cold at the time of harvest.

In Sholapur there was an increase in the prices of food-stuffs except jowari.

Generally speaking prices do not yet show a downward tendency.

Southern Division

Good harvests resulted in a fall of price of jowari in Belgaum from 6 s. 2 ch. to 8 s. 7ch. In Dharwar prices were stationary. Prices rose slightly from 8 s. 9 ch. to 8 s. 5 ch. in Bijapur. Tur dal was sold in Belgaum at 5 s. 7 ch. as against 4 s. 13 ch., but remained stationary in Dharwar and was imported in Bijapur.

Rice was stationary in Kanara and a trifle easier in Kolaba, varying from 62 to 65 rupees a khandi against Rs. 70. In Ratnagiri rice and nagli showed a slight rise. Kolaba and Ratnagiri have to depend mainly on Bombay and other markets for the supply of food-stuffs and the prices are regulated by prices prevailing in Bombay and elsewhere.

Cocoanuts in Kanara rose from Rs. 7-8-0 to Rs. 8-8-0 per hundred owing to larger demand and less yield. The price of pepper, cardamom and betel-nut also rose.

Kadbi was sufficient and cheap owing to the favourable season, but cotton had a bad year and prices were poor.

Bombay Suburban Division

Rice is the staple food as well as the principal crop of this district.

Its price rose slightly during the year from 5 seers 8 chataks to 5 seers. The price of other materials and necessaries of life fell to a small

extent.

17. LABOUR AND WAGES

Northern Division

The wages of both skilled and unskilled labour remained as high as in the previous year, that of skilled labour varying from 2 to 3 rupees and that of unskilled labour varying from eight annas to one rupee per day. In spite of depression in the mill industry there was no unemployment. Organization among skilled workmen is certainly making headway. The 'Hali' system prevailing in Surat and parts of the Thana District, under which money is advanced to labourers for their marriages or other social functions on their undertaking to work for the landlord is now dying out, owing to the labourers leaving the service of their masters shortly after their marriage and before the debt is paid up.

There is considerable want of employment among middle classes depending on clerical work for their maintenance.

Central Division

The rate of wages of skilled labour showed a slight tendency towards rise except in the districts of East Khandesh and Nasik. The increase, especially in Ahmednagar, was due to better seasonal conditions and to increased building activity which was noticeable specially around Poona in Bhamburda and Yerandavna. The Collector of West Khandesh

erves that the supply of skilled labour was not quite equal to the

demand and in out-of-the-way-places decent masons and carpenters were unprocurable. This was to a certain extent due to the great demand for this class of workmen at Nandurbar for rebuilding the houses demolished by the fire of April 1924.

The rates of unskilled labour were stationary in all districts except Ahmednagar and East Khandesh where there was a slight rise due to the favourable character of the season.

In West Khandesh the Collector remarks :---

"The ginning industry was dull, trade in cloth under depression and agricultural labour owing to comparatively poor crops had not any unusual demand."

In the Nasik district the construction work of the Security Printing Press and of the Central Jail at Nasik were an additional source of employment. These works and the railway workshops at Manmad Nandgaon and Igatpuri absorbed a good deal of unskilled labour otherwise required for agricultural operations. The felling works of the Forest Department at Badgi, Musla and Goldari in the Peint taluka also continued to absorb some labour.

Sufficient labour was available in the Poona district and there was a demand for it everywhere in the district except in parts of the eastern division where the crops failed.

In the Satara district agricultural labour was sufficient in spite of the periodical migration of labourers from the precarious tracts—especially Man and Khatav talukas and Khandala Mahal. These migrations are a normal feature and do not affect agriculture as the labourers return at the time of sowing. The number of such emigrants from the district in the year of report is estimated to be over 42,000 as compared with 48,000 in the preceding year. The Collector of Satara observes :—

"The condition of the labouring classes has improved. Their expenditure on the necessaries of life is small as compared with their earnings and a good year gives them comparative ease and comfort."

Southern Division

The attitude of labour was generally satisfactory.

The supply of labour was almost equal to the demand in Belgaum, but not in the cotton tracts of Dharwar or in the northern part of Bijapur. House building operations in Dharwar, Gadag and Hubli provided ample employment especially for skilled labourers who were masters of the situation and able to dictate their own terms. Labourers from the eastern part of Belgaum migrated, on account of the unfavourable season, to the more favoured neighbouring villages of Dharwar and Ramdurg State.

Labour in the Coast Districts showed no appreciable change. In Kanara the supply is sufficient along the Coast but is becoming scarce above-ghats owing to the demand of forest works, with the result that these tracts have to depend on labour imported from Goa and the neighbouring districts of Dharwar and Bijapur. The Tata Company in Kolaba imported several labourers from outside as they found local labour inefficient. Agricultural unrest prevails generally over the Kolaba District and the Collector remarks that there is perhaps no taluka in which some estate does not lie uncultivated from lack of labour. According to him, the main causes of the unrest are :---" revolt against the special tenures of landlordism; revolt against old customs, against the savkars' methods of dealing and against the increased insecurity of tenure of the tenants that has followed introduction of the Record of Rights."

The wages of both skilled and unskilled labour remained stationary, except in Ratnagiri where wages of skilled labour showed a tendency to rise owing to the construction of houses by Mahomedans who trade with Africa. Bombay continues to attract labourers from Kolaba and Ratnagiri with the result that wages there continue to rule high.

Bombay Suburban Division

The rates of wages remained fairly stable at about-

		Skilled.	Unskilled.
Male		Re. 1 to Rs. 5	As. 12 to Re. 1
Female	· · ·	••	,, 8 to As. 12
Child	••	••	,, 6 to ,, 8

Landlords always complain that they cannot get sufficient labourers. But the fact is that landlords do not like to pay increased wages. On the whole labour was plentiful. There was no slackness in building activities and the usual temporary immigrants from above-ghats who come in search of work were all absorbed.

18. PUBLIC FEELING AND THE PRESS

Northern Division

There is nothing particular to note under this head as bearing on the Land Revenue Administration.

Southern Division

Politics had no influence on the administration of land revenue and the Press made no attempts to interfere with the loyalty of the taxpayer.

The only feature of importance was the agitation of the tenants against the Khots in several villages of Guhagar Petha and Khed, Chiplun and Dapoli Talukas of the Ratnagiri District. The trouble is mainly due to wirepulling from outside. Both Collectors of Ratnagiri and Kolaba report that if the outside agency will only desist, there is every likelihood of matters coming to a satisfactory settlement.

The Pen Agris' strike in Kolaba settled last year has shown no signs of recrudescence. "Bandhs" have been repaired and jungle cleared. A similar strike in Alibag collapsed as suddenly and mysteriously as it began.

Bombay Suburban Division

The people are law-abiding. On the whole they appreciate the benefits of the British Raj and are very loval.

n 1901 - 6

19. SPECIAL MATTERS AND GENERAL REMARKS

Northern Division

Outlawry in the Kaira District has at last been put down with a firm hand, and this probably accounts largely for the better feeling towards Government which is now evinced in that part of Gujarat.

Mr. Garrett, Collector of Ahmedabad, writes :--"Railway extension between Dholka and Dhandhuka has been completed and the whole line has been opened for goods and passenger traffic and through connection made with Kathiawar. The full effect of this new line is not yet felt as trains do not yet run through from Ahmedabad to Bhavnagar without change. But already there are signs that the hitherto backward tracts of Western Dholka and the Dhandhuka Bhal will begin to develope.

Emigration and Immigration .- There is nothing noteworthy under this head except that some agriculturists from Native States in Mahi Kantha and Rewa Kantha immigrated in Prantij and Modasa Talukas and took up land for cultivation.

There is a regular influx of Marwadi and Kathiawadi labour to Ahmedabad. These people do not settle permanently but work very hard for some months and return with good wages. The Marwadi women work harder than the average local male."

Mr. G. M. Isani, District Deputy Collector, Ahmedabad, writes :-

"There has been a considerable movement of people from Idar raj, Cutch, Balasinore and other feudatory States to Prantij Taluka and Modasa Mahal. Suitability of the soil around Dhansura and Dehmai for cotton cultivation, good crops and high prices of cotton have also proved a great attraction to some people from the Charotar and the Panch Mahals to be on look-out for black cotton soil in the Mahal. The influx of the outsiders has accelerated the expansion of agriculture in Modasa. These outside cultivators are the pioneers of the cotton cultivation, which was practically unknown there only a couple of years ago. Naturally as a result of the coming in of the new settlers the value of the land has enormously appreciated to the benefit of the Government ex-chequer. In view of the active demand for land, the Collector has, from this year, stopped the shifting eksali cultivation which was a cause of fraud to the public revenue and a prolific source of profit to the corrupt subordinates."

Mr. Koreishi, Collector of Broach, writes :---

"Thirty-one certificates of identity against 42 in the preceding year were issued to emigrants for Africa.

The emigration was mainly from Broach and Ankleshwar talukas and the emigrants were minors and wives of Bohras who have settled in South Africa. There were no new emigrants on account of restrictions laid down by the Colonial legislation.'

Mr. Jayakar, Collector of Surat, writes :---

"Devi movement has completely died out and Kaliparaj people, who had abstained from drinking to a certain extent, resumed their old drinking habits and consequently some additional liquor shops had to be opened during the year under report. However, owing to the raising of toddy duty, there was a decrease in the grant of domestic consumption licenses for toddy.

Rao Saheb M. M. Gandhi, District Deputy Collector, Surat, writes :---

"After the non-co-operation and the Devi movement abated the Kaliparaj classes renewed their former habit of drinking liquor and toddy. There were cases of illicit distillation of liquor. Such cases were brought to book. Three liquor shops that were temporarily closed on account of the Devi movement in Mandvi taluka have been re-opened. The consumption of liquor was found to be more than that of the last year among the Kaliparaj people."

Cotton Transport Act .- Mr. Jayakar, Collector of Surat, writes :-

" There was a good change in the issue of cotton licenses by the delegation of the power of issuing cotton licenses to village cotton committees. This alleviated the spirit of opposition against the working of the Act which prevailed during the previous year.'

Mr. H. H. Diwan, District Deputy Collector, Kaira, writes :---

"There were 10 dacoities in the Anand Taluka as against 23 in the previous year and 4 as against 6 in the previous year in the Borsad Taluka. The crime on the whole has decreased during the year. All the notorious dacoits having been arrested and sentenced, the danger from that source has completely disappeared and the Sub-Division is enjoying security of person and property. The efforts of Government in this direction have met with complete success and the complete eradication of the outlaw pest has restored popular confidence in Government. The people have realized that it was Government and Government alone who could save them from this pest."

Progress made in connection with the maintenance and repairs of small irrigation tanks classed as efficient and retained in charge of the Revenue Department.—A grant of Rs. 21,000 was sanctioned by Government for the financial year 1924-25, in their telegram No. 9336 dated 28th April 1924 and it was distributed as shown below in proportion to the himayat assessment on the tanks to be repaired :—

					Rs.
Ahmedabad	••				7,500
Kaira	••				5,000
Broach .	••	••	• •	••	1,300
Surat	••	••	•		6,900
In reserve	with th	e Commissi	oner		20,700 300
	-				21,000

Details as regards the number of tanks repaired and the amount spent in each district are given below :---

Name of dist	Name of district.			ber of tanks epaired.	Amount spent on repairs.		
					Rs.		
Ahmedabad	••	••	••	20	7,138		
Kaira	••			36	4,576		
Broach	••	••		18	1,111		
Surat	••	••	••	25	6,697		

In Ahmedabad the works were carried out by a special agency appointed for the purpose, while in other districts the execution of works was entrusted either to Local Board Overseers or was done by contract and supervised by the local revenue staff.

Central Division

Scarcity.—As reported in the Administration Report for 1923-24, scarcity prevailed in that year in parts of Ahmednagar, Poona, Satara and Sholapur districts; consequently relief measures such as distribution of dole to the infirm and to the inferior village servants, bonus to patils, etc., which were begun in 1923-24 had to be continued in the year of report according to the circumstances of the different affected parts. The expenditure incurred on these relief measures in the year 1924-25 was as shown below :---

	Dole to the infirm.	Dole to inferior village servants.	Bonus to Patils.
Ahmednagar	475		3,302
		18,187	3,110
Sholanur	. 33,086 	24,649 708	2,594 130

Grass operations.—One grass load of waggon was brought from Palghar to Kondapuri in Sirur taluka (Poona district) where scarcity of fodder was felt for a time. It was sold to the public at a reduced rate.

Grass depôts were opened in the Satara district at Lonand, Koregaon, Kundal and Bhilavdi Railway Station.

Water Supply.—Rs. 8,937 and 1,493 were spent in Satara and Sholapur districts respectively on water supply.

Tagai.—Tagai amounting to, Rs. 1,49,254 was given in Satara district for digging or deepening old wells and for purchasing fodder.

Special operations for the storage of fodder as a famine preventive measure were undertaken in the Sholapur and Ahmednagar districts, in the former by Government agency and in the latter by way of a loan to the District Local Board. The quantity of kadbi stored in the Sholapur district is lbs. 9,991,103 and that stored in Ahmednagar district is lbs. 14,850,942.

Another measure undertaken for famine prevention was the selection of sites by a special officer for the sinking of irrigation wells. This was started first in the Shrigonda taluka of the Ahmednagar district and a special report regarding the work done last hot weather in this connection has already been submitted to Government.

The long standing question of formulating proposals for the giving out of the extensive areas of waste lands in the West Khandesh district was taken up afresh and definite proposals in the matter have now been placed before Government. On this, the Collector of West Khandesh, observes :---

"The most surprising point in this connection is the comparatively small area really available—*i.e.*, both worth cultivating and situated in a part of the district where decent cultivators will go. There is no doubt that great care will have to be taken in future to prevent the great demand for land leading to reckless reduction of forest areas and probable disastrous alterations of rainfall and water levels."

Speaking of retrenchment, the Collector of Nasik, says :---

"Owing to the heavy retrenchment effected in this district work is steadily deteriorating although attempts are being made to recruit men of good qualifications from among the non-Brahmins."

Southern Division

His Excellency the Governor's visit.—His Excellency the Governor accompanied by Lady Wilson visited Belgaum, Bijapur and Kanara and received addresses from local bodies in the first two districts. Congress and Conferences.—The 39th Indian National Congress was held at Belgaum in December 1924, together with all its concomitant conferences. The All-India Non-Brahmin Conference was also held at Belgaum during the Christmas week. The Conferences passed off smoothly and attracted people from all over India.

National Baby Week.—The National Baby Week was celebrated with great success in Belgaum in April and in Dharwar in June 1925. In Dharwar 800 babies were brought to the Show and 122 prizes were awarded.

Red Cross Work.—As remarked last year, there were various activities in connection with the Red Cross Work in Dharwar, Kanara and Belgaum. The total collections of the Fund in Dharwar amount to nearly Rs. 1,25,000. The Committee has recently decided to convert the War Memorial Midwifery Institute, the foundation stone of which was laid by Lady Wilson in June 1924, into a Maternity Hospital, which will remove a long-felt want of the district. Kanara District Committee have invested their funds in 3½ per cent. Government Promissory Notes bearing an annual interest of Rs. 260, which is utilized for the equipment of Taluka dispensaries. The Belgaum District Committee is also progressing satisfactorily and is well supported by the ladies of the Military Station.

Agriculture and Co-operation.—Famine Fodder Reserves have been established at Athni and at Shedbal. The former is managed by the Taluka Association with a Government grant of Rs. 15,000 and local contributions of about 1,000 cart-loads of fodder worth Rs. 13,000 and of Rs. 7,000 in cash, while the kadbi depôt at Shedbal is managed departmentally by Government.

The Athni Taluka Development Association held Annual Cattle Show at Athni. Taluka Development Associations are being started in almost all Talukas in Dharwar and are becoming very popular.

In Dharwar demonstrations of steeping jawar seed against smut were held and 9,225 copper sulphate packets were distributed through the Taluka Officers. A promising beginning was made in response to Government Order No. 6799 dated the 6th June 1924, Revenue Department.

In Kolaba the advantages of using selected rice seed and sulphate of ammonia for manure were demonstrated.

As regards co-operation little has been achieved in Ratnagiri. The Karnatic is well advanced and the activities of its societies are satisfactory. The Co-operative Implement Society at Hosritti has popularised the iron ploughs in the Karajgi Taluka where the power baling plant is working well. The Cattle-breeding Societies in Dharwar are showing a marked improvement. A good pure milk society has been started in Bijapur.

Floods.—Owing to the heavy rains in July 1924, the Tungbhadra had a record flood. Several villages on the banks of the river were swept away and kharif crops lost. Immediate relief in the form of timber and building sites was given to the distressed. The bridge on the Poona-Bangalore Road near Harihar collapsed and has caused a serious dislocation of traffic. It is now under repairs. Floods again gave trouble in Kanara. Twenty-three villages of the Honawar Taluka were seriously affected; families were rendered homeless, crops ruined. Subscriptions were collected and immediate relief was given. The Commissioner made free grants of one hundred Tali Palm trees. Government sanctioned a grant of Rs. 9,000. Tagai loans amounting to Rs. 12,555 were granted free of interest.

The phenomenal tides damaged 71 villages in Kolaba. The damage done to crops is estimated at Rs. 1,50,000 over an area of 3,500 acres. The necessary repairs to bandhs were executed promptly by villagers concerned and excepting one loan there were no applications for Government assistance.

Indian Territorial Force.-In view of the poor response to the Indian Territorial Force, special committees were formed by the Commissioner who attended a meeting where many recruits were secured. As a result of this move active measures have been taken by District Officers to form Recruiting Committees and about 300 applications for enrolment have been received most of which are from Lingayats. Special efforts have been made to secure Lingayat Platoons in Belgaum, Bijapur and Dharwar. The Lingayats are backward in many ways. Their leaders are disunited. A joint effort for a common cause will serve to bring the leaders together. There can be little uplift until this object is secured and for this reason the Commissioner has taken special pains to stimulate recruiting among Lingayats. They make good soldiers as was proved by the Special Company raised in 1917 which, so the Commanding Officer informed the Commissioner, showed special aptitude in Machine Gun drill.

Measures for the destruction of wild pig.—Destruction of pigs was very disappointing as only 560 pigs were destroyed in Kanara. Two more Co-operative Societies have been organized on the lines of Hulihond to erect pig-proof walls at Hungund and Nandikatta. The cultivators have a firm belief that this is the best remedy and lands considerably go up in value once a wall is contemplated. The success of this method has yet to be proved and the Commissioner will look into the question on tour.

Leper Collections.—In response to His Excellency the Viceroy's Leprosy Fund appeal District Executive Committees were formed in all the districts except Kolaba and the following subscriptions were collected :—

					Rs.	a.	p.	
Belgaum			•••	•••	943	0	0	
Bijapur			••		6,892		-	
Dharwar	••	•••	•••		5,962			
Kanara	••	• •	•• •		4,021			
- Ratnagiri	• •	••	••	••	4,218	12	3	

In view of the large sum collected in Kolaba for the Maternity Hospital no attempt was made to raise funds for the Leprosy scheme. The Collector, however, addressed the local bodies which did not respond to the call. *Emigration and Immigration.*—Owing to the bad season, there was in Belgaum and Bijapur the customary temporary emigration from affected areas to more favoured parts. Villagers of Parasgad in Belgaum migrated to the neighbouring talukas of Dharwar and to the Ramdurg State. Those of Sindgi in Bijapur went to Sholapur and parts of Hyderabad (Deccan) which had bumper crops. Seasonal emigration of labourers from Kolaba to Bombay continued and certificates were granted in 25 cases to Mahomedans going from the Southern talukas to South Africa.

In Kolaba, in addition to the immigration of Beldars and Dhangars from the Deccan and Kharwas from Gujarat, labourers were imported by the Tata Company from the Deccan.

Bombay Suburban Division

Matters of special interest in the district are the pending electrification of the Suburban Railways and the opening of the Central Salsette Railway. At present it takes nearly three hours for a man to go from Borivli to Bombay and back. When the service is electrified nearly half the time will be saved and residence in the suburbs will become more popular. The Central Salsette Railway will assist in opening up the Chembur area where a large number of developed plots for erection of bungalows is awaiting sale. The Harbour-branch Railway now provides an alternate and quicker route into Bombay from Kurla.

General remarks and conclusion.—The year was a prosperous one on the whole. The boom in land has disappeared and general trade was dull. But the suburban trade, depending on catering for the local needs of Bombay, flourished. The Koli fishermen and the Malis and Panchkalshi agriculturists make good steady incomes. The large number of buildings erected in the Khar and Chapel Road Schemes helped the building trade considerably.

The Island of Juhu is becoming a favourite bathing-place to which scores of motor cars come on Saturdays and Sundays. Steps are being taken to conserve the special amenities of the island. The greatest desideratum at present to make the suburbs from Bandra to Andheri improved residential area is electric power, and this is likely to be introduced in the near future.

Emigration and Immigration.—There was the usual seasonal immigration of labourers.

EXTRACTS

Northern Division

J. H. GARRETT, Esq., I.C.S., Collector of Ahmedabad.

Famine Relief.—Three schemes of fodder storage at Dhandhuka, Remalpur near Viramgam and at Talod Station in Prantij Taluka were sanctioned by Government and brought into operation. According to the terms of the contract the first year's storage amounted to 6½ lakhs of lbs. and this has been stored. These schemes will of course not meet the fodder demand in a year of scarcity but they will provide reserves to meet local disaster and as a preliminary to extensive operations. They have the advantage of costing nothing to Government as no disbursement is to be made except when grass is taken. On the other hand the contractors make an annual payment to Government for the rights to the surplus grass remaining after the storage of the stipulated quantity. Nor is the Revenue Department required to supervise the storage as this is all done by and at the risk of the contractor. The scheme is a good one from all points of view. Its only drawback is that the quantity of grass is very small.

Other events.—The improvement of water supply for purposes other than irrigation has received much attention.

Boring by large machines has continued throughout the year. The results have been most successful in Virangam which is naturally suited to this form of water supply. In Dhandhuka a very deep boring is in progress but has not yet reached water. Another boring is in progress at Utelia in the Bhal. Both these are experiments and future development in this tract will depend on the results.

LAND REVENUE ADMINISTRATION REPORT

B-SIND

P. R. CADELL, Esq., C.S.I., C.I.E., I.C.S., Commissioner in Sind.

1. SEASON

The season under report was on the whole more favourable than the preceding one. The inundation was very satisfactory as the water-supply in almost all the canals exceeded the actual requirements and the full supply level in them was maintained for a longer period than usual. The river rose somewhat late for the season, resulting in reduction of area under rice crop, but it began to rise steadily about the middle of June and continued to do so gradually till it reached the fair irrigating level of 13 feet at Bukkur on the 19th July. This level and over was maintained for a period of 50 days against only 16 days in 1923, 32 in 1922, 28 days in 1921 and 25 days the average of the previous three years. On the Kotri gauge, the fair irrigating level of 17 feet was first recorded on the 4th July. This level and above lasted for a period of 86 days as compared with 76 days in the year 1923, 102 days in 1922, 55 days in 1921 and an average of 78 days for the previous three years. The highest readings for the year were 16.6 feet on the Bukkur gauge on the 11th August and 23.6 feet on the Kotri gauge on the 19th August as compared with 14.1 feet on the Bukkur gauge on the 30th August 1923 and 21.9 feet on the Kotri gauge on the 6th September 1923 and the recorded absolute maximum readings of 17.9 feet and 23.8 feet respectively.

The very high level of water in the river for an unusually long period combined with heavy rainfall caused floods which were destructive in their effects and exceptionally wide spread in their extent over considerable tracts in all parts of the province with the exception of the districts of Thar Parkar and Upper Sind Frontier. The seriousness of the resultant damage can be gauged from the fact that an area of about 108,000 acres of kharif cultivation was submerged causing a loss of about Rs. 22 lakhs to agriculturists, besides damage to house property and moveable property to the extent of about Rs. 7 lakhs. Special relief measures were therefore necessary to provide indigent sufferers in the flooded areas with food, clothing and the means of rebuilding their dwellings. With this object a Sind Relief Fund was started at Karachi. Its collections amounted to Rs. 57,000 which included grants of Rs. 30,000 and Rs. 3,000 from the Indian Peoples' Famine Trust and the Trustees of the N. M. Wadia Charities respectively. Apart from this, funds amounting to more than half a lakh of rupees were collected and expended locally in the districts of Karachi, Hyderabad, Nawabshah, Sukkur and

LAND REVENUE ADMINISTRATION REPORT

B-SIND

P. R. CADELL, Esq., C.S.I., C.I.E., I.C.S., Commissioner in Sind.

1. SEASON

The season under report was on the whole more favourable than the preceding one. The inundation was very satisfactory as the water-supply in almost all the canals exceeded the actual requirements and the full supply level in them was maintained for a longer period than usual. The river rose somewhat late for the season, resulting in reduction of area under rice crop, but it began to rise steadily about the middle of June and continued to do so gradually till it reached the fair irrigating level of 13 feet at Bukkur on the 19th July. This level and over was maintained for a period of 50 days against only 16 days in 1923, 32 in 1922, 28 days in 1921 and 25 days the average of the previous three years. On the Kotri gauge, the fair irrigating level of 17 feet was first recorded on the 4th July. This level and above lasted for a period of 86 days as compared with 76 days in the year 1923, 102 days in 1922, 55 days in 1921 and an average of 78 days for the previous three years. The highest readings for the year were 16.6 feet on the Bukkur gauge on the 11th August and 23.6 feet on the Kotri gauge on the 19th August as compared with 14.1 feet on the Bukkur gauge on the 30th August 1923 and 21.9 feet on the Kotri gauge on the 6th September 1923 and the recorded absolute maximum readings of 17.9 feet and 23.8 feet respectively.

The very high level of water in the river for an unusually long period combined with heavy rainfall caused floods which were destructive in their effects and exceptionally wide spread in their extent over considerable tracts in all parts of the province with the exception of the districts of Thar Parkar and Upper Sind Frontier. The seriousness of the resultant damage can be gauged from the fact that an area of about 108,000 acres of kharif cultivation was submerged causing a loss of about Rs. 22 lakhs to agriculturists, besides damage to house property and moveable property to the extent of about Rs. 7 lakhs. Special relief measures were therefore necessary to provide indigent sufferers in the flooded areas with food, clothing and the means of rebuilding their dwellings. With this object a Sind Relief Fund was started at Karachi. Its collections amounted to Rs. 57,000 which included grants of Rs. 30,000 and Rs. 3,000 from the Indian Peoples' Famine Trust and the Trustees of the N. M. Wadia Charities respectively. Apart from this, funds amounting to more than half a lakh of rupees were collected and expended locally in the districts of Karachi, Hyderabad, Nawabshah, Sukkur and

Larkana. The following is a brief statement of the main relief operations undertaken with the aid of these funds :---

			Rs.
Cash doles	••		86,100
Provision of timber and other build	ing mate	rials	4,200
Distribution of clothes	•.	• •	200
Advances free of interest	••	·	6,500``
Construction and repair of bunds	••		12,000
	To	tal	1,09,000

Relief in the form of cash doles was given to more than 30,000 persons. The amount of Rs. 4,200 spent in connection with timber and other building materials does not represent the value of the materials provided but merely the cost of the measures taken to place them within easy reach of the people. The materials themselves were provided free of charge either from reserved forests or from Government waste lands. The relief in some cases was administered through the agency of Taluka Relief Committees consisting of the Mukhtyarkar and a small number of local zamindars, and in others the distribution was made by the Deputy Collectors and Mukhtyarkars.

In addition to the above measures liberal remissions and suspensions both of takavi and land revenue dues were allowed and liberal grants of takavi were advanced to alleviate the sufferings of agriculturists; also where necessary, reserved forests were thrown open for free grazing by cattle.

The redeeming feature of the floods, however, was that large areas in the flooded tracts were brought under rabi cultivation though this cultivation suffered slightly from frost.

Outside the flooded tracts, there was a shrinkage of rabi cultivation dependent on the Jamrao and the Mithrao canals owing to deficiency of water supply.

Public health was generally good during the year. In the flooded localities malaria was as anticipated wide spread and of a virulent type. The epidemic would have proved more severe but for the timely measures taken to combat it. Government deputed eight Sub-Medical Service officers who rendered valuable assistance. Very large quantities of quinine were distributed free throughout the province, and for this purpose a special grant of Rs. 20,000 was placed by Government at the disposal of the Director of Public Health. This was supplemented by a further grant of Rs. 15,000 for the free distribution of quinine tablets among school children.

Influenza made its appearance in a few places but it was of a mild type excepting in the Warah taluka of the Larkana district where it attacked 46 persons of whom 20 died. Small-pox broke out in a number of places but it was severe only in the Sukkur district where it caused 577 deaths. Cholera was less prevalent than in the previous year. Plague appeared as usual in Karachi but the total mortality from it was only 35 which is the lowest record since its first occurrence in 1896.

The toal reported mortality among cattle from contagious diseases increased from 4,881 in the previous year to 5,519 in the year under report. This is principally due to the greater prevalence of contagions pleuro-pneumonia among sheep and goats. The two most dangerous diseases of cattle, rinderpest and homorrhagic septicæmia were responsible for only 988 deaths as against over three thousand in the previous year. 3,580 inoculations were performed and of the inoculated animals only seven died in the course of 29 outbreaks of rinderpest. Although the reported mortality among all animals exceeded the last year's figure, the year was a much more favourable one for cattle than its immediate predecessors. The cattle consequently recovered to a great extent from the effects of the poor grazing of the preceding year.

2. GROSS REVENUE

(Column 6 of Appendix I)

The total figures under this head show a net decrease of Rs. 3.53 lakhs or '90 per cent. over the preceding year's figures. The decrease is shared by all districts excepting Sukkur. It is mainly due to lands paying rates of assessment lower than the average ones having been brought under cultivation. Reduction in the area cultivated with rice crop which pays a higher rate of assessment is also responsible for decrease in gross revenue. The increase of Rs. 23 lakhs in the Sukkur district is attributed to increase in dubari cultivation and in the amount of assessment recovered from unoccupied unassessed cultivable lands.

3. ALIENATIONS

(Column 9 of Appendix I)

The total figures under this head show a net decrease of .03 lakhas over the figures of the previous year. This small decrease is contributed by all districts except Sukkur and Hyderabad.

4. NET GOVERNMENT REVENUE

(Column 13 of Appendix I)

There is a net increase under this head of Rs. 7.93 lakhs over the previous year's figures. The increase is shared by all districts except Thar Parkar and is principally due to the extension of cultivation consequent on the favourable inundation. Taking the districts individually, the Sukkur district shows the largest increase, viz., Rs. 3.23 lakhs. Next comes the Larkana district which gives an increase of Rs. 1.99 lakhs. In the Nawabshah and Upper Sind Frontier districts the increases amount to Rs. 97 and '95 lakhs respectively and in the Hyderabad and Karachi districts Rs. '55 and '38 lakhs respectively. The decrease of Rs. '14 lakhs in the Thar Parkar district is attributed to less cultivation in rabi on account of deficiency of water-supply in the Jamrao and the Mithrao canals. The figures in column 13 include 'hakabo' levied on alienated holdings and credited to the Public Works Department. This item amounted to Rs. 95,048 during the year under report against Rs. 84,956 in the preceding year.

5. MISCELLANEOUS GOVERNMENT REVENUE AS SHOWN IN THE TALEBANDS

(Column 16 of Appendix I)

The provincial total under this head shows a net increase of Rs. 14 lakhs over the previous year's figures as under :--

				Ks.
· .	Hyderabad	••		$\dots + 70$ lakhs
ъ.	Upper Sind Frontier	••		12 "
	Sukkur			18 "
•	Larkana	••	• •	• 04 "
•	Nawabshah	••	••	05 "
	Thar Parkar	• •	••	05 "
	Karachi	••	••	12 "

The noticeable increase of Rs. 70 lakhs in the Hyderabad district is attributed mainly to larger realizations from the sale of occupancy rights and from fines for unauthorized cultivation. The decrease of Rs. 12 lakhs in each of the Upper Sind Frontier and Karachi districts is ascribed to smaller realizations from the sale of trees and from fines for unauthorized cultivation. The latter cause is also responsible for the decrease of Rs. 18 and 05 lakhs in the Sukkur and Nawabshah districts respectively. The decrease of Rs. 05 lakhs in the Thar Parkar district is attributed to reduction in receipts from the ghee tax. The falling off of Rs. 04 lakhs in the Larkana district is due to smaller receipts from sales of occupancies.

The realizations from non-agricultural assessment are as under :-

					Rs.
Upper Sind Fi	ontier	••			4,174
Sukkur	••	••	••		35,868
Larkana	••	••	••	••	18,406
Nawabshah	••	••	••		$27,\!594$
Hyderabad	••	••	•• .		66,552
Thar Parkar	••	••	••	· · • •	14,980
Karachi	••	••	••	••	43,602
	•		, m		

Total .. 2,11,176

6. REMISSIONS AND REDUCTIONS

(Column 20 of Appendix I)

The total amount of land revenue remitted during the year was Rs. $6\cdot 10$ lakhs against Rs. $6\cdot 67$ lakhs in the preceding year. The net

decrease of Rs. 57 lakhs over the preceding year's figures is shared by all districts except Karachi and Nawabshah where there was an increase due to heavier remissions on account of floods. The decrease is chiefly due to the fact that remissions on account of insufficiency of water-supply, which had amounted to Rs. 4.62 lakhs in the previous year, fell to Rs. 1.11 lakhs in the year under report.

The other principal causes of remissions are shown below in comparison with the preceding year's figures :---

					1923	-24.	19	24-25.	
					R	8.]	Rs.	
(1)	Floods	••			·30	lakhs	3.24	lakhs.	. 1

(3)	Locusts	and other i	nsects		•46	"	$\cdot 22$	"	
(4)	Kalar	••	••	••	•19	**	·24	"	۰ ۰ .
· (5)	Uncultiv	vated port	tions of	survey					+
• •	number		••		·12	,,	•20	33 * 1	
(6)	Fallow a	assessment			•51	,,	•25	"	

The remissions under the head 'other causes' during the year under report amounted to Rs. ·14 lakhs against Rs. ·28 lakhs in the previous year.

7. SUSPENSIONS

(Columns 33 and 35 of Appendix I).

The amount of land revenue for which postponement was sanctioned was Rs. 52 lakhs against Rs. 87 lakhs in the previous year. Out of this amount Rs. 24 lakhs relate to the year under report and Rs. 28 lakhs to previous years. These figures are included in the balances outstanding at the close of the year and are dealt with in subparagraph 9 below.

8. REVENUE FOR COLLECTION

(Column 21 of Appendix 1)

As a result of the good inundation, the net revenue for collection after deducting remissions rose from Rs. 112.15 lakhs to Rs. 120.70 lakhs, *i.e.*, by 7.62 per cent. With the addition of the previous years' balances (Rs. 1.21 lakhs), the total amount for collection during the year came to Rs. 121.91 lakhs as against Rs. 113.63 lakhs in the previous year.

9. COLLECTIONS

(Columns 23, 29 and 32 of Appendix 1)

The collections on account of the current year's revenue were satisfactory, amounting to Rs. 120-28 lakls or 99.65 per cent. of the demand as against Rs. 111.48 lakhs in the preceding year. The percentages of the various districts are compared below:---

					1923-24.	1924-25.
-	Upper Sind F	rontier	•••		99.81	100
•••	Sukkur	••	••	••	99.72	99.93

10. BALANCES

(Columns 33-37 of Appendix I and Appendix II)

The total outstanding balance at the end of the year was Rs. 86 lakhs as against Rs. 1.24 lakhs in the previous year. It includes Rs. 1,433 shown in column 7 of appendix II since remitted and a sum of Rs. 78 in column 8 of the same appendix under correspondence for being written off. Out of the remaining balance, Rs. 746 have since been recovered, leaving a net balance for recovery of Rs. 83,619, of which Rs. 42,958 relate to former years and Rs. 40,661 to the year under report. The net balance is accounted for as under :-

	Rs.
(a) Under suspension	44,504
(b) Due from the Manager, Incumbered Estates and	
the Court of Wards in Sind	16,990
(c) Under legal process for recovery	$3,\!592$
(d) Mistakes	22
(e) Due from the khatedars of barani tracts in the	
Karachi district who migrated in search of	
pasture for cattle	18,511
Total	83,619

The figures under (a) show a net decrease of Rs. 23,258 as compared with the last year's figures. The recovery of arrears due from the Manager, Incumbered Estates, and the Court of Wards improved during the year, the outstandings being reduced from Rs. 29,863 to Rs. 16,990. A comparison of the net recoverable balances for the several districts. outstanding at the end of the year under report with those of the previous year shows that the Upper Sind Frontier district presents a clean sheet for the tenth year in succession. This reflects credit on the taluka officers of that district. All other districts excepting Karachi show a decrease. in their respective balances outstanding at the close of the year under report. The increase in the Karachi district is attributed to the fact that more than half of the outstanding balance is due from the khatedars of barani tracts who left their villages in search of pasture for their cattle. The Commissioner, however, thinks that the balance could have been reduced if the taluka officers concerned had taken precautionary measures under Chapter XI of the Land Revenue Code. The Collector's attention will be drawn to this fact.

By Government Resolution No. 5140, dated the 22nd July 1890, the previous year's balances which were shown as recoverable in appendix II for the year 1923-24 but were not recovered during the year have to be separately accounted for. These balances had decreased from Rs. 56,376 to Rs. 43,897 by the close of the year and are accounted for in statement B.

11. COERCIVE PROCESS

(Appendix V)

There was an increase in the number of notices issued under section 152 of the Land Revenue Code which is shared by all districts except Sukkur. The increase is chiefly due to the tightness of the money market.

No action was taken under section 148 of the Land Revenue Code in the Upper Sind Frontier and Hyderabad districts. In the remaining districts, viz., Sukkur, Larkana, Nawabshah, Thar Parkar and Karachi, the number of individuals proceeded against was 192, 39, 168, 255 and 70 respectively. There was a decrease from 19 to 16 in the number of distraints and sales of moveable property under section 154 of the Land Revenue Code. The figures in column 17, representing forfeitures, mostly under the Sind Fallow rules, show a reduction of 5,597 cases due to the suspension of the fallow rules in the lands comprised in the Barrage area and in the non-barrage area on the restricted canals.

12. MISCELLANEOUS REVENUE NOT INCLUDED IN THE TALEBANDS

The total amount of realisations under this head was Rs. 1,36,366 against Rs. 2,16,090 in the preceding year. The decrease is due to smaller receipts on account of interest on takavi advances.

н 1291-14

. 100

13. AREA

(Appendix IV)

There is a net increase of 6,170 acres in the total area of the Province (column 3). This increase is shared by all districts except Hyderabad and Thar Parkar. Taking the districts individually, the Sukkur district shows the largest increase, viz., 3,415 acres, which is attributed mainly to the formation of kachas by the river. The increase of 1,335 acres in the Karachi district is also due to the same cause. In the Larkana and Nawabshah districts the increases of 778 and 565 acres are ascribed mostly to the rectification of errors and to survey operations respectively. The increase in the Upper Sind Frontier district and decreases in Thar Parkar and Hyderabad districts are small and call for no remarks.

All the districts except Nawabshah and Karachi show decrease in the figures in column 4 (unassessed cultivable land), the aggregate decrease being 57,501 acres. This is almost entirely due to extensive cultivation in kacha and barani lands resulting from the favourable inundation and rainfall. The increase of 3,105 acres in the Nawabshah district is attributed to the rectification of errors and of 1,652 acres in the Karachi district is ascribed mostly to the transfer of certain surveyed lands to the head ' unassessed cultivable ' owing to the obliteration of boundary marks.

Column 5 (uncultivable land) shows a net decrease of 19,631 acres which is contributed by all districts except Upper Sind Frontier and Sukkur. The decrease is principally due to increase in khasmokal cultivation. The increase of 2,459 acres and 2,481 acres in the Sukkur and Upper Sind Frontier districts respectively is attributed partly to the formation of new kachas and partly to the transfer of land from the head ' cultivable ' to the head ' uncultivable '.

The sub-joined table shows the area taken up permanently and relinquished in each district during the year under report.

				Area taken up					
Distri	ət.		Unoccupied land taken up.	Unassessed land brought into occupa- tion and assessed.	Total.	Arca relinquished.			
Upper Sind Fre	ontier		3,541	1	3,542	142			
Sukkur	•••		3,920	26	3,946	. 54			
Larkana	••		362	2	364	25			
Nawabshah	••	••	8,851		8,851	380			
Hyderabad	••	••	8,108	· · · · · ·	8,108	4			
Thar Parkar	••	•••	7,993	3,653	11,646	1			
Karachi	••	• •	8,457		8,457	116			
Total	for 1924-25	••	41,232	3,682	44,914	722			
Total	for 1923-24		43,081	11,983	55,064	4,908			

The difference between the area taken up during the year under report and that in the preceding year comes to 10,150 acres and is attributable mainly to restriction on the grant of land in the barrage area and on several canals within the non-barrage area.

107

The information required by Government Resolution No. 8294, dated the 20th November 1899, is given in the sub-joined table :---

District.		Area of land		anted on f malkanu.	Land sold by auction-		
Dist	net.		granted free of malkano.	Area.	Amount obtained.	Area.	Amount obtained.
	na na popularia na popularia		Acres.	Acres.	Rs.	Acres.	Rs.
Upper Sind Fr Sukkur Larkana Nawabshah Hyderabad Thar Parkar Karachi	rontier 	· · · · · · ·	42 73 2 20 8,038 65	3,500 3,184 21 295 1,226 3,417 7,425	9,253 9,920 50 2,684 16,892 18,168		··· ··· 3,059
	Total		8,240	19,068	57,566	148	3,059

The difference of 17,458 acres between the total of the area accounted for in this table and the total given in column 4 of the preceding table represents fallow forfeited and relinquished lands restored to their original occupants. Of the total area granted free of malkano, 6,408 acres were given out on the restricted tenure in the desert tract and 1,575 acres for the Government farm in the Thar Parkar district. The remainder is too small to call for any remarks.

The aggregate realizations from malkano and proceeds of auction are larger than in the previous year and the average rate per acre was Rs. 3-2-0 as against Rs. 2-7-0 in the year 1923-24.

14. TAKAVI

(Appendix III)

Takavi advances made during the year ending 30th September 1925 amounted to Rs. 3.09 lakhs against Rs. .84 lakhs in the previous year. Of the former amount, Rs. 1.85 lakhs were advanced under the Land Improvement Loans Act and Rs. 1.24 lakhs under the Agriculturists' Loans Act, against Rs. .69 lakhs and Rs. .15 lakhs respectively in the previous year. The increase of Rs. 2.25 lakhs is shared by all the districts except Thar Parkar and is due to liberal grants in the flooded area.

Out of the total outstanding balance of Rs. 18.89 lakhs against Rs. 27.16 lakhs in the previous year, Rs. 9.94 lakhs fell due for collection in the year, of which Rs. 6.26 lakhs or 62.98 per cent. were collected, Rs. '05 lakhs written off and Rs. 1 47 lakhs suspended leaving Rs. 2 16 lakhs as unauthorized arrears. These arrears are smaller as compared with those of the previous year and are accounted for in statement C.

The information required by paragraph 5 of Government of India's No. 2156-321-7 of 3rd October 1901, regarding the amount of agricultural loan business is embodied in statement D.

The inspection of takavi works was fairly satisfactory. In all, 38 cases of misuse of loans were detected during the year, the immediate recovery of the loan being ordered in every case.

15. TRADE AND INDUSTRIES

The returns of the sea-borne trade of the Port of Karachi for the year under report exhibit a great expansion of commerce. The total volume, both foreign and coasting, reached the level of Rs. 109 76 crores as against Rs. 89.81* crores in the previous year, which was itself the best on record. Of this total foreign trade contributed Rs. 88 40 crores and coasting trade Rs. 21 36 crores.

Out of the aggregate value of the foreign trade, exports amounted to Rs. 54.98 crores representing an increase of 37 per cent. over the figure for 1923-24. Over half of this increase was due to heavy shipments of raw cotton and wheat. The export of the former commodity, which is of great interest to the Port of Karachi, amounted to 119,504 tons valued at Rs. 18.60 crores. Wheat was exported to the extent of 1,046,255 tons worth Rs. 16.12 crores. The value of the import trade also showed a great increase rising in value from 26.48 crores to 33.42 crores or by 26 per cent. The increase was found chiefly in cotton manufactures and sugar which contributed Rs. 12.78 crores and 5.87 crores respectively. The importation of large stocks of cotton manufactures is ascribed partly to the exhaustion of the previous stock and partly to a favourable exchange. The expansion in the volume of · imports of sugar is attributed to a large increase in world-production and an appreciable reduction in prices. It may be observed that Karachi imported more sugar than Bombay. These satisfactory figures of trade naturally gave grounds for hoping that more stable conditions of trade had been reached and that an era of prosperity for the Port had begun. This has unfortunately not proved to be the case, and the heavy imports proved to be in some instances more than the market could stand. A , rapid fall in price followed the large import of sugar, and led to several failures among the sugar merchants. Similarly the cloth trade could not dispose of the cloth imported in spite of the depletion of stocks in the country, and individual merchants suffered severe losses. The fall in the price of cotton, however desirable from the point of view of the mill-owner, disappointed the growers and exporters of cotton, just as a similar fall in the world price of wheat is checking exports in the current year. These unfortunate fluctuations are ascribed partly to the rate of exchange, partly to the uncertainty and instability of many of the world

*This figure is correct as per Maritime Trade Report.

1.1.1

markets, and partly also to the speculative nature of trade in general compared with pre-war conditions. It may be hoped that more stable conditions will soon be arrived at, and that Karachi and the Province in general may look forward to a more constant activity of trade when the works under the Sukkur Barrage Scheme approach completion. The Karachi Port Trustees can reasonably expect this to react favourably on the expansion of the trade of their Port. With this future in view the Trustees are vigorously proceeding with the West Wharf Project.

109

Local industries and manufactures show small sign of progress, and the condition of nearly all of them is either stagnant or precarious. The rice husking factories did well and some were newly started in the Hyderabad, Larkana and Karachi districts. The wheat grinding mills also worked fairly well while the oil and sugar-cane pressing industries are stated to be thriving though still backward compared with other parts of India. The cotton ginning factories were not fully employed. Of the eight factories in the Thar Parkar district, three did not work, two owing to the death of the proprietor and disputes among his heirs. The factory at Bhiria Road in the Nawabshah district which had been closed for some years was reopened.

The cloth weaving industry lost ground owing to the preference amongst the public for mill-made cloth of finer finish. The silk spinning and weaving factory at Larkana is working at a loss. A silk factory at Rohri in the Sukkur district was unable to find a market for its products and negotiations for winding up the business are under contemplation. The hand-loom industry at Larkana is doing moderately well under the patronage of the local Co-operative Society. The coarse woollen cloth industry maintains its position. Enthusiasm for the spinning wheel has practically disappeared, and hand-made khadi has lost its popularity.

The dyeing industry is reported to have fared well. The leather tannery at Pano Akil shows signs of improvement. The lacquer industry at Kashmore in the Upper Sind Frontier district is declining. The tile factory started at Budhapur and the factory for sulphuric acid opened at Kotri in the Karachi district last year were closed. Other minor industries such as those connected with earthenware, pan grass, metal work, soap continued in their previous somewhat elementary condition.

The development of the country depends here as elswhere very largely on the co-operative movement. It is reported to have made considerable advance in the year, and its credit side is increasingly popular. A Co-operative Central Bank and a Zamindari Bank were opened in the Thar Parkar district. The adaptation of the movement to the needs and to the financial conditions of the zamindars is a matter of primary. importance for that class in particular and for the agricultural progress of the whole Province.

16. FRICES

The prices of food-grains rose during the year. This was mainly due to the considerable damage caused to kharif crops by heavy floods and rains. Increased demand from abroad was also largely responsible for a rise in the price of wheat. The price of ghee continued to rule high. The raw cotton registered a decline in price as a result of a better American crop. There was a marked fall in the prices of sugar and foreign cloth owing to the importation of large stocks. Fodder was comparatively cheaper than in the previous year.

17. LABOUR AND WAGES

There was a slight increase in the wages of unskilled and skilled labour without corresponding improvement in the quality of work. This is attributed partly to a greater demand on the Lloyd Barrage works and partly to the high level of the prices of food stuffs. Owing to the scarcity of capable cultivators in the Karachi district, the hari there was able to make his own terms with the zamindar. There was no material change in the rates of cart and camel hire.

Except for a fairly large immigration of Cutchi labour to Karachi due to prospect of high wages, there was very little immigration of labour from Cutch or Gujrat presumably owing to favourable agricultural conditions prevailing in those regions. The supply of labour was however equal to the demand.

With the progress of education unemployment among the literate classes is increasing. This state of things cannot be remedied so long as these classes aspire almost entirely to clerical posts.

The North Western Railway strike originated in the Punjab spread to Sind, where it began on the 17th April 1925. The majority of the workmen in the Carriage and Loco Workshops at Karachi, Kotri and Sukkur and in the Engine Shed at Rohri joined out of sympathy with the Punjab strikers. They were for the most part ignorant of the grounds of the strike. Satisfactory Police arrangements were made to prevent rioting and intimidation. The strikers confined their energies to peaceful demonstrations and persuasion in the beginning but later on .. in the Sukkur district they resorted to unlawful methods of intimidation. In order to avoid breaches of the peace, forty sowars from the Special Force at Jacobabad were called into Sukkur and thirty arrests were made. This had a sulutary effect and the strikers almost at once abandoned their threats of violence. All the arrested persons, excepting two who were convicted under sections 447, 323 and 504 of the Indian Penal · Code, were released on giving security for good behaviour under section 562 of the Criminal Procedure Code.

The strike caused a certain amount of inconvenience to the mercantile community owing to the delays to which goods traffic was exposed. The inconvenience was however not serious as the goods traffic though retarded at no time broke down or was seriously obstructed. The strike caused no dislocation of passenger traffic.

The strike had no political significance and ended in a fiasco. The strikers failed to enlist the sympathy of the public and finding little support from them surrendered unconditionally after about two months. APPENDICES
