# Report on the Maritime Trade of the Province of Sind for 1923-24. 

BY
THE COLLECTOR OF CUSTOMS, KARACHI.

ㄷ:(ivi) 247

## I.-General Review of Foreign Trade.

1. Introductory.-It will be seen from the table on on pages 3 and 4 that the trade figures for the year 192324 compared with those for the previous year are decidedly encouraging. Taken as a whole, the past year was one of definite progress, and the statistics of both exports and imports show that the port is steadily recovering from the after-effects of the war. The monsoon was again favourable and resulted in plentiful.harvests, and the satisfactory nature of the crops is clearly reflected in the recovery of the balance of trade, which was in favour of the port to the extent of Rs. ${ }^{1,361}$ lakhs as compared with an adverse balance of Rs. 133 lakhs in the previous "year. Large exports of raw cotton and the increased purchasing power of some of India's oversea markets were mainly accountable for the improvement in the position. A world-shortage of raw cotton led to a keen demand for the Indian product, and the consequent high prices obtained greatly benefited the agricultural classes.

The outstanding event, during the year under review, in relation to the future export trade of Karachi, was the laying at Sukkur of the foundation stone of the Lloyd Barrage, the world's greatest irrigation project, by His Excellency Sir George Lloyd. As stated in last year's report, this scheme will, on completion, not only bring immense areas of uncultivated lands to the extent of about $3 \frac{1}{2}$ million acres under cultivation, but will also greatly increase the .productivity of much of the present cultivated area.

The import trade during the year, though not striking, was nevertheless fairly satisfactory. As a result of the prosperous condition of the agricultural classes, a good business was done in cotton piece-goods, the principal article in the import trade, in the latter part of the year. Other factors which assisted the revival of the import trade were the reductions in prices both in the United Kingdom and the continent and the steadiness of exchange rates during the course of the year.
2. General position of foreign trade.-The total value of the entire maritime trade of the Province of Sind in

1923-24 reached the record figure of. Rs. 8,981 lakhs, and showed an increase of Rs. 1,827 lakhs or 26 per cent. over the figures of the previous year and of 59 per cent. over those of the pre-war year 1913-14. Of this value, the coasting trade, which is discussed in paragraphs 18 to 25 below, accounted for 26 per cent. and the foreign trade 74 per cent. The latter was as usual confined to the chief port and rose considerably by Rs. $\mathrm{I}, 50 \mathrm{I}$ lakhs or 29 per cent. to Rs. 6,657 lakhss, imports contributing 40 per cent. and exports 60 per cent. to the total value against 49 per cent. and $5^{1}$ per cent. in the previous year. The export trade exhibited a remarkable expansion both in value and volume as will be seen from the detailed analysis of the principal articles embodied in paras. 14 to 17 below. The total value of this trade aggregated no less than Rs. 4,009 lakhs and was the highest on record, representing an increase of 58 per cent. over the figures of the previous year. Over half of this increase was due to heavy shipments of cotton, the price of which ruled very high during the year. Exports of wheat, the leading commodity in the export trade of the port in pre-war days, also contributed largely to this expansion having risen from $218,4,38$ tons in quantity and Rs. 340 lakhs in value to 605,266 tons valued at Rs. 863 lakhs in 1923-24. It is of interest to note here that the maximum quantity of wheat exported from Karachi in one year was 1,321,377 tons in 1912-13 worth Rs 1,404 173 lakhs. Shipments of rapeseed during the year under review, which amounted to 260,266 tons valued at Rs. 56665 lakhs, creat. ed a new record.

The import trade presents no marked variations. The figures were almost on a level with those of the previous year. The total value amounted to Rs. 2,648 lakhs, an increase of Rs. 27 lakhs or $s$ per cent. Cotton piece-goods, the principal article, contributed Rs. 847 lakhs to this value,. and rose by 1 per cent. in quantity and 3 per cent. in value as compared with the imports in the previous year. Other important fluctuations are explained in paras. 10 to 13 below.

## Table No. $\mathbf{x}$

General summary of the sea-borne trade of the Province of Sind, both Foreign and Coasting, for the past four years and the pre-war year including the trade of the chief port Karachi and of the subordinate ports of Sind, riz., Keti Bandar and Sirganda :-

| 1915-20 | 20,77,71,367 | 10,01.18,6\%0 | - 176, $22,59 \%$ | 17,10,90,357 | 18,22,39,524 | 1,11,49,167 |
| 1920-21 | 38,80,21,503 | 23,51,87,068 | -15.34,34,525 | 34.85, 86,664 | 21,10,19,286 | 13,79,67,378 |
| 1921-22 | 31,78,66.737 | 16,45,56,650 | -15:53,10,087 | 26,58, 31,651 | 15,36,11,357 | 11,02,20,204 |
| 1042-23 | 20,69,54,067. | 25,36,17,308 | 193,46,759 | 20,94,68,893 | 25,11,56,578 | 4,16,87,695 |
| 1923-24 | 26,47,80,449 | 40,00,15,942 | 13,61,35,493 | 22,30,00,357 | 39,58,13,004 | 17,57,22,747 |
|  |  |  |  |  |  |  |

As will be noticed from the above table and also from the two graphs prefixed to this report, the balance of foreign trade in favour of the port reached the record figure of Rs. 1,361 lakhs, as against an adverse balance of Rs. 133 lakhs in the previous year. This credit balance represents an increyase of 110 per cent. over that recorded in the pre-war year 1913:14. Taking the figures of private trade alone, the position was even more esatisfactory, the excess of exports over imports reaching Rs. .1,757 lakhs, against Rs. 416 lakhs in 1922-23 and Rs. 1,021 lakhs in 1913-54.
4. Geographical distribution.-The distribution of the foreign import and export trade of Karachi by countries is shown in detail in appendix Table A. with the percentage which each country bears to the whole. The following abstract taken from that table compares the percentage shares of the principal countries during 1923-24, with those in 1922-23 and the pre-war year 1913-14.

|  | Ixports. |  |  | Exports. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Africa $\quad .$. | 020 | 011 | O'54 | 1*49 | 1.14 | $2 \cdot 21$ |

United Kingdom.-Imports from the United Kingdom were practically on the same level as in the previous year and were valued at Rs. 1,283 lakhs, representing 59 per cent. of the aggregate value as compared with 60 per cent. in 1922-23. Cotton piece-goods, the principal item of imports, recorded an increase of Rs. 18 lakhs, solely under coloured goods, grey and white goods showing a considerable falling off. Of the other important articles imported during the year, the following also showed an expansion:-Machinery, iron sheets and plates, "tinned, woollen picce-goods, motor cars, soda ash, apparel, porcelain, polishes and cycles. A decrease, on the other hand, was noticeable in arrivals of coal; whisky, copper braziers and sheets, caustic soda and cigarettes. As regards the export trade, though the share of the United Kingdom increased only slightly from 39 to 40 per cent. the total value expanded from Rs. 959 lakhs to Rs. 1,578 lakhs. Appreciable purchases of wheat and cotton mainly accounted for the improved situation. The United Kingdom also took more barley, maize, gram, crushed bones, chromite, cottonseed and
rapeseed. A contraction, however, took place in shipments of jowar and bajra, buffalo and cow hides, raw, skins, tanned or dressed, castor seed, linseed and raw wool.

British Possessions.-On the import side there were no striking variations in the trade with British Possessions. The value, Rs. is lakhs, recorded against Australia in the previous year was almost entirely in respect of imports of wheat. There being no such imports this year, the value dwindled to Rs. 3.47 lakhs, consisting chiefly of coal from Western Australia against none last year. Imports from Mesopotamia were almost on a par with those in 1922-23, and of the total value, Rs. 21 '3il lakhs, no less than Rs. is lakhs, were contributed by dates. The share of Mesopotamia in the export trade declined from 1 to 067 per cent. owing to reduced shipments of rice. Imports from the Bahrein Islands declined in value from Rs. $5 \cdot 18$ lakhs to Rs. 3.34 lakhs owing mainly to smaller arrivals of dates. The Islands' share of the trade consequently dropped from 0.25 to $0^{\prime} 16$ per cent. The heavy decline in the value of exports from Rs. 38 lakhs to Rs. 22 lakhs was due to smaller takings of boiled rice. As regards imports from other Britisl Possessions, the only noteworthy feature was the increase in the number and value of motor vehicles imported from Canada, the figures for the two years being as follows :-

|  | No. of vehicles. |  |  | Value. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $1922-23$ | $\ldots$ | 8 I | Rs. $1 \cdot 5 \mathrm{I}$ lakhs. |  |  |
| 1923.24 | $\cdots$ | $23^{2}$ | $"$ | $5.85 \quad "$ |  |

It may be noted here that Egypt which in previous reports was classed as a "British Possession," has with effect from the year under review, been included with Africa under "foreign countries."

Europe.-Despite the depressed economic condition of Europe, the trade with forcign countries in Europe showed a satisfactory expansion, advancing from 30 to 36 per cent, of the total trade. Both imports and exports participated in the increase, the share of the former improving from 13 to 15 per cent. and of the latter from 44 to 48 per cent. The outstanding feature was the phenomenal rise in the trade with Italy which accounted for it per cent. of the aggregate value of imports and exports, Italy thus securing the leading position among foreign countries, displacing Germany from the head of the list of foreign competitors. The
improvement was due exclusively to increased exports, the value of which rose from Rs: 257 lakhs to Rs. 658 lakhs in 1923-24. These exports included record purchases of raw cotton valued at Rs. 465 lakhs which represented an increase of Rs. 275 lakhs as compared with the previous year's figures. Shipments of rapeseed advanced from Rs. 30 lakhs to no less than Rs. 129 lakhs. Increases occurred also under maize, wheat and crushed bones. Shipments of castor-seed and sesamum (til or jinjili) showed a decline. Germany was next in importance with a share of 9 per cent. of the combined trade, and exhibited a slight decrease as compared with the previous year. Imports from. this country rose in value by Rs. 13.89 lakhs to Rs. 115.69 lakhs chiefly as a result of larger shipments of cutlery, glassware, machinery, cotton goods, lace and embroidery and woollen piecegoods. Receipts of iron and steel, sugar and yarn and knitting wool, on the other hand, showed a decrease. Although the percentage share of Germany in the export trade fell from 14 to 1 I per cent. its total value expanded from Rs. 354 lakhs to Rs. 452 lakhs in consequence of heavy purchases of cotton, barley and rape seed. Germany also took more maize and cow hides but less bones. Imports from Belgium suffered a slight setback being 4 per cent. of the aggregate value as compared with 5 per cent. in the previous year. The total value fell by Rs. 12 lakhs to Rs. 87 lakhs owing to reduced shipments of aniline dyes, glass-sheet and plate, iron and steel and sugar. Imports of railway materials (rails, chairs and fishplates of steel and iron), coloured cotton piece-goods and woollen piece-goods however showed some improvement. On the export side, Belgium fared better, the total value of her trade with this port having risen from Rs. $245 \%$ lakhs to Rs. 318.43 lakhs chiefly because of larger purchases of cotton and barley. Other articles which showed an expansion were maize, wheat and bones. Shipments of chromite, castor-seed and rapeseed to Belgium declined. The share of France in the combined trade which was 3 per cent. last year doubled in 1923-24 mainly on account of her larger takings of wheat and cotton. Shipments of barley, gram, lentils and bones also contributed to the increase, but the takings of maize, castor-seed, rapeseed, sesamum (til or jinjili) and mulberry silk, raw, were smaller." The share of France in the total import trade increased slightly from 0.58 to 0,96 per cent. and the total value from Rs. 12.06 lakhs to Rs. $20 \% 0$ lakhs as a result of larger sales of woollen piece-goods and brandy.

Asia.-Asia's share in the combined trade fell from 12 to 9 per cent. Of the principal countries in this continent, Fava takes first place on account of her exports of sugar. During the year under report, despite the fact that the quantity of sugar imported from Java showed an increase of 1,625 tons, its value declined by Rs. $3^{60}$ lakhs, and in consequence Java's share in the import trade of this port fell from 15 to 14 per cent. Imports of rectified spirit for denaturation increased from 15,000 gallons in $1922-23$ to 19,807 gallons in the year under review. Owing mainly to smaller business in grey cotton piece-goods, the value of the import trade with fapan dropped by Rs. $6: 8 \mathrm{I}$ lakhs. The value of exports to that country, however, advanced from Rs. $25.3^{2}$ lakhs to Rs. $53^{\circ 22}$ lakhs as a result of larger purchases of cotton.

America.-The share of America in the import trade rose from 6.14 to 6.39 per cent. and its value from Rs. 125 lakhs to Rs. 138 lakhs. The articles responsible for the increase were machinery, tinplates, kerosene oil, lubricating oil, motor cars and motor lorries. A comparatively poor business was done in grey cotton drills" and iron tubes, pipes and fittings, wrought, and no sugar was imported from the United States of America this year against Rs. I7 lakhs worth last year. Although America's share in the export trade declined further from 4 to 3 per cent., its value, viz., Rs. $111 \cdot 8$ lakhs was an merease of Rs. 15.63 lakhs on last year's figures. . Heavy shipments of cotton accounted for this increase. The value of shipments of goat skins increased by Rs. 3 lakhs, but the quantity declined trom 2,721 to 2,572 tons. America, however, took less wool during the year.
5. General changes in the private import and export trade.-The following table gives the value of the import and export trade under the five main groups for the last four years and the pre-war year:-

Table No. 3.

| Articles. | $1913-14$. | $1920 \cdot 21$. | 1921-22. | 1922-23. | 1923.24. |

[^0]Table No. 3-concld.

A summary of the general changes under each group of imports and exports shown in the above table is given in this paragraph : the variations in the principal commodities are explained in paragraphs to to 17 of this report.

Exports.-To facilitate a proper understanding of the fluctuations in the export trade, a brief survey of the seasonal and agricultural conditions of this and the neighbouring provinces, the produce of which is exported from the port of Karachi, is given bslow. The rainfall in Sind, though scanty, afforded some help to cultivation The inundation of the year 1923 was not as good as in the previous year, but was, on the whole, satisfactory. The water-level in the Indus was unusually low until the middle of August, when it attained a fair irrigating level. The rise was just in time to flood the lands for rabi cultivation and save the standing kharaf crops most of which were just then greatly in need of water. In the Punjab, the kharif sowings were helped considerably by heavy rainfalls from January to March 1923. The monsoon burst in the ist week of July, and was unusually active during. August and upto the middle of September. Sowings of the rabi crops were consequently greatly facilitated during these months, The
rainfall in the United Provinces commenced at the end of June and thus favoured the sowings of kharif crops. It was mederate in July and August but was unevenly distributed in the latter month. In September the rainfall was heavy and proved injurious to the standing crops, the yield being thereby reduced. Sewings of the rabi crops were, however carried on under favourable conditions, there being ample moisture on account of heavy rains in September and the early part of October. Good winter rains which followed proved beneficial to the standing crops and" improved prospects. Germination is reported to have been good, and a satisfactory outturn is expected.

Turning to the figures of exports of Indian produce and manufactures which appeär in the above table, it will be noticed that the value of articles of food, drink and tobaccogroup I-rose from Rs. 582 lakhs in 1922-23 to Rs. 1,286 lakhs in 1923-24 or by 122 per cent., and fell short of that in 1913 -14 by only t per cent. The share of this group in the total value of exports also increased from 26 to 35 per cent. in 1923-24. The expansion was due mainly to increased shipments of wheat during the year, and exports of barley, maize and gram also recorded appreciable increases. The value (Rs. 2,393 lakhs) under group II-Raw materials and produce, and articles nainly unmanufactured was the highest on record, exceeding that of last year by 50 per cent. and of the pre-war year 1913.14 by 88 per cent. This remarkable feature was in a great measure due to unusually heavy shipments of cotton which accounted for Rs. 1,484 lakhs of the total value recorded under this group against Rs. 704 lakhs last year. Appreciable increases took place also under rapeseed and cotton-seed. Exports of raw wool, linseed and sesamum, on the other hand, exhibited a declinc. As regards exports of foreign merchandise, the decrease in the value of group $I$ was mainly due to reduced shipments of dried fruits, partly set off by an increase under sugar. Smaller despatches of raw wool accounted for the contraction in the value of group $1 /$. The expansion in the value recorded under group $I I I$ was mainly owing to increased exports of skins, dressed or tanned.

Imports.--Group $1-$ Aticles of food, driuk and tobacco showed a decline of about 8 per cent. in value which amounted to Rs. 488 lakhs as against Rs. 529 lakhs in the previous year. Sugar of 16 Dutch Standard and above, which is the principal article in this group, accounted for Rs. 343 lakhs of this value and was responsible for a deficit of Rs. 2 lakhs. The quantity of sugar imported during the
year, however, showed an increase of 348 tons. The other important articles which shared in the decrease in the total value were dates, wheat and liquors. The value recorded under group II-raw materials, $\mathcal{E}^{\circ} c_{1,5}$ advanced by Rs. $5^{\circ} 63$ lakhs mainly as a result of larger imports of fuel and kerosene oils. Group $/ / /$ (articles wholly or mainly inanufactured) the most important group under imports, accounted for 71 per cent. of the total value recorded under imports as against 68 per cent. last year, and the value (Rs. J,533 lakhs) exceeded that in $1922-23$ by 9 per cent. Cotton manufactures, the principal item, which accounted for Rs. 857 lakhs or 56 per cent. of the total value under this group, showed an excess of Rs. 27 lakhs over the figures of the previous year. Increases also occurred under machinery, woollen piece-goods, matches, vehicles, apparel, chemicals, iron or steel, dyes and paints, glassware and cotton twist and yarn. Imports of the following articles, on the other hand, showed a falling off :-hardware, electrical instruments, railway plant, steel and woollen yarn and knitting wool. 'The other groups are unimportant and require no remarks.

## 6. Comparative importance of principal imports

 and exports.-The comparative importance of the values of the principal commodities entering into the import and export trade during the year is shown in Tables B and C , respectively, of the appendix. It will be noticed that in the case of Table B, cotton manufactures have maintained the leading position secured last year, accounting for $39^{\circ} 57$ per cent. of the total value against $40^{\circ} 23$ per cent. in $1922-23$. Sugar, as in the previous year, was next in importance with 16 per cent. against 17 per cent., followed by metals with 8 per cent. against 9 per cent. in 1922-23. Another important change took place in the case of machinery which advanced from the sixth to the fourth place displacing oil and lifuors. The position of the various commodities in the export trade is indicated in Table C. Colton not only retained the lead which it held last year, but improved its share in the aggregate value from 32 to 40 per cent. in 1923-24. Another satisfactory feature was that wheat, which in pre-war times was invariably the leading commodity of the export trade of this port, stepped from the third to the second place as compared with its position last year, displacing rapeseed and at the same time improving its share from 15 to 23 per cent. Rapeseed followed with a decline in its share from 22 to 15 per cent. although, as previously stated, the quantity exported was a record high figurc. The improvement in the position of barley in the export trade is alsoworthy of note since it accounted for 5 per cent. of the aggregate value as compared with 72 per cent. in the previous year.

## 7. Variations in the average prices of articles.-

 The following statement shows the variations in the average prices of certain artieles imported into and exported from the Province of Sind, the average prices of the year $1899-$ 1900, 1900.01 and 1901-02 being taken as $100:-$Table No. 4.

The figures given in the above table show that a reduction occurred in the prices of the majority of the articles entering into the import trade. Of these, coal, dates and woollen piece-goods were the most-marked. Iron and steel, kerosene and coloured cotton piece-goods, on the other hand, showed a slight advance. The position in this respect as regards the export trade was much more interesting. There was a miarked drop in the prices of indigo, rice and wheat. The fall under rapeseed was negligible, but appreciable increases took place in the case of cotton, wool, sesamum seed and raw hides and skins. The advance in the price of raw cotton was particularly striking, having exceeded all previous records. It was due to a large demand consequent on a world-shortage of cotton caused by the
destruction of a portion of the American crop. The price of raw wool rose in sympathy with the high prices ruling in the United Kingdom. The higher price level tor sesamum seed was due to a poor crop in Sind and the Punjab. - The effect of the change in the level of prices since the out-break of the war is illustrated in the following table in which the volume of the trade in 1923-24 in some of the more important articles of import and export is compared with the pre-war volume and its value re-calculated at pre-war rates:-

Table No. 4-A.

A study of the figures recorded in the table discloses the actual position of the present values as compared with pre-war values. It wifl be noticed that though the total value of the selected articles of imports shows an increase of 36 per cent. as compared with the average pre-war value, this value if re-calcuiated at pre-war prices, would actually show a decrease of 26 per cent. Under exports, the total recorded value of the selected articles which shows an increase of 35 per cent, as compared with the pre-war average would, if re-calculated at pre-war rates, actually show a decrease of 13 per cent.

## TREASURE-PRIVATE.

8. The following table compares the imports and exports of treasure on private account for the past two ycars:-

Table No. 5.

| Description. 1922-23. | 1943-24. | 1)estription. | 1922-23. | 1923.21. |

| Gitand Total ... $31,13,219$ | 64,49,347 | Grand Tofac. ... | 40,77,100 | 25,36,736 |

The total value of imports of Gold advanced from Rs. 17.26 lakhs to Rs. 3 r 93 lakhs or by 85 per cent., the monsignments consisting chiefly of bullion from the United Kingdom. No less than 40,466 ozs., of bullion valued at Rs. 2761 lakhs were imported during the year against 21,133 ozs., valued at Rs. 15.23 lakhs last year. Importations of gold coin consisted almost wholly of 23,770 sovereigns and 4,700 half sovereigns from the United Kingdom, as against 13,000 sovereigns in 1922-23. The expansion under imports of gold was in a great measure due to the demand from the agricultural classes of the Punjab who had realized enormous profits from the sales of raw cotton, The-increase was also partly due to
the celebration of a large number of Hindu marriages during the year which was "considered as specially auspicious for such events. lmports of silver also showed a notable increase having risen from Rs. 13.42 lakhs to Rs. 3197 lakhs in 1923-24. Imports of bar silver, the principal item, increased from 261,011 ozs., valued at Rs. $5 \cdot 64$ lakhs to $1,375,380$ ozs., valued at Rs. $28 \cdot 28$, lakhs of which the United Kingdom sent 975,711 ozs; valued at Rs. 19.65 lakhs as against $260,765 \mathrm{ozs}$., valued at Rs. $5^{\prime} 63$ lakhs, and the United States of America sent 398;992 ozs., valued at Rs. 862 lakhs against none in the previous year. The reasons given above for the increase in imports of gold apply in the case of silver also. Government of India rupees, which are ordinarily sent here from the Gulf Ports for the purchase of food-stuffs, exhibited a shortage of Rs, 4.15 lakhs, owing to a reduced demand for rice from the Bahrein Islands, Muscat and other Native States in Arabia. Exports of gold consisted only of $1: 50$ sovereigus to the Bahrein Islands and Muscat. Exports of silver mainly comprised Government of India rupees, and the decrease of Rs. ${ }^{1} 543$ lakhs took place in the transactions with the Bahrein Islands and Muscat owing to the rates of exchange oltained in those countries being unfavourable.

## GOVERNMENT TRANSACTIONS.

9. The following table compares the items of importance to the commercial public in Government transactions with foreign countries during two years 1922-23 and 1923-24.

Table No. 6.

Imports on Government account feli "in value from Rs. 5.75 lakhs in 1922.23 to Rs. $4^{\circ} 17$ lakhs or by Rs. 158.04 fakhs or 27 per cent. the decrease being mainly due to the fact that no coal was imported during the year under report against 317,243 tons valued at Rs. 108.07 lakhs in 1922-23. A decline of Rs. 39 lakhs was also noticeable in imports of railway plant and rolling stock chiely locomotive engines, tenders and parts thereoffrom the United Kingdom, the United States of America and Sweden and rails and fish plates of steel and iron from Belgium and the United Kingdom. Increases, on the other hand, were recorded under machinery, chiefly from the United Kingdom and the United States of America and metalis from the United Kingdom.

## II.-Detailed review of changes in the value and volume of important articles of the Import and Export Trade. IMPORTS.

## Class I.-Food, Drink and Tobacco.

10. Sugar.-The table below exhibits the imports both from foreign countries and from Bombay, re-exports to foreign countries, and coastwise exports of sugar, 16 Dutch

The increase in imports of sugar anticipated after the slump in the previous year did not materialise. The quantity ( 96,723 tons) imported during the year was orly 348 tons in excess of that received in the previous year. High prices ruling in Java during the latter part of the year restricted business, and some consignments actually purchased for Karachi were diverted to other ports. The bulk of the sugar imported arrived in the months of August, September and October. The local quotations for white Java opened at Rs. 26-10, but rose to Rs. 28 in May, after which the price declined gradually and touching Rs. $23-8$ in June came down at the end of August to Rs. 19.11, the lowest price recorded during the year. In the first week of November, it however again increased to

Rs. 22-6 and rising, rapidly touched Rs. 26 in January and Foreign went up in the first week of March to Rs. 28-3, the highest Imports. figure of the year. The closing price was Rs. 26-7. The consumption of sugar during the year was, however, greater than in $1922-23$ as is evidenced by the fact that though the stocks in hand at the commencement of the year and the quantities imported were practically the same in both years, the balance remaining in hand on 31 st March 1924 was about 4,400 tons as against about 20,000 tons on the same date in 1923. The demand would have been greater still, but for the increased consumption of Indian sugar and jaggery which were produced in larger quantities and were used in preferenge to foreign sugar on account of their cheapness. A comparison of the figures of quantity imported during the year with those in the pre-war year 1913.14 gives some idea of the effects of the existing heavy import duties. The decrease of Rs. $2 \cdot 02$ lakhs or 1 per cent. in the value of sugar imported during the year as compared with the value in 1922.23 inspite of the increase in quantity, is explained by the fact that the bulk of the imports took place, as stated above, in the months of August to October when the prices were low. Of the total quantity imported, 7,622 tons consisted of beet sugar which came during the last three months of the year- 5,33 o tons from Austria, and the remainder from Hungary, Germany, Belgium and Czecho-Slovakia.

## Liquers- $\quad$ Table No. 8.

Foreign Imports.

Ale, beer and porter.-The following table compares the quantities imported from the chief sources of supply during the past two years :-

| Countries of consigament. | 1923-23. | 1923:24. | ${ }_{\substack{\text { Execess or } \\ \text { defecency }}}$ |
| :---: | :---: | :---: | :---: |
|  | Ga | Gals. | Gals. |
| United Kingdom | $3^{660,264}$ | 359,048 | - 1,216 |
| Germany ${ }^{\text {a }}$ |  |  | + 10,313 |
|  | 24,093 |  | - 8,007 |
| Straits Settlements | 1,544 |  | - 1,544 |
| Victoria | 700 | $\ldots$ |  |

The total imports of ale, beer and porter declined by 1,5 5o gallons in quantity and Rs. 3 . 5 lakhs in value. As the above table shows, receipts from all the principal countries, excepting Germany, fell away during the year. The decrease in the case of the United Kingdom was confined to receipts of bottled beer. Imports of bulk beer, which was obtained only from the. United Kingdom, increased in quantity by 7,463 gallons to 324,888 gallons. Imports from Germany recorded a further increase of 10,313 gallons owing to a growing demand for light beer produced in that country. It is-noteworthy that German beer completely ousted Japanese beer from the market during the year.

Spirits.-Whisky shows a shortage of 16,719 gallons in quantity and of Rs. 6.54 lakhs in value. The high prices of Scotch whisky at home checked imports. This decrease was, however, counterbalanced by an increase of $16,19^{2}$ gallons in imports of brandy mainly from France, due to a fall in prices and a favourable exchiange. A feature worthy of notice is the steady increase in the consumption of whisky and brandy from Germany on account of their cheapness, imports of the former from this source being 7,138 gallons and of the latter 2,289 gallons as against 5,166 gallons and 2,004 gallons, respectively in the previous year. The increase of 11,101 gallons under "other sorts of spirits" was due chiefly to large imports of rectified spirits from Java and Germany for denaturation in this country. A local merchant and many dealers in the Punjab who used formerly to obtain their supplies of methylated spirits from Calcutta, have found it more profitable to import rectified spirit direct and methylate it here before clearance from the Custom House. $19,8 \%$ gallons were thus denatured as against $\mathbf{1 5 , 2 8 8}$ gallons in 1922-23.

Wines.-The decrease of 4,462 gallons or 14 per cent. Foreign was owing to smaller imports of port, sherry, madeira and Imports marsala from the United Kingdom and of vermouth from Italy.

Tobacco.-Imports of tobacco fell by $153,73^{8} \mathrm{lbs}$. in quantity and Rs. 7.22 lakhs in value to $747,246 \mathrm{lbs}$. valued at Rs $33^{\prime 2} 29$ lakhs mainly as a result of smaller receipts of cigarettes from the United Kingdom due to overstocked markets.

Fruits and Vegetables.-The value of imports under this head receded by Rs. 310 lakhs or 10 per cent. as compared with that in the previous year. This was due entirely to a contraction in"the value of dates from Rs, $2^{\circ} 77$ lakhs to Rs. $25^{\circ 20}$ lakhs. As the quantity of dates imported increased slightly from 18,587 to 18,717 tons, it is clear that the substantial deficiency in the value is to be accounted for by a marked drop in the prices consequent on a good crop. Mesopotamia, the main source of supply, sent 14,051 tons as against 12,807 tons, but receipts from the Bahrein Isiands declined from 2,564 tons to 1,966 tons.

Provisions and Oilman's stores.-As compared with the year 1922.23 , imports of provisions and oilman's stores rose in value by Rs. 1.24 lakhs or 6 per cent. The following statement shows the variations in the quantities of some of the principal items imported during the year :-

| Principal articles. | Quantity. |  |
| :---: | :---: | :---: |
|  | 1929.23 | 1923.34. |
|  | Cwts. | Cwts. |
| Canned and bottled provisions | 7,968 | 10,284 |
| Farinaceons foods | 5,083 | 6,850 |
| Biscuits and cakes ... ... | 1,625 | 2,363 |
| Bacon and hams | 1,095 | 1,167 |
| Jams and jellies ... ... | 1,546 | 1,763 |
| Cheese (iucluding canned) ... | 1,486 | 1,407 |
| Milk, condensed, \&c. ... ... | 1,251 | 1,806 |
| Pickles, chutnies, sauces and condiments | 1,216 | 1,360 |
| Other sorts of provisions | 2,326 | 2,258 |

It will be noticed from the above table that the quantities of almost all the important articles exhibited an expansion which was due chiefly to reduced prices in the United Kingdom, the main source of supply. The increase under milk is to be attributed also to the introduction of new brands in the market and the consequent competition in the

Foreign
Grain, Pulse and Flour.-The value Rs. 19.59 lakhs Imports. recorded last year under this head represented imports of zeheat from Australia and the United States of America. With the elimination of these abnormal receipts, imports during the year consisted chiefly of pulse from the Gulf ports valued at Rs. 14,709.

Tea.-During the year under report imports of tea suffered a set-back, the quantity having fallen from 1,193,02 ${ }_{7} \mathrm{lbs}$. to $895,7^{1} 3 \mathrm{lbs}$. and the value from Rs. 7.66 lakhs to Rs. 689 lakhs. The decrease followed a heavy increase in the previous year, and was restricted to receipts of green tea from China. Owing to the accumulation of large stocks in the consuming markets at the frontier, only $516,84 \mathrm{llbs}$. of this variety were imported during the year as against $863,309 \mathrm{lbs}$. last year. Black tea, on the other hand, came in larger quantities, wiz., $378,872 \mathrm{lbs}$., an increase of $49,154 \mathrm{lbs}$. which was noticeable in receipts from Ceylon.

## Class II.-Raw materials and produce and articles mainly unmanufactured.

11. Oils.-There was an expansion of Rs. I4. 69 lakhs or 18 per cent. in the aggregate value of imports under this head, the figures for the past two years being Rs. 78.8 c laikhs and Rs. 93.49 lakhs, respectively. Large quantities of mineral oils received during the year accounted for the increase. -The following table shows the imports of mineral oils for the past two years and the pre-war year, including, in the case of kerosene, imports from Bombay and Burma :-

Table No. 9

|  | 13,058 | 18,158 |  | 8,406 | 5,499 | 13,102 |
| Total | 1,103.330 |  | 3.855.164 | 22,8, | 2,2 |  |

Imports of kerosene oil, which represented nearly $6_{3}$ per Foreign cent. of the total quantity of mineral oils imported during Imports the year, showed a rise of $1,562,355$ galions under bulk oil and 328,194 gallons under case oil, the entire quantity coming from the United States of America. Large quantities went to the Punjab inspite of the production of kerosene oil in that province. The rise in the prices charged for the indigenous product enabled the foreign oil to compete with it on favourable terms. Another reason for the larger takings by the Punjab is ascribed to the prosperity among the agricultural classes consequent upion good harvests. The increase in the imports of kerosene oil from foreign countries was, however, partly set off by a decrease to the extent of 526,058 gallons in coastwise imports from Burma and Bombay. Imports of fuel oil also recorded a heavy increase of $2,473,652$ galions in quantity and Rs. 7776 lakhs in value, due to the ever increasing consumption of this oil for use as bunkers as well as in oil machinery. Of the total quantity, viz., $5,3^{1} 3,93^{8}$ gallons, imported during the year $3,456,495$ gallons came from Persia, $1,521,294$ gallons from the Straits Settlements and 336,549 gallons from Dutch Borneo The heavy decline of 619,532 gallons or 61 per cent. in the quantity of lubricating oils occurred entirely in receipts from the United Kingdom as a result of the North-Western Railway having placed their orders with the Attock Oil Co. The quantity imported from the United States of America, on the other hand, rose by 112,701 galions to 352,122 gallons.

Coal.-Imports of coal which totalled 89.188 tons in quantity and Rs. $25^{\circ} 9^{1}$ lakhs in value were less than those of last year by 2,067 tons. and Rs. $5 \cdot 54$ lakhs. This deficit was more than made up by a heavy increase. in imports of Bengal coal which was received in larger quantities on account of its cheapness, the figures for the past two years being 35,860 tons and 68,489 tons; respectively. The following statement shows the variations in the quantities imported from foreign countries "during the past two years from the principal sources :-

|  |  | 1932-23. | 1923-224. | Excess or deficiency |
| :---: | :---: | :---: | :---: | :---: |
| United Kingdom ... |  | Tons. 45,606 | $\begin{aligned} & \text { Tons. } \\ & 16,793 \end{aligned}$ | $\begin{gathered} \text { Tons, } \\ -28,8 \mathrm{I} 3 \end{gathered}$ |
| Natal ... $\because$ | $\ldots$ | 37,665 | 21,452 | $-16,213$ |
| Portuguese East Africa | $\ldots$ | 7,984 | 41,763 | $+33.781$ |
| New South Wales ... | $\ldots$ | , | 1,505 | + 1,505 |
| Western Australia ... | $\ldots$ | $\ldots$ | 7,613 | + 7,613 |

Foreign Imports.

The decreasé in supplies from the United Kingdom despite the large output of 1923 was due to the fact that heavy purchases of English coal were made by European countries. Portuguese East African coal was imported in large quantities as it was found less expensive and of better quality than Indian coal.

## Class III,-Articles wholly or mainly manufactured.

12. It is satisfactory to note that class. III which includes most of the important articles entering into the import trade, recorded a further increase of 9 per cent. in the aggregate value and also improved its share in the total . value of imports from 67 to 71 per cent.

Cotton yarns and manufactures.-Taken as a whole, the cotton trade in the year under review was devoid of any very striking features. Owing to the heavy stocks in hand, the outlook at the beginning of the year was not very hopeful, but with the keener demand and regular inquiries from upcountry markets which arose later in the year, the prospects improved considerably, and on the aggregate the business transacted was slightly in excess of the previous year's figures. The following table shows the quantity and value of cotton twist and yarn and other manufactures during the past two years and the pre-war year 19:3:14:-

Table No. 10.

Cótton twișt and yarn.-The increase of $305 ; 158$ Foreign lbs. in quantity and Rs. $45^{\circ}$ lakhs in value followed a Imports. decrease in the previous year, and was: accounted for by larger supplies of coloured varns Nos. 3! to $40(+229,640$ lbs.) mostly from-the United Kingdom but partly from Switzerland and the Netherlands, and Nos. 26 to $30(+68,182$ lbs.) chiefly from the United Kingdom,

Piece-goods.-Imports of cotton piece-goods recorded an advance of 1 per cent. in volume and 3 per cent. in value, the net result of increased receipts of coloured cloth set off by a decrease under grey and white goods. On a comparison of the figures with those of the pre-war year 1913-14, it will be seen that although the volume of imperts was only 53 per cent. of the volume in' that year, the -value was higher by 19 per cent. thus indicating the extent of the present high level of prices. It is interesting to note that the average price in the United Kingdom per yard in 1923 was 8.02 d . as against only $3^{\prime} 3^{2} \mathrm{~d}$ in 1913 . As regards the variations in the three main divisions of piece-goods, grey goods exhibited a decline of no less than $13,920,178$ yards or 56 per cent. in volume and Rs. 53.30 lakhs or 57 per cent. in value as compared with the previous year. Several factors contributed to this reduction in the trade. Firstly, owing to the relatively lower prices of coloured goods, it was found cheaper to purchase them in preference to grey cloth which is generally dyed before being brought into use. Another reason for this shortage is the poor demand for exports to the Frontier provinces and Afghanistan due to disturbed conditions there. A good demand for Indian mill-made grey goods from the consuming centres also restricted imports of foreign grey cloth. The decrease of 7 per cent. in yardage and in per cent. in value in imports of zhite piece-goods was due to the heavy accumulation of previous year's stocks in the local and upcountry markets. It was also partly due to the increased consumption of certain descriptions of Indian mill-made grey-goods which are bleached and passed off as khaddar. A strong demand for white cloth however sprang up at the end of the year, and in consequence large orders for it are being placed. The deficiency in imports of grey and white piece-goods was, however, balanced by a heavy increase of coloured goods to the extent of $26,639,977$ yards or 56 per cent. in quantity and Rs. ${ }^{1} 3^{2} 22$ lakhs or 61 per cent. in value. The fall in prices stimulated imports of these goods for which there was a large demand from the agricultural classes who, having realized satisfactory profits from their crops, indulged

[^1]Foreign freely in fancies and fine-goóds. The following statement Imports. gives the average prices of a few selected varieties ruling in the past two years :-

The prices of all the selected varieties of white and coloured goods were lower than in the previous year. Under grey goods, the average price of pepperill drills rose hy Rs. $2-4$ per piece owing to the shortage of cotton in the United States of America. The following are the figures of the quantitites and values of some of the more important varieties of grey, white and coloured piece-goods imported during the past two years:-

The figures given in the above table show that imports of all the important descriptions of grey goods declined during the year, the deficiency being due to a restriction in the supplies from the United Kingdom, Japan and the United

Slates of America. The best varieties of white and coloured goods came, as usual, from the United Kingdom.

## Foreign Imports.

Woollen goods. - Imports of yarn and knitting aool, mainly for the Amritsar market, declined by $19,148 \mathrm{lbs}$. in quantity and Rs. $4 \div 3$ lakhs in value. The decrease occurred solely in receipts from Germany which sent very large quantities in the previous year. As was the case last year, a good business was done in woollen piece-goods owing to the old high-priced stocks having been disposed of. Imports, which aggregated $1,941,063$ yards valued at Rs. $40^{\circ} 7 \mathrm{l}$ lakhs, exhibited a further expansion of 144 per cent. in yardage and 126 per cent. in value as compared with 1922-23. Considerable quantities came from the United Kingdom, France, Belgium ar:d Germany, consignments from France consisting of shawl cloth for the Amritsar market.

Silk.-As explained in two previous reports, the silk trade is gradually declining year by year, the local traders not finding it profitable to import largely on account of the high import duty. The value of imports during the year dwindled to Rs. 4 lakhs from Rs. 5.64 lakhs last year, the contraction having occurred in receipts of piece-groods from China and Hongkong.

Metals and metal manufactures.- The following statement shows the quantities and values of the different descriptions of metals and manufactures of metals during the past two years :-

Table No. 11.

Foreign Imports.

Iron and Steel.-After the activity shown in the previous year, imports of iron and stecl declined by 15 per cent. in quantity and 11 per cent. in value. The contraction is chiefly due to the fact that owing to the accumulation of large stocks, the prices in India were lower than those ruling in Europe, and therefore merchants hesitated to. send large orders. The tightness in the money market also tended to restrict business. The following table compares the share of each country in the total imports of iron and steel for the past two years:-

Table No. 12.

The share of the Unted Kingdom in the imports of iron and steel improved considerably from 23 to 35 per cent. in quantity and from $3^{2}$ to 42 per cent. in value. This remarkable expansion in the British steel trade was to a considerable extent due to the large output of steel and to the feeling of confidence created in the commercial world by the comparative stabilization of prices after the unparalleled variations in recent years. The increase was most marked in receipts of tin plates for oil companies, hoops and strips, galvanized sheets and plates and pipes and tubes, cast and wrought. Imports from Belgium, the princi'pal supplier during the year, showed a considerable falling
off, and in consequence the share of that country' dechined Eoreiga from $5^{8}$ to $5^{\circ}$ per cent. in quantity and from 45 to 37 per Imports. cent. in value. The decrease was due to high prices ruling in Belgium. The effect of the Ruhr occupation is seen in the drop in Germany's exports from 11,972 tons to 7,689 tons and in her share in the import trade from 15 to 11 per cent. in quantity and from 14 to in per cent. in value.

Other metals.-The decrease of 46 per cent. in quantity and 49 per cent. in value in imports of copper. followed a heavy increase in the previous year and occurred solely in receipts of braziers and sheets from the United Kingdom. The shortage was also due to the fact that prices in the United Kingdom were continuously on the decline, and in consequence traders were averse to purchasing freely in expectation of a further fall, and restricted their orders to bare requirements. The slight contraction amounting to 427 cwt. in quantity and Rs. 68,434 in value under brass was noticeable in receipts of mixed or yellow metal for sheathing from the United Kingdom.

Machinery of all kinds including belting for machinery.-The total value of imports under this head rose considerably from Rs. 39.59 lakhs to Rs. 102.23 lakhs, showing an increase of 72 per cent. The principal types of machinery imported and the statistics with regard to. each for the past two years are shown in the following statement :-

| Description |  |  | 1922-23. |  |  | 1923 -24. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Prime movers (other than electr |  | Rs. | roso | lakhs. | Rs. | 31:161 | laklis. |
|  | Electrical machinery ... | ... | " | 5*44 | " | 4 | 6.06 |  |
|  | Boilers $\quad .$. | ... | , | 1.94 | , | , | 2 L |  |
|  | Mining machinery | ... | " | 4.65 | ; | " | 978 | " |
|  | Rice and flour mill machinery | $\cdots$ | " | 380 | " | " | 523 | " |
|  | Textiln Machinery .. | .. |  | 1749 | , |  | 4.88 | " |
|  | Suwing and knitting machines | $\cdots$ | No. 1 | 4.954 |  | No. | 16,303 |  |
| ${ }_{\mathrm{H}}$ | Typewriters | $\cdot 1$ |  | 409 |  |  | 542 |  |
|  | Other sorts of machinery | $\ldots$ | 125. | 1783 | khs. | Rs. | 2759 | laklis |

The all-round increase in imports of different types of machinery is indicative of the progress which is taking place in the industrial development of the country. A number of oil-engines imported from the United Kingdom for local and up-country use accounted. for the heavy increase of Rs. 2067 lakhs under prime-movers. Large consignments of electrical machinery came during the year for the ejectric lighting installation at Hyderabad (Sind), and the improvement in the value was chiefly noticeable in imports of control and switchgear from the United Kingdom. Mining machinery, which was mostly intended for the Punjab, came almost

Foreigh entirely from the United Kingdom and the United States of Imports. America, the consignments from the former being valued at Rs. $4^{\circ 21}$ lakhs against Rs. 29,270 and those from the latter Rs. $5^{\circ} \mathrm{O} 7$ lakhs against Rs. $4^{\circ}$ or lakhs. The expansion of Rs. I•44 lakhs under rice and four mill machinery occurred ir. receipts from the United Kingdom, Germany and the United States of America:- Imports of textule plant rose by Rs. 3.39 lakhs to Rs. 4.88 lakhs chiefly under wool machihery from the United Kingdom intended for manufacturing carpets at Amritsar. Under other sorts of machinery, the increase took place in imports of agricultural and metal zorking machinery from the United Kingdom and oil crushing and refrigerating machinery from the United States of America. It is interesting to note that Rs. 88,000 worth of match-making machunery was imported during the year from Germany for the Shahdara factory, the first match factory in the Punjab. The number of sewing machines imported during the year rose from 14,954 to 16,303 and their value from Rs. in 75 lakhs to Rs. 14.73 lakhs. Of these the United Kingdom, the main - source of supply, sent 12,965 machines valued at Rs. $: 260$ lakhs as against 12,136 machines valued at Rs. $9 \cdot 98$ lakhs. Supplies from Germany also showed an advance, 3,3 or machines valued at Rs. 2 II lakhs having been received during the year as against 2,747 valued at Rs. $1^{\prime 7} 70$ lakhs in 1922-23.

Cutlery, hardware, implements and instruments (excluding electrical instruments and apparatus).-Imports under this head declined in value by Rs. 1.35 lakhs to Rs. 4408 Jakhs. The decrease was most marked in receipts of builders' hardware (-Rs. 3.14 - lakhs) chiefly hinges and steel butts from Sweden. A contraction also took place in imports of implements and tools, other than agricultural implements and tools (-Rs. I'23 lakhs) from Germany and the United States of America. The decrease in the above articles was partly set off by an increase under cutlery ( + Rs. $93,7 \circ 9$ ) chiefly from Germany and metal lamps ( + Rs. 122 lakhs) from Germany and the - United States of America.

Chemicals, drugs and medicines.-The value of imports under this head showed a further increase of Rs. I 82 lakhs, the figures for the past two years being Rs. 30.72 lakhs and Rs. $3^{2.54}$ lakhs, respectively. Of the more important chemicals, imports of soda ash, which is used mostly for the cleansing of linen, rose from 84,247 cwt. valued at Rs. 6.44 lakhs to 115,49 : cwt. valued at Rs. 865 lakhs, the United Kingdom being the main source of supply. An improvement also took place in receipts of anhydrous
ammonia from the United States of America and other Foreign compounds of ammonia from the United Kingdorn. Pro- Imports. prietary and patent medicines, which came in large quantities, mostly from the United Kingdom, exhibited an advance in value from Rs. $1 \cdot 34$ lakhs to Rs. $2 \cdot 20$ lakhs. The following articles, on the other hand, suffered a setback:-alum (-Rs. 61,747), caiustic soda (-Rs. 63,335) and bicarbonate of soda (-Rs. 47,685), chiefly from the United Kingdom.

Vehicles (excluding locomotives, \&c., for railways.-After two years of depression, imports of vehicles rose by Rs. 17.56 lakhs or 98 per cent. to Rs. $35 \cdot 56$ lakhs in value. The expansion was to a great extent due to the receipts of a large number of motor cars especially small light cars which were greatly in demand for both local and up-country use.

The number of the principal classes of vehicles imported during the past two years is shown in the following statement :-

It will be seen from the above statement that there was an all-round increase in the number of all the important classes of vehicles imported during the year. Imports of cycles from the United Kingdom again showed a marked improvement as a result of the reduction made by manufacturers in prices. The increase in the number of carriages was accounted for by larger arrivals from Germany and the Netherlands consequent on low prices. The following statement shows the number and value of motor cars imported during the past two years from the principal sources of 'supply:---

Foreign ${ }^{-1}$ The number of motor cars received from the-United Imports. Kingdom, .viz., 66, though double that of $1922^{\circ}-23$, still compares unfavourably with the much higher figure of 486 representing the imports from Canada and the United States of America. The reason for this is not far to seek.' As stated last year, high import duties placed the more costly British cars beyond the reach of many purchasers' who can afford only the prices charged for cheap Canadian and American cars. Of the 43 cars imported from other countries, 27 were second-hand cars from Mesopotamia, and of the remainder, 8 were received from Belgium, 5 from Germany, 2 from France and, 1 from Egypt. The expansion in the number of motor cycles occurred mainly in imports from the United Kingdom which sent 129 machines as against 61 last year. Only 21 came from the United States of America, about the same number as in 1922-23. The increase in the number of motor omnibuses, motor vans and motor lorries was due to large purchases from the United States of America and Canada, the receipts from the former being 37 lorries as against 10 and the latter 14 against 4 in the previous year. Most of these were intended for use in hill-station traffic.

Other articles.-Of the other important articles falling under class III, the following showed an expansion in values:-Apparel, dyes and colours, glassware and earthenware, paper, pasteboard and stationery, rubber manufactures and matches. The value of apparel rose considerably by Rs. 6.97 lakhs to Rs, 1777 lakhs mainly owing to larger imports of second-hand clothing from the United Kingdom and the United States of America. The value of $d$ ves and colours imported during the year amounted to Rs. 21.75 lakhs, showing an increase of Rs. 250 lakhs, mainly accounted for by heavy imports of aniline dyes from Germany, considerable quantities of which were intended for merchants in Afghanistan. Imports of glassware and earthenware were valued at Rs. 1975 lakhs as against Rs. ${ }^{77} 74$ lakhs, the increase of Rs. 201 lakhs being due to larger receipts of porcelain from the United Kingdom and Germany, and glass beads and false pearls from Japan, Germany, Austria and Czecho-Slovakia, and funnels, globes and glass parts of lamps from Germany. No less than Rs. 28.51 lakhs worth of paper, pasteboard and stationery were imported during the year, an increase of Rs. 97,427 mainly under stationery from the United Kingdom. Increased imports of rubber tyres for motor cars and motor
cycles, chiefly from the United Kingdom raised the value of rubber manufactures from Rs. 2:36 lakhs to Rs. $3^{52}$ lakhs. Imports Imports of matches rose in quantity from 619,917 gross boxes to $1,362,303$ gross and in value from Rs. $9^{\circ} 37$ lakhs to Ris. $173^{6}$ lakhs. This remarkable expansion, mainly under safety matches from Sweden, was due to a large demand for replenishing local stocks as well as for exports to Afghanistan, stimulated by a further fall in prices during the year. A decline was, on the other hand, recorded in imports of raizvay plant and rolling stock and soap. The value of the former fell by Rs. 84,488 to Rs. $16 \% 74$ lakhs chiefly as a result of reduced arrivals of locomotive engines and tenders and parts thereof from the United Kingdom. The decrease in the value of soap is attributable to smaller imports of toilet soap from the United Kingdom.

## Class V.-Postal articles not specified.

13. The total value of imports under this head rose from Rs. 1167 lakhs in $1922-23$ to Rs. 1368 lakhs in $1923-24$ or by '. 7 per cent. The increase was chiefly noticeable in receipts from the United Kingdom which were valued at Rs. 1001 lakhs as against Rs. 860 lakhs last year. The figures recorded under this head do not include imports by post of (1) jewellery, (2) precious stones, (3) gold and silver thread, (4) cigarettes and (5) cinematographfilms which are now classified under their appropriate heads in the general imports. The total number of parcels dealt with during the year was 30,986 as against $3^{0,442}$ in 1922-23. Besioes these, no less than 13,352 letter packets were assessed to duty against 9,708 in the previous year. The total amount of import duty recovered on all articles imported by parcel post advanced from Rs. $2,61,633$ to Rs. $3,11,976$ and that on articles received by letter packets from Rs. 10,371 to Rs. 14,309 in 1923-24. An important change in the system of distribution of foreign parcels received in India was introduced under Government orders during the year under report, and accordingly postal parcels and letter packets for Sind, Punjab, Baluchistan and the North.West Frontier Province which were formerly assessed to duty at Bombay commenced to arrive towards the end of March for assessment at this port.

## EXPORTS

## INDIAN PRODUCE AND MANUFACTURES.

Class I-Food, drink and tobacco.
14. Grain, Pulse and Flout:-Exports of the commodities included under this group, being entirely free from the restrictions which were in force at one time or another during the past 9 years, showed a notable expansion, increasing in value from Rs. 568 lakhs to Rs. 1,268 lakhs and in quantity from 351,995 tons to no less than $945,3^{84}$ tons. The disproportion between the percentages of increase in the quantity (i68 per cent.) and in the value ( 123 per cent.) was due to a fall in the prices of all kinds of food-grains during the year. A study of the following statement in which the figures of the quantities of the different kinds of food-grains exported in 1923-24 are compared with each of the years 1922-23 and $19^{1} 3^{-1} 4$ will show that, despite the improvement during the year, the figures are, on the whole, still behind the pre:war average :-

| :---: | :---: | :---: | :---: | :---: |
|  | 192:-22. | 1922-23. | 1921-22. | 1932-23. |
| Sind ... 464,115 |  | Acres. | Tons. | Tons. |
|  |  | 533,000 | 134,510 | 160,000 |
| Punjob .. 9,980,692 |  | 10,870,000 | 4,185,467 | 3,688,000 | the Punjab, give the particulars noted in the margin regarding the wheat crop. It will be noticed from these figures that in Sind the area under cultivation as well as the out turn showed an increase, but in the Punjab an increase of 9 per cent. in the acreage was accompanied by a reduction of 12 per cent. in the yield. As regards the season' in Sind,

rains, combined with cloudy weather, resulted in a general outbreak of rust in the north which fortunately did not last

## Foreigts <br> Exports'

 long enough to cause any serious damage. In South Sind, however, the crops did well generally, and taken as a whole, the yield in Sind approached the average. In the Punjab the increase in the area was attributed to a favourable season at sowing time. The, canals ran well throughout the winter, and the heavy winter rains were useful to the standing crops; but as in Sind, the unusual cloudy weather which accompanied the rains induced rust which did serious damage in some places, and the yield, which was estimated to be better than in the previous year, was considerably reduced. Of the total outturn of $3,848,000$ tons from Sind and the Punjab, 605,206 tons valued at Rs. 86265 lakhs were exported to foreign countries during the year as against $218,43^{8}$ tons and Rs. 3396 I . lakhs last year, showing an increase of 177 . per cent. in quantity and 154 per cent. in value. The quantity exported during the year, though the highest recorded in the quinquennium, was less than that shipped in 1912-13 by no less than 716,171 tons or 54 per cent. The extent of the export" business was reduced because the product was of a somewhat inferior quality, for which, nevertheless, the growers were able to obtain comparatively high priees owing to a keen demand for internal consumption; and the purchasing activities of exporters, limited by the range of competitive world-prices; were restricted in consequence. It is, however, satisfactory to note that, contrary to the fears entertained in many quarters, the area under wheat in the whole of India for the season $1922 \cdot 23$ rose by $2,628,000$ acres to $30,835,000$ acres or by 9 per cent. The total yield of the crop, estimated at $9,891,000$ tons, was also better than that of the previous year by 61,000 tons or 1 per cent. Of this outturn, 638,252 tons were exported to foreign countries, 95 per cent. of which were shipped through Karachi. The total area under wheat in India for the season 1923.24 is also reported to have been larger than that in the season 1922-23, and the general condition of the crop is said to be fair. The local quotations for white wheat opened at Rs. 4-1 3 per maund in the first week of April, but rose to Rs. 5-1 in the third week of the same month. The price, however, commenced to fa! gradually towards the end of May, and with minor fluctuations came down to Rs. 4 per maund in the second week of August, which was the lowest price recorded during the year. The closing price was Rs. 4-7. The following statement shows the distribution of wheat exports for the past two years and the pre-war year:-Foreign Table No, 14 .
Exports.

It will be observed from the above table that the United Kingdom, our principal customer, purchased 77 per cent, of the total quantity as against 87 per cent. last year. Shipments to France, Italy and. Belgium rose by no less than 58,18 1 tons, 21,346 tons and 24,925 tons, respectively.

Other food-grains.-The figures of the quantities of other food-grains exported during the year are given in the statement at page 34. The striking feature of the trade in the commodities included under this head was the unusually heavy export of barley amounting to 0 no less than $159,93^{8}$ tons valued at Rs. 169 lakhs, or an increase of $145,93^{\circ}$ tons in quantity and Rs. $153^{\circ} 08$ lakhs in value as compared with the previous, year. The figures are also in excess of those for 1913 -14 by 25 per cent. in quantity and 57 per cent. in value. The United Kingdom took the largest amount, viz., $8 \mathrm{r}, 504$ tons as against $9,2,33$ tons, Germany 26,181 tons against only 49 tons, Belgium 17,850 tons against 49 tons and Egypt "for orders" 23,982 tons

These large purchases were made mainly to replace maize, which could not be obtained at moderate prices, from

Foreign
Exports the United States of America, the principal supplier. Better prices ruling in Europe also induced larger exports. It is interesting to note that the quantity shipped from this port represented nearly 95 per cent. of the total quantity ( 168,704 tons) exported from the whole of India. Exports of maize also showed an abnormal increase. Shipments which amounted to 49,839 tons valued at Rs. 51.65 lakhs, showed an increase of no less than 33,972 tons in quantity and Rs. 34.71 lakhs in value as compared with last year. Italy and the United Kingdon were our largest purchasers during the year, the former taking 19,181 tons and the latter 16,943 tons as against 4,677 tons and 7,465 tons, respectively in 1922-23. The share of Karachi in the total shipments of maize from the whole of India was 74 per cent. The attempt of the American farmers to corner this staple and sell it at considerably enhanced prices, forced the British and continental purchasers to obtain their requirements from other sources of supply. This factor accounted to a large extent for the marked expansion in the trade. Great quantities were available for export during the year owing to decreased consumption in India, wheat being more and more preferred by large masses of the population. Higher prices in Europe also stimulated exports. Shipments of gram rose considerably from 15,366 tons to 54,718 tons in quantity and from Rs. 20.54 lakhs to Rs. $59^{\circ} 77$ lakhs in value. Of the total quantity exported during the year, the United Kingdom purchased 22,357 tons, the Netherlands 11,732 tons and France 9,108 tons. Karachi was also the largest exporter of gram, her share in the aggregate shipments from the whole of. India being nearly 77 per cent. Better prices consequent on a sustained demand for animal food induced larger exports. An increase was also recorded in the exports of wheat flour, the figures for the past two years being 25,700 tons valued at Rs. $55^{7} 76$ lakhs and 36,798 tons valued at Rs. $64^{\circ} 33$ lakhs. Egypt, our principal purchaser, again took the largest quantity, viz., 11,647 tons, and of the remainder, considerable quantilies were also taken by Aden, Mauritius and Dependencies, Ceylon and Gulf ports; 570 tons valued at Rs. 99,274 also went to Italy for the first time. Exports of rice dwindled by 23,808 tons in quantity and Rs. 58.26 lakhs in value as compared 'with the previous year, the reduction being almost entirely in shipments of boiled rice to the Gulf ports which drew large quantities

Foreign from Calcutta, the Bengal product being preferred to Sind Exports. boiled rice. Shipments of cleancd rice fell slightly from 4,379 to 4,094 tons in quantity owing to smaller purchases by Ceylon and the United Kingdom. The rice crop in Sind was smaller than in the previous year. The inundation being late and of short duration, the area was greatly curtailed, resulting in the yield falling from 592,066 tons to 499,527 tons in 1923-24. Exports of pulse, other sorts, which amounted to $10,13^{2}$ tons, consisted mainly of lentils and peas to the United Kingdom.

## Class II-Raw materials and produce and articles mainly unmanufactured.

15. Raw cotton.-The figures of the Agricultural

Table No. 15.

|  | Area c | tivated. | Out |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1922-23. | 1923.24. | 1922-23. | 1923-24. |
|  | Acres. | Acres. | Bales of 400 lbs. | Bales of 400 lbs. |
| Sind Punjab | 273,479 $1,394,251$ | $\begin{array}{r} 310,628 \\ 1,914,106 \end{array}$ | $\begin{aligned} & 115,405 \\ & 397,176 \end{aligned}$ | 129,6104 <br> 628,059 | Department's final forecasts are given in the margin. In Sind the area under cultivation showed an improvement of 37,149 acres and the outturn an improvement of 14,199 bales. The expansion in the area is. attributable to the incentive of high prices and the favourable character of the inundation of the river during the year under report. The crop had a good start, and showed vigorous development at first ; but a rather serious attack of boll-worm in September, and a spell of frost about the middle of December, caused a much smaller crop than at first seemed likely, and ihe quality was also affected: 5,000 acres in the Thar and Parkar district with a yield of about 2,548 bales were reported to be under the American variety. In the Punjab, both the area and the yield showed a remarkable expansion. The increase of 37 per cent. in the area was due to high prices, favourable conditions at sowing time and a sufficient supply of canal water. The season on the whole was a favourable one, and the yield shoved an excess of 58 per cent. over the previous year. Of the total crop, 598,900 acres, with an estimated production of 234,118 bales, were reported to be under American cotton. The balance of the area was under the Deshi variety. The following table shows how cotton exports were distributed during the past two years and the pre-war year 1913-14:-

Table No. 16.

During the year under report there was a great worldshortage of raw cotton owing to the American crop having partially failed for the third season in succession. The growth of that crop for 1923.24 was seriously damaged by bad weather and the ravages of insect pests. As a result of these conditions a very difficult state of affairs arose and prices soared to an astonishing level. A great demand for Indian cotton consequently sprang up during the year, especially at the commencement of the local export season, when stocks of the old crop were almost entirely exhausted and the new crop cotton was not yet available: there was a keen demand for Sind and Punjab cotton, and large sums were paid for early shipments. As a sequel to these circumstances exports during the year reached the highest figure on record. No less than 92,198 tons valued at Rs. $1,484^{\circ} 02$ lakhs were exported, showing an increase of 39 per cent. in quantity.and in per cent. in value as compared with the previous year and $\dot{z}_{3}$ per. cent. in quantity and 165 per cent. in value as compared with the pre-war year 1913 - 14 . This difference
between the percentages of increase in quantity and in value gives an idea of the high price level reached during the year. One result was that cotton again secured the leading position among the principal exports, and further improved its share in the aggregate value fromi $3^{2}$ per cent. in 1922-23 to 40 per cent. in $1923^{-24}$. It will be seen from the above table that, with the exception of Germany and China, all the countries drew much larger quantities than in the previous year. Italy was the heaviest purchaser, taking over one-third of the total quantity exported during the year. The United Kingdom and Germany came next, but the quantity ( 16,359 tons) exported to the latter country showed a decline of 3,046 tons or 15 per cent. Of the total quantity ( 671,293 tons) exported from the whole of India, Karachi contributed 14 per cent., and stood second in order of importance, Bombay coming first with an export of $527,5^{84}$ tons.

Raw wool.-The quantity of raw wool exported during the year declined from $25,723,173 \mathrm{lbs}$, to $18,743,710 \mathrm{lbs}$. or by 27 per cent. and the value from. Rs, 192.72 lakhs io. Rs. 153.89 lakhs or by 20 per cent. Increased consumption by Indian factories, which made continuous purchases throughout the year at good prices, checked exports to foreign countries. The bulk of the shipments as usual went to the United. Kingdom.

Seeds.-Exports of secds showed, a further expansion, the quantity having risen by 15 per cent. and the value by to per cent. chiefly owing to unusually heavy shipments of rapeseed during the year, a further record being established by this commodity. The following table compares the volume and value of exports of the different kinds of seeds to the principal countries during the past two years and the pre-war year:-

Rapeseed.-The agricultural returns for the rape and

## Table No. 18.

L (Iv) 217-6
mustard rabi crop are given in the margin. Notwithstanding the favourable character of the season and the excellent inundation, the area under cullivation
in Sind receded by 129,583 acres. owing to the fact that larger areas were devoted during the year to the more paying crops of wheat and cotton. The outturn, though not far short of the normal, was below the quantity at first estimated. A rapid rise in the temperature accompanied by hot winds at the time the crops were nearing maturity affected the yield to a certain extent. In the Punjab, though the area was curtailed by 1 i per cent., the outturn increased by 6 per cent. The season was favourable for sowings. Winter rains were generally sufficient for maturing the crop, and the yield was above normal on irrigated, and generally normal on unirrigated land. The record exports of rapeseed which amounted to 260,266 tons valued at Rs. 566.65 lakhs showed an excess of 16 per cent. in quantity and value over the figures of 1922 -23 which was itself a record year. A large demand from Germany, Italy and the United Kingdom brought about the increase, the first - named country taking the largest quantity, viz., 68,975 tons. Shipments from Karachi represented 77 per cent. of the total quantity ( $33^{6,920}$ tons) exported from the whole of India during the year.

Other seeds.-Exports of other seeds totalled 37.947 tons, of which the greater portion, $v i z=, 35,666$ tons consisted of cotton seed. Almost the entire quantity of this seed was taken by the United Kingdom, and the figures, as compared with the prexious year, show an expansion of 187 per. cent. due to the fact that in consequence of the shortage of the cotton seed crops in the United States of America, the English crushers were obliged to obtain their supplies largely from India. A good crop and a smaller demand in India for cattle-food considerably helped exports. Shipments of linseed - dwindled from $7,3^{1} 3$ tons to 701 tons due to the United Kingdom taking only 560 tons as against 3,876 tons and to France taking none at all against 2,787 tons last yeat. Exports of sesamum also fell considerably from 8,000 tons to $35^{2}$ tons chiefly in despatches to Italy and France. Poor crops both in Sind and the Punjab and the consequent high prices ruling in the local market made very little export business possible.

Hides and skins, raw.-The following table compares the exports of hides and skins, vaw, to the different countries during the past two years. :-

| Articles. | Exports during |  |  |  |

|  |  |  |  |  |

Raw hides.-It will be noticed from the above table that exports of raw hides fell by I 33 tons in quantity, but rose by Rs. 1.5I lakhs in value. The increase in the value was partly due to high prices consequent on a keen demand by Indian tanners and partly to Germany, Italy and the United Kingdom having purchased superior qualities of hides for the civil population during the year. The shortage in the quantity was to a great extent due to a further curtailment of the purchases of cory hides by Spain owing to the depressed economic condition and a steady fall of the exchange in that country. Exports to the United Kingdom also declined by 160 tons in quantity chiefly in shipments of buffalo hides due to a poor demand. Exports to Germany, on the other hand, increased by 227 tons in quantity and Rs. 4.22 lakhs in , value consequent on larger purchases of cone hides to replenish depleted stocks.

Razi skins.--The position as regards the trade in raw skins was also the same as that in raw hides; the quantity
showed a shortage of 414 tons, while the value exhibited an increase of Rs. $1 \cdot 32$ lakhs: Exports consisted chiefly of goat skins, and the decrease in the quantity resulted from reduced shipments to the United States of America, which took 2,573 tons as against 2,741 tons last year. High prices ruling during the year caused an increase in the value. Exports of sheep skins were negligible, the figures for the past two years being $3^{2}$ and 30 tons, respectively.
$\therefore$ Metallic ores, \&c.-The only exports of ores from this port consist of cliromite (chrome iron ore) a mineral product of Baluchistan. : Shipments during the year under report fell from 26,389 tons valued at Rs. 792 lakhs to 18,617 tons valued at Rs. 5.59 lakhs; the decrease being due to smaller pur-- chases by Belgium ( -7, rog tons) and Sweden ( $-3,850$ tons). The United Kingdom, on the other hand, took a much larger - quantity than in the previous year, viz., 9,845 tons valued at Rs. 295 lakhs as against 6,520 tons valued at Rs. i'95 lakhs.

Gums, resins and lac.-Exports under this head, which consisted mainly of rosin and lac seed, rose further in value by Rs. 1.07 lakhs to Rs. 494 lakhs. The improvement was due to larger shipments of rosin to the United Kingdom. The value of lac seed, on the other hand, declined from Rs. I. $\mathrm{O}_{3}$ lakhs to Rs. 71,386 chiefly in shipments to the United Kingdom and the United States of America.

Miscellaneous.-Exports of manures, the principal article included under this head rose in value from Rs. 3249 lakhs to Rs. 35.06 lakhs, shipments .consisting chiefly of animal bones and bone-meal. The value of the former rose by Rs. 6777 lakhs to Rs. 2815 lakhs owing to larger takings by Belgium and France. The value of bone-meal declined from Rs. 10.54 lakhs to Rs. $6^{\circ} 7^{2}$ lakhs, mainly in shipments to the United States of America.

## Class III.-Articles wholly or mainly manufactured.

16. The total value of articles included in class $1 I I$ rose slightly by Rs. 5,350 to Rs. 33.45 lakhs. Of the principal. commodities falling under this group, exports of cotton goods and painters' materials showed an increase. The value of the former rose by Rs. $94,4{ }^{1} 7$ to Rs. 3.72 lakhs, chiefiy under coloured goods to Persia. Exports of painters' materials consisted solely of turpentine, and the expansion was due to the development of the new industry recently started in the Punjab for the manufacture of this article which competes favourably with the Amerigan product. The first shipments of about i 40 cwt . valued $\boldsymbol{x}^{4} \mathrm{Rs}$. Io,000 were made
to foreign countries last year, and durintg the year under repert exports rose to 3,582 cwt. valued at Rs. 2.31 cwt. lakhs. Of the quantity exported this year, the United Kingdom took 308 , cwt., the Netherlands 1,985 and Italy $\mathrm{I}, 287$ cwt. A decrease was on the other hand recorded under skins, trenned or dressed and saltpetre. The value of the former receded from Rs. 1424 lakhs to Rs. $7 .{ }^{\circ} 1$ lakhs and the latter from Rs. $2 \cdot 08$ lakhs to Rs. $1 \cdot 7$ lakhs mainly under shipnients to the United Kingdom.

## Foreign merchandise re-exported.

17. Following upon an increase of nearly Rs. 29 lakhs in 1922-23, the value of articles of foreign merchandise reexported during the year under, report declined by Rs. 12.83 lakhs or 5 per cent. The articles responsible for this contraction were dried fruits, raw ziool, raw cotton and cotton piece-goods. Shipments of dried fruits were mainly raisins to the United Kingdom, and they dwindled. from 2,402 tons valued at Rs. 3396 lakhs to the comparatively low figure of 751 tons valued at Rs. 7.54 lakhs owing to a poor demand from that country.

Exports of razy zool fell by $3,830,87 \mathrm{I}$ lbs. and Rs. 21.83 lakhs to $8,495, \mathbf{1} 46, \mathrm{lbs}$. valued at Rs. ${ }^{6}$ r 44 lakhs. The decrease was due to a large proportion of the Kandahar wool which formerly came to Karachi for export to foreign countries having been partly retained for local use and partly despatched to Russia through the Northern territories in Afghanistan. Increased consumption by Indian factories also checked exports. The "contraction occurred in shipments to the United Kingdom and the United States of America, the purchases by the former amounting to $7,661,169$, lbs. and the latter $824,244 \mathrm{lbs}$. as against $10,934,78 \mathrm{I} \mathrm{lbs}$. and $1,391,23^{2}$ lbs. respectively in 1922-23. Exports of Fersian. cotton which took place for the first time last year fell from 1,057 tons valued at Rs. 1 i61 lakhs to 278 tons valued at Rs. 45 I lakhs owing to reduced shipments to Italy. The total value of cotton piece-goods receded by Rs. 5.47 lakhs to Rs, 1547 lakhs, the contraction having occurred in shipments of white and coloured goods to Persia. The re-export trade in 'tuoollen manufactures, other sorts' which has been showing some activity in recent years owing mostly to large shipments of Persian carpets to the United Kingdom, the United States of America and Constantinople fell slightly in value by Rs. 23,695 to Rs. 4592 lakhs. Exports of foreign sngar, leather and kerosene wil, on the other hand, showed a considerable improvement. Shipments of sugar, which

Coasting amounted to $6,373^{\circ}$ tons valued at Rs. $27^{\prime} 3$ I lakhs in 1922-23,
Trade rose to 10,435 tons valued at Rs. $49^{6} 67$ lakhs in 1923-24 owing to large purchases by Gulf ports during the year. Reexports of leather rose considerably in value from Rs. 13.35 lakhs to Rs. 26.55 lakhs. The expansion was due to shipments of large consignments of tanned fur skins, mostly Persian, to the United Kingdom. The increase under kerosene oil was due to a consignment consisting of $1,552,803$ gallons, valued at Rs. io'i9 lakhs having been re-exported to the United States of America during the year. .

## III-Coasting Trade.

18. A further improvement was recorded in the coasting rade during the year, the aggregate valueincreasing from Rs. 1,948 lakhs in 1922-23 to Rs. 2,324 lakhs or by 19 per cent. Both imports and exports shared in the improvement, the value of the former rising from Rs. 1,088 lakhs to Rs. 1,194 lakhs and of the latter from Rs. 860 lakhs to Rs. 1, I3o lakhs.

## Chief Port-Karachi.

19. The following table shows the aggregate value of the coasting trade of the port of Karachi including Government stores and treasure for the last four years and the prewar year 1913-14:-

Table No. 20.

The aggregate value of the coasting trade of the chief port advanced by Rs. $374^{\circ} 17$ lakhs to Rs. $2,305 \times 35$ lakhs or by 19 per cent., imports showing an improvement of Rs. 108.54 lakhs and exports of Rs. $265^{\circ} 62$ lakhs.

## Private:

20. The following table compares the distribution of the coasting trade in private merchandise, both imports and exports, for the last two years :-

Table No. 2I.

Coasting Trade.

* "A" represents Indian produce. $\dagger$ " B" represents Foreign merchandise.

## IMPORTS.

21. Indian merchandise.-The value of imports of Indian merchandise which aggregated Rs. $1,065 \%$ I lakhs showed an excess of Rs. 107. $3^{8}$ lakhs over the figures of the previous year as a result of larger arrivals of grey cotton piece-goods ( + Rs. 82.87 lakhs), white piece-goods ( +Rs .5 oI lakhs), coloured piece goods ( + Rs. 1876 lakhs) and cotton twist and yarn ( + Rs. 4.87 lakhs) from Bombay, gunny bags
 lakhs) from Calcutta and pepper ( + Rs. 2.43 lakhs) from Madras, other ports. A decrease was, on the oiher hand, recorded under imports of candles (-Rs. 2.62 lakhs), petrot ( $-753,918$ gallons, - Rs. II.O5 lakhs) and kerosene oil ( $-526,05^{8}$ gallons, -Rs. 799 lakhs) from Burma and cleaned rice ( $-1,425$ tons, - Rs. 3.24 lakhs) from Calcutta.

Cotton piece-goods. - The table below gives the trade in Indian piece-goods imported coastwise during the past four years and the pre-war year 1913-14 under each of the three headings, grey, white and coloured.

Table No. 22 :

Foreign merchandise.-The import trade in foreign merchandise improved slightly in value by Rs. 76,923 to Rs. 115.57 lakhs, the increase having occurred under coloured cotton piece-goods ( + Rs. $4^{\circ} 4^{+}$lakhs) and alizarine dyes $(+$ Rs. $1 \cdot 53$ lakhs) partly set off by a decrease under aniline dyes (-Rs. I•59 lakhs.)

Cotton piece-goods.--The following table shows the imports of foreign piece-goods coastwise for the past four years and the pre-war year 1913.14 under each of the three headings grey, white and coloured.

Table No. 23.

| Years. |  |  | G |  | White. |  | Coloured. |  |

## EXPORTS.

22. Indian produce and manufactures.-The value of articles of Indian produce and manufactures exported coastwise showed a marked expansion of Rs. 251.80 lakhs, the figures for the past two years being Rs. 718.84 . lakhs and Rs. 970'64 lakhs, respectively. The increase was to a great extent due to an abnormal increase in the value of exports of cotton ( $+\mathrm{R} \mathrm{s} . \quad 178.33$ lakhs) to Bombay, despite a decrease of 500 tons in quantity. The other important articles which exhibited an improvement were rice, other sorts $(+14,393$ tons, + Rs. 23.58 lakhs $)$, gram ( $+12,644$ tons, + Rs. 1446 lakhs), pulse $(+5,785$ tons, + Rs. 8.52 lakhs) and wheat flow $(+5,470$ tons, + Rs. 690 lakhs) to Madras, and cottonseed ( $+3,596$ tons, + Rs. 3.69 lakhs) to Kathiawar. A decrease, on the other hand, L (Iv) $217-7$

Coasting occurred under exports of wheat (-25,150 tons, -Rs. $50^{\circ} 27$
Trade. lakhs) to Bombay and sesamum ( $-1,802$ tons, -Rs. 5.39 lakhs) to Madras and Burma. The following table shows the exports of cotton to Bombay during the past four years and the pre-war year 1913-14:-

Table No. 24.

Foreign Merchandise.-Exports of foreign merchandise advanced by Rs. 5 lakhs to Rs. $30^{\circ} 58$ lakhs mainly under shipments of sugar ( + Rs. 10008 lakhs) to Madras, Cutch and Kathiawar partly set off by a decrease under cotton picce-goods (一Rs. $4 \times 15$ lakhs) mostly to Bombay.
23. Treasure.-As in the previous year there were no transactions in gold with coast ports. Imports of silver. fell in value from Rs. 16,000 to Rs. 7,500, and consisted of - Government of India rupees from. Bombay. Exports of silver rose considerably from Rs. 1,000 in 1922-23 to Rs. $8 \cdot 65$ lakhs, representing the value of shipments of bullion to Bombay.

## GOVERNMENT TRANSACTIONS.

## Stores.

24. The value of Indian produce and manufactures declined from Rs. 149 lakhs to Rs. 60,564 under imborts and from Rs. $1 \cdot 51$ lakhs to Rs., 4,528 under exports, while that of foreign merchandise rose from Rs. 7.56 lakhs to Rs. 8.92 lakhs under imports and from Rs. 2.87 lakhs to Rs. $4^{*} 5^{2}$ lakhs under exports.

## Treasure.

25. There were again no transactions on Government account under this head during the year under report.

## Subordinate ports.

26. Keti Bandar and Sirganda.-The total value of the entire trade of these two ports rose from Rs. 17.24 lakhs to Rs. $19^{\circ}$ I5 lakhs during the year under report. Keti Bandar contributed 64 per cent. and Sirganda 36 per cent. to the total value. Imports into Keti Bandar consisted chiefly of cotton twist and yarn, cotton piece-goods, wheat flour, spices, liquors, matches, sugar and soap; and exports consisted of rice, firewood, bairi and jowar, barley and r"nzo hides and skins. Imports into Sirganda were insignificant and exports consisted of rice, bajri and jowar, mustard oil and rapeseed.

## IV.-Misce!laneous.

27. Shipping.-The table below gives the number of vessels entered at and cleared from the ports of the province of Sind during the past two years.

Table No. 25.

Foreign trade.-The shipping figures in the above table clearly indicate the trend of the trade of the port during the year. The number of steamers entering the port from foreign countries rose by 14, and 91 more cleared outwards. Under arrivals, 253 steamers brought cargoes, and 90 entered
in ballast as against 285 and 44. The number of steamers clearing with cargo was 376 and in ballast 31 as against 270 and 46, respectively in the previous year. The increase, (viz.,64), in the number of clearances as compared with the number of arrivals is because the vessels - which cleared direct to foreign ports were more numerous than those which arrived direct from such ports. Vessels which arrive or clear via British Indian ports are registered uncler the coasting trade. The fluctuations in the number of steamers visiting the port are explained below. Under entries, important increases were recorded in arrivals of steamers from Italy ( +17 steamers) due to heavy shipments of wheat, cotton and rapeseed. Arrivals from Natal, on the other hand, showed a decrease of 8 steamers owing to reduced imports of coal. The heavy increase under clearances of steamers occurred chiefly in departures to the United Kingdom ( $+\sigma_{3}$ steamers) due to heavy shipments of wheat, seeds and cotton, and to Germany ( +20 steamers) due to increased shipments of seeds and cotton. The increase in the number of sailing vessels occurred chiefly in arrivals from the Gulf ports. As regards tonnage, the average tonnage per steamer rose from 2,785 to 2,790 tons and that of sailing vessels from 91 to 96 tons.

Coasting trade.-The shipping employed in the coasting trade exhibited a further notable improvement, both steamers and country craft contributing to the increase.

Freight--As compared with the previous year, there were no marked fluctuations in the rates of freight during the year under report. The freight for wheat and rapeseed to the United Kingdom, which was available at $26 s$. and 23 s. $6 d$. per ton at the commencement of the year, rose in the third week of April to 27 s .6 d . and 25 s ., respectively, the figures being the highest recorded during the year. A steady drop, however, set in later, beginning with the last week of May; and $21 s$. for wheat and $88 s$. $6 d$ for rapeseed were quoted in the last week of August, which were about the lowest figures recorded during the year. The month of October, however, again witnessed a rise, which continued during the rest of the year, and the rate for wheat rose to as much as 26 s . 6 d . and that for rapeseed to 24 s . in January and February, and stood at $24 s .6 d$ and $22 s$. respectively, at the close of the year. The average rates to ports in the Persian Gulf were Re. 1 per bag by steamer and 8 annas per bag by country cralt.

The following figures show the number of steamers of each nationality that entered the port of Karachi during: the year 1923-24 as compared with 1922-23:-

28. Exchange.-The steadiness of exchange was, as already remarked, one of the features of the year under review. At the beginning of the year the rupee was quoted at $1 / 4 \frac{1}{32}$ for demand drafts, and remained more or less at that level until the 24th August, when it dropped to $1 / 3 \frac{7}{8}$. Thereafter, with increased exports and tightness of money generally, exchange showed a much stronger tendency, and rose steadily to $1 / 53^{5}$ on the $23^{\text {rd }}$ December. This level was not, however, long maintained, and the closing rate on the 31 st March was $1 / 4 \frac{5}{8}$.
29. Revenüue.--The following table shows the total collections for the Province on account of Import and Export duty and refunds therefrom, and the duty on imported salt separately for the last four years and the pre-war year :-

- Payments up to date.

The total grose receipts of Customs revenue during the year under report amounted to Rs. $3^{64094}$ lakhs, showing a decrease of Rs. 4.35 lakhs or 1 per cent. as compared with the previous year. The decrease was shared by both import and export duties. Collections on account of the former declined from Rs. $3^{60} 3^{6}$ lakhs to Rs. $359^{\circ} 08$ lakhs, or by Rs. 1.27 lakhs. Cotton piece-goods, the principal item, accounted for 26 per cent. of the total import revenue, and the realizations which amounted to Rs. $93^{\circ} 84$ lakhs were in excess of those of the previous year by Rs. 3.09 lakhs. Sugar, the next important item, which accounted for 21 per cent. of the impoft revenue, declined from Rs. $90^{\prime} 54$ lakhs to Rs. 75.54 takhs or by Rs. $\mathrm{I}_{5}$ lakhs. Receipts from liquors, tobacco and steel which amounted to Rs. $3^{\circ} \circ 7$ lakhs, Rs. 23.80 lakhs and Rs. 2'81 lakhs also showed a shortage of Rs. : $: 33$ lakhs, Rs. 6.66 lakhs and Rs. 2.04 lakhs, respectively. Increases were, on the other hand, recorded under matches ( + Rs. 8.35 lakhs), woollen yarn ( + Rs. 3.12 lakhs), , kerosene ( + Rs. 70,191) an i motor cars and motor cycles ( + Rs. 3.50 lakhs). The total amount of export duty fell by Rs. 307 lakhs to Rs. $5 \cdot 86$ lakhs chiefly due to reduced exports of hides and skins ( - Rs. 2.23 lakhs) and rice ( - Rs. $8_{3,945}$ ).

## ADMINISTRATION.

-3o. Indian Merchandise Marks Act-During the year under review there were altogether 1,207 consignments which infringed the requirements of this Act, against 477 in the previous year, and the penalties imposed amounted to Rs. 45,339 against Rs, 10,471 in 1922-23. The cases
were distributed as follows according to the countries of origin :-

| Germany ... | ... 585 | Austria |  | 16 |
| :---: | :---: | :---: | :---: | :---: |
| Belgium ... | ... 133 | Portugal ... |  | 2 |
| United States of America 120 |  | Other European count- 17 ries. |  |  |
| United Kingdom | ... 110 |  |  |  |
| Switzerland | ... 63 | Straits Settlements |  | 5 |
| France | ... 33 | China |  | 4 |
| Holland | $\cdots 3^{\text {a }}$ | Egypt |  | 3 |
| Italy | ... 27 | Australia ... |  | 2 |
| Japan ... | ... 25 |  |  |  |
| Czecho-Slovakia | ... 21 | Total ... 1,207 |  |  |
| A summary of the cases is given below :- |  |  |  |  | Class of cases.

Class A.-(Application of counterfeit trade-mark or false indication in respect of the person by whom the goods were made or produced). -There were 13 detentions under this class . Of these, five related to cotton warped sateens, five to toilet soap, and one each to Perfection whisky, cotton sewing thread and German hurricane lantern globes. Of the five consignments of sateens, two were eventually released under the orders of the Court, and the remaining three because the aggrieved parties failed to furnish the necessary indemnity bond. Of the five consignments of toilet soap, four were released as the party on whose application they were detained failed to take the necessary action against the importers within the prescribed period, and the remaining one is still under detention pending the orders of the Court. The consig,mments of whisky, sewing thread and globes were allowed clearance with the mutual consent of the parties concerned.

Class B.-(Application of false trade description or other indication in respect of the country in which the goods were made or produced).-There were $933^{2}$ cases under this class of which the following were the most important:-

A consignment of bank paper of German origin watermarked "Exira Strong". Swords imported from Austria, the blades of which were engraved with the name and address of a British Indian dealer; and a monogram consisting of the letters "G. R. I." and a crown. A consignment of riffes of German manufacture engraved with the name and address of a British Indian dealer. Chinaware fruit plates imported from Germany bore illustrations of well known London buildings such as London Bridge, the Tower of London, Westminister Abbey, the Houses of Parliament, \&c., and the name of the building in English. : A consignment of toilet soap of German origin bore English and French descriptions. Origin was not indicated on any of the articles mentioned above. All the consignments were confiscated and released on payment of substantial penalties after the offending markings were corrected wherever possible. Razors from Germany, labelled and marked in a manner suggesting British oriyin, were confiscated; redemption was allowed subject to payment of a penalty and re-shipment. A consignment of perfumed spirits from Germany,
labelled with French descriptions, was passed on payment of a penalty almost equal to the value of the goods and after correction of the labels.
Class C.- (Application of trade description false in. other respects).-The number of cases dealt with under this head was 94 . Those of special interest are briefly detailed below :-

Artificial silk braids from Germany marked "Silk
Russia Braids." Several consignments from Germany of glass bangles packed in boxes containing one dozen pairs but marked as containing two dozen pairs. Consignments of account-book paper from the same country marked with incorrect weights. Packets of metal leaves marked "Silver metal leaf superior quality" and reported by the Chemical Analyser to Government to contain no silver in their composition. All the above were confiscated and redeemed on payment of penalties and correction of the false descriptions. Twelve consignments of wine described as "Port" were detained under class $C$ (3), as they were not accompanied by the required certificates from the competent Portuguese authorities. All were eventually released either on production of the necessary certificates or on payment of substantial penalties or as special cases.
Class D.-(L̈Lengths not properly stamped on piece-goods).-168 cases were detected under this head. Of these, 74 related to cotton piece-goods, 60 to woollen 'piecegoods, 22 to cotton embroideries and 12 to cotton fents and remnants.

All the cases excepting the thirteen under Class $A$ were detected by the Appraisers and Examiners in the ordinary course of their duties.

There was only one appeal to the Commissioner in Sind against the orders of the Collector of Customs which was rejected.

The very large increase in the number of detections was due partly to increased imports and partly to the exercise of greater vigilance by the Appraising and Examining staff. It is noteworthy that the cases of infringements by German goods were more than four times as numerous as those in' respect of goods from any other country.
I. (iv) $217-8$

3i. Customs offences.-During the year under report 561 cases were adjudicated under the Sea Customs Act as against 603 in $1922 \cdot 23$, and the collections on account of fines and forfeitures in respect thereof amounted to Rs, 27,323 against Rs. 54,645 in $1922 \cdot 23$. The Appraisers' section detected four importations of obscene picture post cards worth Rs. I,340 consigned from Germany. Other detections made by this section of prohibited or restricted articles imported as cargo were 150 "Sham death" pistols and 500 cartridges therefor declared as "Huntsman's equipment" and found to be fire-arms and ammunition within the meaning of the Indian Arms Act ; and a consignment of 25 copies of a pirated edition of Bentley's complete phrase code published in the United States of America.

The Postal Branch of this section detected illicit importations of (1) 6 revolvers and 1 pistol from Mosul and Baghdad, (2) a gas pistol and to cartridges from Germany and (3) 12 parcels containing sample cartridge cases. The sender of the parcel from Mosul, which contained the pistol mentioned above, was sentenced to six months' rigorous imprisonment under the Arms Act. This branch also seized 89 packets and 3 parcels containing obscene pictures, 4 packets of cigarette and tobacco cases which bore obscene pictures and I packet of cigarettes with an obscene picture on each cigarette. All these came from Germany.

The Preventive Service were responsible for the detection of 21 cases of illicit importations of arms and ammunition which resulted in the seizure and confiscation of 8 revolvers, 4 pistols, 2 rifles, 2 rifle bolts, I bayonet and 487 rounds of ammunition. Penalties to the extent of Rs. 2,156 were also imposed in these cases. Most of these seizures were made in the course of rummaging operations. During the year $I_{3} 0$ foreign vessels were rummaged by the Preventive staff. There were also 4 seizures of obscene pictures and cards in which the goods were confiscated and penalties imposed. Only one important case of cocaine was detected in which 500 grains of the drug were found concealed behind nailed up planks in the bulk-head whilst rummaging the firemen's quarters of an Italian vessel. The penalties recovered from steamer agents at the instance of the Executive Audit section amounted to Rs. 14,722 against Rs. 43,334 in 1922-23. This falling off is due entitely to the fact that the previous year's figures were inflated as a result of the clearance of large arrears of ships' files.
32. Tendered goods.-During the year goods were taken over by Government under section 32 of the Sea Customs Act in two cases as the importers were not willing to pay duty on the values appraised by the Custom House. The goods were sold by public auction, and in both cases, the values realised exceeded" those declared by importers, Government making a net profit of Rs. 414.
33. Appeals.- There were 15 appeals to the Collector against decisions of the Assistant Collectors and 6 to the Commissioner in Sind as Chief Customs Authority against the orders of the Collector. In 13 cases the decisions of the Assistant Collectors were upheld and in 2 cases they were modified. The Commissioner confirmed the orders of the Collector in all the six cases. There was one revision application to the Bombay Government which was also rejected.
34. Testing.-The Chemical Analyser to Government for Sind tested 1,132 samples on behalf of the Customs Department during the year. Of those, 562 related to medicines, essences and chemicals, 65 to liqueurs and bitters, 291 to gold and silver thread and lametta, 19 to light caoutchoucine and pyridine brought to the Custom House for denaturing imported rectified spirit, 112 to denatured spirit, 9 to milk and 74 to other miscellaneous articles.
35. Receipts and expenditure.-Details under these heads are exhibited in Table D of the appendix. The gross receipts during the year amounted to Rs. $3,66,48,575$ against Rs. $3,70,32,088$ in $1922-23$. The total expenditure. was Rs. $6,10,086$ or 166 per cent. of -the gross and 1774 per cent. of the net collections as against Rs. $6,15,305$ or 1.66 per cent, of the gross and i.79 per cent. of the net ${ }^{\circ}$ collections in $1922 \cdot 23$. As a result of the adoption of special measures of economy, savings to the extent of about Rs. 30,000 were effected in the budget allotment sanctioned for expenditure during the year.
36. Miscellaneous matters.-In connection with the extension of the ind appraisement system, arrangements have recently been made for the examination of import cargo in the Port Trust transit sheds, thus avoiding the inconvenience to importers caused by bringing packages to the Custom House Hall for examination. A special procedure for the supervision and examination of packages containing arms and aimmunition immediately after landing has also been introduced.

The following Acts affecting Customs administration were passed during the year:-
(1) The Indigo Cess repealing Act, 1923.
(2) The Central Board of Revenue Act, No. IV of 1924.
(3) The Indian Finance Act, 1924.
(4) The Sea Customs Amendment Act, No. VIII of 1924.
(5) The Indian Tariff (Amendment) Act, 1924 (Act IX of 1924).
Under the Central Board of Revenue Act, the Customs administration was transferred to the Central Board of Revenue with effect from the ist April 1924.
37. Documents.--There was an all-round increase in the transactions dealt with at the Custom House as will be seen from the following comparative statement showing the number of the different classes of documents delivered by importers and exporters during the past two years:-

|  |  | 1922.23. <br> Nos. | $1923-24$. <br> Nos. |
| :--- | ---: | ---: | ---: |
| Bills-of-Entry.... | $\ldots$ | 60,368 | 75,376 |
| Shipping Bills | $\ldots$ | 29,059 | 39,159 |

| Seistan Drawback Bills | $\ldots$ | 1,950 | 2,707 |
| Afghanistan Invoices | $\ldots$ | 735 | 2,845 |

38. Establishment.-I held the appointment of Collector of Customs during the year. Messrs. Singleton and "Brennan served as Assistant Collectors, the formér throughout the year and the latter from 9th April 1923 . During the year under report Government sanctioned the post of a third Assistant Collector for this Custom House which was temporarily held by Mr. P. D'Cunhá, local Auditor, from the 16th June 1923 until the end of the year.

## I.-General Review of Foreign Trade.

I. Introductory.-The last annual review recorded a distinct improvement in the trade of the port since the depression which set in at the end of 1920. The figures of trade embodied in Table A of the Appendix show that the improvement has been further accentuated during the yeüar under report, and afford much cause for satisfaction to all interested in the development of this progressive port. Conditions on the whole have been favourable. For the fourth year in succession the monsoon was a good one and led to a large increase in the surplus of agricultural products available for export. The general rise in the value of these products consequent on a heavy demand from the overseas markets also contributed largely to the increase in the volume of exports, especially of wheat and cotton. The notable expantion in exports increased the balance of trade in favour of the port to the extent of Rs. 2,156 lakhs as compared with a credit balance of Rs, 1,369 lakhs in 192324 and debit balances of Rs. 176, Rs. 1,534, Rs. 1,553 and Rs. I 33 lakhs in the four preceding years respectively. The achievement of this credit balance constitutes a record, and is the outstanding feature of the year's trade. On the import side, satisfactory progress was also recorded, and conditions were more favourable than in the previous year. With the final liquidation towards the end of the previous year of the heavy stocks of imports accumulated in the post-war boom and the absorption of large quantities of Government Surplus Stores, a healithier tone pervaded the market and facilitated the resumption of normal trading relations. The prosperity induced by a succession of favourable seasons and the high prices realised from the sale of agricultural products abroad were also important factors in conjunction with favourable rates of exchange in stimulating the demand for foreign goods. The more settled political conditions in the country assisted the recovery of the import trade. A notable event in regard to this branch of the trade was the adoption by Government of a policy of protection of Indian Industries against foreign competition. The Tariff Board, which was appointed to consider the claims of different industries, first examined the claim of the steel industry and recommended the iniposition of protective tariff duties on imported steel for a period of three years. These proposals were accepted and incorporated in the Steel Industry (Protection) Act, 1924. The question of extending similar concessions to other industries is also being examined by the Board.
2. General position of foreign trade.-In the year under review an expansion of Rs. 1,995 lakhs took place as compared with 1923-24, in the aggregate turnover of the maritime trade of
the Province of Sind, which reached the record level of Rs. 10,976 lakhs. 19 per cent. of this figure represents the value of the Coasting trade, which is dealt with in section III of this report, and 81 per cent. that of the foreign trade which was confined as usual to Karachi. The aggregate value of the foreign trade increased by no less than Rs. 2,176 lakhs or 33 per cent. to Rs. 8,840 lakhs of which exports and imports contributed 62 and 38 per cent. respectively. Of this increase of Rs. $2,1.76$ lakhs; exports accounted for Rs. 1,482 lakhs, and imports for Rs. 694 lakhs, the net result being that the favourable balance of trade rose by Rs. 787 lakhs to Rs. 2,156 lakhs. The marked increase in the aggregate value of the foreign trade is due chiefly to an expansion in the volume of imports and exports which, as will be seen from the detailed analysis of the trade appearing in the following pages, is steadily approaching the pre-war level. Exports during the year were valued at the unprecedented figure of Rs. 5,498 lakhs, representing an increase of 37 per cent. over 1923-24. Shipments of raw cotton and wheat accounted for $6_{3}$ per cent. of the total value and were mainly responsible for the remarkable improvement in the position. Of the former commodity no less than 119,504 tons valued at Rs. 1,860 lakhs were exported, constituting a record for the port. Shipments of wheat amounted to 1,046,255 tons valued at Rs. 1,612 lakhs. Imports increased in value by 26 per cent. to Rs. 3,342 lakhs. This improvement was due chiefly to large receipts of cotton manufactures and sugar which accounted for 56 per cent. of the total value.
3. Balance of trade.-The following table shows the balance of trade in merchandise and treasure under foreign trade during the last ten years and the pre-war year 1913.14:-

Table No. I.

An examination of the figures in the above table and of the two graphs prefixed to this report afford a clear index of the marked improvement recorded in trade conditions during the past two years.
4. Geographical distribution.-The distribution of the foreign import and export trade of Karachi by countries is shown in detail in Table B of the Appendix with the percentage which each country bears to the whole. The following abstract compares the percentage shares of the principal countries during 1924-25 with those in 1923.24 and the pre-war year 1913-14 :

Import trade. - It will be observed that the share of the Empire as a whole in the total import trade of the port has remained stationary at 61 per cent., while that of the Unted Kingdom has declined to 57 per cent. from 59 per cent., in 1923-24 and the prewar year. The aggregate share of European countries, viz., 15 per cent. is the same as in the previous year but has dropped 3 per cent as compared with the pre-war proportion. The respective shares of Belgium, Italy and France show no marked fluctuations. That of Germany, however, has increased to 6 per cent from 5 per cent. in 1913-14 and 1923-24 and is likely to expand still further in the near
future. It is also noteworthy that the share of other European countries has declined from 7 per cent, in $1913^{-1} 4$ to 4 per cent. in 1923 -24 and 3 per cent. in $1924-25$. The supplies from countries in Asia, which consist chiefly of sugar from Java and piece-goods from Japan, increased from 16 per cent. to 17 per cent. The American share in the trade declined from 6 per cent. in 1923.24 to 5 per cent. in 1924-25 which, however, is nearly 3 per cent. above the pre-war proportion. Imports from Africa constitute a small fraction of the total trade and call for no remarks. The present position of the principal countries participating in the trade in the more important commodities is summarised in the following table:-

Export trade. -The share of the Empire in the export trades dropped from 43 per cent. in 1923-24 to 41 per cent. in the year under review. The United Kingdom as usual accounted for the bulk of the trade, her purchases representing nearly 39 per cent. of the total exports as compared with 40 per cent. in I923-24 and $3^{8}$ per cent. in the prewar year. Among the European countries, which shared in the export trade to almost the same extent on the aggregate as the British Empire, the leading position was taken by Italy. Her purchases, consisting chiefly of raw cotton, accounted for 12 per cent. of the total exports as compared with 16 per cent. in 192.3-24 and only 2 per cent. in 1913-14. The percentage shares of Germany and France showed an appreciable reduction as compared with the previous year's proportions and are considerably below the prewar level. No marked change was recorded in the trade with other European countries. The trade with Asiatic countries increased from 4 per cent. of the aggregate value in 1923-24 to 12 per cent. in the year under review, owing mainly to the very heavy shipments of raw cotton to 'Japan. No alterations of note occurred in the export trade with America, whose principal transac. tions were confined to purchases of wool, woollen carpets and raw
goat and sheep skins. The share of Africa increased from 092 per cent, in 1923-24 to 3.94 per cent. in 1924-25. The increase was partly due to larger purchases of wheat and wheat flour and partly to the inclusion of some of the figures of wheat shipped to Port Said 'for orders' the destinations of which could not be ascertained up to the time of writing. A feature was the large export of wheat to Alexandria which port probably sërved as a distributing centre. The present position of the principal countries obtaining their supplies of the more important commodities in the export trade is summarised in the following table:-

5. General changes in the private export and import trade. -The following table gives the value of the export and import trade under ihe five main groups for the last four years and the pre-war year :-

Table No. 2.

Table No 2-concld.

The general changes under each group are discussed in this paragraph, and the variations in the principal commodities are explained later in section II of this report.

Exports.- The port of Karachi being the entrepot for the distribution of the produce of the province and of upcountry, it will be useful to review briefly the seasonal conditions obtaining in those places before dealing with the different heads of trade. The rainfall in Sind was very heavy and damaged the early sown crops to some extent. The inundation of 1924 was indeed a very good one in as much as the water-supply in all the canals exceeded actual requirements and the full supply level was maintained for a longer period than usual. The gauge at Bukkur reached its fair irrigating level of 13 feet and over on the 19th July 1924 against 20 th August last year. This height was maintained for a period of 50 days. against 16 days in 1923 . The very high level of water in the River Indus for an unusually long period, however, caused floods in several parts. The whole of Nawabshah and part of the Hyderabad district were practically submerged, and a few serious breaches were caused in some of the bunds in the Shikarpur, Western Nara and Karachi

Canals Districts which resulted in damage to the kharif crops. At Attock, the river rose to an extraordinary height of 56 feet. The portions flooded are expected to yield very good rabi crops except in the Karachi Canals District where the soil was not fit for rabi cultivation having emerged late in the season. In the Punjab the monsoon broke in the second week of July and gave moderate rain during that month as well as in the following month nearly all over the province. Good rains in September assisted in maturing the kharif crops. The early rabi sowings were greatly helped by the good and general rainfall in August and September. Water in the canals was sufficient and the river floods were high. In the Linited Provinces the monsoon commeñced later than usual. The rainfall in June was considerably below normal and in July and August it was unevenly distributed. Excessive rains, however, fell in September and October and caused some damage to the crops. The sowings of the rabi crops were carried on under favourable conditions, there being sufficient moisture in the soil for the purpose. Winter rains though below normal proved beneficial to the crops in certain districts. Continued cloudy weather accompanied by frost and rust had, however, an adverse effect on the crops in many districts.

The results of the favourable climatic conditions are to be seen in the figures of exports of Indian produce and manufactures embodied in the table at the head of this paragraph. Articles of food, drink and tobacco (group I) showed a marked recovery. Although exports in this group have not yet attained the leading position held in pre-war times, the value recorded, viz., Rs. 2,419 lakhs represents an increase of no less than 90 per cent. over that in 1923-24. This improvement has raised the share of articles under this group in the aggregate value of exports from 35 to 46 per cent. in 1924-25. Large exports of wheat were mainly instrumental in bringing about this satisfactory position. Other articles which also showed increases were barley, gram, pulse, wheat flour and rice Abnormal shipments of high-priced cotton were largely responsible for the increase of Rs. 37 I lakhs or 15 per cent. in group II (Raw materials and produce and artucles mainly unmanufactured). Of the other important articles in this group. wool and raw hides and skins, also showed an expansion, while rapeseed recorded a decline. Under re-exports of foreign merchandise, the contraction of Rs. 24.58 lakhs under group $I$ was due to reduced shipments of sugar. Groups $I I$ and $I I I$, on the other hand; showed an expansion, the former under raw wool and the latter under woollen carpets.

Imports.-A notable feature in the import trade was an allround improvement in the different groups. Group $I$ exhibited an
increase of Rs. 259 lakhs or 53 per cent. to which suggar alone contributed Rs. 238 lakhs. Liquors and provisions and cilman's stores also shared in this increase." The small increase in Group II was due to larger arrivals of kerosene and lubricating oils during the year. The most important group under imports is Group $1 / 1$. Though its share in the total value of imports receded slightly from 71 per cent. to 69 per cent. in 1924-25, the value recorded, vis., Rs. 2,096 lakhs showed an increase of Rs. 563 lakhs or 37 per cent. over the figures of the past year. As usual, cotton manufactures, the principal article claimed the bulk of this increase. Imports of apparel, cutlery, hardware, implements and instruments, sewing machines, textile machinery, iron and steel, railway plant and rolling stock, vehicles and woollen yarn and manufactures also recorded an improvement. A decrease, on the other hand, was noticeable in receipts of prime-movers (other than electrical), aniline dyes, glassware and earthenware, matches and cement.

## 6. Comparative importance of principal imports and

 exports.-The comparative importance of the principal articles of the import and export trade so far as their values are concerned is shown in Tables C and D, respectively of the Appendix. It is noteworthy that no change occurred during the year in the relative positions of the seven leading articles in the Import trade. Cottonmanufactupes accounted for $42^{\circ} 13$ per cent. of the total imports in the year under- review äs compared with 3957 per cent. in 1923-24 and thus further consolidated the premier position hitherto held. Imports of sugar which are next in order of importance also fared better rising from 16.08 to 19.34 per cent. The shares of machinery metals, oils, wool and liquors, however, decreased slightly during the year. - Among other items the most important change, occurred in the position of "articles imported by post" which rose from the 23 rd to the 8 th place on the list (vide Table C of the Appendix). The increase in the value recorded under this head was due to the inclusion of the value of postal parcels for Sind, Punjab, Baluchistan and the North-West Frontier Province which were formerly assessed to duty at Bnmbay. The first seven items in the list of exports have also retained the relative positions beld in the previous year, but the changes in the shares contributed by each to the aggregate value of exports were more pronounced. Raw cotton which ranked fist declined from $39-92$ to $35 \cdot 59$ per cent, while there was a welcome recovery in the share of wheat from $23^{\circ} 21$ to $30^{\circ} 83$ per cent. Rapeseed registered a falling off from 15.24 per cent. to only 8.76 per cent., while the share of barley rose from 4.55 to 8.60 percent.7. Variations in the average prices of articles.-The following statement shows the variations in the average prices of
certain articles imported inio and exported from the Province of Sind, the average prices of the year 1899-1900, 1900-0: and 1901.02 being taken as reo:-

Table No. 3.

| Cotton, raw .. ... | 100 | 2.55 .32 | 187.89 | 16233 | 21873 | 33.63 | 31976 |
| Wool (Indian) ...ib | 100 | 97'21 | 186.91 | 158.27 | 168.43 | $184{ }^{\circ} 5$ | 19512 |
| Do. (Foreign) | 100 | 110.73 | 187.04 | 14847 | 146.13 | 156.43 | :88.64 |

It will be seen from the above table that the general downward tendency of the market experienced last year in respect of the chief articles of import trade continued during the year under report also. Excepting cotton manufactures and kerosene oil, the prices of the majority of articles more or less weakened, the drop in sugar, coal and iron and steel being more marked. The stiff prices of raw cotton account for the high level of prices of cotton twist and yarn and grey and white piece-goods, the small decrease in coloured piecegoods being more due to a recoil from the very high prices obtained last year than to any real improvement in the position. The price of kerosene oil rose in sympathy with the world-price of crude oil which ruled high during the year. On the export side, the position was, on the other hand, quite the reverse, the prices of almost all the articles, barring raw cotton, maintaining a high level during the year. This appreciation was due to a worldwide demand for Indian products. Though raw cotton fell in price as compared with 1923* 24, the prices recorded were higher than any of the other preceding years. The effect of the change in the level of prices since the outbreak of the war is illustrated in the following table in which the
volume of the trade in $1924-25$ in some of the more important articles of import and export is compared with the pre-war volume and its value recalculated at pre-war tates:-

An examination of the figures in the above table reveals a very int eresting position in both the import as well as the export trade of the port during the year under report. It will be seen that in respect of the selected articles, both the actual total values as well as the total values worked out at pre-war normal rates show an an advance over the average values of three years ending 1913.14, a fact which denotes a welcome increase in the volume of the trade,
which is the more striking in as much as the pre-war period selected for comparison includes the record year. 1912-13: The effect of the present high level of pricess is also reflected in the figures of value recorded in the above table, which show that though the actual values of imports and exports in 1924-25 were higher than the prewar average values by 96 per cent. and 93 per cent., respectively, yet if they were recalculated at pre-war rates, these increases would dwindle down to 9 per cent. and 20 per cent. respectively.

## TREASURE-PRIVATE.

8. The following table compares the imports and exports of treasure on private account for the past two years :-

Table No. 4.

Imports of gold suffered a set-back, the value having receded by Rs. 5.54 lakhs or 17 per cent, to Rs. 26.40 lakhs in 1924-25. The contraction occurred solely under bullion from the United Kingdom, whence 33,237 ozs. were imported as against $39,697 \mathrm{ozs}$. last year. The decrease was due to the fact that during the year under report purchases of gold for upcountry were mostly madedirect in Bombay, where the rates quoted were lower than at this port. Sovereigns which came wholly from the United Kingdom slightly increased in value by Rs. $57,4^{29}$ to Rs. 473 lakhs. Although the total value (Rs. 3182 lakhs) of imports of silver did not show any marked variation as compared with the previous year, yet in direct contrast with the trade of that year, $7 \%$ per cent. of the imports comprized Government of India rupees, purchases of bar silver dwindling from Rs. $28 \cdot 28$ lakhs to Rs. 9.44 lakhs or by 67 per cent. Only $477,3^{\circ} 7$ ozs. of bar silver were imported from the United Kingdom as against $975,7 \mathrm{II}$ ozs., and none came from the United States of America against 398,992 ozs., in 1923-24. The
explanation given above for the contraction under gold bullion holds good in the case of bar silver also, the upcountry merchants having got their requirements from Bombay; at favourable rates. The heavy increase in imports of Government of India rupees was attributable to larger asrivals from the Bahrein Islands, Mesopotamia Muscat, Other Native States in Arabia. and Persia for the purchase of rice, wheat and other food-grains. Exports of gold advanced by Rs. 67,972 to Rs. 86,291 and mainly represented the value of 205 ozs. of bullion and of 4,675 sovereigns to gulf ports. The decrease of Rs. 9 lakhs in the exports of silver was solely the result of smaller consignments of Government of India rupees to the Bahrein Islands owing to reduced transactions in pearls. The value Rs. fo 29 lakhs of other coins represented shipments of krans which came by land chiefly from Peshawar and passed through this port in transit to Persia.

## GOVERNMENT TRANSACTIONS.

9. The following table compares the items of importance to the commercial public in Government transactions with foreign countries during two years 1923 -24 and $1924-25$.

Table No. 5.

Table No. 5-ioncld.

As a result of smadler importations of railway plant and rolling stoch by the North.Westera Railway, the total value of stores imported on Government account decreased by R"s. $168: 26$ lakhs or 40 per cent. to Rs. 248.64 lakhs. The principal descriptions of raikyay plant which were responsible for the falling off were carriages and wagons and parts thereof and looomotive enginess and tenders and parts thereof from the United Kingdom. Machinery. and milluork which came mostly from the United Kingdom and the United States of America, on the other hand, recorded an increase of Rs. $1 \theta^{\circ} 03$ ladshs. Most of it was intended for the construction werk of the thoyd: Barrage.

# II.-D.etailed review of changes in the value and volume of important articles of the Import and, Export Trade. 

## IMPORTS.

## Class I.-Food, Drink and Tobacco.

10. Sugar.-The following table exhibits the ${ }^{*}$ imports, both from foreign countries and from Bombay, re-exports to foreign countries, and coastwise exports of sugar, 16 Dutch Standard and above, including beet sugar for the past two years and for the year 1913-14:-

Table No. 6.

Owing to a large increase in world-production and an appreciable reduction of prices, the imports of sugar during the year surpassed all previous records and amounted to 192,995 tons valued at Rs. 580.55 lakhs, representing double the quantity, and an increase of 69 per cent, over the value of imports in 1923.24. It is also interesting to note that Karachi imported more sugar this year than Bombay where the total quantity imported amounted to 179,093 tons. The disparity between the percentages of increase in the quantity and value gives an idea of the extent of the drop in prices. The market showed adownward tendency throughout the year. The local quotations for white Java opened at Rs. 26-2 on the Ist April 1934, which was the highest price recorded during the year. A rapid fall however commenced iminediately and Rs. 22 was quoted at the end of the same month. Thereafter with minor fluctuations in May and June, a further drop took place, and the price came down to Rs. 20.5. A gradual steady decline followed in the succeeding months, and the end of December saw Rs: 17 . The market was more or less steady in January and February, and the lowest figure of Rs. I6-1I was recorded in the fourth week of March. The closing price was Rs, 16-14. Receipts of 7 ava sugar amounted to 137,569 tons as compared with, $87 ; 882$ tons in the previous year. Although this quantity represents more than $70^{-}$per cent. of the aggregate imports, the practional monopoly in the trade which that country enjoyed since the outbreak of the war has beer disturbed by the re-entry into the market of other sugar-producing countries. Mauritius which has in recent years been selling the bulk of its sugar to the United Kingdom sent no less than 27,731 tons valued at Rs. 77 II lakhs against none in the previous year. Purchases of Continental beet sugar amounted to 25,531 tons of the value of Rs. 7 • 57 lakhs as against $7,62 \mathrm{z}$ tons valued at Rs. 32 . 55 lakhs, an increase of 235 per cent. in quantity and 120 per cent. in value. Of this quantity, 15,412 tons carue from Germany, 5,073 from Hungary, 2,125 from Fiume, 453, fromAustria and 2,468 from Belgium. A considerable increase in the Continental beetroot crop especially in Germany and Czechoslovakia as a result of extensive sowing and favourable weather made large quantities available for export, and the position was also considerably helped by the more settled conditions in Europe. The continued flow of low-priced sugar had, however, a very depressing effect upon the market, and sugar merchants who had contracted large forward business are reported to have incurred considerable losses,

Foreign Imports

Table No. 7.

Ale, beer and porter.-The following table compares the quantities imported from the chief sources of supply during the past two years:-

Imports of ale, beer and porter have recorded a considerable improvement of 272,144 gallons in quantity and Rs. $5^{\circ} 06$ lakhs in value, the increase being more marked in consignments from the United Kingdom and Germany. Arrivals of bottled beer rose by 110,113 gallons to 301,691 gallons, of which Germany sent 216,914 gallons and the United Kingdom 64,494 gallons. Bulk beer which came almust exclusively from the United Kingdom advanced from 318,128 to 476,118 gallons. The increase in arrivals of ale and beer was partly due to larger imports for supplies to the military and partly to the growing demand by the general public for light German beer in the place of Indian beer, the price of the former being practically the same as that of the latter.

Spirits.-The feature of the trade in potable spirits was the increased importation of cheap immature spirits which appear to replace country liquor. This remark will be borne out by the fact that under imports of whisky, while the quantity shows an improvement of 12 per cent., the value has risen by 1 per cent. only. Supplies of whisky from the United Kingdom advanced from 91,699 to 98,754 gallons and those from Germany from 7,138 to 11,166 gallons. Imports of brandy increased by 16,280 gallons in quantity and Rs. 239 lakhs in value mainly in arrivals from France. The contraction of 21,574 gallons under other sorts of spirits was chiefly due to the elimination of imports of rectified spirit from Java, and is explained by the fact that some Punjab merchants who imported this spirit during 1922-23 and 1923-24 for the purposes of denaturation as an experimental measure did not find it profitable to do so and have again reverted to the former practice of obtaining their requirements through Calcutta. Some 4,870 gallons which were imported from Java and placed in bond in 1923.24 were denatured and issued during the year under report, . ${ }^{-1}$

Wines.-Imports of 'wines which suffered a setे-back last year showed a recovery of 18,071 gallons or 63 per cent. The increase was due to large imports of Vermouth from France and Italy. This wine is finding favour with the public on account of its cheapness and also its properties as a tonic.

Tobácco.-The import trade in tobacco showed a further diminution mainly in receipts of cigarettes from the United Kingdom, the quantity, viz., $576,040 \mathrm{lbs}$. having receded by $171,206 \mathrm{lbs}$. and the value, which aggregated Rs. 24.63 lakhs by Rs. 8.65 lakhs. Large stocks remaining in hand out of the imports in the previous two years and reduced consumption due to cheap Indian-made cigarettes coming to the fore mainly accounted for the depression in the trade.

Fruits and Vegetables - lmports under this head which amounted to Rs. 258 B lakhs again decreased in value to the extent of Rs. I.77 lakhs. Dates, the principal commodity was responsible for the falling off, the figures recorded, viz., 18,480 tons and Rs. 23.98 lakhs being short of those of last year by 237 tons and Rs. 1.22 lakhs. Smaller supplies of dry dates from the Bahrein Islands caused the deficiency. Imports from Mesopotamia, the main source of supply, however, increased by 882 tons in quantity and Rs. $4_{1}^{1,844}$ in value to 14,933 tons valued at Rs. 1842 lakhs.

Provisions and Oilman's stores:-The total value of provisions again expanded considerably by Rs. 1752 lakhs or 79 per cent. to Rs, $39^{\prime 8}$ I lakhs. The following statement shows the

Imports.
variations in the quantities of some of the principal items imported during the year :-

The figures tabulated above will show that there has been a general rise in all thê subheads. A further reduction of prices in the United Kingdom induced dealers to do more business during the year. Large importations for supplies to the military also contributed materially to the increase.* The expansion under milk which was particularly striking occurred mainly in receipts from the Netherlands and was also partly due to the introduction of several new agencies into the market. A feature of the trade in other sorts of provisions was the regular monthly importations from the Netherlands of the product known as vegetable. ghee or vegetable fat, the total quantity received during the year amounting to 10,659 cwt. valued at Rs. 660 lakhs. This stuff is imported as a substitute for ghee.

Tea.-The aggregate quantity of tea imported in $19^{24-25}$ rose by $173,217 \mathrm{lbs}$. to $1,068,930 \mathrm{lbs}$. and its value by Rs. 461 lakhs to Rs. 1150 lakhs. This increase was contributed mainly by. receipts of green tea from China which in the previous year showed a marked decline. Despite high prices some $883,000 \mathrm{lbs}$. of this tea came from China against $409,975 \mathrm{lbs}$. valued at Rs. 340 lakhs in 1923-24. The recovery was due to a brisk demand from Persia, the chief consuming market where it is sent by the NushkiSeistan Route. Purchases of black tea, on the other hand, declined by $194,442 \mathrm{lbs}$. and Rs. 80,702 to $184,430 \mathrm{lbs}$. valued at Rs. $1 \cdot 77$ lakhs. High prices checked imports both from Ceylon and China.

## Class II.-Raw materials and produce and articles mainly unmanufactured.

ij. Oils - The total value recorded under this head advanced by Rs. ${ }_{1} 57$ lakhs to Rs. 109.59 lakhs as a result of a further increase in receipts of mineral oils. The following table shows the imports of mineral oils for the past two years and the pre-war year, including in the case of kerosene, imports from Burma:-

Table No. 8

The total quantity of kerosene oil imported into Karachi from both foreign countries and Burma decreased slightly from $16,749,559$ to $16,48 \mathrm{i}, 365$ gallons, but the value rose by Rs. 5.59 lakhs to Rs. 122.16 lakhs. The increase in the value was due to a rise in the price of kerosene oil in sympathy - with the world price of crude oil. The decrease in the quantity occurred solely in receipts from Burma which fell away by $1 \frac{1}{2}$ million gallons, but the deficit was to a great extent made up by increased supplies of forcign oil. Nearly 11 million gallons of foreign oil were imported against $9 \frac{1}{3}$ million gallons last year, the expansion occurring under bulk oil from the United States of America. It is noteworthy that a consignment of 509,675 gallons of kerosene oil valued at Rs. 3.82 lakhs came for the first time from Egypt. This was white oil of a superior quality received from the refineries at Suez, and was intended to compete with superior American oils. Following upon a heavy increase of $2,473,652$ gallons in $1923-24$ imports of fuel oil

Imports.
decreased by 808,381 gallons to $4,505,5.57$ galions, comprizing $3,953,365$ gallons from Persia and the rest from Dutch Borneo. Though imports of lubricating oils showed a partial recovery of ${ }^{1} 52,543$ gallons in quantity and Rs. 3.86 lakhs in value as compared with the previous year, yet the figures fell far short of the quinquennial average, the volume of imports even in the two years 1923-24 and 1924-25 taken together being lower than any one of the three preceding years. The decline, as stated last year, was due to the North-Western Railway obtaining the bulk of their requirements from the Attock Oil Company. Of the total quantity imported during the year, 469,667 gallons were supplied by the United States of America, 61,553 by the United Kingdomand 14,133 by Germany.

Coal.-The quantity of foreign coal imported at the port increased by 17,692 tons to 106,880 tons and its value by Rs. 1.37 lakhs to Rs. 27.29 lakhs. The following statement shows the variations in the quantities imported from the principal foreign countries and also from Bengal during the past two years:-

It will be seen that though Portuguese East Africa was our largest supplier during the year, yet the quantity imported from that country was smaller by 762 tons and that the increase occurred almost wholly in purchases from the United Kingdom and Natal. Bengal coal also showed a slight improvement of 4,305 tons. Foreign coal is preferred to Bengal coal owing to its uniformity of quality and comparative cheapness. Arrivals of the latter were confined to quantities received by importers directly interested in the Bengal Collieries.

## Class III,-Articles wholly or mainly manufactured.

12. Cotton yarns and manufactures.-The piece-goods market which after the disastrous slump of $1921-22$ showed signs of a slow recovery in the succeeding two years, witnessed a considerable activity during the year under report. A great demand
sprang up in both local and up-country markets resulting in a considerable expansion in the volume of imports which were also stimulated to a certain extent bv a vigorous demand for exports to Afghanistan. This revivat was to some extent due to the fact that dealers everywhere had allowed their stocks to run down very low until it became necessary to replenish them. Favourable opportunities which offered themselves during the year also gave a further impetus to the trade. Exchange rates were favourable, and the prices at which goods were offered by the manufacturers at home were lower than spot prices which induced dealers, both local and up-country, to place large orders in the overseas markets. A series of good monsoons brought some prosperity in its train which enaliled the people to indulge in fine goods and fancies. During the concluding months of the year, prices of piece-goods, especially fine goads appreciated somewhat as a result of a sudden rise in the price of Egyptian raw cotton from 24d . in September 1924 to $3^{88}$. per lb. in March 1925; It must, however, be recorded that large stocks of piece-goods were remaining in hand at the close of the year, and business in the coming year is not expected to come up to imports in the year just ended. The following table shows the quantify and value of cotton twist and yarn and other manufactures during the past two years and the-pre-war year 1913-14:-

Table No. 9.

Cotton twist and yarn.-The import trade in cotton twist and yarn showed a further development to the extent of $217,040 \mathrm{lbs}$. or 22 per cent. in quantity and Rs. 4.52 lakhs or 27 per cent. in value. Of the total quantity imported, $805,087 \mathrm{lbs}$. consisted of coloured yarn, Nos. $3^{I}$ to 40 mainly from the United Kingdom and partly from Switzerland, the Netherlands and Italy. The quantity of coloured yarn Nos. 26 to 30 also rose from 89,962 to 189,133 lbs., the bulk of imports comprizing British yarns. A feature of the trade was the import of a certain quality of inferior coloured yarn for competition with Indian yarn.

Piece-goods.-Imports of piece-goods increased by 47 per cent. in quantity and by 49 per cent. in value over the figures of 1923-24, but as compared with the pre-war year 19:3-14, though the value showed an excess of 77 per cent. on account of.the'present high prices, the volume was short by 22 per cent. It is noteworthy that as compared with the last year an all-round improvement occurred under all the three main divisions of piece-goods; viz., grey, white and coloured. Grey goons recorded a considerable advance amounting to $17,576,75^{2}$ yards or 162 per cent. in yardage and Rs. ${ }^{5} 61$ lakhs or 165 per cent. in value. Large imports were made both from the United Kingdom and Japan chiefly in response to a great demand for exports to Afghanistan. The increase in receipts from Japan was particularly striking, the yardage having risen by no less than 511 per cent. and the value by 476 per cent. Imports of white goods also showed a marked expansion of 41 per cent. in quantity and 46 per cent. in value, the United Kingdom being the principal supplier as usual. Large imports were made to replenish depleted stocks. A good business was also done in colouved groods, the figures showing an excess of 39 per cent. in yardage and 38 per cent. in value over those of last year. The following statement gives the average prices of a few selected varieties ruling during the year :-

Of the selected varieties under grey goods, the most important variation in the price occurred under pepperill drills. Last year the average price of this variety went up to Rs. 25 per piece as against Rs. 22-12 in 1922-23, and during the year under review it rose furiher to Rs. 26. Under white goods, the price of shirtings, hand and key dropped from Rs. $23-8$ to Rs. 22 per piece. Both the selected varieties under coloured goods registered a failing off. The figures of the quantity and value of some of the more important descriptions of grey, white and coloured piece-goods imported during the past two years are given in the following statement:-

|  | - Quantity. |  | Value. |  |
| :---: | :---: | :---: | :---: | :---: |
| Deseription. | $\overline{1923-24}$ | 1924-25." | 1923.24. | 1924-25. |
| 1. Grey trunbleached). | Yds. | Yds. | $\begin{gathered} \text { Rs. } \\ \text { Laths. } \end{gathered}$ | Rs. Lakhs. |
| 1.ongeloth and shirtings | 6, $8_{34,865}$ | .19,794,660 | 25.68 | 7400 |
| Grey drills and jeans | 1,094,000 | 2,965,200 | $\sim 503$ | 1357 |
| Jaconets including madapollanss, mulls and cambrics. | 2,090,411 | 3.832.643 | 533 | 10.53 |
| 2. White (bleacherl). |  |  |  |  |
| Clecks, spots and stripes | 5,964,96n | 8,889,253 | 30:26 | 35.56 |
| longroth and shirtings | 28,793,504 | 57.303.472 | 127.20 | $243: 2$ |
| Muls . ... $\quad$ "\% | 74.753.484 | 92,62\%,185 | 21993 | 27355 |
| N:inspoks ... | 18,648.599 | 22,505.474 | 48.2 | 62.14 |
| 3. Coloured, pronted and tyed. |  |  |  |  |
| Printed and dyed rambrics $\because$ | 22,373,858 | 22, i53,087 | 71.85 | 7129 |
| Prinied drills and jeans | -9,570,436 | 13699,740 | 4498 | 61.84 |
| Printed and dyed twills | 11,474,201 | 12,129,973 | 66.05 | - 58.13 |
| Printed saris and scarres | 4,698,120 | 3,493,797 | 28.78 | 19.09 |
| Printed and dyed shirtings ... | 14,853,367 | 24, 198,604 | - $62 \cdot 34$ | $95^{89}$ |

It will be observed that almost all the principal varieties of piece-goods showed a marked improvement. Under grey goods, longcloth and shirtings which recorded the bighest figures came from the United Kingdom and Japan, the share of each country in the trade being almost equal. Drills and $\mathfrak{f}$ eans were received largely from Japan and partly from the United States of America, the former supplying $2,304,600$ yards and the latter 660,600 yards. Coloured goods, as usual, were chiefly supplied by the United Kingdom.

Woollen goods.-The aggregate value of imports of woollen goods advanced by Rs. 18.12 lakhs to Rs. $73^{\prime 2} 2$ lakhs. Yarn and knitting wool which is mostly consumed by the Amritsar market came in larger quantities, imports amounting to $246 ; 923 \mathrm{lbs}$. valued at Rs. io 7 o lakhs, an increase of $28,655 \mathrm{lbs}$. and Rs. 172 lakhs. Of the total quantity received during the year, Germany sent ${ }^{161,766} \mathrm{lbs}$., the United Kingdom 60,404 lbs. and France 19,650 lbs. as against $150,077 \mathrm{lbs}$, $52,567 \mathrm{lbs}$ and $5,511 \mathrm{lbs}$., respectively. A brisk business was done during the year in woollen puece-goods, the quantity having increased further by 580,388 yards to $2,52 \mathrm{I}, 451$ yards and the value by Rs. 1067 lakhs to Rs. $51 \cdot 38$ lakhs. The expansion was noticeable in importations from the United Kingdom and France, supplies from the latter country largely comprizing shavol cloth for the Amritsar market. Germany and Belgium, on the other hand, sent reduced quantities. The increase in imports of piece-goods was due to a reduction in prices and favourable rates of exchange ruling during the year.

Silk.-Imports under this head recovered slightly in value from Rs. 4 lakhs to Rs. $5^{\circ} \mathrm{O}$ lakhs, the improvement having taken place in arrivals of velvets from Germany.

Metals and metal manufactures.-The following table shows the quantities and value of the different descriptions of metals and manufactures of metals during the past two years:-

Iron and steel.-It is noteworthy that despite the imposition of the protective duties the import trade in iron and steel showed a marked improvement, the tetal quantity imported, viz., 86,035 tons having exceeded the previous year's imports by 17,188 tons or 25 per cent. and the value by Rs: $25^{18}$ lakhs or 17 per cent. Large imports were made in response to a keen demand to meet the requirements of the several new constructional "works taken in hand in the province as well as in the Punjab and also for replacing damages caused by heavy rains and floods during the year. The relatively low prices at which foreign steel could be brought into the country in consequence of a reduction in prices both at home and on the continent backed by a favourable exchange made it difficult for the indigenous material to compete favourably. The following table compares the share of each country in the total imports of. iron and steel for the past two years :-

Table No. It.

| Total | 68,847 | 100\% | ,49, 11,765 | 100\% | 86,035 | 100\% | 1,74,30,010 | 100\% |

The United Kingdom which after the unparalleled slump of 1921-22 had somewhat improved its position last year as the leading exporting country again lost its hold on the market, and her share in the percentage of the volume of imports receded from 35 per cent. to 25 per cent. in $1924-25$. The British manufacturers had to face severe foreign competition, and though much of their productions were sold at or below the actual cost of manufacture, yet they were undersold by the continental producers. As a natural sequence, some of the works of quite a modern design had to remain idle throughout the year. Belgium particularly has since 192I-22 consistently maintained a bigh volume of exports, and of the total quantity imported, 55 per cent. came from that country as against 50 per cent. last year. It is interesting to note that her total output of pig iron and crude steel surpassed the pre-war quantities. Germany also improved its share from in per cent. to i3 per cent.

Other metals.-After a decrease in the past year, imports of copper showed a revival to the extent of 3,076 tons in quantity and Rs. I'55 lakhs in value. The improvement was noticeable in arrivals of sheets from Germany. Supplies from the United Kingdom were slightly less than in $1923-24$. The small increase in the quantity of brass was due to larger imports of mixed or yellow metal for sheathing fröm the United Kingdom, and the decrease in value was due to low prices. The expansion of 477 cwt . in quantity and of Rs. 93,508 in value in imports of tin occurred under unwrought tin from the Straits Settlements.

Machinery of all kinds including belting for machinery:-Imports under this head showed noticeable progress. The aggregate value amounted to Rs. 12147 lakhs, and showed an excess of Rs. 19.23 lakhs or 19 per cent. over the imports in 1923-24. The principal types of machinery imported and the statistics with regard to each for the past two years are shown in the following statement:-

| Description | 1923.24. |  | 1924.25. |  |
| :---: | :---: | :---: | :---: | :---: |
| A. Prime movers (other that electrical) |  | $3 \times 16$ lakhs. | Rs. 24.53 | lakhs. |
| B. Electrical machinery |  | 6.06 | \# 12,30 | " |
| C. Boilers .. |  | 2 '12 | ,. 2.85 | ${ }^{\prime}$ |
| D. Mining machinery |  | 978 | f. 9882 | " |
| E. Rice and flour mill machinery |  | 5.23 , | 588 |  |
| F. Textike Machinery .. |  | 4.88 | 712 | , |
| G. Sewing and knitting machines |  | 16,303 | No, 29.972 |  |
| H. Typewriters ... |  | 542 | , 650 |  |
| I. Other sorts of machinery ... |  | 2759 laktrs. | Rs. 30.56 |  |

It will be noticed that with the exception of prime-movers, all the different descriptions of machinery increased in value. The contraction under prime-movers occurred chiefly in the value of oil engines, though the number imported was larger than in the previous year. The anamoly is explained by the fact that a large number of cheap second-hand rebuilt oil engines were imported for the Punjab instead of new ones. The value of electrical mäcninery doubled itself owing to the arrivals of large consignments for the completion of the electric supply scheme in the Punjab. The value of mining machinery maintained the level of the imports last year, but the only noticeable change in the trade was an increase in receipts from the United States of America and a decrease in the supplies from the United Kingdom. Rice and flour mill machinery came chefly from the United Kingdom and Belgium, consignments from the former being valued at Rs. 4034 lakhs and the latter Rs. $1{ }^{1} 15$ lakhs. Large importations from the United Kingdom of cotton ginning machinery due to the recent activities of the British cotton-growing association at Khanewal (Punjab) weme responsible for the increase in the value of textile machinery. The notable expansion in imports of sewing machines is due to the extensive use and the consequent ever-growing demand both in the Province and the Punjab. No less than 23,091 machines valued at Rs. 23.52 lakhs came from the United Kingdom as against. 12,965 valued at Rs. 12.60 lakhs, while Germany supplied 6,765 machines valued at Rs. 410 lakhs as against 3,301 valued at Rs. 2.1 I lakhs. It is noteworthy that German machines are now again being placed in larger numbers on the market and are becoming more popular on account of their cheapness. A feature of the trade in other sorts of machinery was the importation of match-making plants for the Punjab.

Railway plant and rolling stock.-The total value registered under this head advanced considerably from Rs. 16.74 lakhs in 1923.24 to Rs. 37 Io lakhs in $1924 \times 25$. The increase was due to large imports chiefly by the Jodhpur-Bikaner Railway of locomotive engines and tenders and parts thereof from the United States of America and the United Kingdom and of carriages and wagons and parts thereof from the United Kingdom, Imports of rails, chairs and fish-plates fell slightly by Rs. 64,119 to Rs. 757 lakhs, but the decrease was by no means evenly distributed, consignments from Belgium declining from Rs. 6.34 lakhs to a negligible figure of Rs. 864, while those from the United Kingdom expanded from Rs. $1 \times 87$ lakhs to Rs. $7 \times 56$ lakhs:

Cutlery, hardware, implements and instruments (excluding electrical instruments and apparatus).-The total value of imports under this head advanced by Rs. 16.43 lakhs to

Rs. 60 '51 lakhs in 1924-25. Large orders were placed in the overseas markets as a result of favourable rates of exchange and a reduction in prices. Of the principal articles classed under this group, cutlery advanced in value from Rs. 3.65 lakhs to Rs. 768 lakhs, the increase having occurred in the supplies from Germany and the United Kingdom. There was also a striking increase in imports of metal lamps, the total consignments valued at Rs. 9.20 lakhs having been sent by the United States of America and Germany. The trade in builders' hardware showed a partial recovery chiefly in transactions with Sweden and Germany.

Chemicals, drugs and medicines,-The total value of the various articles included under this head again improved by Rs. $3^{.02}$ lakhs to Rs. 35.56 lakhs, the United Kingdom being the principal supplier as usual. Under chemicals, the chief importations which showed an improvement were soda ash and crystals, valued at Rs. 997 lakhs ( + Rs. 1.32 lakhs), soda bicarbonate valued at Rs. 2.07 lakhs ( + Rs, 79,203 ) and alum valued at Rs. $1 \cdot 79$ lakhs $(+$ Rs. 5,643$)$. A contraction, on the other hand, took place in imports of ammonia and salts thereof valued at Rs. 160 lakhs ( - Rs. 53,333 ) and caustic soda valued at Rs. 4.26 lakhs (-Rs. 63,510 ).

Vehicles (excluding locomotives etc., for railways).The increased trading done in the previous year was further improved upon during the year under review, the total value rising by Rs. 6.36 lakhs to Rs. $4^{\circ} 93$ lakhs. The number of the principal classes of vehicles imported during the past two years is shown in the following. statement :-

As in the last year, a general increase occurred in the number of all the important, classes of vehicles imported at this port. The nerease in the number of cycles was particularly striking and is
accounted for by large purchases of British cycles, viz., 8,698 cycles as against 4,964 in 1923 -24. German machines showed a decrease in number from 2,137 to 1,026 . The following statement shows the number and value of motor cars imported during the past two years from the principal sources of supply :-

It. will be seen that both American and Canadian cars came in larger numbers, the increase being more prominent in arrivals of. the former. These cars are largely in demand on account of their cheapness. The small increase in the number of British cars did not occur in irnportations for trade purposes, but was due to arrivals of second-hand-cars, property of private individuals coming to India. Motor cycles also increased in number from 163 to 215 , the chief importations consisting of 161 British and 46 American models. The total number of motor wagons imported advanced from 56 to 120, the United States of America supplying 60, Canada 49, the United Kingdom 7 and Germany, Belgium and France the rest.

Other articles.-Some of the articles of lesser importance imported during the year are discussed in this paragraph. The value of apparel rose from Rs. 1777 lakhs to Rs. 26.09 lakhs due to larger purchases from the United Kingdom and the United States of America, consignments from the latter consisting mostly of second-inand clothing. Under dyes and colours, the increase was most marked in receipts of alizarine dyes, the quantity of which advanced by $4^{1} 3,315 \mathrm{lbs}$. to $625,717 \mathrm{lbs}$. and the value by Rs. 2.30 lakhs to Rs, $4^{\circ} 0^{3}$ lakhs. Of the total imports, Germany supplied $49 \mathrm{I}, 835 \mathrm{lbs} .(+304,422 \mathrm{lbs}$.$) , the Netherlands 84,136 \mathrm{lbs}$. $(+7 \mathrm{~L}, 46 \mathrm{lbs}$ ) and Belgium 49,774 lbs. ( $+37,544 \mathrm{lbs}$ ). Large imports were made as a result of a fall in prices and a good upcountry demand. Imports of aniline dyes, on the other hand,

Foreign
Imports.
contracted from $43^{2,228}$ lbs. valued at Rs. $8 \cdot 18$ lakhs to 388,443 lbs. valued at Rs. 7.30 lakhs chiefly owing to reduced transactions with the Netherlands. The value recorded under the liead glassware and earthentare receded slightly by Rs. 142 lakhs to Rs. 18.33 lakhs mainly owing to decreased iniports of funnels, globes and glass parts of lamps from "Germany and porcelain from the United Kingdom. Large receipts of printing paper and old newspapers were responsible for the increase of Rs. 4.58 lakhs under imports of paper, pasteboard and stationery which were valued at Rs. 33 to lakhs. Rubber manufactures were valued at Rs. 4.51 lakhs and showed an increase of Rs. 98,217 which was chiefly noticeable in imports of pneumatic covers. The quantity of cement imported during the year contracted from 9,401 to 8,672 tons and its value from Rs. 6 lakhs to Rs. 4.88 lakhs owing to the keen competition and growing importance of the Indian Cement industry. Imports of matches declined by 395,425 gross of boxes in quantity and by Rs. 6.18 lakhs in value to 966,878 gross of boxes valued at Rs. $11 \cdot 18$ lakhs, the contraction having occurred chiefly in purchases of safety matches from Sweden. The decrease was due to a smaller demand for exports to Seistan and the gulf ports on account of accumulations of previous year's large stocks in those markets. The value of imports of soap totalled Rs. ${ }^{1}{ }^{\circ} \mathrm{O} 3$ lakhs, showing an increase of Rs. 2.07 lakhs mostly under household and laundry soap and toilet soap.

## Class V.-Postal articles not specified.

13. As a result of the introduction at the end of the last year of the new system of assessment of parcels for the Sind, Punjab, Baluchistan and the North-West Frontier Province at this port instead of at Bombay as before, the figures of value recorded under this head swelled considerably from Rs. 1368 lakhs to Rs. 4568 lakhs or 234 per cent. The improvement was mainly noticeable in arrivals from the United Kingdom, the value of which aggregated Rs. $4^{\circ} 60$ lakhs as against Rs. $10^{\circ} 11$ lakhs last year. The figures registered are exclusive of imports by post of (1) jewellery (2) precious stones (3) gold and silver thread (4) cigarettes and (5) cinematograph films which are classified under their appropriate heads in the general imports. The total number of parcels dealt with during the year increased from 30,986 in $1923-24$ to 117,758 in 1924-25. Besides these 35,915 letter packets were assessed to duty as against $13,35^{2}$ last year. The total amount of import duty realized on all articles imported by parcel post also increased from Rs. $3,11,976$ to Rs. 9:32,711 and that on articles received by letter packets from Rs. 14,309 to Rs. 40,682 .

## EXPORTS.

## INDIAN PRODUCE AND MANUFACTURES.

## Class I.-Feod, Drink and Tobacco.

14. Grain, Pulse and Flour.-The year 1924-25 witnessed a notable expansion in exports under this head, the aggregate shipments amounting to $1,671,075$ tons valued at Rs: $2402.55^{2}$ lakhs, or an increase of 77 per cent. in quantity and 89 per cent. in value as compared with the preceding year. A heavy and insistent demand coupled with high prices greatly stimulated the sale of the large exportable surplus of cereals available as a result of four successive favourable monsoons. The following statement compares the quantities of the different kinds of food-grains exported in 1924-25 as compared with exports in 1923-24 and the pre-war year 1913-14.

The redeeming feature was the complete recovery of the trade, the aggregate quantity exported showing an excess of 40 per cent over the shipments in the pre-war year 1913-14.

Wheat.-The Directors of Agriculture, Bombay, the Punjab
 and the United Provinces give the particulars noted in the margin regarding the wheat crop. It will be seen that in Sind the cultivated area and outturn were lower than in the preceding year by 19 per cent. and 23 per cent. respectively, but in the Punjab, the acreage improved by I per cent. and the yield by 5 per cent. In the Unitod Provinces both
area and outturn rose by 3 per cent. As regards the season, deficient water supply reduced the yield to a certain extent in Upper Sind, but in middle Sind better conditions prevailed, and the outturn was expected to be normal. On the Jamrao canal, the crop was very poor owing to low inundation. In the Punjab the total monsoon rainfall being. generally below normal, the conditions were not favourable for sowings. The winter rains, however, benefited the standing crops which gave a normal yield. In the United-Provinces sowings were carried on under favourable circumstances on account of a good rainfall in September and October. Winter rains also proved beneficial to the crop, and the outturn was estimated at 90 per cent. of the normal. The position as regards the all-India wheat crop was also satisfactory on the whole. The total area sown increased by 1 per cent. to $30,844,000$ acres, but the yield declined slightly by 2 per cent. to $9,754,000$ tons. As regards the shipments of wheat effected during the year, it is highly gratifying to note that the trade in this leading commodity which was greatly dislocated since the war showed a complete recovery. The quantity exported amounted to $1,046,255$ tons and the value to Rs. 161175 lakhs, the former showing an excess of 72 per cent. and the latter of 87 per cent. over the figures recorded in the past year. As compared with the pre-war year 1913.I4 there was also an increase of 17 per cent. in quantity and 65 per cent. in value. Shipments from Karachi represented 94 per cent. of the total quantity ( $1,111,691$ tons) exported from the whole of India. The enormous increase in exports of wheat is explained by the fact that during the year just elapsed, there was a great shortage of crops in most of the wheat producing countries of the world more particularly in Canada, and in consequence great demands were made upon India's 1924 crop from the outside markets. The constant world-wide demand and the doubtful adequacy of the available surplus in all wheat-exporting countries raised the prices all over the world to a very high level especially in the latter half of the year. The local quotations for white wheat opened at Rs. $4-7$ per maund which was the minimum price during the year, and fluctuated between that figure and Rs. 4-12 in the first three months. Thereafter a steady rise followed in July and the end of that month saw Rs. $5-13$. With minor fluctuations, the prices kept firm in the neighbourhood of that figure till the middle of January after which they showed a further upward tendency. Touching Rs. 6-7 in the third week of that month, the price rose to Rs. $7-8$ in the second week of March which was the highest price recorded during the year. A rapid decline, however, soon followed, and the year closed with Rs. 6-4.

The enormous takings of wheat have however reduced India's carry over for the new season to a very great extent and in view
of the fact that the outturn of the $1924-25$ crop is estimated to be lower than in the preceding year, the prospects of the export trade in the coming year do not appear to be at all bright. The following statement shows the distribution of wheat exports for the past two years and the pre-war year:-

Table No, 13.

The figures recorded above will show that, excepting France and Italy, all the principal countries drew much larger quantities than in the last year and several new countries have entered the field. Shipments to the United Kingdom, our principal purchaser rose by 255,206 tons or 54 per cent. and to Belgium our next best customer by 81,530 tons or 223 per cent. as compared with 1923-24. It may be stated that the figures appearing against L (Iv) $33^{1-5}$,
(Food-grains and flour).
Egypt include 19,477 tons shipped to Port Said 'for orders,' the destinations of which still remain to be ascertained.

Other food-granns.- It will be noticed from the figures given in the first statement in this paragraph, that among the different food-grains, barley was "next in importance to wheat. There was again a keen demand for this commodity, and the last year's unusually heavy shipments were further surpassed. No less than 388,062 tons valued at Rs. 44937 lakhs were sent abroad, the figures recording an increase of 228,124 tons or 143 per cent, in quantity and Rs. $280^{\circ} 37$ lakhs or 166 per cent. in value on the exports in that year. The countries which took the principal amounts were the United Kingdom ( 201,720 against 96,878 tons), Germany ( 100,575 against 33,592 tons), Belgium ( 40,129 against 17,850 tons) and France (24,749 against 2,926 tons). The share of Karachi in the total shipments of barley from the whole of India was 86 per cent. Shortage of cereals and the consequent high prices obtained in the foreign markets were the chief factors which tended to increase exports largely. There was also a remarkable improvement in shipments of gram, the quantity expanding from 54,718 to 120,921 tons or by 121 per cent. and the value from Rs. $59 \% 7$ lakhs to Rs. 139.55 lakhs or by 133 per cent. The heaviest increase was noticeable in exports to the United Kingdom which rose from 25,519 to 57,207 tons. 'The other countries which took larger quantities were the Netherlands ( $+1 \mathrm{I}, 116$ tons), Germany ( $+15,662$ tons) and France ( $+4,260$ tons). As in the case of wheat and barley, Karachi was the largest exporting port in India of gram, the quantity shipped representing 84 per cent. of the total exports outside India. Following upon an abnormal increase in the previous year, shipments of maize which' aggregated 14,708 tons valued àt Rs. 1544 lakhs contracted by 70 per cent. in both quantity and value chiefly owing to smaller takings by the United Kingdom and Italy. The business done in wheat four was much larger than in the past year, the quantity rising from 36,798 to 48,446 tons and the value from Rs. 64.33 lakhs to Rs. 98.80 lakhs. The increase is ascribable chiefly to very heavy purchases by Egypt amounting to 26,50 I tons as against 11,647 tons last year. Exports of rice rose by 33 per cent. to $3^{2,296}$ tons in quantity and by 43 per cent. to Rs. 6 I $^{\circ} 43$ lakhs in value. The expansion occurred mainly under boiled rice to Ceylon, the Bahrein Islands, Mauritius and Dependencies and Muscat Territory and partly under cleaned rice to Persia. The prices of Bengal and Burma rice during the year being higher than those of Sind rice, larger purchases were made at this port. The rice crop in Sind was larger than in the previous year, the total yield being estimated at 531,53 . tons against 505,374 tons,

## Class II.-Raw materiais and produce and articles

 mainly unmanufactured.15. Raw cotton.-The figures of the agricultural depart-

Table No. 14.
 ment's final forecasts are given in the margin. It will be noticed that though the area sown under cotton increased slightly by I per cent. the outturn declined to the extent of 27 per cent. The decrease in the yield is ., explained by the fact that considerable damage was done to the crop by a severe frost in the third week of January which told seriously on its development. In the Punjab, the area under cotton increased by 32 per cent. as compared with the previous year, and exceeded the record sowings, vie., 207 million acres in $1919-20$ by no less than 22 per cent. The increase was due to the incentive of high prices and favourable season at sowing time. Of the total area sown, 934,200 acres are reported to be under American and 1,339,400 acres" under Desi cotton. The total yield was 42 per cent. in excess of that in the last year. In the United Provinces, for the fifth year in succession, the season was not favourable for the cotton crop and sowings were commenced later than usual. In consequence, though the area increased by 60 per cent. the yield increased by 29 per cent. only. The all-Inria cotton crop for the season $1924-25$ was highly satisfactory, the area cultivated having risen from $23.577,000$ acres to $26,415,000$ acres and the yield from $5,140,000$ bales to $5,988,000$ bales of 400 lbs. each. The following table shows how cotton exports were distributed during the past two years and the prewar year 1913-14:-

| Countries. | 1913-14. |  | 1943-24. |  | 1924-45. |  |

## Exports."

The continued expansion in exports of cotton is a gratifying feature of the trade of this port. For the third year in succession shipments showed a remarkable increase, the figures recorded, vig., 119,504 tons valued at Rs. $1,860^{\circ} 3^{2}$ lakhs exceeding the previous year's record figures by 26,931 tons or 29 per cent. in quantity and by Rs. $368 \% 1$ lakhs or 25 per cent. in value. Italy was again the chief customer, her purchases having amounted to 34,260 tons valued at Rs. $5^{20 \% 1}$ lakhs, an increase of 3,830 tons and Rs. $56 \% 7$ lakhs. The expansion was due to a considerable development in her cotton industry, the mills largely using Indian cotton. A feature during the yearwas the very large demand by the mills on the continent for Desi cotton for which high prices were offered. It. is interesting to note that during the year under review, Japan increased her transactions with this port to an extent never reached before. No less than 26,675 tons of cotton valued at Rs. 418.37 lakhs were shipped to that courtry against only 3,398 tons valued at Rs. $60 \% 73$ lakhs last year. The increase was due to the opening at this port of a direct steamer service with Japan during the year, as a result of which large direct shipments were made instead of via Bombay. Purchases by China were also interesting, some 9,07o tons valued at Rs. 136.52 lakhs having been consigned to that country against only $5^{27}$ tons valued at Rs. 776 lakhs Exports to the United Kingdom and Germany, on the other hand, fell away by 5,548 tons and 1,976 tons respectively. It is noteworthy that while Karachi's. share in the total quantity $\left(6_{3} 8,852\right.$ tons) exported from the whole of India improved from 14 per cent. last year to 19 per cent. in 1924-25, that of Bombay declined from 79 per cent to 72 per cent. Although, as compared with the previous year, the price of raw cotton registered a decline as a result of a better American crop, yet it was much higher than any other preceding year. This high level is maintained on account of a large demand due to smaller stocks in the consuming markets

Wool, raw.-Dealers in raw wool had a busy and prosperous year. The total world supplies available for the wool textile industries in the different countries were much less than in the past year, and in consequence a keen demand arose for this commodity. Prices in the United Kingdom rose to a very high level resulting in large shipments being effected to that country. In all, 27,795,512 lbs. of wool valued at Rs. $241^{1} 24$ lakhs were exported abroad, being an increase of 48 per cent. in quantity and 57 per cent. in value. The figures recorded were the highest in the quinquennium. As usual, the United Kingdom took the largest quantity, viz, $25,543,739 \mathrm{lbs}$. Shipments to the United States of America also increased from $798,760 \mathrm{lbs}$. valued at Rs. 496 lakhs to $2,022,221 \mathrm{lbs}$. valued at Rs. $19^{\prime \prime} 2$ lakhs.

Raw silk.-Exports of raw sitk which consist mainly of mulberry silk, totalled $298,028 \mathrm{lbs}$. in quantity and Rs. 18.23 lakhs in value as against $307,268 \mathrm{lbs}$. valued at Rs. 22.80 lakhs last year. The decrease was due to a poor demand from the United Kingdom. Shipments to France, on the other hand, showed an improvement.

Seeds.-After a great actitvity in the previous two "years, exports of seeds recorded a decline of 20 per cent. in quantity and 16 per cent. in value which occurred almost wholly under rapeseed. The following table compares the volume and value of exports of the d!fferent kinds of seeds to the principal countries during the past two years and the pre-war year 1913.14:-

Table No. 16

Rapeseed.-The agricultural returns for the rape and mustard

Table No. 17.

|  | Area cultivated. |  | Outturn. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1922-23. | 1923.24. | 1922-23 | 1923-34. |
|  | Acres. | Acres. | Tons. | Tons. |
| Sind | 265,000 | 186,000 | 351000 | 20,000 |
| Punjab $\quad \cdots$ | 1,286,000 | 1,132,000 | 241,000 | 203,000 |
| United ${ }^{\text {U }}$ Unmixed | 119,000 | 167,000 | 25,000 | 34,000 |
| Provinces. 3 Mixed ... | 2,467,000 | 2,550,000 | 523,000 | 524,000 | rabi crop are given in the margin. In Sind, the area under cultivation decreased by 79,000 acres owing to deficiency of watersupply and in consequence the outturn was reduced by 15,000 tons. In the Punjab also the area and yield were, 12 per cent. and 16 per cent. respectively below the estimates of the last year. The season was not very favourable for sowings, but the winter rains were generally sufficient for the maturing of the crop. In the United Provinces, the area sown with unmixed crop was 40 per cent. above the area of last year, and the yield increased by 36 per cent. The expansion in the acreage was due to favourable conditions at sowing time. The area and yield of rapeseed grown mixed with other crops as borders and lines used chiefly for home consumption also showed an improvement. The total area under rapeseed in the whole of Indza which amounted to 6,134,000 acres was 2 per cent, below that of last year, and the yield which was estimated at $1,154,000$ tons showed a decrease of 4 per cent. Exports of rapeseed which aggregated 198,702 tons valued at Rs. $45^{8} \% 9$ lakhs suffered a set-back to the extent of 24 per cent. in quantity and 19 per cent. in value as compared with 1923 -2.4, which was a record year, but the figures were above the quinquennial average. Excepting Italy which took 11,077 tons more than in the last year, all the principal countries purchased smaller quantities. Karachi was the largest exporter of rapeseed, her share in the total quantity ( 260,637 tons) shipped from the whole of India being 76 per cent.

Other seeds.-Among other seeds, cotton seed is the principal item worth particular notice. The quantity of this seed contracted slightly by 1,173 tons or 3 per cent. to 34,493 tons, but the value rose by Rs. i 84 lakhs or 5 per cent. to Rs. 39 '92 lakhs. The decrease in the quantity was due to a smaller demand from the United Kingdom, the principal purchaser, and the increase in value was attributable to local prices rising in sympathy with the prices in the United Kingdom. Shipments of castor seed which from 4,893 tons in $1922-23$ had dwindled to only 106 tons last year again revived, the figures having risen to 3,527 tons in quantity and

Rs. 9.78 lakhs in value. Of the total shipments, the United Kingdom purchased 1,764 tons, Italy 1,3 ro tons and France 453 tons. Exports of linseed decreased further by 501 tons and Rs. 1.24 lakhs to 200 tons valued at Rs. $-47,463$, Bombay and Bengal being the only chief exporting centres in India. Though shipments of sesamum (jinjili) seed showed a slight improvement to the extent of ${ }_{217}$ tons, yet the quantity exported, viz 569 tons fell far "short of the quinquennial as well' as the pre-war average. Sind jinjili being dearer in price on account of its superior quality is getting more and more difficult to sell in the continental markets and is largely consumed in India. The continental crushers have taken to the use of Bombay jinjili which is cheaper owing to its inferior quality.

Hides and skins, raw.-The following table compares the exports of raw hides and skins to the different countries during the past two years:-

Table No. 18.

Raw hides.-During the year under review there was a brisk demand for raw hides from the continental markets and high prices
were realized by the exporters. Exports advañced by ${ }_{561}$ tons or 40 per cent. in quantity and by Rs: $10 \circ 2$ lakhs or 65 per cent. in value. Germany and Spain purchased coov hides freely, while calf skins went in larger numbers to Italy and Spain. Shipments to the United Kingdom, on the other hand, contracted by 127 tons in quantity and by Rs. 90,191 in value.

Raw skins.-A large business was also done under raw skins, the quantity and value having improved by 27 per cent. The quantity of goat skins shipped abroad rose by 416 tons or 13 per cent. to 3,508 tons and the value by Rs. 63 l lakhs or 55 per cent. to Rs. $49^{\prime} 73$ lakhs. The United States of America, the chief customer, increased her purchases from $2,57^{2}$ tons valued at Rs. 35.25 lakhs to 3,025 tons valued at Rs. 42.22 lakhs, and shipments to France also showed an advance from 87 tors valued at Rs. $1 \cdot 32$ lakhs to 307 tons valued at Rs. 490 lakhs. Exports of goat skins to the United Kingdom which mainly took place in the first half of the year declined again by 178 tons and Rs. 3.08 lakhs to 167 tons valued at Rs. 240 lakhs. The English tanners restricted their purchases owing to a rise in the prices in the latter half of the year as a result of a strong American competition. Shipments of sheep skins which had dwindled into insignificance in the previous two years exhibited a smart recovery, the figures rising by 434 tons and Rs.. $53^{8}$ lakhs to 464 tons valued at Rs. $\int^{62}$ lakhs. The increase was due to a better demand from the United States of America, United Kingdom and Germany.

Metallic ores, \&c.-The figures recorded under this head solely represent shipments of chromite (chrome iron ore), a mineral product of Baluchistan. Exports of this ore amounted to 21,466 tons valued at Rs. 644 lakhs, showing an excess of 2,849 tons and Rs. 85,440 . of the total quantity exported, the United Kingdom took 5,536 tons, Sweden 6,000 tons, the Netherlands 3,700 tons, France 2,630 tons, Italy, Germany and Belgium taking the rest.

Gums, resins and lac.-The total value under this head fell by Rs. $3^{\circ 20}$ lakhs to.Rs. 1744 lakhs chiefly as a result of smaller shipments of rosin to the United Kingdom. Exports of lac seed declined further from $3^{62}$ Cwt valued at Rs. 71,386 to 152 Cwt. valued at Rs. 27,667 , the shortage being noticeable in shipments to the United Kingdom.

Miscellaneous.-The principal article under this head is manures. Exports which mainly consisted of animal bones decreased largely from 30,404 tons valued at Rs. 3487 lakhs to 20,723 tons valued at Rs. 2434 lakhs. A poor demand for crushed bones from Belgium, France and Germany and of bonemeal from the

United Kingdom was responsible for the falling off. Japan, after a lapse of two years, bought 2,600 tons of bone-meal valued at Rs. 2 .o8 lakhs. Among other articles a feature was the export for the first time of $5,229 \mathrm{lbs}$. of charas valued at Rs. 10,000 which was received in bond-from the, hemp drugs bonded warehouse at Rawalpindi and shipped in bond to Lorenzo Marques via Goa.

## Class III,-Articles wholly or mainly manufactured.

16. The total value of the articles included under this class declined by Rs. 2'II lakhs to Rs. 31033 lakhs. The decrease occurred chiefly under saltpetre, painters' materials, cotton piecegoods and haberdashery. No saltpetre was exported during the year against $7,064 \mathrm{cwt}$. valued at Rs. 9.17 lakhs last year. The contraction in the value of painters' materials was attributable to reduced exports of turpentine. The decrease under cotton piecegoods and haberdashery was due to smaller shipments to Persia and the United Kingdom, respectively. Shipments of hides and skins, tanned or dressed, the principal article under this head however, advanced in value by Rs. $4^{*} 64$ lakhs to Rs. ${ }^{1} 3^{\circ} 5^{1}$ lakhs. Larger purchases of tanned goat and sheep skins by the United Kingdom caused the increase.

## Foreign merchandise re-exported.

17. The total value of articles of foreign merchandise re-exported to foreign countries receded from Rs. $245^{\circ} 63$ lakhs to Rs. 241.24 lakhs or by I per cent. The principal articles which were responsible for the decline were sugar, tanned skins, kerosene oil, dried fruits, F aw cotton and cotton piece-goods. After the heavy buying done in the previous year, the gulf ports reduced their purchases of sugar to a great extent and in consequence exports declined by 3,485 tons and Rs. 2146 lakhs to 6,943 tons valued at. Rs. 28.09 lakhs. Exports of tanned *kins, comprize chiefly fur-skins. Shipments of these skins which had also risen abnormally in 1923.24 suffered a set-back, the figures for the past two years being 103 tons valued at Rs. 26.27 lakhs and 58 tons valued at Rs. 16.90 lakhs, respectively. The decrease was due to a poor demand from the United Kingdom. The value of exports of dried fruits contracted by Rs. 2.68 lakhs to Rs. 4.86 lakhs mainly owing to smaller despatches of raisins to the United Kingdom in consequence of a reduced demand. Last year a large consignment of kerosene oil re-exported to the United States of America raised the value under this head to Rs. 1022 lakhs, but in the absence of any such transaction this year, a corresponding decrease wàs recorded. Foreign raw cotton exported at this port is wholly Persian, and the decrease under that head was due to Germany not having taken this cotton during the year against

Int tons valued at Rs. 269 lakhs in "1923-24. Shipments to the United Kingeom, on the other hand, sose by $\mathrm{Si}_{1}$ tons and Rs. 120 lakhs to 188 tons valued at Rs. $3 \cdot 94$ taklas. The value of cotton piece-goods fell by Rs. 1.23 lakhs to Rs r4.24 lakihs as a result of smaller despatches to gulf poits. The incirease in the articles discussed above was to a large extent set off by a heavy increase in shipments raw wool and woollen manufactures. Shipments of the former vose by no less than -973.801 lbs. in quantity and Rs. 21.14 lakhs in value to $9,468,947$ los. valued at Rs. 82.58 lakhs. Both the United Kingdom and the United States of America took larger quantities, the purchases by the former expanding from $7,65 \mathrm{t}, 6 \mathrm{69}$ lits. to $8,27,2,280^{\circ}$ Whs. ane the latter from $824: 244$ lbs." to $1,150,228$ lits. As explained in the case of experts of Indian wool, the increase was attributable to a keen demand and the incentive of high prices. The value of woollen manfactures which totalled Rs. 65.63 lakhs showed an excess of Rs. $59 \% \mathrm{I}$ lakhs over the exports in the preceding year and was the highest yet recorded. Shipments comprize ehiefly Persian carpets, and the expansion was due to the United States of America increasing her purchases from Rs. $18: 02$ lakks to Rs. 32.73 lakiss and the United Kingdom from Rs. 13.83 lakhs to Rs: 20.47 lakhs. Exports to Constantinople. which were valued at Rs, npiz lakhs exhibited a decline of Rs. : 21 lakhs. Among other articles, a featare was. "the re-export for the first time of 2,450 llbs. of opium valued at Rs. 36,750 . This was Persian opium brought to Karachi by land from Meshed by the Nushiki-Seistan route and re-exported by sea to Bushire.

## III-Coasting Trade.

18. The total value of the coasting trade in the year 1924-25 amounted to Rs. $2,136.16$ lakhs and showed a decrease of Rs. $180^{\circ} 74$ lakhs or 8 per cent. as compared with the year $1923^{-24}$. The decrease was confined to the export trade, the value of which receded from Rs. $1,122.43$ lakhs to Rs. $9^{2} 3^{\circ} 59$ lakhs.

## Chief Port-Karachi.

19. The following table shows the aggregate value of the coasting trade of the port of Karachi, including Government stores and treasure, for the last four years and the pre-war year 1913-14.

Table No. 19.

- The aggregate value of the coasting trade of the chief port declined by Rs. $179^{\circ} 3^{2}$ lakhs or 8 per cent. to Rs. 2, 118.44 lakhs. The contraction occurred solely in the value of exports which totalled Rs. 908.86 lakhs as against Rs. 1,10685 lakhs last year. The value of imports, on the other hand, advanced by Rs. 18.68 lakhs to Rs. $1,209{ }^{\circ} 58$ lakhs.

## Private.

20. The following table compares the distribution of the coasting trade in private merchandise, both imports and exports, for the last two years :-

Table No. 20.

" A " represents Indian produce. 4 " B " represents Forcign merchandise.

## IMPORTS.

25. Indian merchandise.-The value of imports of Indian merchandise rose by Rs. 22.8 I lakhs to Rs. $\mathrm{I}, 088.53$ lakhs. The articles which showed an increase were grey cotton piece-goods ( + Rs. 71.2 I lakhs), cigarettes ( + Rs. 6.83 lakhs) and turmeric ( + Rs. $2 \cdot \circ_{3}$ lakhs) from Bombay, gunnv bags (+Rs. 20'9o lakhs) from Bengal, coconut-kernel or copra ( + Rs. $14 \%$ lakhs) from Madras and State of Travancore and Teak-wood ( + Rs. 3.80 lakhs) and candles ( + Rs. $2 \cdot 3$ I lakhs) from Burma. A contraction, on the other hand, occurred in imports of coloured cotton piece-goods (-Rs. 61.19 lakhs) from Bombay, benzine and pelrol ( $-610,043$ gallons, -Rs. 14.84 lakhs) and kerosene oil (- 1,518,032 gallons, -Rs. 7.88 lakhs) from Burma, coconut oil ( $-82,037$ gallons, - Rs. 2,39 lakhs) from Madras and pepper (一Rs. $4^{\circ} 40$ lakhs) from Madras and State of Travancore. Imports of coal from Bengal increased in quantity by 4,305 tons, but decreased in value by Rs. 4.39 lakhs. The decrease in value was due to a fall in prices during the year.

Cotton piece-goods.-The table below gives the trade in Indian piece-goods imported coastwise during the past four years and.the pre-war year 1913-14 under each of the three headings, grey, white and coloured.

Table No. 2r.

Foreign merchandise.-The total value of imports of foreign merchandise decreased slightly by Rs. 6.19 lakhs to Rs. $109 \cdot 38$ lakhs. The articles responsible for the falling off were grey cotton piece-goods (-Rs. $5 \cdot 2 \mathrm{I}$ lakhs), white piece-goods (-Rs, 196 lakhs) and alizarine dyes (-Rs. 1'03 lakhs) from Bombay. Imports of copper, zrought, on the other hand, increased in value from Rs. 66,554 in $1923-24$ to Rs. 3.63 lakhs in 1924-25 due to larger arrivals from Bombay.

Cotton piece-goods.-The following table shows the imports of foreign picce-grods coastwise for the past four years and
the pre-war year 1913-14 under each of the three headings grey, white and coloured.

Table No. $2 \dot{2}$.

## EXPORTS.

22. Indian produce and manufactures.-The value of exports of Indian produce and manufactures which amounted to Rs. 808.98 lakhs recorded a marked decline to the extent of Rs. ${ }^{154.06}$ lakhs, which was mainly due to reduced shipments of raw cotton to Bombay. The total quantity of raw cotton exported during the year fell from 31,448 to 28,47 I tons and the value from Rs. 57582 lakhs to Rs. $445^{11}$ lakhs. The other important articles which showed a decline were wheat ( $-15,747$ tons and Rs. 20.45 lakhs) and wheat flour ( $-5,814$ tons and Rs. 8.20 lakhs) to Bombay, jowari and bajri ( $-2,590$ tons and Rs. 860 lakhs) to Bombay and Kathiawar, pulse ( $-3,649$ tons and Rs. 457 lakhs) to Bombay and Cutch, cleaned rice ( $-2,768$ tons and Rs. 3744 lakhs) to Kathiawar and sesamum ( $-1,083$ tons and Rs. 3,49 lakhs) to Kathiawar and Burma. An increase was, on the other hand, noticeable in exports of gram ( $+3,743$ tons and Rs. 3.46 lakhs $)$ and rice, other sorts ( $+4,619$ tons and Rs. 567 lakhs) to Madras and kerosene oil ( $+588,200$ gallons and Rs. 340 lakhs) and sugar ( +53 I tons and Rs. 189 lakhs) to Bombay. The following table shows the exports of cotton to Bombay during the past four years and the pre-war year 1913-14:-

Table No. 23.

| Years. |  |  | Quantity. | Value. |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Tons. | Rs, |
| 1913.14 | ..' | $\ldots$ | 12,002 | 93,09,940 |
| 1921-22 | ., | $\cdots$ | 28,400 | 2,45,51,318 |
| $1922 \cdot 23$ | $\cdots$ | $\cdots$ | 31,453 | $3,90,32,005$ $5,61,55,439$ |
| 1923-24 | $\cdots$ | $\cdots$ | 27,396 | 4,28,57,558 |
| 1924-25 | -. | $\cdots$ | 27,30 | 4,28,5755 |

Foreign merchandise.-The value of exports of foreign merchandise decreased by Rs. $34^{\circ}$ or lakhs to Rs. 96.57 lakhs mainly as a result of smaller shipments of sugar ( $-4,324$ tons and Rs. 23.90 lakhs) to Bombay, Kathiawar and Madras and cotton piece-goods (-Rs. $4^{28}$ lakhs) to Bombay.
23. Treasure.-Imports of gold amounted to 1,177 ozs. valued at Rs. 70,625 against none in the past year and comprized 5,000 sovereigns from Bombay. Imports of silver from coast ports which were valued at Rs. $6,100^{\circ}$ consisted of Government of India rupees from Cutch and Kathiawar. As in the previous year there were no exports of gold to coast ports. The value viz: Rs. 1,500 of exports of stlver represented shipments of Government of India rupees to Bombay.

## GOVERNMENT TRANSACTIONS.

## Stores.

24. The value of imports of Indian produce rose from Rs. 60,564 to Rs. 3.19 lakhs, but that of foreign merchandise declined slightly by Rs. $1 \cdot 22$ lakhs to Rs. 771 lakhs. Under exports, the value of Indian produce increased from Rs. 4,528 to Rs. 9,782 , but the value of foreign merchandise decreased by Rs, 133 lakhs to Rs. 3.20 lakhs.

## Treasure.

25. As in the previous year there were no transactions of treasure on Government account during the year under report.

## SUBORDINATE PORTS.

26. Keti Bandar and Sirganda.--The total value of the entire trade of these two ports decreased from Rs. 1915 lakhs to Rs. 1772 lakhs in $1924-25$. Keti Bandar contributed 57 per cent. and Sirganda 43 per cent. to the total trade. Imports into Keti Bandar consisted chicfly of beree leaves, canes, fodder, wheat four, spirits, kerosene oil, salt,cotton piece-goods, tobacco, dates, matches and sugar, and exports consisted of charcoal, frewood, earthenvare, rice, jowari and bajri, hides and skins, raw, ghee, tilseed and raw wool. Imports into Sirganda consisted of gunny bags and cotton piece-goods, and exports consisted chiefly of earthenware, jowari and bajri, rice, mustard oil, ghee, rapeseed, tilseed and firewood.

## IV.-Miscellaneous.

27.-Shipping.-The table below gives the number of vessels entered at and cleared from the ports of the province of Sind during the past two years :-

Table No. 24.

Foreign trade.-The notable expansion in the volume of trade, to which reference has already been made, was accompanied, as might be expected, by an increase in the number of vessels engaged in the foreign trade from 1,189 to 1,443 and an improvement in the tonnage from $2,134,107$ to $2,895,073$ tons. The bulk of the shipping consisted as usual of steam vessels numbering 1,007 with an aggregate burthen $2,853,743$ tons, showing an increase of 257 in number and 761,579 tons in burthen. The average tonnage per steamer again rose from 2,790 to 2,834 tons, while that of sailing vessels was 95 tons as against 96 tons last year.

Coasting trade.--Though the total number of steamers employed in the coasting trade declined by 29 to 1,031 tons, their tonnage rose by 65,316 to $2,5,30,189$ tons owing to vessels of a larger burthen having entered the port during the year. Country
craft engaged in the coasting trade declined by 2,249 in number and by 45,178 tons in tonnage.

Freight.--The rates of freight for wheat and rapeseed to the United Kingdom which in the beginning of the year stood at 25 s. and $22 s$., respectively, commenced to decline steadily from the middle of April until the first week of August when the lowest figures, ziz., 19 s . for the former and 175 s . for the latter were recorded. A steady rise however soon followed, and the second week of October again saw 25 s . for wheat and 23 s . for rapeseed. This level was, with minor fluctuations, maintained in the succeeding three months and with stronger demand, the rates went up to 26 s . for wheat and 24 s . 6 d . for rapeseed in the last week of January, which were the highest figures recorded during the year. This high level was, however, not long maintained, a drop setting in at the end of February. The year closed with 22s. for wheat and zos. for rapeseed. Freight rates for cotton were the same as those for rapeseed. The average rates to ports in the Persian Gulf were Rs. 1-3 as per bag by steamer and ten annas per bag by country craft.

The following figures show the number of steamers of each nationality that entered the port of Karachi during the year 1924.25 , as compared with 1923.24 :-

Table No. 25 .

28. Exchange.-Owing to improved trade conditions and a good monsoon, the rupee appreciated in value by about $1 d$. on an average over the last year At the beginning of the year, the rate

L (iv) 331-7
of exchange for demand drafts was quoted at $1 s .4 \frac{5}{3} d$. and with slight variations this rate was maintained till the end of June, when it rose to $1 s .4 \frac{31}{32} d$. By the middle of July, it touched is. $5 d$., but there was a drop in August, and on the 15 th of that month it was quoted at is. 48 s 7 $d$. The drop, however, lasted for about a week only followed by a steady rise until the rate reached is. $6_{32}^{3} \mathrm{~d}$. at the end of December. This high rate was not long maintained, and the ast three months of the year witnessed a decline, the average rate prevailing in those months being is. $5 \frac{15}{16}$.d. The closing rate on the 31st March was is. $5_{16}^{13} d$.
29. Revenue.-The following table shows the total collections for the province on account of Import and Export duty and refunds therefrom, and the duty on imported salt separately for the last four years and the pre-war year:-

Table No. 26.

During the year under report two important changes were introduced in the system of levying Customs duties. Firstly, stores imported and exported by Government which were hitherto allowed free of duty were, with effect from ist April 1924 subjected to duty at the rates applicable to private merchandise, excepting in the case of imports, arms, ammunition and military stores, aeroplanes and parts, stamps and currency notes which were exempted from duty. The other important innovation was the imposition of protective tariff duties under the Steel Industry (Protection) Act on imported steel which has already been referred to in the foregoing paragraphs. Collections on account of import duty on private merchandise rose by Rs. ${ }^{17} 0^{\circ} 74$ lakhs or .48 per cent. to Rs. 529.82 lakhs. Of this amount no less than Rs. 160.37 lakhs were recovered on imports of sugar. Next in importance from a revenue point of view were cotton piece-goods which realised Rs. 138.68 lakhs or Rs. 44.84 lakhs in excess of the receipts in the year 1923-24. Duty on liquors increased by 731 lakhs to Rs. $38 \cdot 38$ lakhs. The total import duty on iron and steel, including special protective duties, amounted to Rs. 2715 lakhs, exhibiting an increase of Rs. 12.98 lakhs. Realizations on articles imported by post advanced from Rs. 2.97 lakhs to Rs. $10 \times 49$ lakhs in 1924-25, an increase of Rs. $7{ }^{\prime} 52$ lakhs. An improvement was also noticeable under oils ( + Rs. 2.38 lakhs), and yarns and textile fabrics, other than cotton ( + Rs. 4.56 lakhs). Receipts from tobacco and matches amounted to Rs. 1895 lakhs and Rs. $15 \cdot 1$ lakhs, representing a decrease of Rs. 4.87 lakhs and Rs. 2.92 lakhs, respectively. The total amount of protective duties recovered was Rs. 19.23 lakhs. Import duty on Government stores amounted to Rs. 19.62 lakhs. The total collections of export duty on private merchandise improved from Rs. 5 86lakhs to Rs. 7 lakhs. Receipts from rice which totalled Rs. 2.92 lakhs showed an excess of Rs. 47,493 and those from hides and skins which amounted to Rs. 4' $_{3}$ lakhs improved by Rs. 68,835 . The total export duty on Governinent stores amounted to Rs. I,984.

## ADMINISTRATION,

30. Indian Merchandise Marks Act.—During the year under report there were altogether 1,173 consignments which infringed the requirements of this Act, against 1,207 in the previous year, and the penalties imposed amounted to Rs. 26,912 against Rs. 45,339 in the previous year. The cases were distributed as follows according to the countries of origin :-

A summary of the cases is given below:-
Class of cases.
(a) 137 passed without correction of marking.

| (b) | 97 | do. | do. |

Class A.-(Application of counterfeit trade marks or other indications that they are the manufacture or merchandise of a person whose manufacture or merchandise they are not).-There were 12 detentions under this class. Of these 8 related to agricultural implements, 2 to old newspapers and 1 each to white shirtings and goggles. Of the 8 consignments of agricultural implements, 3 were released at the request of the parties concerned. In the case of remaining five the aggrieved parties furnished the requisite Indemnity Bond and subsequently obtained the release of the goods in conse-
quence of mutual settlements. The two consignments of old newspapers were released after obliteration of the offending trade marks on the bales, as mutually agreed upon by the parties. The consignment of white shirting was released as the aggrieved party did not wish to have them further detained. The consignment of goggles was released at the request of the aggrieved party as a result of an amicable settlement with the importers.

Class B-(Application of false trade description or other indication in respect of the country in which the goods were made or produced).-There were altogether 943 cases under this class of which the following were the most important:-

Seven consignments of Perfumery and Toilet preparations from Germany bore French and English expressions unqualified by indication of their German origin. The goods were released after marking indication of origin and on payment of heavy penalties. Cotton Fents from the United States of America bore a label with the word "Bombay." They were allowed to pass on payment of a heavy penalty and after the removal of the offending labels. Cakes of Bath Soap from Italy impressed with English expressions:-" Bath Soap, London" "Best quality" and "Trade mark" were confiscated but redeemed on payment of a penalty equal in amount to their value. Smoking pipes from Germany, engraved with the English description "Real Briar" unaccompanied by indication of origin, were confiscated, but redeemed on payment of a heavy penalty.

Class C.- (Application of trade description false in other res-pects).-The number of cases dealt with in this class was 45 . Of these, the following may be mentioned as of special interest:-Galvanised plain steel sheets from the United Kingdom were marked as " 27 gauge" whereas on examination they were found to be 26 gauge. The goods were allowed to pass after correcting the marking and payment of a penalty. In the case of a consignment of Gilt and Fancy Bangles from Italy the cardboard boxes bore a label which showed that they contained 2 dozen bangles; on examination they were found to contain one dozen only. The consignment was released on payment of a penalty and after correction of the marking.

Twelve consigmments of wine described as " Port " were detained under class $\mathrm{C}_{3}$, because they were not accompanied by the required certificates from the competent Portuguese Authorities. All were eventually released : five on production of the necessary certificates, four on payment of penalties, and three without penalties.

Eighteen consignments from Belgium described "White zinc" and "Red lead" containing less than $5^{\circ}$ per cent. of White Zinc and red lead were released after correcting the marking as required by law and on payment of heavy penalties. Artificial silk and cotton Braids from Germany were wrongly described as "Silk Russia Braids". They were confiscated but released after correcting the marking and payment of a redemption penalty. Fountain pen nibs from Germany, marked 14 kt Gold but containing no gold in their composition, were allowed to pass on payment of a redemption penalty. A consignment of spoons and forks from London engraved with the expression "Itonite Silver" contained no silver. They were released after obliteration of the word "silver" and on payment of a penalty. Silver gilt fancy laces from Germany were marked in a way indicating that they contained 30 per cent. of silver, whereas the Chemical Analyser reported that they contained only 22 per cent. of silver. They were released after obliteration of the offending description and on payment of a penalty. A consignment of velvet from Germany described as "Superior Silk Velvet " was found to contain cotton and silk in its composition. It was released on payment of a penalty and after obliteration of the words "Superior Silk".

Class D.-(Piece-goods which have not the length properly stamped on each piece).-

One hundred and seventy-three infringements were reported in this class, of which 86 were of cotton piece-goods, 53 of woollen piece-goods, $2:$ of cotton embroideries and 13 of fents. Thirteen consignments were allowed to pass after marking the yardage on the pieces. In the case of the remaining 160 , penalties were imposed in addition to requiring the marking of the yardage.

All these cases were detected by the Appraisers and Examiners in the ordinary course of their duties.

There was no appeal against the orders passed in any of the cases mentioned in the report.
31. Customs offences.-The total number of cases adjudicated under the Sea Customs Act was 838 as against 561 in the
preceding year, and the realizations on account of fines and forfeitures in respect thereof amounted to Rs. 29,450 as against 27,323 in 1923-24. Among the important cases, nine related to the importation of obscene pictures detected by the appraising section. 115 , cases of import of obscenities also were detected by the postal branch of this section. There were four cases of unauthorized importations of wireless apparatus and accessories through the post, in two of which the goods were confiscated and in the other two they were permitted to be returned to the senders. An air-gun which fell in the category of firearms and a few sample cartridges for firearms imported by means of the post were also confiscated.

As a result of rummaging operations carried out by the preventive section during the year under report, 14 cases were detected in which arms and ammunition imported by members of the crew were not declared in the store lists of the vessels : 8 pistols, 4 revolvers and 227 cartridges were confiscated, and a total penalty of Rs. 1,435 was recovered. In all 194 foreign vessels were rummaged during the year. There were also four seizures of obscene pictures. Three attempts to smuggle dutiable goods inwards, viz., jewellery, carpets and cigarettes and one to export percussion caps without a license were also detected by this section. Suitable penalties were imposed in all the cases.

The penalties recovered from steam-ship agents at the instance of the Executive Audit section amounted to Rs. 7,534 as against Rs. 14,722 last year. The decrease was due to the fact that, unlike last year, the number of ships' files dealt with in $1924-25$. included very few of previous years' arrears.
32. Appeals.-There were 22 appeals to the Collector against the decisions of the Assistant Collectors and 3 to the Chief Customs Authority ( 2 to the Commissioner in Sind and it to the Central Board of Revenue) against the orders of the Collector. In 18 out of these cases, the decisions of the Assistant Collectors were upheld and in 4 they were modified. The Chief Customs Authority confirmed the orders of the Collector in 2 Cases and modified them in 1 case. There were also 4 revision applications to the Government of India which were rejected.
33. Testing.--The Chemical Analyser to Government for - Sind tested $\mathrm{r}, 234$ cases on behalf of the Customs Department during the year. Of these, 463 related to medicines, essences and chemicals, 48 to liqueurs and bitters, 378 to gold thread and spangles, 168 to oil, 82 to dyes, $3^{2}$ to milk, 4 to light caoutchoucine
and pyridine brought to the Custom House for denaturing imported rectified spirit, 35 to denatured spirit and 24 to methylated liniments.
34. Receipts and expenditure.-Details under this head are exhibited in Table $E$ of the Appendix. The gross receipts during the year amounted to Rs. $5,58,11,588$ as against. Rs. $3,66,48,575$ in 1923-24. The total expenditure was Rs. $6,55,214$ or 1.17 per cent. of the gross and 1.21 per cent. of the net collections as against Rs. $6,10,086$ or $1 \cdot 66$ per cent. of the gross and $\mathrm{I}^{\prime} 74$ per cent. of the net collections in 1923-24.
35. Miscellaneous matters.-The following Acts affecting Customs Administration were passed during the year :-
(1) The Steel Industry (Protection) Act XIV of 1924.
(2) The Indian Merchant Shipping (Amendment) Act XI of $19^{25}$.
(3) The Indian Finance Act XIII of 1925.
(4) The Indian Tariff (Amendment) Act XIV of 1925.

II standing orders were issued during the official year from ist April 1924 to 31 st March 1925 to ensure prompt despatch of business and to remove defects and irregularities brought to light in the course of audit or otherwise. The more important of these directions are summarized below :-
(1) Rules were framed to regulate (a) the entry and clearance of Government stores and (b) the assessment and adjustment of duty leviable thereon in accordance with the instructions of the Government of India, Finance Department (Central Revenues).
(2) Revised instructions were issued regarding checkweighment of consignments of sugar in order to reduce the number of bags to be checkweighed.
(3) Provision was made for transmission of goods to Persia via the Nushki-Seistan route on payment only of $\frac{1}{16}$ th of the duty on execution of bond in respect of the remaining ${ }^{15} 5$ ths duty.
(4) The procedure for the part transfer of dutiable goods from one vessel to another was modified so as to give more facilities to the trade.
(5) In order to expedite the disposal of public business modifications in the procedure for dealing with applications for amendment of Import manifests and Bills of Entry were introduced.
(6) Procedure relating to the examination, sampling and test - of liquors imported in cases was revised so as to minimize the trouble in the clearance of such goods.
Provision was also made for examining imported goods in the Port Trust Warehouses instead of in the Examination Hall attached to the Custom House.
36. Documents, \&c.-The following statement compares the statistics of the volume of work turned out in the Custom Houses at the Chief port and subordinate ports during the year 1924-25 and the previous three years:-

[^2]L. (Iv) $33^{\text {I }}-8$
37. Establishment.-Mr. H. H. Hood held charge of the department up to the 2 th Febriary 1925 when I retieved him. Messts. Singletion and Brennan servee as Assistant Collectors throughout the year. Mr. P. D'Cuida, who temporarily held the newly-created post of the $3^{4 \mathrm{e}} \mathrm{C}$ Assistant Colleetor, reverted to his perniment appointiment as local Auditor on the f4th April 4924 on being relieved by Mr. K. G. Jacob, M.A., whe held that post for the rest of the year.

Custom House,
Karachi, the poth June por 5 .
F. B. LALKAKA, Offg. Coilector of Customs.

## 1.-General Review of Foreign Trade.

1. General position of trade.-The trade accounts for the year under review, embodied in Table A of the Appendix, may well be described as disappointing when compared with those of the two previous years which recorded a distinct improvement following the depression which set in at the end of 1920. The entire maritime trade of the Province of Sind during the year under review was valued at Rs. 8,403 lakhs or Rs. 2,573 lakhs and 23 per cent. less than the corresponding figures for the previous year. The foreign trade accounted for 78 per cent. of the total or Rs. 6,583 lakhs, a reduction of 26 per cent. compared with $1924-25$. Exports contributed 56 per cent. and imports 74 per cent. of the total value of the foreign trade, the former falling by Rs. 1,788 lakhs to Rs. 3,710 lakhs and the latter by.Rs. 469 lakhs to Rs. 2,873 lakhs.

As is natural in a port which depends for the prosperity of its trade on the extent of the supplies of food-stuffs and raw materials and produce shipped to foreign countries, the set-back was due in the first place to the curtailment of exports of wheat, barley and rapeseed owing to a reduction in the world prices of the first two commodities accompanied by a fall in the quantities available for export. The drop was of course more marked in the case of wheat, shipments having declined to the extent of no less than Rs. I, 342 lakhs, though serious decreases were also recorded in the shipments of rape seed and barley. The unfavourable position created by the decline in the value and volume of these exports was relieved only by a notable expansion in the shipments of raw cotton which made a fresh record in the history of the Port, and but for this remarkable rise the position in the export trade as a whole would have been exceedingly unfavourable. Other important increases or decreases in the value of the more important articles included in the export trade will be found from a comparison of the figures embodied in Table D of the Appendix.

The position in regard to the import trade is less depressing. The fall in the total value of this trade was due partly to a reduction in the general price level of several commodities to which reference is made in paragraph 4 below, but the main cause of the decline was an appreciable contraction in the values of cotton manufactures and sugar, which, as will be seen from Table C of the Appendix, are the two leading commodities in the import trade. Business in cotton goods was restricted by the heavy losses suffered by dealers owing to the drop in prices, and to the disastrous speculations by many of them in sugar. Among the principal features, besides the

$$
\mathrm{L}(\mathrm{Iv}) 156-1
$$

fall in prices referred to above, which affected commercial transactions during the year, the continued stability of exchange and the stringency of the money-market during the greater part of the year are deserving of note.

A detailed examination of the variations in the value and volume of all the important imports and exports classified under the five main categories into which the trade is divided will be found in Section II of this Report.
2. Balance of trade.-The following table shows the balance of trade in merchandise and treasure under foreign trade during the last ten years and the pre-war year 1913-14:-

Table No. $\mathbf{I}$.

The figures given in the above table and the two graphs prefixed to this report show that the credit balance has dropped from Rs. 2,156 to Rs. 836 lakhs, exports having fallen much more than imports.
3. Geographical distribution.-The distribution of the foreign import and export trade of Karachi by countries is shown in detail in Table B of the Appendix with the percentage which each country bears to the whole. The following abstract compares the percentage shares of the principal countries during 1925.26 with
those in 1924-25 and the pre-war year 1913-14 : 一

|  | Imports. |  |  | Exports. |  |  |

| Atrica |  |  |  |  | 33: | $2 \cdot 82$ |

Import Trade.-It will be seen from the figures given in the above statement that the share of the British Empire as a whole in the total value of the import trade of the port, which stood 'at 61 per cent., both in 1924-25 and in the pre-war year 1913-14 receded to 56 per cent. during the year under review. Owing to a reduction in the value of imports from Rs. 1,747 lakhs to Rs, 1,368 lakhs, the share of the United Kingdom declined from 57 to 53 per cent. Among other countries in the Empire, the most noticeable variation occurred in the case of Maurituus, from which no supplies were received as compared with transactions valued at Rs. 77 lakhs in the previous year. The decrease in the Empire trade afforded foreign countries in Europe a convenient opportunity of improving their position to a level with that heid in pre-war years. Imports from Germany were on the same scale as in the previous year. Belgian goods decreased in value from Rs. 107 lakhs to Rs. 104 lakhs, but her share advanced from 3 to 4 per cent. Italy and France increased their transactions with this port and thereby raised their shares slightly. The import trade with the United States of America is making very rapid strides, the value of goods sent out by that country having expanded from Rs. 169 lakhs to Rs. 222 lakhs, which resulted in the share rising from 5 to 8 per cent. Among non-British Asiatic countries, Java continued to occupy the first place on account of her exports of sugar, and it is interesting to note that though these exports increased by 14,191 tons in quantity, the value contracted by as much as Rs. 112 lakhs on account of the heavy fall in prices during the year. This resulted in Java's
share in the total value of imports being reduced from 14 to 12 per cent. Japan, the next important country, on the other hand, raised its share slightly from. $2 \cdot 10$ to 2.76 per cent. owing to increased sales of cotton piece-goods. The present position of the principal countries participating in the trade in the more important commodities is summarized in the following statement:-

| Artictes. | United Kingdom. | Straits Settlements. | Forgign countries. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Export Trade.-The share of the British Empire in the total value of the export trade which stood at the high figure of 41 per cent. both in 1924-25 and in the pre-war year 1913-14 dwindled to the low point of 27 per cent. This unsatisfactory position was chiefly due to smaller shipments of wheat to the United Kingdom. The total value of purchases made by the United Kingdom at this port fell from Rs. 2,152 lakhs to Rs. 853 lakhs, which reduced her share from 39 to 23 per cent. Among Continental countries, Italy was again the largest purchaser, and though the value of the goods taken by that country, viz., Rs. 526 lakhs was short of that in 1924-25 by Rs. 177 lakhs, her share in the total trade rose slightly from 13 to 14 per cent. Her chief purchases consisted of cotton, and it is noteworthy that though the quantity received was about the same as in the previous year at 34,255 tons, the value, viz., Rs. 424 lakhs was nearly a crore of rupees less than that in the previous year. The German quota of the total trade improved slightly from 8.92 to 9.47 per cent., but it was still far behind the pre-war share of 15 per cent. Among other European countries, the variations in Belgium's purchases at this port are worth notice. That country which last year bought some i19,000 $^{0}$ tons of wheat valued at Rs. 185 lakhs, took only 7,275 tons valued at Rs. 12 lakhs, which resulted in the share being reduced from 8 to 5 per cent. As regards non-British Asiatic countries, Japan and China
raised their shares considerably owing to enormous purchases of cotton. The share of the United States of America, vis., 4 per cent. was double that in the previous year. Larger purchases of goat skins, raw cotton and wool and woollen carpets mainly accounted for the improvement. The present position of the principal countries obtaining their supplies of the more important commodities in the export trade is summarized in the following statement:-

4. Variations in the average prices of articles.-The following table shows the variations in the average prices of certain articles imported into and exported from the Province of Sind, the average prices of the years 1899-1900, 1900-01 and 1901-02 being taken as 100:-

The figures in the above table again exhibit a welcome decline in the average prices of all the chief articles of the import trade, except dates. Sugar in particular shows a heavy fall which has reduced prices to a figure below the average of the three years ending 1901-02-the present official standard for comparison-the fall being mainly the result of an increase in the world production. The rise in the case of dates was due to high prices ruling in the first half of the year on account of a poor crop in the previous year.

Among exports, the prices of rice, wheat, rape seed and indigo stiffened somewhat as compared with the previous year, while those of the other principal articles were weaker. The decline under cotton was particularly striking and was due to a considerable expansion in world supplies. The effect of the change in the level of prices since the outbreak of the great war is illustrated in the following table in which the volume of the trade in 1925-26 in some of the more important articles of import and export trade is compared with the pre-war volume and its value recalculated at pre-war rates:-

Table No. 2-A.

A study of the figures in the above table discloses the fact that the apparent increase in the value of both imports and exports in 1925-26 as compared with the pre-war average is not real. It will be seen that under imports, though the total value of the selected articles in $1925-26$ is higher by 48 per cent. than the pre-war average, if recalculated at pre-war prices, the value would actually be less by about 2 per cent. The position in the case of exports is much the same. The value of the selected articles shows an excess of 27 per cent. over the pre-war average, but if pre-war rates were. applied, it would show a shortage of 19 per cent.

## TREASURE-PRIVATE.

5. The following table compares the imports and exports of treasure on private account for the last two years:-

Table No. 3.

The total value of gold received during the year declined by $5^{\circ}$ per cent. to Rs. 13.18 lakhs, imports mainly comprizing $21,055 \mathrm{ozs}$. of bars from the United Kingdom. Large purchases made last year, both. locally and from Bombay, restricted business. Imports of silver which consisted chiefly of Government of India rupees and partly of bars, also suffered a set-back from Rs. $3^{1 / 82}$ lakhs to Rs. 23.73 lakhs. The former which are received here from the gulf ports for the purchase of food-stuffs and cloth were less by Rs. $3^{\circ 09}$ lakhs owing to smaller arrivals from the Bahrein Islands. Bar Siver which came almost wholly from the United Kingdom decreased in quantity from $4,77,307$ to 244,919 ozs. and in value from Rs. $9^{\circ} 44$ lakhs to Rs. 440 lakhs. Under exports, the transactions in gold were negligible. Exports of silver, as usual, comprized Government of India rupees and other coins. The
decline in the former occurred in despatches to the Bahrein Islands where they are sent for the purchase of pearls. No rupees were sent to those Islands during the year under report as against Rs. 443 lakhs last year. There were large stocks of pearls in hand at Bombay and the output this year was poor. As in the previous year, the value Rs. II'6I lakhs of 'other coins' represented shipments of krans purchased at favourable rates at Quetta and Chaman and sent through this port to Persia.

## GOVERNMENT TRANSACTIONS.

6. The following table compares the items of importance to the commercial public in Government transactions with foreign countries during two years $1924-25$ and $1925-26$ :-

| Total entire Foreign Trade | $\cdots$ | 2,61,03,046 | ... | 2,91,25,881 |

The total value of stores imported on Government account amounted to Rs. 276.79 lakhs, showing an increase of Rs. 28.15 lakhs or it per cent. The principal articles which showed an improvement were railway plant and rolling stock and metals. The expansion under the former occurred in purchases of carriages and wagons and parts thereof by the North-Western Railway from the United Kingdom and Belgium, and under the latter in arrivals of metal-work from the United Kingdom and Belgium required for the construction of the Lloyd Barrage. A decrease of Rs. 15.51 lakhs was, on the other hand, noticeable in imports of machinery from the United Kingdom and the United States of America.

## II.-Foreign Trade.

## IMPORTS.

7. The following table gives the value of the import trade under the five main classes for the last four years and the pre-war year 1913-14:-

Table No. 5.

| Articles. | 1913.14. | 1922.23. | 1923-24. | 1924-25. | 1925-26. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| IMPORTS. | $\cdots$ Prs. | Rs. | Rs | IRs. | 1Rs. |
| I, $\rightarrow$ Food, drink and tobacco | 3,99,06,893 | 5,29,09,880 | $4,87,85,305$ | 7,46,54,426 | 5:39,4.623 |
| II.-Raw materials and produce and articles mainly unmanufactured | 64,05,580 | 1,16,10,006 | 1,31,73,567 | 1,44,80,553 | 1,73,47.56it |
| III.-Articles wholly or mainly manufactured | 1i,59,72,433 | 14,06,58,767 | 15,33,12,704 | 20,96,56,019 | 17,98,28,656 |

| Grand total of Imports ... | 16,27,71,741 | 20,63,55,664 | 21,66,41,215 | 30,33,62,093 | 25,58,84,262 |

## Class I.-Food, Drink and Tobacco.

The decrease of Rs. 20740 lakhs recorded in the value of articles included in this category represents a reduction of 28 per cent. as compared with the figures of the previous year. The reasons for the variations in the value of the more important commodities are discussed below.

Sugar.-The following table exhibits the imports, both from foreign countries and from Bombay, re-exports to foreign countries and coastwise exports of sugar, 16 Dutch Standard and above, including beet sugar, for the past two years and for the year 1913-14:-

Table No. 6.

The outstanding feature revealed by a comparison of the figures given in the above table is that whereas the quantity of sugar imported from foreign countries, viz., 169,003 tons declined by only 12 per cent. as compared with the corresponding figures of the previous year, the value recorded, viz., Rs. 351.24 lakhs decreased by no less than 39 per cent. This was obviously due to a heavy fall in prices consequent on the enormous increase in the world production, the total outturn for $1925-26$ in Java alone, from which the bulk of the supplies were received, being estimated at $2,294,000$ tons compared with $1,977,490$ tons in the previous year. As a
result of the marked fall in prices, the average rates prevailing were actually below the pre-war level, a gratifying feature from the consumer's point of view. From Rs. 17-2 per ewt. on the 7 th April, the local quotations for white Java sugar gradually declined to Rs. $15-4$ in the second week of June and to Rs 13-1 towards the end of October; after which a firmer tendency was evident and prices rose steadily to Rs, 15-6 at the close of the year. The downward movement and heavy losses suffered by many speculative dealers tended to restrict the volume of business done.

The comparatively small decrease in the volume of imports was not due to any lack of demand. Consumption, on the contrary, stimulated by low prices, increased, as is evident from the fact that the stocks in hand at the close of the year under review are estimated at 6,200 tons only as compared with 34,400 tons at the end of the previous year. The figures relating to the volume of trade given in the Table at the head of this paragraph show that imports of fava sugar increased in quantity by 10 per cent. to ${ }_{151,760}$ tons, while the receipts of Mauritius and Continental beet sugar from Hungary, Czechoslovakia and Austria, recorded a. marked decline-supplies from Mauritius having ceased altogether while imports of Continental beet fell from 25,531 tons in $1924-25$ to 13,828 tons in $1925-26$. It is also worthy of note that the United. States of America, which during the past two years did not participate in the sugar trade, supplied $\mathrm{I}, 825$ tons valued at "Rs. 3.95 lakhs in the last month of the year.

## Liquors-

Table No. 7.

|  | Total Liquars ... |  | 749,935 | 22,47, 770 | 1,052,812 | 57,77,802 | 1,116,974 | 64,99,778 |

(Liquors).
Ale, beer. and porter.-The following statement compares the quantities imported from the chief sources of supply during the past two years :-

A further expansion was recorded in the imports of ale, beer and porter and cider and other fermented liquors, the total quantity having advanced by 24,968 to $830,55^{6}$ gallons and the value by Rs. $1 \cdot 12$ lakhs to Rs. 19.56 lakhs. The increase occurred in receipts of bottled beer chiefly from Germany and the Netherlands, the figures for the past two years being 301,691 gallons valued at Rs. 8 in lakhs and 371,366 gallons valued at Rs. 10.25 lakhs, respectively. Bulk beer which came solely from the United Kingdom, on the other hand, decreased in quantity by 42,883 gallons to 433,235 . gallons and by Rs. 94,790 to Rs. 8.22 lakhs in value. This drop in the imports of bulk beer is due to the increasing popularity of continental beer, which is not only lighter but also much cheaper than bulk beer.

Spirits.-Imports of whisky, the principal item under this head, recorded an increase of 13,714 gallons in quantity and of Rs. 3.37 lakhs in value. A feature during the year was the import of cheaper brands of whisky from the United Kingdom, tbe prices of which were almost as low as German imports. This resulted in a considerable reduction in receipts of the so-called German whisky, the consumption of which, in recent years, was showing a tendency to increase. Arrivals of whisky from the United Kingdom rose from 98,754 gallons valued at Rs. $19 \cdot 28$ lakhs to 121,885 gallons valued at Rs. 23.20 lakhs, while German imports declincd in quantity from ${ }^{11,166}$ gallons to 3,386 gallons and in value from Rs. 70,682 to Rs. 24,393 . The increase of 9,729 gallons in the imports of brandy was due to larger purchases from France whence it could be obtained at prices as cheap as the German product on account of the fall in exchange. An improvement was also noticeable under liqueurs, the quantity having expanded from 2,831 gallons to 4,649 gallons
or by 64 per cent. The bulk of the imports came from France and consisted of creme-de-menthe which is much used by Sindhis for flavouring their drinks. The expansion under other sorts of spirits was due to larger receipts of rectified spirit from Java for denaturation. In all 10,345 gallons of this spirit were denatured at the Custom House, 5,976 immediately on arrival before clearance and 4,369 gallons in bond before clearance. The facilities afforded to importers for denaturing spirit, and the cheapness of the denaturants, have now made it possible for local merchants to compete with traders at other ports.

Wines.-The low prices prevailing during the year and a greater demand from the Punjab and the Frontier Provinces were the principal factors which led to the increase under this head. Almost all the principal descriptions of wines showed an expansion. The quantity of port wine rose from 5,975 to 8,740 gallons. Imports of champagne and other sparkling wines also advanced by 2,686 to 5,228 gallons. A decrease, on the other hand, occurred in imports of other sorts of wines, supplies from France consisting chiefly of vermouth, having been reduced from 21,871 gallons to 13,387 gallons. The decrease followed a heavy increase in the previous year.

Tobacco. - The import trade in tobacco, consisting mainly of cigarettes from the United Kingdom, showed a marked recovery, the total quantity rising by $158,320 \mathrm{lbs}$. to $734,360 \mathrm{lbs}$. and the value by Rs. $5^{\prime} 11$ lakhs to Rs. 29.74 lakhs. The increase followed a corresponding decrease in the previous year.

Fruits and Vegetables.-The total value of imports under this head rose by Rs. $5 \% 7$ lakhs or 19 per cent. to Rs. 3088 lakhs to which dates, the chief item, contributed Rs. 28.74 lakhs. The increase was due to a good crop of dates in the Persian Gulf during the year. Of the total quantity imported, viz., 19,826 tons, 17,198 tons came from Mesopotamia, 1,108 tons from Persia and 1,062 tons from the Bahrein Islands.

Provisions and Oilman's stores.-A further improvement occurred in imports classified under this head, the value, viz., Rs. 49 I 5 lakhs exceeding by 23 per cent. the figures (Rs. 39.8 I lakhs) of the previous year which represented an increase of 79 per cent. on the value of imports in $1923^{-24}$. The following statement shows

Imports.
the variations in the quantities of some of the principal items imported during the year:-

| Principal articles. |  | Quantity. |  |
| :---: | :---: | :---: | :---: |
|  |  | 1934.25. | 1925-26 |
|  |  | Cuts. | Cwis. |
| Canned and bottled provis |  | 25,656 | 52,414 |
| Farinaceous foods | $\ldots$ | 8,523 | 7,532 |
| Biscuits and cakes | $\ldots$ | 3.368 | 4,104 |
| Bacon and hams | ... | 2,704 | 2,606 |
| Jams and jellies | ... | 2,762 | 2,499 |
| Cheese (including canned) | . | 2.796 | 2,243 |
| Milk, condensed, \&c. | $\ldots$ | 5,386 | $55_{1} 607$ |
| Pickles, chutnies, sauces a | diments | 2,198 | 1,653 |
| Other sorts of provisious | ... | 3,604 | 2,411 |

It will be seen from the above table that the main increase occurred under canned and bottled provisions. Larger imports from the Netherlands of vegetable fat which is classified under this head accounted for the improvement. This new trade, which was started last year, appears to be prospering. An extensive use of the fat is being made for cooking purposes throughout the country. The Netherlands was again the chief supplier, no less than $35,635 \mathrm{cwts}$. valued at Rs. $18 \cdot 36$ lakhs having been received from that country as against $10,659 \mathrm{cwts}$. valued at Rs. 6.60 lakhs last year. Germany and the United Kingdom also sent 509 cwts . of this fat valued at Rs. 21,832 and 44 cwts. valued at Rs. 2,420 , respectively, during the year. Fluctuations in other descriptions of provisions were not considerable. Slight decreases were noticeable in receipts of farinaceous-foods, bacon and hams, jams and jellies, cheese and pickles owing to overstocked markets. Under milk, though the quantity improved by 221 cwts., the value declined by Rs. 54,958 . This was due to a reduction in prices and larger importations of cheaper brands during the year.

Tea.-A drop of $467,983 \mathrm{lbs}$. in quantity and of Rs. $5 \cdot 28$ lakhs in value reduced the total imports of tea to $600,947 \mathrm{lbs}$. valued at Rs. 6.2 I lakhs. The decrease was confined to receipts of green tea from China whence only $37 \mathrm{r}, 024 \mathrm{lbs}$. of this variety valued at Rs. 3.89 lakhs were imported as against $882,914 \mathrm{lbs}$; valued at Rs. $9^{\circ} 71$ lakhs in $1924-25$. This tea was hitherto imported mainly for transit by land via., Meshed to Russian Turkistan,
which, it is understood, now obtains its supplies direct through Siberia. The few consignments, which were despatched to Meshed during the year, are reported to be șill lying there unsold. Purchases of black tea which were mostly made from Ceylon, on the other hand, increased by $30,129 \mathrm{lbs}$. to $214,559 \mathrm{lbs}$. in quantity and by Rs. 41,882 to Rs. 2'1g.lakhs in value. The bulk was dust tea, mainly used in Indian tea shops, and the total quantity imported represents the normal requirements of the port.

## Class II.-Raw materials and produce and articles mainly unmanufactured.

8. The aggregate value of imports of the various articles included in class $/ 1$ expanded from Rs. $144^{\circ} 8$ ! lakhs to Rs. 173.48 lakhs or by 20 per cent. The fluctuations in the principal commodities are explained below.

Oils.-There has been an increase of Rs. 35.18 lakhs or $3^{2}$ per cent. in the aggregate value of imports under this head, the figures for the past two years being Rs. 109.59 lakhs and Rs. 144.77 lakhs, respectively. Large quantities of mineral oils received during the year accounted for the improvement. The following table shows the imports of mineral oils for the past two years and the pre-war year, including, in the case of kerosene, imports from Burma:-

Table No. 8

|  | 730,899 13,058 | 5,25,409 | 545.353 | 11,28,645 | 753.448 | $13,97.918$ |
|  | 13,058 | 18,158, | 32,129 | 66,488 | 34,820 | 72,443 |
| Total | 1,103,330, | 5,95,042 | 5,083,039 | 6,55, | 059, | 37,60,014 |

Of the total quantity of mineral oils imported from foreign countries 65 per cent. consisted of kerosene oil. Imports of this oil expanded by $3,860,277$ gallons in quantity and by Rs. 23.84 lakhs in value. The improvement occurred mainly under bulk oil from the United States of America, case oil showing a shortage of 84,434 gallons. American oil is largely in demand in the Punjab, Cutch and Kathiawar on account of its superior quality. A feature in the oil industry was an increase in the world production of crudeoil during 1925, the estimated production in the United States of America showing an increase of ahout 7 per cent. over that in 1924. The consignment of 809,489 gallons of kerosene oil from Egypt represented, as stated last year, white oil of a superior quality, from the refineries at Suez, intended to compete with superior American oils. Coastwise imports from Burma also showed an increase of $3,23^{2,188}$ gallons over the figures recorded last year. The phenomenal rise in imports of fuel oil is due to a continuous increase in -its consumption by oil driven ships as well as for oil engines generally. Imports during the year, which amounted to $7,271,389$ gallons valued at Rs. $23^{\circ} \mathrm{O} 3$ lakhs, were the highest on record, the quantity being $2,765,83^{2}$ gallons and the value Rs. $8 \cdot 42$ lakhs in excess of the corresponding figures for $1924^{-25}$. The quantities received from the producing countries were as follows :-

| Persia | .. | ... | $4,420,510$ gallons. |  |
| :--- | :--- | :--- | :--- | :--- |
| British Borneo | .. | ... | $1,539,419$ | $\prime \prime$ |
| Dutch Borneo | ... | .. | $1,3 \mathrm{Ir}, 460 \quad$ " |  |

Lubricating oils again came in larger quantities, the principal suppliers being the United States of America ( 594,114 gallons), Straits Settlements ( 60,777 gallons) and the United Kingdom (45,399 gallons).

Coal.-Arrivals of foreign coal totalled 83,452 tons valued at Rs. $20^{\circ} 53$ lakhs, and showed a decrease of 23,428 tons in quantity and of Rs. 6.76 lakhs in value. The decrease was, however, more than counterbalanced by the large increase of 49,318 tons in imports of Indian coal from Bengal. The following statement shows the variations in the quantities imported from the principal foreign countries and also from Bengal during the past two years :-

It will be seen from the above figures that the contraction under foreign coal occurred chiefly in receipts from the United Kingdom and Natal. The increase in Portuguese EastAfrican coal was mainly due to the Lloyd Barrage and Canals Construction agencies having contracted for a substantiel quantity.

## Class III.-Articles wholly, or mainly manufactured.

9. The aggregate value of the commodities classified under this category, which is easily the most important and accounted for no less than 70 per cent. of the total value of the import trade, amounted to Rs. 1798.29 lakhs, representing a decrease of 14 per cent. on the value of imports in. the previous year. The variations in the value and volume of some of the more prominent articles are dealt with in the following paragraphs.

Cotton yarns and manufactures.-As predicted in last year's report, the year $1925-26$ has been one of disappointment to dealers in cotton goods. Several factors contributed to bring about this unsatisfactory position. The large stocks of high-priced piecegoods remaining in hand at the close of the previous year, coupled with the marked decline in Manchester prices which occurred at the beginning of the year under review resulted in heavy losses being incurred. The position was further aggravated by the disastrous speculations of several piece-goods merchants in the sugar trade. The progressive fall in the Manchester market created a feeling of uncertainty as to the future level of prices. In consequence there was a disposition to buy cautiously, especially as the money-market was tight and the financial condition of the merchants poor. Even the small volume of business done proved unremunerative, especially in the first half of the year. It is, however, gratifying to record that the judicious buying in the beginning of the year was advantageous in the end, the accumulated stocks moved slowly into consumption and matters reached a turning point in December: Subsequently some profitable business is reported to have been done. Stocks of almost all descriptions of piece-goods are now said to be low, and the shortage is particularly marked in the case of fancies, the Delhi and Amritsar markets having purchased all their requirements from Karachi and Bombay. There is therefore a feeling that in view of the comparatively small •stocks of piece-goods and also of the lower prices now prevailing, both for raw cotton and manufactured goods, there is every probability, other conditions being favourable, of an appreciably increased volume of trade in the current year: In fact much forward business is reported to have already L (Iv) $156-3$
(Cotton manufactures).
been secured. 'The following table shows the quantity and value of cotton twist and yarn and other manufactures during the past two years and the pre-war year 1913-14:-

Table No. 9.

Cotton twist and yarn.-Imports of cotton twist and yarn amounted to 828,841 lbs. valued at Rs. in 44 lakhs and were short of those in the previous year by $392,812 \mathrm{lbs}$. or $3^{2}$ per cent. in quantity and by Rs. 9.66 lakhs or 46 per cent. in value. Large stocks held in the previous year and a smaller demand by the Indian mills due to the depressed condition of the trade account for the decrease. White yarns, which came solely from the United Kingdom, declined from ${ }^{151,984} \mathrm{lbs}$. valued at Rs. 294 lakhs to $4^{2,084}$ lbs. valued at Rs. $63,09 \mathrm{o}$. Under coloured yarns, both the important counts, viz., nos. 31 to 40 and 26 to 30 suffered a setback, the quantity of the former decreasing from $805,087 \mathrm{lbs}$ to 534.699 lbs . and that of the latter from $189,133 \mathrm{lbs}$. to $134,526 \mathrm{lbs}$. mainly as a result of smaller receipts from the United Kingdom. Purchases of grey yarns, on the other hand, expanded from 33,860 lbs. in 1924-25 to $100,85^{1}$ lbs. in $1925-26$, chiefly under counts nos. 31 to 40 from Japan. That country sent $88,35^{1} \mathrm{lbs}$. of this
quality valued at Rs. 1.05 lakhs against only $.15,200 \mathrm{lbs}$. valued at Rs. 20,930 in the previous year.

Piece-goods.-As compared with the year 1924-25, imports. of cotton piece-goods declined by 23 per cent. in volume and by 32 per cent. in value, the higher percentage of decrease in the value being due to lower prices. As compared with the pre-war year, the quantity showed a diminution of nearly 40 per cent., but the value rose by 20 per cent. owing to the present relatively high level of prices. All the three sub-divisions of piece-goods, viz., grey, white and coloured suffered a set-back during the year. The following statement shows in a comparative form the imports of some of the important descriptions of these sub-divisions :-

| Description. | Quantity. |  | Value, |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1924.25. | 1925-26 | 1924-25. | 1925-26. |

Grey goods.-Grey goods recorded a shortage of 5,062,698 yards or 18 per cent. in yardage and of Rs. 27.39 lakhs or 26 per cent. in value which was mainly due to smaller purchases from the United Kingdom. Japan was again the chief supplier, and shipments from that country increased by $1,370,020$ yards, but their

Foreign Imports
value "contracted slightly by Rs. 90,750. The lower cost of production of Japanese cloth has made it possible for Japanese manufacturers to compete more successfully with Lancashire and Indian made goods. The competition with the former was particularly marked in sales of longcloth and shirtings, which is evident from the fact that while the value of Japanese longcloth and shirtings rose from Rs. 3770 lakhs to Rs. $39^{\circ} 09$ lakhs, the value of the British supplies declined considerably from Rs. 36.05 lakhs to Rs. $17 \% 7$ lakhs. As regards this competition with Indian cloth, some relief to the indigenous industry must result from the recent abolition of the excise duty hitherto levied on Indian manufactures. Of the total quantity of drills and jeans 79 per cent. came from Japan and 21 per cent. from America, supplies by the latter consisting of pepperill drills.

White goods.-White imports were, as usual, mainly British. The quantity recorded a deficit to the extent of $38,131,963$ yards or 20 per cent. and the value of Rs. 186.2 I lakbs or 28 per cent.

Coloured goods.-The decrease under this head is particularly striking, the yardage having contracted by no less than $30,586,850$ or nearly 30 per cent. and the value by Rs. 189.16 lakhs or 39 per cent, as a result of reduced purchases from the United Kingdom. The specially heavy reduction in the trade in these goods is explained by the fact that the upcountry people who formerly used coloured goods are now taking to white fancy cloth. It is significant to note that Japan and Italy increased their transactions in coloured goods by Rs. 6 lakhs and Rs. $2 \cdot 58$ lakhs, respectively.

The following statement gives the average prices of a few selected varieties during the year :-

The above statement gives an idea of the low level of prices of cotton piece-goods prevailing during the year. It will be noticed that the prices of all the principal varieties slumped considetably.

Woollen goods.-As a result of a considerable reduction in prices in the exporting countries, imports of woollen goods exhibited a remarkable improvement. The quantity of yarn and knitting. zoool increased by $139,706 \mathrm{lbs}$. to $386,629 \mathrm{lbs}$. and the value by Rs. 4.06 lakhs to Rs. $14^{\circ} 7^{6}$ lakhs. A brisk demand from Amritsar, the chief consuming market, gave an impetus to the trade, the principal amounts being received from Germany ( $208,451 \mathrm{lbs}$. ), the United Kingdom ( 97, , 54 lls .), Poland ( 32,657 lbs.) and France ( 30,969 lbs). The trade in woollen piece-goods was also equally brisk. Imports which amounted to $3,77 \mathrm{o}, 168$ yards valued at Rs. 67.45 lakhs showed an excess of $1,248,717$ yards and Rs. 16.06 lakhs over the imports in the previous year. The increase occurred chiefly in purchases from Belgipm and France, the value of their goods rising from Rs. 6.97 lakhs to Rs. 16.33 lakhs and from Rs. 16.71 lakhs to Rs. 23.24 lakhs, respectively. The، value of supplies from the United Kingdom, on the other hand, contracted by Rs. 2.20 lakhs to Rs. 1741 lakhs. British manufacturers have had a very unsatisfactory year and owing to the slump in prices, business was mostly done at a very small margin of profit. The value of woollen carpets and rugs imported during the year, viz., Rs. 6.73 lakhs was double that in the previous year, the improvement being noticeable chiefly in supplies from the United Kingdom and Italy.

Silk.-Imports of silk yarn and manufactures were valued at Rs. $4^{\circ} 75$ lakhs, showing a slight decrease of Rs. 30,083 which was due to smaller arrivals of silk piece-goods from Hongkong and China.

Metals and metal manufactures.-The following table shows the quantities and value of the different descriptions of metals and manufactures of metal during the past two years:-

Table No. 10.

Table No. 1o-concld.

Iron and Steel.-A keen competition among the exporting countries and a further reduction in prices were the salient features in the trade in iron and steel during the year under report. As regards the local market, the heavy imports made in the previous year had been absorbed and the market opened with comparatively low stocks. An increased demand to meet the requirements of public and private constructional works which were taken in hand during the year both here and upcountry led to a further expansion in imports, the volume increasing by 5.5 J 9 tons or 6 per cent. and the value by Rs. $1 / 17$ lakhs or 1 per cent. The relatively lower iricrease in the value was due to a reduction in prices. It is interesting to note here that out of the total quantity of iron and steel imported, viz. 96,836 tons, no less than 79,594 tons or 82 per cent. represented descriptions which paid protective rates of import duty. The following table compares the share of each country in the total mports of iron and steel for the past two years :-

Table No. Ir.

|  |  |  |  |  |  | 0\%\% | 1,83,04,718 | 100\% |

An interesting feature of the figures given in the above table is that both the volume and value of imports from the United Kingdom were practically on the same level as in the previous year and that no change occurred in the percentage share of the total trade. Despite their heavy reductions in prices British manufacturers were unable to make any headway against the severe competition in foreign markets. Belgium again supplied the largest quantity, viz., 50,420 tons and raised its share from 51 to $5^{2}$ per cent. Supplies from the United States of America were double those in the previous year and mainly consisted of tin plates for the manufacture of tins for kerosene oil. German steel production was however on the downward grade throughout the year, a fact, which accounted for her shipments contracting from 10,776 tons to 9,385 tons and her share from 13 to 9 per cent.

Other Metals.-Imports of copper showed an improvement of 4,533 cwt. in quantity and Rs. $2 \cdot 19$ lakhs in value. The increase occurred solely in receipts of sheets from Germany. Lower prices and a brisk demand especially from the Punjab and Afghanistan, stimulated imports. British sheets, however, recorded a decline, imports from the United Kingdom which totalled 8,373 cwt. valued at Rs. 5.29 lakhs last year being reduced to the low figure of 597 cwt. valued at Rs. 36,782 . The decrease under brass was due to reduced purchases of mixed and yellow metal for sheathing from the United Kingdom, whence $6,053 \mathrm{cwt}$. valued at Rs. 3.25 lakhs of that metal were imported as against $10,203 \mathrm{cwt}$ valued at Rs. 5.66 lakhs in 1924-25. Large quantities remaining unsold from the previous year's stock and a poor upcountry demand caused the diminution.

Machinery of all kinds including belting for machinery.--With the growing activity in the industrial concerns, both in the Province and the Punjab, imports of machinery expanded further by Rs. $3^{6} 54$ lakhs or $3^{\circ}$ per cent. to Rs. $15^{\circ}$ ol lakhs. The principal types of machinery imported and the statistics with regard to each for the past two years are shown in the following statement:-

The expansion under prime-movers was noticeable both in imports of oil and steam-engines, other than locomotives. No less than 700 oil-engines, mainly British, valued at Rs. 1793 lakhs arrived during the year as against $5^{81}$ I valued at Rs. 1738 lakhs. As in the previous year, most of these engines consisted of cheap second-hand rebuilt engines. The demand for oil-engines is constantly on the increase, the small industrialist in particular having apparently realized that the oil-engine is the cheapest power producer. The value of electrical machinery rose by Rs. 718 lakhs to Rs. $19{ }^{\prime} 49$ lakhs. The increase is explained by the fact that advantage is now being taken of the many new electrical concerns recently started in the Punjab and the United Provinces by small factories which receive electrical energy at a small cost. A substantial increase also took place under boilers, the vaiue having. advanced by Rs. 593 lakhs to Rs. 8.79 lakhs. The United Kingdom and Germany were the chief suppliers, the value of exports by the former country being Rs. 6.09 lakhs and by the latter Rs. 195 lakhs. The marked increase of Rs. 6.36 lakhs or 64 per cent. under mining machinery was noticeable in shipments from the United States of America, which sent some Rs. 13 lakhs worth of this machinery againt Rs. 7 lakhs last year. The large number of mechanical dragline excavators imported for the Sukkur Barrage and the Sutlej-valley Projects mainly accounted for the expansion. The increase of sogi in the number of sewing machines was due to larger arrivals of German machines, the figures for the past two years being 6765 and 8942 machines, respectively. These machines are beccoming more popular in the market on account of their cheapness. The number of British machines, on the other hand, decreased from 23,091 to 22,011.

Railway plant and rolling stock.-The total value of imports under this head amounted to Rs. 33.45 lakhs, an increase of Rs. 392 lakhs. Large imports by the Jodhpur Bickaner Railway of materials for construction from the United Kingdom mainly accounted for the improvement. Imports of carriages and wagons and parts thereof which were valued at Rs. 16.86 lakhs showed practically no variation from the corresponding figures of the previous year, the United Kingdom being the sole supplier. The value of locomotive engines contracted by Rs. I'27 lakhs to Rs. 11.5I lakhs to which the United Kingdom contributed Rs. 7.45 lakhs and the United States of America Rs 4.06 lakhs as against Rs. 4.74 lakhs and Rs. 8.02 lakhs, respectively. Rails, chairs and fish plates of iron or steel intended for railways which were formerly classified under the head 'railway plant' are now included under ' manufactures of iron or steel ${ }^{\text {? }}$.

Cutlery, hardware, implements and instruments (excluding electrical instruments and apparatus).-The
aggregate value of imports under this head increased by Rs. 127 lakhs to Rs. $61 \cdot 78$ lakhs. Of the principal articles under this group, builders' hardware recorded a total value of Rs. 598 lakhs which exceeded the last year's imports by Rs. $\mathbf{7 2 , 2}^{2,2}$. It is significant to note that Germany on account of its low prices was able to compéte successfully with Sweden which was hitherto the chief supplier The value of German imports which totalled Rs. 2.53 lakhs showed a remarkable expansion of no less than 140 per cent., while Swedish supplies declined by 42 per cent. to Rs. I 49 lakhs. The high level recorded in the value of imports of cutlery in the previous year was reduced by Rs. I'og lakhs to Rs. 6.58 lakhs, the decrease being noticeable in receipts from both Germany and the United Kingdom. The position as regards metal lamps was also almost the same, the value which in 1924-25 had reached the high figure of Rs. 9.20 lakhs having contracted by about Rs. I lakh to Rs. 8.23 lakhs. The bulk of the supplies came from Germany (Rs. 3.37 lakhs) and the United States of America (Rs. $3^{\circ} 92$ lakhs).

Chemicals, drugs, and medicines.-The total value, vis., Rs. $33^{.24}$ lakhs of articles included under this group fell short of that in the previous year by Rs. 2.32 lakhs or 7 per cent. The supplies obtained were mainly from the United Kingdom which holds its own against continental competition in imports of heavy chemicals: The decrease occurred chiefly in receipts of alum (-Rs. 88,173), soda bicarbonate (-Rs. 73,537), caustic soda (-Rs. $1 \cdot 23$ lakhs) and soda ash and crystals (-Rs. 53,5!3) and was ascribed to overstocked markets.

Vehicles (excluding locomotives, \&c., for railways).The import trade of the port in vehicles has been making very rapid strides. The value recorded, viz., Rs. 76.16 lakhs was higher than in any of the previous years, excepting 1920-2I, when it was Rs. 122.49 lakhs. The record figure in 1920-21 was however due to high prices prevailing at the time. The number of the principal classes of vehicles imported during the past two years is shown in the following statement :-

Motor 'cars, the principal item under this head, exhibited a remarkable expansion, their number having advanced by no less than 1,134 or ${ }_{152}{ }^{2}$ per cent. to ${ }^{1}, 878$ and the value by Rs. 21.26 lakhs or 111 per cent. to Rs. $40 \% 43$ lakhs. Lower prices and a brisk demand from the Punjab for passenger traffic stimulated imports. The following statement shows the number and value of motor cars imported during the past two years from the principal sources of supply :-

It will be seen that Canada sent more than three times as many motor cars as in the previous year, while imports from the United Kingdom more than doubled. The number of American cars was also nearly twice as many as in the previous year. Italy which supplied only 2 cars last year sent 89 during the year under report. The number of motor omnibuses, vans and lorries also rose from 120 to 325 and their value from Rs. 3.36 lakhs to Rs. 7.34 lakhs. As in the case of motor cars, lower prices and a good demand from the Punjab for goods and passenger traffic led to the improvement. Of these imports 170 came from the United States of America, 120 from Canada and 19 from the United Kingdom. The expansion under cycles was also equally striking, the total number imported, viz., 15,632 having exceeded the imports of last year by 60 per cent. The value, however, advanced by 23 . per cent. only. A feature during the year was the introduction of cheap English cycles sent out unassembled in packing which costs much less to ship and to import than the packing of assembled cycles. These unassembled English machines which were as cheap as the German article, were much preferred by the public on account of their durability, and no less than 15,135 cycles were imported
during the year as against 8,698 last year. The number of German machines, on the other hand, declined from i,026 to 474.

Other articles.-The total value of apparel which amounted to Rs. 2774 lakhs showed an improvement of Rs. I 66 lakhs chiefly owing to larger imports of boots and shoes from the United Kingdom and gold and silver thread from Germany. Imports of second-hand clothing which recorded a considerable advance last year fell back in value from Rs. 11.32 lakhs to Rs. 9.29 lakhs as a result of reduced arrivals from the United States of America. The contraction of Rs. $5 \cdot 43$ lakhs under dyes and colours was noticeable under. alizarine and aniline dyes and was due to large stocks remaining on hand from the previous year's imports. Imports of the former fell from $625,717 \mathrm{lbs}$. to only $82,116 \mathrm{lbs}$. in quantity and from Rs. 4.04 lakhs to Rs. 45,605 in value, and of the, total quantity received, Germany sent $77,63^{2} \mathrm{lbs}$. ( $-414,203 \mathrm{lbs}$.) and the United Kingdom 4,480 lbs. against none in the previous year. Imports of aniline dyes which amounted to 267,73 : lbs: valued at Rs. 4.84 lakhs were short of those of 1924.25 by $120,712 \mathrm{lbs}$. in quantity and Rs. 2.46 lakhs in value, the chief quantities having come from Germany ( 142,064 lbs.), the Netherlands ( 76,916 lbs.), Belgium ( $22,606 \mathrm{lbs}$.) and Switzerland ( $14,308 \mathrm{lbs}$ ). The value of paints, colours and painters' materials which totalled Rs. $110 \%$ lakhs was almost the same as that recorded in the previous year. Imports of glassware and 'earthenware rose by Rs. $1 \cdot 28$ lakhs to Rs. 19.62 lakhs. The improvement occurred in receipts of glass beads from Germany, bottles, other than soda water bottles from Sweden and porcelain from the United Kingdom. Purchases of sheet and plate glass, on the other hand, declined from Rs. 3.12 lakhs to Rs. $2^{2} 4^{8}$ lakhs. The contraction was noticeable in receipts from Belgium. A decrease to the extent of Rs. 354 lakhs occurred under the head paper, pasteboard and stationery, the value of which amounted to Rs. 29:26 lakhs. Among the principal descriptions, imports of newsprinting paper were valued at Rs. I'63 lakhs showing a decrease of Rs. 186 lakhs which is ascribed to reduced purchases from Germany. Smalier supplies from Germany also brough't about a fall in the imports of writing paper from Rs. $48 \mathrm{BI}_{\mathrm{I}}$ lakhs to Rs. 3.27 lakhs. The total value of old newspapers during the year, viz., Rs. 7.54 lakhs was about the same as that in the previous year, but American imports increased at the cost of British imports. This was due to lower prices quoted by American firms. Larger receipts of pneumatic motor covers from the United Kingdom, chiefly accounted for the expansion of Rs. 229 lakhs under xubber manufactures. The quantity of cement imported declined from ${ }^{2}, 713$ tons to 6,099 tons and its value from Rs. 495 lakhs to Rs. 370 lakhs. Increased consumption of Indian cement checked foreign imports.

| Foreigu | 1 | 128 |
| :---: | :---: | :---: |
| Imperts. |  |  |

Following a large decrease in the previous year, importations of matches rose by 347,883 gross of boxes to $1,3{ }^{14}, 761$ gross in quantity and by Rs. $3^{12}$ lakles to Rs. 14.30 lakhs in value. Imports of soap were valued at Rs. 1193 lakhs and showed a decrease of Rs. I'to lakhs chiefly ander toilet; soap from the United Kingdion.

## Class V:worstal articles not classified.

Ie. The tetal value of articles inported by post which last 'year showed a considerable expansion owing, to the transter of the assessment of parcels for Sind, Pumab, Baluchistan and the North-West Frontier Province from Bombay to this port, rose farther by R.s. 2.22 lakhs or 5 per cent. to Rs. $47 \% 9$ lakhs during the year ander report. The increase occurred chiefly in arrivals from the United Kingdom which were valued at Rs. 43.34 lakhs as against RS. 4.60 lakhs in 1924-25. The fuguke registered are exclusive of imports by pest of (1) jewellery, (2) precious stones, (3) gold and silver thread, (4) cigarettes and (5) cinematograph funtras which are classified under their appropriate heads in the general imports. The total number of parcels dealt with during the year increased from 11 亦,758 in $1924 \div 25$, $0.125,825$ in 192526 . Besides these, 38,089 letter parkets were assessed to duty as against $35,9 \mathrm{5} 5$ last year. The total amount of import duty realized on all articles imported by parcel post increased from Rs, $10,37,212$ to Rs. $19,73,693$ and that on artictes contained in lettier paekets from Rs. 45,996 to Rs, 47,47.

## EXPORTS.

## INDIAN PRODUCE AND MANUFACTURES.

11. Agricultural conditions.-As more than 80 per cent. of the total exports from this port consists of agricultural produce, it will be of interest to preface the detailed examination of the fluctuations in the value and volume of the more important commodities with a review of the climatic conditions and of the area and yield of the principal crops in Sind and the neighbouring provinces on which so much of the prosperity of trade depends.

The climatic conditions were on the whole less favourable than in the previous year. In Sind the rainfall was scanty, and partial famine conditions prevailed in the desert portion of the Thar Parkar district. The inundation of 1925 was only a moderate one. The river commenced to rise late and fell below the normal irrigating level earlier than usual. In the Punjab seasonable conditions at the outset facilitated sowings of the kharuf crops, but the disappearance of the monsoon in the middle of August had an injurious effect on the crops. Rabi sowings were assisted to a certain extent' by the moderate rainfall in October and November, but the subsequent failure of the winter rains and deficient supply of canal water reduced the yield considerably. The climatic conditions in the United Provinces were not more favourable.

In the following table the area and yield of the three most important crops, viz., wheat, rape and mustard seed and cotton, for the past two seasons are compared, the figures being taken from the agricultural returns furnished by the Directors of Agriculture, Bombay, the Punjab and the United Provinces. In the case of wheat and rapeseed which are rabi crops, the figures for the season 1924-25 are compared with those of 1923-24, as the produce exported in $1925-26$ relates mostly to the former season. In the case of cotton which is a kharit crop, exports relate to the

Foreign Exports.
season 1925-26, and therefore the crop figures for 1925-26 a,re compared with those of 1924.25 :-

Table No... 12.

These figures show that while there was an increase in the total area under wheat cultivatoon in the three Provinces, the yield on the whole was disappointing, especially in the Punjab and the United Provinces where the decrease was estimated at 26 and 8 per cent., respectively. The figures for the rape and mustard seed crops in Sind and the Punjab are more satisfactory, the total area under cultivation having increased by 176,000 acres and the yield • by 14,000 tons. This improvement was, however, more than negatived by the reduction in the yield in the United Provinces. In the case of the cotton crop, the area under cultivation in Sind and the United Provinces was reduced by in per cent. and 4 per cent. respectively, the decrease in the former case beíng due to the poor inundation. The area in the Punjab, on the other hand, increased by 11 per cent. Of the total area sown, viz., $2,900,000$ acres some $1,834,000$ acres were reported to be under Desi and $1,066,000$ acres under American cotton. The yield in Sind and the Punjab was below the level of the previous year by 4 and 6 per cent. respectively, but in the United Provinces it rose
slightly by 0,4 per cent. The total area and yield of these three crops $m$ the whole of India were as follows :-

| Crop. | Area acres. | Percentage of increase. | Yiẹld. | Percentage of increase or decrease. |
| :---: | :---: | :---: | :---: | :---: |
| Wheat ... ... | 31,773000 | +2 | Tons. $8,696,000$ | - 10 |
| Rape and mustard seed ...) | 6,376,000 | +3 | (1,173,000 | $+2$ |
| Cotton ... ... | 27,835,000 | + 4 | 6,051,000 | - I |

12. The following table gives the value of the export trade, including re-exports, under the five main classes for the last four years and the pre-war year:-

Table' No. 13.

Foreign Exports. (Food-grains and flour).

## Class I.-Food, Drink and Tobacco.

13. The marked decrease of Rs. 184562 lakhs, or 76 per cent., in the total value of articles included in this class was chiefly due, as will be seen from the detailed discussions which follow, to the decline in shipments of wheat, the leading commodity in the export trade, barley and gram.

Grain, Pulse and Flour.-After the great activity of the previous year, the export business in grain, pulse and flour suffered a considerable set-back. The aggregate shipments under this head dwindled from $1,671,075$ tons.in 1924-25 to the low figure of 324,712 tons or by 81 per cent: and the value from Rs. $2402 \cdot{ }^{2}$ lakhs to Rs. 555.63 lakhs or 77 per cent. The following statement compares the quantities of the different kinds of food-grains exported in $1925-26$ as compared with exports in ' 1924.25 and the pre-war year :-

Wheat.-After the complete recovery noted in the previous year when exports of wheat, amounting to $1,046,255$ tons valued at Rs. 161175 lakhs exceeded the corresponding figures of the pre-war year 19:14 by 17 per cent. in quantity and 65 per cent. in value, it is disappointing to record that shipments during the year under review were reduced to the low level of 163,094 tons valued at Rs. 269.63 lakhs. This heavy fall of nearly 84 per cent. in quantity and walue was due to several factors. During the year under report, the prices of Indian wheat ruled high as a result of a considerable reduction in stocks caused by the abnormal shipments in the previous year and a smaller outturn of the 1924.25 crop. The position in other countries was, on the other hand, quite the reverse. Crops in Europe, America (particularly Canada) and Australia were very good, and in consequence, the demand for highpriced Indian wheat ceased entirely. In fact the price offered for Indian wheat in the home market was much lower than that at
which it could be obtained in India. No export business was, therefore, possible, and shipments, which were made only in the first half of the year, consisted entirely of forward business done in December 1924 and January 1925 when bullish tendencies influenced the home market. The turning point came in February 1925 when the home market completely collapsed owing partly to the arrival of large Australian shipments in Europe at very low prices, and also because European crops were, without exception, very good. As regards local prices, the quotations for white wheat opened in April at Rs. $5^{-1} 5$ per maund as against Rs. $4-7$ in the corresponding period of the previous lyear. In the third week of the same month the figure rose to Rs. $6 \% 7$ and fluctuated between that and Rs. 6 until the middle of June. The market then showed a downward tendency, and the lowest price of the year, viz., Rs. 5-6 was touched in the first week of July and the first two weeks of October. In November another rise commenced, and the highest point of the year, viz., Rs, 6-12 was touched in the second week of December. In the succeeding months however there was a slight weakening in the position, and at the close of the year in -March, Rs. 6 was quoted.

The following 'statement shows the distribution of wheat exports for the past two years and the pre-war year: $\rightarrow$

Table No. $\mathbf{1 4}_{4}$.

L (rv) 156-5
(Food-grains and flour).
It will be noticed that of the total quantity exported during the the year, viz., 163,094 tons, shipments to European countries amounted to only 97,357 tons. The United Kingdom, our chief purchaser, took only 86,567 tons valued at Rs. 140.76 lakhs as against 741,096 tons valued at Rs. 1127.12 lakhs, a decrease of $654,5^{2} 9$ tons and Rs. 986.35 lakhs. Germany and the Netherlands which last year purchased 13,25 tons valued at Rs. $21 \cdot 35$ lakhs and 15,010 tons valued at Rs. 23.94 lakhs, respectively, took no wheat at all, while Belgium and France which purchased no less than Iti, IIf tons valued at Rs. $185 \cdot 43$ lakhs and 48,857 tons valued at Rs. 767 I lakhs in $\mathbf{1 9 2 4 - 2 5}$ bought only 7,275 tons valued at Rs. 12.35 lakhs and 3.515 tons 'valued at Rs. 591 lakhs respectively. Shipments to the Gulf Ports, however, showed an increase over those of the previous year. The total shipments of - wheat from India amounted 'to $21 \mathrm{I}, 637$ toms, to which Karachi contributed 77 per cent. as against 94 per cent. last year.

Other food-grains.-As will be seen from the figures given in the first statement in this paragraph, shipments of the other prominent food-grains were also considerably reduced. The most noticeable decrease occurred under shipments of barley, the total quantity exported being 353,589 tons less than in the previous year which created a record at 388,062 tons. The decline in the value of exports was even more marked-the figures for the past two years being Rs. $449^{\circ} 37$ lakhs and Rs. 46.13 lakhs respectively. This commodity was greatly in demand last year and high prices were paid, but during the year under report the crops in most European countries and America were good and the supply exceeded the demand. Nevertheless the total quantity exported, viz., 34,473 tons, represented 8i per cent. of the shipments from India, and the principal amounts went to the United Kingdom ( 17,245 tons), Germany ( $9,6_{32}$ tons), Belgium ( 1,414 tons) and Egypt ( 1,823 tonsi. The contraction in exports of gram was also equally striking, the figures recorded, viz., 24,021 tons and Rs. $32 \cdot 52$ lakhs, exhibiting a decrease of 96,900 tons and Rs. Io ${ }^{\circ} \mathrm{O} 3$ lakhs. The United Kingdom, the chief customer last year, reduced her requirements from 56,060 tons to only 99 tons, and supplies to Germany, the Netherlands and France fell away from $16,805,24,049$ and 14,315 tons to $1,190,3,349$ and 7,961 tons, respectively. As usual, Karachi was the largest exporter of gram, her share in the total shipments from India being 78 per cent. The position as regards exports of wheat four was not so discouraging. Following upon a substantial increase in the previous year, shipments registered a fall of 5.351 tons in quantity and Rs. 3.29 lakhs in value. Egypt, the chief consumer, took only 14,226 tons valued at Rs. 3 1.81 lakhs as against 26,50 I tons valued at Rs. $56 \cdot 38$ lakhs, but the
decrease was to a great extent set off by an increase in purchases by Aden ( $+1,364$ tons), Ceylon ( +733 tons), Mauritius ( $+1,880$ tons), Mesopotamia ( $+3,2$ Io tons) and Persia $(+2,516$ tons). Maize exports also dropped in quantity by 13,616 tons to 1,092 tons and by Rs. $143^{\circ}$ lakhs to Rs. $1 \cdot 14$ lakhs. The decrease occurred mainly in shipments to the United Kingdom. which took only 200 tons as against 10,036 tons last gear. Italy which has been regularly buying maize in recent years at this port made no purchases at all during the year under report. The only redeeming feature in the exports of food-grains was an expansion of 12,852 tons in quantity and Rs. $3^{\circ} 36$ lakhs in value under rice, the figures for the past two years being 32,296 tons valued at Rs. 61.43 lakhs and 45,148 tons valued at Rs. 91 79 lakhs, respectively. The improvement was due to a keen demand for boiled rice from Aden ( $+1,905$ tons), Bahrein Islands ( $+_{4,1} 79$ tons), Mesopotamia ( tilin $_{18}$ tons), Italian East Africa ( $t_{1,096 \text { tons }) \text {, Muscat ( }+4,192 \text { tons), Other }}$ Native States in Arabia ( $+4,702$ tons) and Persia ( 1 1;977 tons). Purchases of boiled rice by Ceylon and Mauritius, on the other hand, decreased by 5,115 tons and 2,537 tons, respectively.

## Class II.-Raw Materials and produce and articles mainly Unmanufactured.

14. The value of exports under class II aggregated Rs. $2,887 \cdot 14$ lakhs, showing an improvement of Rs. $115 \cdot 17$ lakhs or 4 per.cent. Variations in some of the important commodities included in this class are discussed below:-

Raw Cotton.-The following table shows how cotton exports were distributed during the past two years and the prewar year 1913-14:

Table No. 15

Shipments of cotton, which increased progressively from $3^{6,245}$ tons in 1921-22 to $1,19,504$ tons in 1924-25, a mounted in the year undet review to no less than $1 ; 79,679$ tons, a figure which enceeds the quantity shipped in 1913-14 by as much as 104,993 tons or 140 per cent. This notable expansion serves to emphasise the growing importance of Karachi as a cotton exporting port. The expansion was, as stated in last year's report, mainly due to the opening of a steamer service with Japan as a result of which large direct shipments are now made to that country instead of via. Bombay. Other favourable conditions obtaining at this port, especially the better shipping facilities, have also attracted more business, and some Indian firms of standing in Bombay have opened branches here. It is interesting to note that a good deal of Rajputana cotton which was formerly shipped via. Bombay now comes to Karachi for shipment. The value of shipments increased from Rs. $1860^{\circ} 3^{2}$ lakhs to Rs. $2210^{\circ} 95$ lakhs, or an increase of only 19 per cent. as compared with the expansion of $5^{\circ}$ per cent. in the volume of exports. This disparity in the percentage increase of the value and volume of business was due to a heavy drop in world prices in sympathy with the American market. Notwithstanding this heavy reduction, raw cotton contributed as much as $\sigma_{3}$ per cent. to the total value of the export trade of the port during the year. It is a matter for regret, however, that holders of cotton who had obtained high prices last year would not sell it early in the seasorrat the lower rates then ruling in the hope that prices would again recover; but these anticipations were never realized, and the difficulty of financing heavy stocks at last compelled holders to part with them when prices were at a still lower level, with the result that a great deal of money was lost to the country. Turning to the share of the principal countries in the export trade, the figures in the table at the head of this paragraph show the phenomenal strides made by Japan. That country, which purchased only $2,45^{2}$ tons in the pre-war year, took 26,675 tons valued at Rs. $4^{18.37}$ lakhs in 1924-25, and shipments during the year under report were no less than 57,637 tons valued at Rs. 665 '93 lakhs, showing an increase of 116 per cent. in quantity and 59 per cent. in value over last year's figures which were also a record. Italy, our biggest purchaser last year, came next with a total purchase of 34,255 tons which was about the same as last year. It is understood that Indian cotton is largely used in that country for the manufacture of cheap coloured cloth. China, which in former years took yarn from Bombay, has now to some extent been purchasing raw cotton instead. Shipments to that country, which totalled ${ }_{1} 7,775$ tons, were double those in the previous year. The United Kingdom and Germany also increased their purchases from 12,100 tons and 14,843 tons to $17,55^{2}$ tons and 22,807 tons, respectively.

Wool, raw.-In last year's report it was stated that traders in this article enjoyed prosperous year: the prosperity was, however, short-lived. Heavy purchases were made by dealers in the United Kingdom in that year in anticipation of a shortage in future supplies and very high prices were paid, but it proved difficult to pass the high-priced goods into consumption, except at considerable losses. In consequence, the demand during the year under review was greatly curtailed and values slumped appreciably. The prices realised at the sales in the first half of the year were tolerably good, but those held in the second half resulted in heavy losses. Shipments during the year, which amounted to $23,705,301 \mathrm{lbs}$. valued at Rs. 202.68 lakhs showed a decrease of 15 per cent. in quantity. and of 16 per cent. in value... The United Kingdom, the chief purchaser, absorbed only $20,641,806$ lbs. as compared. with $25,543,739$ lbs. Shipments to the United States of America, on the other hand, increased by $830,37^{2} \mathrm{lbs}$. to $2,852,593 \mathrm{lbs}$.

Seeds.-The export trade in seeds again suffered a set-back to the extent of 33 per cent. in quantity and of 43 per cent. in value which occurred almost wholly under rapeseed. The following table compares the volume and value of exports of the different kinds of seeds to the principal countries during the past two years and the pre-war year :-

Table No. 16.

#### Abstract

Foreign Exports. $\quad 3^{8}$ (Seeds).

Rapeseed. - Exports of rapeseed, the chief item in the oilseed trade, again contracted considerably by 115,658 tons or 58 per cent. in quantity and by Rs. 262.42 lakhs or 57 per cent. in value. All the principal countries took smaller quantities. Shipments of this oilseed generally form part of two seasons. Those in the first nine months of the year related to the season 1924-25 and those in the last quarter to the toria crop of the Punjab for the season 1925-26. The former was a good season, but the latter was poor, and only a small export business was done. It is noteworthy that while the quantity exported in the last quarter of $1924-25$ totalled 69,455 tons, that for the corresponding period in the year $1925-26$ was no more than 20,161 tons. As in the previous year, Italy was the largest purchaser of rapeseed to the extent of 37,504 tons which represented 45 per cent. of the total shipments during the year and a decrease of 32,058 tons as compared with the previous year's figures. Supplies to the United Kingdom were also reduced considerably by ${ }^{1} 5,652$ tons to 19,045 tons. The share of Karachi in the total shipments of rapeseed from the whole of India decreased slightly from 76 to 74 per cent.

Other seeds.-Among other seeds, the development in the export trade in cotton seed is worthy of note. During the year under report there was a keen demand from the United Kingdom, and shipments reached the high figure of 71,621 tons valued atRs. 82.04 lakhs, showing an increase of 108 per cent. in quantity and 106 per cent. in value as compared with the previous year.

It is also satisfactory to note that the export trade in sesamum, which declined considerably, in the previous two years, showed a marked recovery, the quantity shipped, viz., 3094 tons having exceeded the previous year's shipments by 2,525 tons, and its value, viz., Rs. 982 lakhs by Rs. 8 lakhs. Egypt, the Netherlands and Italy were the principal purchasers. The decline of 1,816 tons in shipments of castor seed was solely due to Italy and France having made no purchases as against 1,310 tons and 453 tons, respectively last year. There were no exports of linseed during the year under report, shipments which were made in previous years through this port having apparently gone via Bombay.

Hides and Skins, raw - The following table compares the exports of raw hides and skins to the different countries during the past two years.

Table No. 17.

| Articles |  |  | Exports during |  |  |  |

| .n- - .- | . - |  | - |  |  |  |

Raw hides.-Shipments of raw hides maintained the level attained in the previous year, but the business done did not prove as remunerative as in that year, for while the total quantity rose from 1,975 to 2,185 tons, the value decreased by Rs. 70,019 to Rs. 24.67 lakhs. The United Kingdom, Spain and Italy purchased larger quantities, Germany, on the other hand, reducing her transactions considerably from 664 tons to 319 tons in quantity and from Rs. 10 or lakhs to Rs, 4.54 lakhs in value. Owing to the high prices of Indian hides, the German tanners turned their attention to South American and African markets, where rates were appreciably lower than the quotations for the Indian product.

Raw skins.-A further improvement was recorded in the business done in this line during the year under review, the quantity exported having advanced by 34 per cent. and the value by 33 per cent. Shipments of goat sloins which totalled 4,982 tons valued at Rs. 69.75 lakhs showed an excess of 1,474 tons and Rs 20.02 lakhs over those in $1924-25$, the United States of America being the principal consumer as usual. The United Kingdom, on the other hand, reduced her demand from 167 tons valued at Rs. 2,40 lakhs to only 44 tons valued at Rs. 88,935 owing to the diffioulty of placing the manufactured article at satisfactory rates in the market. As a result of a restricted demand from the United States of America, shipments of sheep skins declined by 141 tons to 323 tons in quantity and by Rs. $1 \times 77$ lakhs to Rs. 3.85 lakhs in value.

Miscellaneous.-Among articles of lesser importance, shipmen+r of raw silk declined in quantity by $73,345 \mathrm{lbs}$. to 224,683 . lbs. and in value by Rs. $1 * 45$ lakhs to Rs. 16.78 lakhs as a result of smaller purchases by the United Kingdom. Under metallic ores, exports of chromite (chrome iron ore), a product of Baluchistan rose slightly by ' $\mathrm{i}, 743$ tons and Rs. $\mathbf{5}^{\mathbf{2}, 290}$ to $\mathbf{2 3 , 2 0 0}$ tons valued at Rs. 6.96 lakhs, the United Kingdom, Sweden, Belgium, France and the Netherlands being the principal purchasers. The value of manures advanced by Rs. $8.55^{2}$ lakhs to Rs. 33.29 lakhs, shipments chiefly comprising animal bones and bonemeal. The former were taken in larger quantities by Belgium and Germany and the latter by Ceylon and the United States of America.

## Class III.--Articles wholly or mainly manufactured.

15. The aggregate value of the articles included under this class declined from Rs, 3 I 33 lakhs to Rs. 28 lakhs or by in per cent. The decrease occurred mainly in exports of tanned or dressed skins, the value of which fell away from Rs. 12.02 lakhs to Rs, 8.8 I lakhs as a result of a reduced demand for goat skins
by the United Kingdom. Among other important articles, the value of cotton goods, mostly exported to Persian Gulf ports, was maintained at Rs. 298 lakhs.

## Foreign merchandise re-exported.

16. The total value of the articles of foreign merchandise re-exported to foreign countries declined from Rs. $241 / 24$ lakhs to Rs. 186.44 lakhs or by 23 per cent. Class I.-Food, Drink and Tobacco' which contributed Rs. 22'2I lakhs to this value showed a falling off of Rs. 1162 lakhs or 34 per cent. The decrease occurred chiefly under sugar, the value of which contracted by Rs. 10.85 lakhs or 39 per cent. to Rs. 17.25 lakhs due partly to reduced shipments to Gulf Ports and partly to a slump in prices during the year. The value of dried fruits re-exported was Rs. 4.23 lakhs, a decrease of Rs, 62,823 . The value of articles included under Class II.-Raw materials and articles mainly unmanufactured receded by Rs. 28.69 lakhs or 30 per cent. to Rs. 68.54 lakhs. The decrease was chiefly noticeable in shipments of raw wool, which decreased considerably by 1,809,089 lbs. to $7.659,858 \mathrm{lbs}$. in quantity and by Rs. 19.08 lakhs to Rs $63^{\circ} 50$ lakhs in value As explained in the case of Indian wool, a reduced demand and low prices in the United Kingdom market restricted exports. There was also a decrease of Rs. 1451 Iakhs or 13 per cent. in the value, viz, Rs. 95.67 lakhs recorded under Class III.-Articles wholly or mainly manufactured. Exports of woollen manufactures which contributed Rs. 61.88 lakhs to this value exhibited a contraction of Rs. 426 lakhs. Shipments consisted chiefly of woollen carpets, and the diminution was due to smalier purchases by the United Kingdom and European Turkey. The value of exports of cotton piece-goods fell by Rs. 3.33 lakhs to Rs. Io'g lakhs as a result of reduced shipments of coloured piece-goods to Persia. The re-export trade in tanned slins consisted chiefly of shipments of fur skins to the United Kingdom. The total value of these skins decreased by. Rs. 6.44 lakhs to Rs. 1045 lakhs. As in the previous year, a consignment of 14 cases containing ${ }^{1,476} \mathrm{lbs}$. of Persian opium valued at Rs. $19,000^{\prime \prime \prime}$ which was brought by land by the Nushki-Sistan Route was re-exported to Bushire.

## III-Coasting Trade.

17. The aggregate value of the coasting trade of the Province of Sind amounted to Rs. 1,82060 lakhs, showing a decrease of Rs. $3^{15} 5^{\circ}$ lakhs or ${ }^{1} 5$ per cent. as compared with the previous year.

L (iv) $156 \times 6$

## ChiefPort-KKarachi.

18. The following table shows the aggregate value of the coasting trade of the port of Karachi including Government stores and treasure, for the last four years and the pre-war year.

## IMPORTS.

20. Indian merchandise.-The value of Indian produce and manufactures imported into Karachi from coast ports decreased from Rs. $1,088.53$ lakhs to Rs. 1,053'95 lakhs. The articles

## Trade.

responsible for the fall were chiefly cotton twist and yarn (-Rs, 6.06 lakhs), grey piece-goods (-Rs. 5067 lakhs) and coloured piece-goods (-Rs. 45.59 lakhs) from Bombay and gunny bags (-Rs. 14.39 lakhs) from Bengal and Bombay. An increase was, on the other hand, noticeable in receipts of coal ( $+\mathrm{Rs} .7^{\circ} 27$ lakhs) from Bengal, benzine and petrol ( + Rs. 26.61 lakhs), kerosene ( + Rs. 22.33 lakhs) and teak wood ( + Rs. 2.41 lakhs) from Burma and copra ( + Rs. 16.41 lakhs) from Madras and State of Travancore.

Cotton piece-goods.-The table below gives the trade in Indian piece-goods imported coastwise during the past four years and the pre-war year under each of the three headings, grey, white and coloured.

Table No. 20.

| Years. |  |  | Grey. |  | White. |  | Coloured. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Foreign merchandise.-The total value of imports of foreign merchandise into Karachi from coast ports fell by Rs. 12:81 lakhs to Rs. 96.58 lakhs, the decrease being due chiefly to smaller arrivals of grey piece-goods from Bombay.

Cotton piece-goods.-The following table shows the imports of foreign piece-goods coastwise for the past four years and the pre-war year under each of the three headings, grey, white and coloured :--

## Table No. 2 II .

|  | $\begin{gathered} \text { Years. } \\ \hline \end{gathered}$ | Grey Yards. |  | White. |  | Coloured. |  |

## EXPORTS.

21. Indian produce and manufactures.-The value of Indian produce and manufactures exported from Karachi to coast ports decreased from Rs. 808.98 lakhs to Rs. 534.83 lakhs as a result of reduced shipments of raw cotton (-Rs. $227^{\prime \prime} 4$ lakhs) mainly to Bombay, rice (-Rs. $65 \cdot 22$ lakhs) to Madras and Kathiawar, Jowari (一Rs. 22.18 lakhs) to Madras and Cutch, and gram (-Rs. I4 lakhs) to Madras. An increase, on the other hand, occurred in exports of wheat ( + Rs. 27 lakhs) to Bombay, wheat flour ( + Rs. 14 lakhs) to Madras and sesamum seed ( + Rs. 5 lakhs) to Madras and Bombay. The following table shows the exports of cotton to Bombay during the past four years and the pre-war year.

Table No. 22.

| Years. |  |  | Quantity. | Value. |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Tons. | Rs, |
| 1913-14 | $\ldots$ | . | 12,002 | 93,09,940 |
| 1922-23 | ... | ... | 31,453 | 3,90,32,065 |
| 1923-24 | ... | ... | 30,578 | 5,61,05,439 |
| 1924-25 | ... |  | 27,396 | 4,28,57,558 |
| 1925-26 | $\cdots$ |  | 16,152 | 1,92,72,487 |

Foreign merchandise.-The value of exports of foreign merchandise from Karachi to coast ports rose by Rs. 9 lakhs to Rs. 105.57 lakhs. The increase occurred mainly in exports of kerosene oil ( + Rs. 12 lakhs).

## SUBORDINATE PORTS.

22. Keti Bandar and Sirganda.-The total value of the entire trade of these ports which is confined to trade with coast ports again decreased from Rs. 17772 lakhs to Rs. 14.25 lakhs to which Keti Bander contributed 57 per cent. and Sirganda 43 per cent. Rice is the chief produce of both these ports. During the year under report Keti Bandar exported 2,013 tons of rice to Cutch, 376 tons to Madras, 90 tons to Goa and 981 tons to Karachi, while Sirganda sent 3,813 tons to Cutch exclusively.

## IV.-Miscellaneous.

23. Shipping.-The table below gives the number of vessels entered at and cleared from the poits of the Province of Sind during the past two years :-

Foreign trade.-The total number of vessels, steam and sailing, engaged in the foreign trade declined from 1,443 to 1,129 and the total tonnage from $2,895,073$ to $1,850,089$ tons. The decrease was due entirely to the reduction in the number of steam vessels from $:, 007$ to 636 and the consequent drop in the tonnage by $1,048,666$ tons to $1,805,077$ tons. The average tonnage per steamer improved slightly from 2,834 tons to $2,8,38$ tons. The sailing vessels were 'native craft' trading to the Persian Gulf ports, Aden, Ceylon, East Africa and Zanzibar. The following figures show the number of steamers of each nationality that entered the
port of Karachi during the year 1925-26 as compared with 1924-25:-

Table No. 24.

It will be seen from the above table that only 516 steamers flying the British flag called at the port as against $\sigma_{39}$ in the previous year, the decrease of 123 vessels being due mainly to the slump in the export trade in wheat. The considerable falling off in shipments of wheat and rape-seed also accounted for the decline in the number of Italian ships from 71 to 49 . There was, on the other hand, an increase in the number of American vessels from 11 to 21 which was mainly due to an expansion in the import trade with the United States of America and partly to larger receipts of kerosene oil. It is noteworthy that II Japanese vessels visited the port as against 3 last year, the larger number being required to deal with the heavy exports of cotton.

Freight-Owing to the general trade depression freights were at a comparatively low level during the year. The rates for wheat and rape-seed, which stood at 215 . 6d. and 205 . in April, declined gradually from the second week of May and reached $16 s$. and 15 s., respectively, in July. A rise, however, soon lollowed and the succeeding three months witnessed a recovery to the levels prevailing in April. Another fall began in December, however, and easier rates prevailed in the last four months of the year, the quotations on the 3 Ist March being ${ }^{15} 5.6 \mathrm{~d}$. for wheat and 14 s .6 d . for rape-seed.
24. Exchange.-In the year under review, during which the comparative steadiness of the rupee was a marked feature, its sterling value appreciated by about $1 d$. on the average of the
preceding year. At the beginning of the year is. $51_{i 6}^{13} d$. was quoted for demand drafts, and with slight variations this rate was maintained until the end of June, after which there was a rise to is. $6 \frac{1}{32} d$. It remained at that figure, with occasional small fluctuations, up to the last week of March $1: 26$ when there was a fall to $1 s .5 \frac{31}{3} d$. , and the closing rate was $1 s .5 \frac{1}{6} \frac{8}{6} d$.
25. Revenue. -The following table shows the total collections for the province on account of import' and export duty and refunds therefrom and the duty on imported salt separately for the last four years and the pre-war year:-

Table No. 25.

| Import Duty on SaltGovernment | , | ... | ... | 105 | ... |

The total Customs duty collected during the year was Rs. $547^{\circ} 47$ lakhs, a decrease of Rs. 9 lakhs or 2 per cent. Recoveries on account of import duty 'on private merchandise
receded by Rs. $20^{\circ} 02$ lakhs or 4 per cent. to Rs. 509.80 lakhs. The chief decreases occurred under sugar and cotton piece-goods, the collections on these two leading articles having declined by Rs.
 lakhs, respectively. An increase, on the other hand, was noticeable in realizations on liquors, Rs. 43.53 lakhs ( + Rs. 5 'is lakhs), tobacco, Rs. 20.37 lakhs ( + Rs. 1.42 lakhs), kerosene, Rs. 2150 lakhs ( + Rs. 4.44 lakhs), matches, Rs. 1741 lakhs ( + Rs. 2.31 lakhs), iron and steel, including special protective duties, Rs. 3498 lakhs ( + Rs. 782 lakhs), woollen yarn, Rs. 1444 lakhs ( + Rs. 4 lakhs), and motor cars, Rs. 13.12 lakhs ( + Rs. $6 \circ 7$ lakhs). The total amount of import duty recovered under the Steel Industry (Protection) Act was Rs. $3^{1 \circ}{ }^{\circ} 3$ lakhs as against Rs. $19^{\circ} 23$ lakhs recovered in nine and a half months of the previous year. The total amount of revenue derived from protective duties on paper was Rs. 98,97 1. The import duty on Government Stores was Rs. 28.79 lakhs as against Rs. 19.63 lakhs. The total collections on account of export duty advanced by Rs. I 85 lakhs to Rs. 8.87 lakhs, the increase being due to larger receipts under raw hides and skins ( + Rs s'53 lakhs).
26. Changes in the rates of duty.-During the year under report, the following important changes were introduced in the rates of import duty :-

| Afrticles. | Old rate. | Revised rate. |
| :---: | :---: | :---: |
| Motor spirit | Two annas and six pies per Imperial gallon plus six annas per gallon under Act II of 1917 as amended by Act III of $\mathbf{1 9 1 9 .}$ | Four annas per Imperial gallon. (With effect from ist April 1925. |
| Sugar ... | 25 per cent, ad valorem .. | Specific rate of Rs. 4.8 .0 per cwt . on sugar, 23 Dutch standard and above and Rs. 4 per cwt . on sugar, inferior to ${ }_{23}$ Dutch standard, but not inferior to 8 Dutch standard. (With effect from Ist June 1925). |
| Tin plates | Specific rate of Rs. go per ton ... | Specific rate of Rs. 85 per ton. (With effect from 27th February 1926). |
| Tin block | 15 per cent. ad valorem ... | Specific rate of Rs. 250 per ton. (With effect from 27th February 1926). |

Besides these, duty at 20 per cent. ad valorem was imposed on silk mixtures with effect from 1st June 1925, and a protective duty of one anna per lb. was imposed on certain descriptions of paper with effect from 21st September 1925 .

L (tv) $156-7$
27. Administration.-The review of Administration including cases dealt with under the Indian Merchandise Máriks Act, which appeared in the previous issues of this Report, ha's now been omitted under the orders of the Government of India.

Custom House, Karachi, the gth Juine 1926.

H. H. HOOD, Collector of Customs.

## Ten years' foreign trade from 191\%-18 to 1826-2\% and the pre-war year 1913-14.

```
EXPORTS---------------
```

IMPORTS

Nots.-For details see paragraph 2 at page 2.

Ten years balance of trade from 191\%-18 to 1926-2\% and the pre-war year 1913-14.

Nort-Tor details see paragraph 2 at page 2.

## I.-General Review of Foreign Trade.

1. General Position of Trade.-An examination of the trade accounts sppearing in Table A of the Appendix reveals that the year 1926-27, like its predecessor has, on the whole, proved disappointing. The aggregate value of the maritime trade of the Province of Sind during the year under review amounted to Rs. 7,543 lakhs, showing a decrease of Rs. 861 lakhs or 10 per cent. as compared with the previous year, which itself was one of great depression. A comparison of this figure with the corresponding figure for 1924-25 discloses a much greater deficiency, viz., Rs. 3,433 lakhs or 31 per cent. The aggregate value of the foresgn trade, which represents 77 per cent, of the entire trade, declined by Rs. 780 lakhs or 12 per cent. to Rs. 5,803 lakhs. The most discouraging feature in regard to this trade was the excess of inports over exports, the share of the former in the total value having risen to 54 per cent. from 44 per cent. and that of the latter being only 46 per cent. as against 56 per cent. last year.

The outstanding feature of the export trade during the year was a heavy fall in the price of raw cotton in sympatby with the world market, which together with a reduction in the quantity exported, mainly accounted for the contraction of Rs. 1,049 lakhs or 28 per cent. in the total value of exports amounting to Rs. 2,660 lakhs. Shipments of wheat were only slightly above the low level of the previous year. As in that year, a smaller available surplus for exports and lower world prices were the principal factors which prevented the transaction of a larger volume of business. Considerable decreases also occurred in exports of other food-grains, flour and cotton seed. The slump in the export trade was also to a certain extent due, apart from the reasons given above, to unfavourable conditions prevailing in some of the chief purchasing countries in Europe, including the economic disturbances in Great Britain occasioned by the coal strike. Other marked increases or decreases in the values of the more important articles exported will be fonnd from a comparison of the figures given in Table $D$ of the Appendix. It is of interest to record here that the aggregate value of merchandise exported from the port of Bombay to foreign countries declined by Rs. 3,173 lakhs or 31 per cent. during the year under report.

The position as regards the import trude was, on the other hand, fairly satisfactory, the total value, viz., Rs. 3,143 lakhs having increased by Rs. 269 laklas or 9 per cent. The improvement, as will be seen from Table C of the Appendix, occured in the imports of cotton manufactures and sugar, the two leading commodities in the import trade, but the quantities purchased, especinlly in the last quarter of the year, were monch in excess of the requirements of the market, with the result that large stocks of both these articles remained in hand at the close of the year. Other striking features worthy of note were the general downward
zendency of prices, steadiness of exchange, higher rates of freight and strmgency of the money market for the greater part of the year. The position at Bombay as regards imports was, however, very different, the total value of merchandise from foreign countries having receded by Rs. 201 lakhs or 2.54 per cent.

A detailed examination of the variations in the value and volume of all the important imports and exports classified under the five main categories into which the trade is divided will be found in Section II of this Report.
2. Balance of Trade.-The following table shows the balance of trade in merchandise and treasure under foreign trade during the last ten years and the pre-war year 1913-14:-

Table No. 1.

| 1 | Yeart. | Including Goverament Trambactions. |  |  |  | Exeluding Government Traunactions. |  |  |

| 1023-. 4 | ... | . | 20,47,60,764 | 40,16,75,84? | 18,04, 08, 168 | 23,30,20,2002 | 39,85,73,004 | 17,04,82,442 |
| 1924-35 | ... | ...* | 33,42, 12,849 | 64,98,15,588 | 21,58,02,744 | 30,93, 48, 933 | 54, $85,76,468$ | 29, 02, 27, 538 |
| $1225 \cdot 28$ | ... | ... | 28,73,05,236 | 37,69,63,098 | 8,35,67,760 | 25,98,55,82\% | 36,95,10,539 | $10,98,60,707$ |
| $1426-47$ | $\stackrel{ }{*}$ | $\rightarrow$ । | 31,42,00, 025 | 26,60,44,772 \| | -4, $22,21,1563$ | 28,22,07,28 | 26,64, 26,601 | $-1,8^{\circ}, 30,027$ |

The figures given in the above table and the two graphs prefixed to this report are not satisfactory. The improvement made in the three previots years, when credit balances to the extent of Rs. 1,369 lakhs, Rs. 2,156 lakhs and Rs. 836 laklis, respectively, were recorded, was not maintained, and the year under review registered an adverse balance of Rs. 482 lakhs. Excluding Government stores, the debit balance was, however, only Rs. 169 lakhs.
3. Geographical Distribution.-The distribution of the foreign import and export trade of Karachi by countries shown in detail in Table B of the Appendis with the percentage which each country bears to the whole. The following table compares the percentage shares of the principal comntries during 1926-27 with those in 1925-26 and the pre-war year 1913-14:-

Import Trade.-The share of the British Empire as a whole in the total value of the import trade again declined, viz., from 56 per cent. to 53 per cent. The United Kingdom was the chief country affected, her quota in the total trade representing 51 per cent. as against 53 per cent. last year. Despite this falling off, the United Kingdom retained its premier position, and the value of imports therefrom rose by Rs. 54 lakhs to Rs. 1,423 lakhs during the year under report. As regards the trade with foreign comntries in Europe, Germany again took the lead with a share of 7 per cent. as against 6 per cent. in 1925-26. The value of German goods received during the year amounted to no less than Rs, 206 lakhs, an increase of nearly Rs, 52 lakhs over the figures recorded during the previons year. The position of Italy' also improved, her contribution to the total trade increasing from $1: 54$ per cent. to 2.33 per cent. in 1926-27. Belgian imports decreased slightly in value by Rs. 256 lakhs to Rs. 101 lakhs. Among foreign countries in Asia, Jave as usual held the first place. Smaller receipts of sugar from that comtry caused a fall in the value from Rs. 312 lakhs to Rs. 310 lakhs and in the percentage share from 12 to 11. Japan continued to occupy the second position among Asiatic countries, other than British possessions, and improved her share slightly from 2.76 to 8.08 per cent. The value of her sales, consistine mainly of grey cotton poods, amounted to Jis. 86 lakhs, an increase of Rs. 16 lakhs as compared with the pre-
vious year. Imports from the United States of America, which reached the record figure of Rs. 222 lakhs last year, suffered a set-back to the extent of Rs. 11 lakhs, resulting in a decline of the share in the aggregate value from 9 to 8 per cent. The position of the principal countries participating in the trade in the more important commodities is summarized in the following statement:-

| Anticles. |
| :--- |

Export Trade.-The share of the British Empire in the export trade, which sustained a heavy decline last year, having fallen to 27 per cent. from 41 per cent. in 1924-25, showed no signs of recovery and remained at the same low level. Export business with the United Kingdom, theprincipal country, was again dull, purchases dwindling last year to thepoor figure of Rs. 853 lakhs from Rs. 2,152 lakhs in 1924-25, and during. the year under report there was a further decline of Rs. 640 lakhs. Among continental countries, Italy was the chief customer with a shareof 14 per cent., but the total value of exports to that country contracted from Rs. 526 lakhs to Rs. 360 lakhs. A reduced demand for cotton accompanied by a fall in its price led to the decrease. For the samereasons Germany, the country next in importance, failed to retain the position held last year. A contraction of Rs. 175 lakhs in the value of the goods purchased during the year, viz., Rs. 173 lakhs lowered the' percentage share from 9 to 7 . France was the only primeipal country in Furone whose trade with the port showed an improvement, the advance being from Rs. 138 lakhs to Rs. 144 lakhs and from 4 to 5 in the percentage share. Among the remaining countries in Europe, Belgitm's trade is of most importance. Exports thereto, consisting mainly of cotton, wheat, rapeseed and bones, were valued at Rs. 113 lakhs, and accounted for 4 per cent. of the trade as against 5 per cent.past year. Japan and China, the two leading countries in Asia, contributed 19 and 6 per cent. as against 18 and 5 per cent., respectively. The fall in the position was due to reduced takings of cotton and the lower prices
realised for it. The United States of America, as usual, chiefly took goat skins and raw wool, and though the total value of the transactions, viz., Rs. 142 lakhs fell short of that in $1925-26$ by Rs. 24 lakbs, the percentage share rose slightly from 4 to 5 . The present position of the principal countries as regards the more important commodities exported from Karachi is summarized in the following statement:-

4. Variations in the average prices of articles.-The following tableshows the variations in the average prices of certain articles imported into and exported from the Province of Sind, the average prices of the years 1899-1900, 1900-01 and 1901-02 being taken as $100:-$

Table No. 2.

| Do. (Fircian) ... | 100 | 11073 | 158704 | 140.19 | 1654 | 183.84 | 1770:42 | 176.56 |

It will be seen from the figures given in the above table that under imports, the average prices of all the commodities except dates, kerosene oil and sugar declined, the fall under cotton twist and yairn and piecegoods being more marked. On the export side also, the prices of the majority of the articles weakened, rice, sesamum and wool (Indian) showing slight increases. The drop of 63 points under raw cotton was most pronounced, and was the result of a bumper American crop during the year.

The effect of the change in the level of prices since the outbreak of the great war is illustrated in the following table in which the volume of the trade in 1926-27 in some of the more important articles of the import and export trade is compared with the pre-war volume and its value recalculated at pre-war rates :-

Table No. 2-A.

| 1Articles. | $2$ <br> Average of three pre-war years 1911-12 to 1918-14. |  | 3 |  | 4 <br> Falue of imports if recalenlated at prices derived from column 2. |

| Wool, raw... | \% $80,02.4$ | 4,48,81,255 | 146,9\%5 | $13,50,44,220$ | 10,49,15,511 |
| Wool, raw... ... Lbb. | 31,631,527 | 1,40,07,736 | 26,514,271 | 2,29,90,579 | 1,15,99,994 |
| Total ... Rs. | $\cdots$ | 26,39,89,036 | $\ldots$ | 23,40,15,266 | 17,51,91,447 |

An examination of the figures in the above table reveals a satisfactory position in the case of the import trade. The actual total value of theselected articles imported during the year and the value worked out at the pre-war rates exhibit an excess of 69 per cent. and 18 per cent., respectively over the pre-war average values, a fact which denotes an expansion in the volume of the trade. The disparity between the twopercentages gives an idea of the present high level of prices. The position in the case of the export trade was, on the other hand, quite the reverse, both the actual aggregate value and the value recalcutated at pre-war rates showing a decline of 11 per cent. and 33 per cent., respectively, as compared with the pre-war average value.

## Treasure--Private.

5. Treasure-Private.-The following table compares the imports. and exports of treasure on private acconnt for the last two years :-

Tabie No. 3.

Owing to the general trade depression and the low prices reatized for agricultural products, the demand for gold and silver was much restricted, and the imports of both again declined in conseguence. -Imports of gold decreased in value from Rs. 1317 lakhs in 1924-25 to Rs. 8.11 lakhs, the consignments consisting chiefly of $13,168 \mathrm{ozs}$. of bars valued at Rs. $7 \cdot 6.5$ lakhs from the United Kingdom. Receipts of bar siver, also from the Tnited Kingdom, fell heavily from 244,919 to $22,521 \mathrm{ozs}$. in quantity and from Rs. $4 \cdot 40$ lakhs to Rs. 41,271 in value. Government of India mpes, which are ordinarily sent here from the gulf ports for the purchase of food-stuffs and cloth, were lower by Ths. 053 lakhs, chiefly in arrivals from Museai, other Native States in Arabia and Persia. Exports of silver consisted of Government of India rupers and other coins, and the decrease of Rs. 4.69 lakhs in the total value was due to smaller shipments of krans purehased at favourable rates at Quetta and Chaman and sent through this port to Persia.

## Government Transactions.

6. Government Transactions.-The following table compares the items of importance to the commercial public in Government transactions with foreign countries during the two years 1925-26 and 1926-27 :-

Table No. 4.

| Articles. | 1925-26. |  | 1926-27. |  |

| Total entire Foreign Trade | $\cdots$ | 2,91,85,881 | $\ldots$ | 3,25,97,448 |

The value of stores imported on Government account amounted to Rs. $319 \cdot 69$ laklis against Rs. 277.39 lakhs, an increase of Rs. $42 \cdot 30$ lakhs or 15 per cent. The improvement was due to larger receipts of machinery ( + Rs. $11 \cdot 05$ Iakhs) and vehicles, chiefly aeroplane parts, ( + Rs. 33.65 lahbs) from the United Kingdom and railway materials, ( + Rs. $22 \cdot 43$ lakhs) from Belgium and Italy. The articles which showed a falling off were railway carriages and wagons (-Rs. 1618 lakhs) from the United Kingdom. and Belgium, locomotive engines and tenders and parts thereof (-Rs. 5.82 lakhs) from the United Fingdom and metals. (-Rs. 7.99 lakhs) from the United Kingdom and Belgium. The decrease in railway plant was due to smaller imports by the NorthWestern Railway, and that under metals to a reduction in the orders placed for the Lloyd Barrage and Canals Construction Works.

## II.-FOreign Trade.

## IMPORTS.

1 7. The following table gives the ralue of the import trade under the five main classes for the last four years and the pre-war year 1913.14 :-

Tabian No. 5.

| Articles, | 1913-14. | 1923-24. | 1924-25. | 1925-26, | 1926-2\% |

## Class I.-Food, Drink and Tobacco.

The aggregate value of the imports of the various articles included noder class $I$ expanded from Rs. 539.15 lakhs to Rs. 706.01 lakhs or. by 31 per cent. The fluctuations in the principal commodities are explained belots.

Sugar.-The following table exhibits the imports, both from foreign countries and from Bombay, re-exports to foreign countries and coastwise exports of sugar, 16 Dutch Standard and above, including beet sugar, for the past two years and for the year 1913-14:-
|Table No. 6.

After a brief respite during the preceding twelve months, the import business in sugar again showed great activity, stimulated somewhat by the small carryforward of about 6,200 tons at the beginning of the year. Purchases were on a much larger scale, and no less than 230,807 tons of sugar valued at Rs. 524 lakhs were imported during the year, showing an increase of 61,804 tons or 37 per cent. in quantity and Rs. 173 lakhs or 49 per cent. in value as compared with 1925-26 and constituting a record for the port in any one year, the previous best being 192,995 tons in 1924-25. It is interesting to note that, as was the case in 1924-2.5,

Karachi imported more sugar than Bombay, the total importations at the latter port amounting to only 184,863 tons. The tone of the market was, on the whole, healthier than in the previous year. Smaller crops in Java and the continent and the Cuban restriction of output caused world prices to harden, and they showed a rising tendency during the greater part of the year. The local price of white Java-was Rs. 15-6 per cwt. in April 1926, and rose steadily to Rs. 17-13 in June, when a temporary set-back lasting for two months occurred, the price in August being no more than Rs. 14-11, the lowest quotation of the year. But September saw another advance, which was well maintained during the following four months, the highest price of Rs. 17-12 being quoted on the 14th December 1926. Weakness developed in February however, and the year closed with Rs. 15-4.

Referring to the figures given in the table at the head of this paragraph, it will be noticed that though Java was, as usual, the chief supplier, the quantity imported from that country, viz., 139,217 tons was less than in the previous year by 12,543 tons or 8 per cent. The local dealers this year turned their attention to the continental markets, where there was a large surplus available for export, and no less than 76,888 tons of beet sugar was purchased as against 13,828 tons in 1925-26, the principal supplies having been received from Germany, Hungary, Czechoslovakia, Southern Russia and Poland. It is noteworthy that exports from the United States of America to Karachi further increased from 1,825 tons to 10,019 tons, while Canada sent 3,200 tons for the first time. As in the prerious year, Mauritius was entirely out of the field, its product being largely secured for the United Kingdom. It may be mentioned that there was some overtrading in the latter part of the year, and with a carryforward of about 45,000 tons, the weakness in prices at the close was natural.

## Liquors.

Ale, beer and porter.-The following statement compares the quantities imported from the chief sources of supply during the past two years:-

As a result of heavy stocks held locally from the previous year's imports, the business in ale, beer and porter was somewhat restricted, the quantity declining by 134,710 to 695,846 gallons and the value by Rs. 1.74 lakhs to Rs. 17.83 lakhs. The decrease was shared by both bottled and bulk beer. The quantity of the former fell from 371,366 to 297,207 gallons, chiefly in receipts from Germany and the Netherlands and that of the latter from 433,235 to 364,926 gallons in purchases from the United Kingdom.

Spirits.-Arrivals of whisky, the chief item under this head, amounted to 120,178 gallons valued at Rs. $21 \cdot 64$ lakhs, a decrease of 4 per cent. in quantity and 8 per cent. in value. The decrease in quantity followed a substantial increase in the previous year, and the larger fall in the percentage of value was ascribed to the importations of cheaper brands during the year under report. Imports of brandy, on the other hand, showed an improvement of 4,663 gallons or 7 per cent. in quantity and Rs. 21,353 or -2 -per cent. in value, having risen from 71,035 gallons valued at Rs. $9 \cdot 09$ lakhs to 75,698 gallons valued at Rs. $9 \cdot 30$ Jakhs. The low value of the franc stimulated imports from France, and also accounts for the comparatively smaller percentage of the rise in value. The increase of 16,594 gallons under 'other sorts of snirit' was due to larger imports of rectified spirit from Java for denaturation. Arrivals of this spirit aggregated 21,738 gallons, and the entire quantity was denatured at the Custom House on arrival.

Wines.-The small increase of 1,228 gallons recorded under wines was due to larger importations of vermouth from France as a result of the depreciation of the franc.

Tobacco.-Imports under this head showed a considerable faling off to the extent of $260,130 \mathrm{lbs}$. or 35 per cent. in quantity and Rs. 10.73 lakhs or 36 per cent. in value. The bulk of the importations, as usual, comprized cigarettes from the United Kingdom, and the decrease was due to the diversion of the trade to Bombay as a result of an increase in the local Municipal terminal tax. The tax has, however, now been rednced, and there is, every prospect of the port regaining its legitimate trade.

Fruits and Vegetables.-The chief item in this group is dates. Imports of this commodity receded in quantity by 4,825 tons to 15,001 tons, but the value expanded by"Rs. $1 \cdot 41$ lakhs to Rs. $30 \cdot 16$ lakhs. Mesopotamia was the chief source of supply. Smaller crops in that country were responsible for the decline in imports, and the consequent rise in prices explains the disparity in the percentages of decrease in the value and volume of business done during the year.

Provisions and Oilman's Stores.- During the year under review imports under this head were valued at Rs. 55.54 lakhs, showing an excess of Rs. 6.39 lakhs over the value recorded in the previous year. The following statement shows the variations in the quantities of some of the principal items imported during the year :-

The above table shows that the largest increase occurred under 'canned and bottled provisions'. This is chiefly due to imcreased arrivals from the Netherlands of vegetable fat, which is classified under this head. The trade in this new product again showed a marked development, imports having advanced from $36,188 \mathrm{crt}$. valued at Rs. $18 \cdot 60$ lakhs in $1925-26$ to $53,485 \mathrm{cret}$. valued at Rs. 22.72 lakhs in 1926-27. The variations in the trade in otber descriptions were insignificant.

Tea.-The decrease of $467,983 \mathrm{lbs}$. in quantity and Rs. 5.28 lakhs in value noticed last year was followed by a further drop of $317,610 \mathrm{lls}$. and Rs. 3.41 lakhs during the year 1926-27, when imports stood at $283,337 \mathrm{lbs}$. valued at Rs. $2 \cdot 80$ lakhs. As in the previous year, a restricted business in qreen tea from China caused the decline. This tea is imported here chiefly for re-exportation to Meshed by land, whence it
finds its way to Russian Turkistan. The latter country having arranged: to obtain its requirements direct from China, there was an almost complete cessation of demand during the first half of the year. It is, however, reported that some revival took place during the latter half of the year, and that fresh business was put through. The decrease in imports was also due to the disturbed state of Chink during the year under report. Imports of black tea, mostily from Ceylon, did not show any marked fluctuations, the figures recorded, viz., $227,268 \mathrm{lbs}$. and Rs. 22 lakhs, showing a small increase of $12,709 \mathrm{lbs}$. in quantity and Rs. 776 in value over imports in 1925-26. The bulk of this tea was dust tea, mainly used in Indian tea shops.

## Class II.-Raw materials and produce and articles mainly unmanufactured.

8. The decrease of Rs. 34.87 lakhs recorded in the value (viz., Rs. 139 lakhs) of articles included in this category, represents a reduction of 20 per cent. as compared with the figures of the previous year. The reasons for the variations under the more important commodities are discussed below.

Oils.-The total value under this head declined by Rs. 20.54 lakhs. to Rs. 124 lakhs in 1926-27, chiefly under mineral oils. The following table shows the imports of mineral oils for the past two years and the pre-war year, including, in the case of kerosene, imports from Burma :-

It will be seen from the above table that there has been a shrinkage: to the extent of 22 per cent. in the total quantity, viz., 181 million
gallons of kerosene oil imported from both foreign countries and Burma. As compared with 1924-25, however, this quantity shows an excess of 11 per cent. The decrease has followed a heavy increase in the previous year, and in the case of foreign kerosene oil, it would have been much less, but for the fact that a vessel bringing more than three million gallons, which was due in March, arrived in April, the result being that the figures were included in the accounts of the current official year. As usual, the principal supplies came from the United States of America, and the decline occurred under bulk oil, the imports of which fell from 13 million gallons valued at Rs. $91 \cdot 38$ lakhs to $9 \frac{1}{2}$ million gallons valued at Rs. $67 \cdot 70$ lakhs... Arrivals of case oil from the United States of America, on the otber hand, improved by about $\frac{1}{2}$ million gallons and Rs. 3.92 lakhs to about $1 \frac{1}{4}$ million gallons walued at Rs. 11 laklis. It may be mentioned that Sumatra sent some 58,500 gallons of bolk oil valued at Rs. 40,000 against none in the previous year, while the Straits Settlements increased their supplies of case oil from 4,200 to 15,196 gallons. Burma oil decreased in quantity by 16 per cent. to nearly 7 million gallons and in value by 24 per cent. to Rs. 48.35 lakhs. Imports of fuel oil fell back by $\frac{1}{2}$ million gallons or 4 per cent. in quantity and Rs. $2 \cdot 24$ lakhs or 9 per cent. in value as compared with the record figures of last year, the contraction being due to no oil having come from Dutch Borneo as against 1,311,460 gallons in 1925-26. Of the total quantity of fuel oil imported during the year, some $43_{x}$ million gallons came from Persia and 24 million gallons from British Borneo. An improvement to the extent of 54 per cent. in quantity and 40 per cent. in value was noticed in receipts of lubricating oils amounting to $1 \frac{1}{4}$ million gallons valued at Rs. 19.54 lakhs. The principal quantities consisted of 917,818 gallons from the United States of America, 81,410 gailons from the United Kingdom, 47,780 gallons from the Straits Settlements, 41,935 gallons from Dutch Borneo and 37,827 gallons from Germany.

Coal.-Imports of coal from foreign countries dwindled from 83,452 tons to 14,303 tons or by 83 per cent. in quantity and from Rs. 20.53 lakhs to Rs. 3.09 lakhs or by 85 per cent. in value, all the exporting countries sharing in the decrease. The following statement shows the variations in the quantities, imported from the principal foreign countries and also from Bengal during the past two years :-

The outstanding event of importance in the trade during the year was the unparalleled coal strike in England which lasted for nearly seven months involving an almost complete cessation of production. The effect of the strike is shown in the figures of arrivals of British coal which fell as low as 322 tons from 15,598 tons in the preceding year. There was also a notable decline in shipments from Portuguese East Africa, whence only 1,962 tons were received as against 47,011 tons last year. This coal was replaced by Indian coal, which came into favour as a result of the operations of the Indian Coal Grading Board. Among other sources of supply, Natal coal diminished by 6,327 tons, while none came from New South Wales against 2,658 tons last year. The decrease of 69,149 tons under foreign coal was, however, to a great extent made up by an increase of 59,697 tons from Bengal.

## Class III.-Articles wholly or mainly manufactured.

9. The total value of the articles included under this group, which is the most important one in the import trade, expanded by Rs. 103 lakhs or 6 per cent. to Rs. 1,902 lakhs. The fluctuations in the tradein the principal articles failing under this category are explained kelow:-

Cotton Yarn and Manufactures.-Although the expectations referred. to in last year's report have not 'been fully realized, satisfaction can be derived from the fact that the aggregate turnover in cotton goods during the year under report, despite many obstacles, showed an improvement to the extent of 20 per cent. in value as compared with the previous. year. It must at the same time be admitted that the year 1925-26 was itself one of great depression, and cannot therefore be regarded as affording a proper standard for comparison. The closing months of that year showed signs of improvement, but subsequent events precluded the possibility of a greater expansion of the trade than has actually been recorded. The chief disturbing factors were the continued fall in the prices of both the raw material and manufactured goods and the consequent uncertainties of the market, which prevented merchants from placing their orders freely. Notwithstanding the extreme caation exercised in buying, especially during the first nine months of the year, dealers often found the market against them when the goods arrived, and much difficulty was experienced in disposing of high-priced stocks in a falling market. Moreover, consumption, both local and upcountry, was on a much restricted scale. This was due to a poor demand by the agricultural classes, the prices realized for their products being.unremunerative. Conditions at home were also equally unsatisfactory on account of the shortage of fuel due to the coal strike, and the resulting exorbitant prices manufacturers had to pay for it in order to keep their machinery running. In such adverse circumstances the increase in imports recorded during the year must be regarded as satisfactory. Business on a larger scale was not possible, and there was in fact much over-trading in the latter part of the year, large stocks remaining onhand at the close.

An event of outstanding importance in connection with the piecegoods trade was the appointment by the Government of India, during the year, of a second Tariff Board to consider the question of granting protection to the, Indian Textile Industry. The inquiry by the Board was completed before the close of the year, but their report has not been published up to the time of going to press. The following table shows the quantity and value of cotton twist and yarn and other manufactures during the past two years and the pre-war year 1913-14:-

Table No. 9.

Cotton Twist and Yarn.-There has been a further reduction to thé extent of $84 ; 494 \mathrm{lbs}$. in the quantity and Rs. $2 \cdot 93$ lakhs in the value of the imports of cotton twist and yarn, amounting to $744,347 \mathrm{lbs}$. valued at Rs. 8.51 lakhs. The decrease was mainly due to smaller receipts of coloured yarn, 315 to $40 S$, from the United Kingdom which sent 351,245 lbs. of these counts valued at Rs. $4 \cdot 12$ lakhs as against $437,438 \mathrm{lbs}$. valued at Rs. $6 \cdot 14$ lakhs last year. Imports of white yarn, solely from the United Kingdom, on the other hand, rose from $42,084 \mathrm{lbs}$. to $102,427 \mathrm{lbs}$. in quantity and from Rs. 63,090 to Rs. 1.09 lakhs in value. The improvement under grey yarn noticed last year was not
maintained, and imports decreased by $80,975 \mathrm{lks}$. and Re. 95,161 to 19,876 lbs. and Rs. 21,793.

Piece-goods.-Imports of cotton piece-goods showed a partial recovery, under all the three main sub-divisions, viz., grey, white and coloured. It is worthy of note that, while the total yardage expanded by 35 per cent., the value showed an increase of 19 per cent. only, the disparity clearly indicating the trend of prices during the year. As compared with the pre-war year, the figures recorded during the year under review reveal a shortage of 18 per cent. in the volume, but an increase of 43 per cent. in value. These figures indicate how relatively high prices still are, compared with those ruling before the war. The following statement shows in a comparative form the imports of some of the important descriptions under the three main sub-divisions of piece-goods.

| Description. | Quantity. |  | Value. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1925-26. | 1926-27. | 1925-26. | 1926-27. |
| 1. Grey (\%nbleached). | Yds. | Yd\% | Rs. Lakhs. | Rs. Lakbs. |
| Longcloth and shirtings | 17,124,978 | 21,899,982 | 56.46 | 63.70 |
| Grey urilis and jeans | 2,923,520 | 4,391,280 | 11.38 | 13:73 |
| Jaconets including madapollams, mulls | 1,657,531 | 1,247,175 | $4 \cdot 13$ | 276 |
| 2. White (bleached). |  |  |  |  |
| Cheeks, fpots and stripes . . . | 4,577,351 | 0,492,954 | 17.92 | $31 \cdot 13$ |
| Longcloth and shistings | 45,268,540 | 63,422,168 | 176.88 | 176\%1 |
| Mulls | 81,162,456 | 120,633,932 | 222.58 | 288.62 |
| Nainbooks | 15,387,305 | 12,089,458 | 36.96 | 23.80 |
| 3. Coloured, printed and dyed. |  |  |  |  |
| Printedland dyed cambrics | 14,426,193 | 19,488,269 | $40 \cdot 64$ | 55.56 |
| Printed drills and jeans | 12,303,423 | 12,144,958 | 46.36 | $40 \cdot 27$ |
| Printed and dyed twills | 11,138,651 | 13,259,330 | 42.04 | 44.04 |
| Printed asris and ssarves | 1,971,039 | 2,291,083 | $9 \cdot 32$ | $9 \cdot 86$ |
| Printed and dyell shirtings | 17,812,523 | 25,413,383 | 64.51 | 80.06 |

Grey Goods.-Imports of grey goods rose by about $5 \frac{3}{4}$ million yards and Rs. $7 \cdot 21$ lakhs to 29 million yards valued at Rs. 85 lakhs. Japan was again the chief source of supply. On account of the lower value of her goods that country continued to complete successfully with the United Kingdom, and further increased her share in the total value
from 64 per cent. in 1925-26 to no less than 78 per cent. in 1926-27. The bulk of the supplies from Japan consisted of long cloth and shirtings, totalling Rs. 54.96 lakhs in value as against Rs. 39.09 lakhs last year. Under drills and jeans also Japan claimed the lion's share, the value of her sales, viz., Rs. 9.85 lakbs representing 71 per cent. of the total value of Rs. 13.72 laklhs, the balance coming from the United States of America. Imports of grey goods from the United Kingdom, on the other hand, receded from $8 \frac{1}{2}$ million yards valued at Rs. $24 \cdot 21$ lakhs to $5 \frac{3}{}$ million yards valued at Rs. 1444 lakhs, the drop being most pronounced under long cloth and shirtings.

White Goods.-Imports of white goods, mainly British, expanded by 54 million yards and Rs. 81 lakhs to 2061 million yards valued at Rs. $563 \times 83$ laklis. The decline in prices gave an impetus to the trade.

Coloured Goods.-Imports of coloured goods, also mainly from the United Kingdom, amounted to 1021 million yards valued at Rs. 365.75 lakhs, showing a recovery to the extent of $29 \frac{1}{4}$ million yards in quantity and Rs. 75.79 lakbs in value as compared with the previous year. Among other sources of supply, Italy sent coloured goods worth Rs. 17.58 lakhs, Japan Rs. 11.78 lakhs, Switzerland Rs. 4.49 lakhs and Belgium Rs. 3.71 lakhs. The following statement gives the average prices of a few selected varieties during the year:-

|  | - | - | $\begin{aligned} & \text { Average } \\ & \text { rrice } \\ & 19 \% \div \geq 6 . \end{aligned}$ | - | $\begin{aligned} & \text { Average } \\ & \text { price } \\ & 1926-27 \end{aligned}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Rs. A. p. |  | Rs 1. |  |
| Grey | ...' | Sbirting Asahi . | $16 \% 0$ | Per piece of $\mathbf{4 0} \mathrm{yds}$. | 1312 |  |
| " | ... ... | Pepperill darill ... | 1980 | Ditto | 160 |  |
| " | $\ldots$ | Japanese drill 3 dogs in trianglo. | 15120 | Per piece of 40 yd , | 138 | 0 |
| White | ... ... | Shirting hand and key | $\begin{array}{lll}19 & 8 & 0\end{array}$ | Ditto | 180 |  |
| " | ... ... | Shirting, Saw ... | 1540 | Ditto | 150 | 0 |
| * |  | Mulls ${ }_{\text {St }}$ | 700 | Ditto $20 \mathrm{yls}$. . | 512 | 0 |
| $\operatorname{pas}_{\text {of }}$ grou | ticular quality coloured white ind prints. | $\cdots \cdots$ | 079 | Pe: yard | 00 |  |
| Colour | ed... ... | Jean prituts, Gomesh... | 076 | $\mathrm{D}_{0}$. | 07 | 0 |

It will be seen that the prices of these goods showed an all-round decline.

Woolien Goods.-After a heavy increase in the previous year consequent on a considerable reduction in prices, imports of woollen goods slightly contracted in value by 9 per cent. to Rs. 9423 lakbs. Yam

## Imports.

and knitting wool, mostly intended for the Amritsar market, decreased. in quantity from $386,629 \mathrm{lbs}$. to $362,805 \mathrm{lbs}$. and from Rs. 14.76 lakhs to Rs. 10.42 lakhs in value, the chief amounts having come from the United Kingdom ( $146,325 \mathrm{lbs}$.), Germany ( $126,718 \mathrm{lbs}$.) and Poland ( $34,925 \mathrm{lbs}$.). In the case of piece-goods, while the yardage rose slightly by 2 per cent. to $3,826,832$ yards, the value, viz., Rs. 5987 lakhs fell short of that in the previous year by 11 per cent. The principal purchases were made from France (Rs. $22 \cdot 77$ lakhs), the United Kingdom (Rs. 18.93 lakhs), Germany (Rs. 6.95 lakhs), Belgium (Rs. 5.39 lakhs) and Italy (Rs. 415 lakbs). Among other manufactures of wool, the trade in carpets and rugs is worth notice. The increase of Rs. 3.64 lakhs secured last year was further improved upon, and the total value adranced from Rs. 6.73 lakhs to Rs. 808 lakhs in 1926-27. This was mainly due to Italy having increased her supplies of bed rugs from a total ralue of Rs. 1.94 lakhs to Rs. 4.67 lakhs. The value of purchases from the United Kingdom was, on the other hand, curtailed from Rs. 3.55 lakhs to Rs. 1.87 lakhs.

Silk.-Imports of silh yarn and manufactures showed a substantial recorery, the total value, viz., Rs. 784 lakhs recording an excess of no less than 60 per cent orer the figure registered in the preceding year. The improvement was due to larger sales of yarn by Italy and of silk goods mixed with other materials by Germany.

Metals and Metal Manufactures.-The following table shows the quantities and values of the different descriptions of metals and manufactures of metals during the past two years:-

Tabie No. 10.

| Description. |  | 1925-26. |  | 1926-27. |  |

|  |  |  |  | 85,673 | 1,56,95,072 |

Iron and Steel.-After showing a steady advance in four successire years, imports of iron and steel suffered a set-back to the extent of 13 per cent in quantity and 23 per cent in ralue, the figures for the past two years being 96,836 tons valued at Rs. 183 lakhs and 84,250 tons valued at Rs. $140 \cdot 93$ lakhs, respectively. The following table compares the share of each country in the total imports of iron and steel for the past tro years:-

Table No. 11.

It will be seen from the distribution given in the above table that by far the greater portion of the deficit occurred in receipts from the United Kingdom, whose share in the total quantity supplied was reduced from 29 per cent. to 22 per cent. in 1926-27. For some time past British manufacturers have been undersold by continental competitors, but the year 1926-27 mitnessed the crowning disaster. The iron and steel industry is of course entirely dependent on ample and regular supplies of cheap indigenous coal, and the cessation of coal production for nearly seven months of the year involved an almost complete suspension of opera-
tions. The extent of the injury, sustained by the British industry can easily be gauged from the figures of the output of manufactured iron and steel, which in 1926 was reduced to $3,400,000$ tons as compared with $7,397,000$ tons in 1925. Owing, therefore, to the uncertainty of delivery and to the higher prices quoted, local dealers refrained from placing orders with manufacturers in the United Kingdom during the strike, and obtained the bulk of their requirements from the Continent, Belguim, as usual, supplied the most, and though the quantity received decreased slightly by 588 tons as compared with 1925-26, the share of that country in the volume of the trade expanded from 52 per cent. to 60 per cent. Imports from Germany, France and the United States of America also showed a falling off of 473 tons, 1,508 tons and 1,437 tons, respectively. The diminution in receipts from the Continent and the United States of America was due to the increased consumption during the year under report of Tata's iron and steel in the parts of the Punjab served by that Company. An event of importance in the organisation of production on the Continent was the formation of an international pool known as the - steel cartel by the producers of iron and steel in Germany, Belgium, France, Luxemburg and the Saar with a view to protect the home markets of the countries concerned and at the same time to raise world export prices to a more profitable level. So far this cartel has had very little effect on the local market. It may be noted here that out of the total quantity of iron and steel imported during the year under report, viz., 84,250 tons, 63,995 tons or 76 per cent. represented articles liable to duty at protective rates.

Dther Metals.-Imports of copper receded by 2,171 tons and Rs. $2 \cdot 19$ lakhs to 14,798 tons valued at Rs. 7.84 lakhs. The contraction took place under sheets from Germany, and was due to large stocks remaining unsold from the heavy imports made in the previous year. There has been no marked variation in imports of brass, consisting chiefly of mixed or yollow metal for sheathing, but it is significant that German supplies improved at the expense of the British product. The former expanded from 332 to $2,419 \mathrm{cwt}$., while the latter decreased from $6,053 \mathrm{cwt}$. to $3,664 \mathrm{cwt}$. The curtailment in business with the United Kingdom was due to the coal strike and the consequent rise in prices.

Machinery $\mathfrak{o f}_{\text {f }}$ all kinds including belting.-Imports of nachinery which progressed steadily in the previous three years show a setback, the total value, viz., Rs. $137 \cdot 43$ lalkhs recording a deficit of Rs. 16.95 lakhs or 11 per cent. The decrease was chiefly due to reduced supplies from the United Kingdom as a result of the prolonged coal strike. It is noteworthy that the output of pig iron in the United Kingdom was redreed from $6,236,200$ tons in 1925 to $2,400,000$ tons in 1926. The drop in imports was also partly attributable to a smaller demand from the Punjab, the United Provinces and Sind, several new industrial undertakings in those provinces having been completed in the early part of the year. The principal types of machinery imported and
the statistics with regard to esch for the past two years are shown in thefollowing statement :-

| Description. | 1925-26. | 1926-27. |
| :---: | :---: | :---: |
| A. Pritue movers (other tlan electrical) | Rs. 29.91 lushs | Hs. 23.70 lakhs. |
| B. Electrical machinery | , 19.49 | , $22 \cdot 15$ |
| C. Boilers | " 8\%79 | $3 \cdot 67$ |
| D. Mining machinery | *- $\quad 16.19$ | " 6.19 |
| E. Rice and flour mill machinery | , $5 \cdot 32$ | , 8.18 |
| F. Textile maclinery | , $10 \cdot 66$ | " 7.33 |
| G. Sewing and knitting machites | No. $31,0 \div 3$ | No. 84,279 |
| H. Typewriters ... | \% 1,234 | -1, 1,001 |
| I. Other sorts of machinery ... | Hs. 34.47 laklis. | Rs. 37.75 lah lis, |

The falling off of Rs. 6.21 lakbs under prime-movers (other than. electrical) was noticeable chiefy in the arrivals of oil and steam engines, other than locomotives from the United Kingdom, the number of the former decreasing from 683 to 580 and that of the latter from 73 to 37 . A restricted supply from the United Kingdom was also responsible for the decline under boilers, aice and flour mill machinery and textile machinery, while the reduction under mining machinery occurred in purchases from the United States of America. The value of electrical machinery, on the other hand, improved by Rs. $2 \cdot 66$ lakls. Bigger imports of electrical metal working machinery from the United Kingdom and of electrical pumps from Germany accounted for the increase. Sewing machines again came in larger numbers, British machines numbering 22,999 as against 22,011 and German machines 11,199 against 8,942 last year.

Railway Plant and Rolling Stock.-The dire straits to which the engineering industry in the United Kingdom was reduced also mainly accounted for the heavy drop of Rs. 19.19 lakhs in the total value (Rs. 14.26 lakhs) of railway plant and rolling stock imported during the year. The principal sub-heads affected were carriages and parts thereof (-Rs. 3.47 lakhs) and wagons and parts thereof (-Rs. 11.52 lakbs) from the United Kingdom and locomotive engines and tenders and parts thereof (-Rs. $9 \cdot 19$ lakhs) from the United Kingdom and the United States of America. Materials for construction, on the other hand, showed an expansion of Rs. 4.99 lakhs, which was due to an import of sleepers and keys of steel or iron worth Rs. 8.26 lakhs mainly from Belgium against none last year.

Cutlery, Hardware, Implements and Instruments (excluding Electrical Instruments and Apparatus).-The aggregate ralue recorded under this head amounted to Rs. 62.12 lakhs, practically the same as last year.

A detailed examination of the figures of the trade in the principal articles classed under this group shows that cutlery decreased in value from Rs. 6.58 lakhs to Rs. 588 lakhs, chiefly in receipts from the United Kingdom and Germany. Inports of builders' hardware, on the otber hand, advanced from Rs. 5.98 lakhs to Rs. 6.32 lakhs to which the United Kingdom, Germany and Sweden contributed Rs. 1.34 lakhs, Rs. 278 lakhs and Rs. 1.80 lakhs, respectively. The value of implements and tools, other than agricultural implements and machine tools imported during the year was Rs. $9 \cdot 10$ lakhs as against Rs. $8 \cdot 68$ lakhs, the bulk of the supplies coming from the United Kingdom, the United States of America and Germany. As usual, metal lamps imported were mainly of German and American manufacture, the former contributing Rs. 4.23 lakbs and the latter Rs. 3.37 lakbs to the total value, viz., Rs. 8.70 lakhs. The consumption of cheap German lamps is steadily increasing at the expense of American varieties.

Chemicals, Drugs and Medicines. -The total value of the various articles included under this head improved by Rs. 3.60 lakhs to Rs. 36.84 lakhs, the United Kingdom being as usual the principal supplier, especially of heavy chemicals. A better demand from the Pumjab caused the increase, the chief importations participating therein being soda ash and crystals valued at Rs. $10 \cdot 41$ lakhs ( + Rs. 97,889 ), caustic soda valued at Rs. $4 \cdot 23$ lakhs ( + Rs. $1 \cdot 20$ lakhs), alum, valued at Rs. $1 \cdot 48$ lakbs ( + Rs. 56,639 ) and proprietary and patent medicines valued at Rs. 3.71 lakhs ( + Rs. 41,980 ). Receipts of bicarbonate of soda, on the other hand, suffered a further set-back from Rs. 1.33 lakhs to Rs. 98,384 , which is accounted for by the fact that carbon dioxide gas manufactured in India has been found to be a better and a more profitable substitute for this article in the manufacture of aerated waters.

Vehicles (excluding locomotives, etc., for railways). -Imports of vehicles continue to increase steadily, the total value recorded, piz., Rs. $84 \cdot 18$ lakhs showing a further excess of Rs. 8.02 lakh's over imports in the previous year. The expansion was most pronounced under cycles and motor lorries. The number of the principal classes of vehicles imported during the pasit two years is given in the following state-ment:-

Motor cars.--In vien of the very heavy imports last year it is not surprising that the number of cars declined slightly during the year under report from 1,878 to 1,825 , the value dropping from Rs. 40.43 lakhs to Rs. 3876 lakhs. The following statement shows the number and value of motor cars imported during the past two years from the principal sources of supply:-

It will be seen from the above statement that the shortage occurred chiefly in arrivals from the United States of America (-73 cars) and Canada (- 43 cars). Italian and French cars, on the other band, increased in numbers by 53 and 14, respectively, while English makes were about the same as last year. The number of motor omnibuses, motor vans and motor lorries, which was 325 in 1925-26, reached the unprecedented figure of 872 in 1926-27, and their total value advanced in consequence from Rs. $7 \cdot 34$ lakhs to Rs, 17.01 lakhs. The increase is due to a brisk demand from the Punjab, where these types of vehicles are now replacing bullock carts and other similar conveyances employed in the transport of goods and passengers from the towns to the outlying villages not served by railways. Of the total number of these commercial vehicles imported during the year, 520 were chassis- 371 from Canada and 121 from the United States of Americaand 352 were complete wagons with bodies- 112 from Canada and 233 from the United States of America. Imports of cycles also created a record. No fewer than 21,946 machines, mainly British, valued at Rs. $10 \cdot 78$ lakhs were received during the year as against 15,632 valued at Rs. 8.17 lakhs in the preceding year. Markedly lower prices stimulated this trade.

Other Articles.-Imports of apparel, including boots and shoes improved further in value by Rs. 2.27 lakhs to Rs. 30.01 lakhs, mainly in arrivals of second-hand clothing from the United States of America and the United Kingdorn. A slight increase of Rs. 69,623 was also recorded

## Foreign <br> Imports.

under the head dyes and coloters, the total value of which amounted to Rs. 18 lakhs. Paints and colours, the principal item in this group, contributed Rs.' $11 \cdot 43$ lakhs to this value as against Rs. $11 \cdot 75$ lakhs last year. Imports of alizarine dyes rose by $128,365 \mathrm{lbs}$. to $210,481 \mathrm{lbs}$. in quantity and by Rs 87,770 to Rs. $1 \cdot 33$ lakhs in value due to increased purchases from Germany. Imports of aniline dyes amounted to 320,539: lbs. valued at Rs. $4: 88$ lakhs, the quantity slowing a rise of 20 per cent., and the value an excess of 1 per cent. only. Larger supplies of cheaper dyes from Germany explain the disparity. The value of glassware and earthenware totalled Rs. 21.79 lakhs as against Rs. 19.62 lakhs, the expansion of Rs. 217 lakhs being due to larger purchases of sheet and plate glass from Belgium. Imports of paper, pasteboard and stationery recorded a value of Rs. $33 \cdot 80$ lakhs, an increase of Rs. 4.54 lakhs, which occurred chiefly under newsprinting paper and writing paper. Larger supplies from Austria and Germany raised the value of newsprinting paper from Rs. 4.98 lakhs to Rs. 768 lakhs, while the advance in the value of writing paper from Rs. 3.27 lakhs to Rs. $5 \cdot 25$ lakhs was due mainly to increased sales by Austria and the Netherlands. Purchases of cement, mainly Portland cement from the United Kingdom, again showed a diminution, the figures for the past two years being 5,952 tons valued at Rs. $3 \cdot 51$ lakhs and 4,366 tons ralued at Rs. $2 \cdot 35$ lakhs, respectively. The decrease, as stated last year, was due to an increased consumption of Indian cement which was more in demand on account of its cheapness. Imports of matches declined from 1,314,761 gross of boxes valued at Rs. $14 \cdot 30$ lakhs to $1,032,543$ gross of boses worth Rs. $11 \cdot 33$ lakhs owing. to smaller arrivals of safety matches from Sweden. Competition by Indian matches and the anticipation of a reduction in import duty towards the end of the year affected imports. The value of soap expanded by Rs. 3.02 lakhs to Rs. 14.95 lakhs, larger arrivals of household and: laundry soap mainly accounting for the increase.

## Class V.-Postal articles not specified.

10. The figures registered onder this head exclude the imports by post of the five specified articles, viz., (1) gold and silver thread, (2) cinematograph films, (3) jewellery, (4) precions stones, and (5) cigarettes, which are included under the relative beads in the general imports. The total value of postal articles, not specified advanced further by Rs. 10.25 lakhs or 21 per cent. to Rs. 58.15 lakhs to which imports from the United Kingdom contribiuted Rs. 52.83 lakhs. The total number of parcels dealt with during the year was 113,658 as against 125,825 in $1925-26$. Besides these, 41,782 letter packets were assessed to duty as against 38,089 last year. The total amount of import duty realized on all articles imported by parcel post decreased slightly from Rs. $10,73,693$ to Rs. $10,59,891$ and that on articles contained in letter packets rose from Rs. 47,471 to Rs. 49,031 .

## EXPORTS.

## Indian Produce and Mantafactures.

11. Agricultural conditions.-As the bulk of the export trade of this port consists of agricultural produce, it will be useful to give a brief review of weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces before entering into a detailed examination of the figures relating to the more important commodities.

In Sind the rainfall was normal, and the inundation of 1926 was, on the whole, fairly good. The river commenced to rise late in the season, but maintained a sufficiently high irrigating level beyond the normal period. Despite a favourable (though belated) water supply, the average outturn of both the kharif and rabi crops was estimated to be much below normal, the unsatisfactory position being due to the damage done by various diseases, locusts and a severe frost. In the Punjab the monsoon broke in the second week of July, somewhat later than usual, and gave fairly good rains throughout the province. The heavy rains in August and September accompanied by dry hot winds and boll-worm in October, however, adversely affected the kharif crops to a certain extent. The conditions for the sowing of the rabi crops were not very favourable, and the winter rains were generally insufficient for the maturing of unirrigated crops. The water in the rivers was, however, almost sufficient to meet the keen demand on the various canals, and the conditions and prospects of the standing crops in the irrigated areas were reported to be generally good. In the United Provinces also, the seasonal conditions were not altogether favourable. Sowings with irrigation com-- menced later than usual, and excessive rains damaged the crops in many districts. In the following table the area and yield of the three most important crops, viz., wheat, rape and mustard seed, and cotton, for the past two seasons are compared, the figures being taken from the agricultural returns furnished by the Directors of Agriculture, Bombay, the Punjab and the United Provinces. In the case of wheat and rape and mustard seed, which are rabi crops, the figures for the season 192526 are compared with those for 1924-25, as the produce exported in 1926-27 relates mostly to the former season. In the case of cotton, which

is a kharif crop, exports relate to the season 1926-27, and therefore the crop figures for 1926-27 are compared with those for 1925-26.

Table No. 12.

| Province. | Wheat. |  | Rape and IItustard seed. |  | Cotton, |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1924.25. | 1925-26. | 1934-25. | 1025-26. | 1925.26. | 1920-27. |
|  | Area. |  |  |  |  |  |
|  | Acres |  | Acres, |  | Acres. |  |
| Sind ... | 569,000 | 410,000 | 362,000 | 172,000 | 362,000 | 334,000 |
| Ponjab | 10,024,000 | 10,683,000 | 1,269,000 | 798,000 | 3,052,000 | 2,799,000 |
| United Provinces | 7,472,000 | 6,991,000 | 2,660,000 | 2,592,000 | 1,004,000 | 807,000 |
|  | Yield. |  |  |  |  |  |
|  | Tons. |  | Tons. |  | Bales of 400 lbs . |  |
| Sind ... | 119,000 | 107,000 | 35,000 | 18,000 | 116,000 | 82,C00 |
| Funjab | 2,981,000 | 8,382,000 | 209,000 | 123,C00 | 908,000 | 598,000 |
| United Provinces | 2,447,000 | 2,314,000 | 534,000 | 428,000 | 277,000 | 257,000 |

It will be seen from the above figures that although the total area under wheat cultivation in the three provinces was reduced to the extent of 881,000 acres or by 5 per cent., the total outturn of the crop improved by 256,000 tons or 5 per cent. as compared with the previous year. The increased production was solely due to a better crop in the Punjab, which was greatly helped by favourable rains towards the end of the season. The area sown under tape and mustard seed in all the three provinces was below the level of the previous year, the deficiency being more marked in the case of Sind and the Punjab. In consequence, the outturn was reduced by 50 per cent. in Sind, 41 per cent. in the Punjab and 20 per cent. in the United Provinces. The figures for the cotton crop in all the three provinces were also lower than in the previous year botb in area and yieid. In Sind the shortage of 8 per cent. in the area was reported to be due to the late inundation of the year, and the reduction of 30 per cent. in the outturn was due to considerable damage done to the crops by wilt, boll-worm and other diseases and by repeated attacks of locusts. In the Puajab, the fall in the price of cotton acted as a deterrent to extensive sowing, and the decrease of 34 per cent. in the outturn, is attributable not only to the curtailment of the area, but also to the damage caused by excessive rains. It may be noted here
that of the total area under cotton in the Punjab, viz., $2,799,000$ acres, some $1,664,000$ acres were reported to be under Desi and $1,135,000$ acres under Amcrican cotton. In the United Provinces the acreage was reduced by 19 per cent., but the crop, though injured to some extent by excessive rains, was satisfactory on the whole. The total area and yield of these three crops in the whole of India were as follows :-

12. The following table gives the value of the export trade, including re-exports, under the five main classes for the last four years and the pre-war year :-

Table No. 13.

## Class I.-Food, Drink and Tobacco.

13. The total value of the commodities included in this class fellfrom Rs. $573 \cdot 19$ lakhs to Rs. $448 \cdot 80$ lakhs or by 22 per cent. The fluctuations in the volume and value of some of the more importantarticles are discussed in the following paragraphs.

Grain, pulse and flour.-Exporters of grain, pulse and flour experienced another bad year. The aggregate shipments declined further by 66,917 tons or 21 per cent. and by Rs. $121 \cdot 52$ lakhs or 22 per cent. to 257,795 tons valued at Rs. $434 \cdot 11$ lakhs. When compared with thosefor 1924-25 these figures reveal a much greater shortage, viz., 85 per cent. in quantity and 82 per cent. in value. The following statement compares the quantities of the different kinds of food-grains exported in 1926-27, 1923-26 and the pre-war year :-

[^4]at the low level of last year, the sbipments amounting to only 168,769 tons valued at Rs. 257.65 lakhs, the quantity showing the trifling increase of 5,675 tons, but the value a decrease of Rs. 1198 lakhs as compared with 1925-26. Needless to say these figures compare very unfavourably with those for 1924-25, when shipments totalled 1,046,255 tons valued at Rs. 1,611.75 lakhs. As regards the conditions in the local market, the prices prevailing during the year were lower than those in the previous year. The quotations for white wheat opened at Rs. 5-14 per maund in April, and towards the end of that month went up to Ris. 6, which proved to be the highest figure during the year. This rate was, however, matintained for two weeks ouly, Rs. 5-12 being quoted in the second week of May. Thereafter a steady decline set in, and by 15th September the price had fallen to Rs. 4-15, the lowest quotation of the year. Subsequently there was a slight improvement, and the closing rate on the 294 h March was Rs. 5.4. The following statement shows the distribution of wheat exports for the past two years and the pre-war year :-

It will be seen from the above table that the United Kingdon, our chief customer, took 81 per cent. of the total quantity of wheat exported during the year, and increased her purchases by 58 per cent. to 136,641
tons in quantity and by 48 per cent. to Rs. 20776 lakhs in value. This. increase was to a great extent offset by a considerable decline in shipments to the Gulf ports and Egypt, which took only 3,473, and 3,510 tons as against 36,847 and 23,773 tons, respectively last year. Among continental countries, Belgium's purchases were almost the same aslast year, but supplies to France rose considerably from 3,515 tons to 13,400 tons. Syria which bought 5,112 tons of wheat last year, took none at all in 1926-27. It may be remarked that shipments of wheat from Karachi represented 96 per cent. of the total quantity ( 175,949 tons) exported from India.

Other food grains.-Shipments of all kinds of food-grains suffered a. considerable set-back, the drop under barley being particularly striking. Exports of this commodity which in 1924-25 reached the record figure of 388,062 tons valued at no less than Rs. $449 \cdot 37$ lakhs declined heavily in 1925-26 to 34,473 tons valued at Rs. $46 \cdot 13$ lakbs, and during the year under report dwindled to the negligible figure of 838 tons valued at Rs. 99,766 . A mediocre crop and a large internal demand raised local prices to a level which made export business impossible. There was also a marked decline in shipments of gram, the quantity having receded by 15,117 tons to 8,904 tons and the value by Rs. 18.45 lakhs to Rs. 14.07 lakbs. As in the case of barley, a poor surplus available for export and ihe resultant high prices checked exports. The principal countries which took smaller quantities were France (-6,822 tons), Egypt ( -3.148 tons), the Netherlands ( $-3,349$ tons) and Germany ( $-1,190$ tons). The share of liarachi in the total quantity of gram shipped from India was 64 per cent. as against 78 per cent. in 1925-36. Shipments of wheat flour registered a decline of 18 per cent. in quantity and, 22 per cent. in value, the figures for the past two years being 43,035 tons valued at Rs. 95.51 lakhs and 35,254 tons valued at Rs. 74.49 lakhs, respectively. The falling off was chiefly due to Persia, Mesopotamin and Mauritius having reduced their requirements from 4,732 tons, 5,944 tons, and 4,452 tons to 1,908 tons, 1,988 tons and 3,269 tons, respectively. Egypt, the principal customer, on the other hand, increased herpurchases from. 14,226 to 15,521 tons.

After showing a substantial rise in the previous year, shipments of rice fell back by 11,464 tons and Rs. $19 \cdot 74$ lakhs to 33,684 tons valued at Rs. 72.05 lakhs. The decrease was chiefly due to the Bahrein Islands having ređuced their purchases of boiled rice from 9,455 tons to 4,769 tons and to Persia having taken only 1,454 tons of cleaned rice as against 2,467 tons last year. Good crops of rice and other food-grains in Persia and Mesopotamia brought about the slaekness in the demand.

## Class II.-Raw materials and produce and articles mainly unmanufactured.

lakhs or 31 per cent. to Rs. $1,996 \cdot 58$ lakbs. The variations in some of the important commodities included in this class are discussed below :-

Raw cotton.-The following tahle shows how ention exports were distributed during the past two years and the pre-war year 1913-14:-

Raw cotton was again easily the leading commodity in the export trade of the port, its share in the aggregate value of exports having amounted to 55 per cent. as against 63 per cent. last year. The salient features of the year were a bumper crop of about $18 \frac{1}{2}$ million bales in America, which beat all previous records, and the consequent heavy drop in world prices. The market showed a continuous downwarl terdency for the greater part of the year, with the result tbat both sellers and buyers were dominated by a feeling of nervousness, and hesitated to enter into forward contracts; further, the uncertain price leveis caused a disposition on the part of buyers to limit commitments, and the demand was also somewhat restricted owing to the relatively high price of Indian cotton. This disparity encouraged Indian mills to purchase large quantities of American cotton, of which about 25,000 tons ras imported into Bombay as against only a bundred tons last year. Exports at Karachi during the year under report declined by 32,684 tons or 18 per cent. to 146,995 tons in quantity and by Rs. 851 lakhs or 39 per cent. to Rs. 1,359 lakhs in value : the difference between the two percentages shows how severe was the depreciation in local prices. As a result, however, of certain favourable conditions, especially the shipping facilities afforded, the port continued to attract large quantities for export, including some 20,000 bales from the United Provinces and

10,000 bales from Rajputana against only 1,000 and 4,000 , respèctively. in the previous year, so that in spite of the reduced total of exports as compared with $1925-26$, the figures for the year were the second highest on record. It may be noted that shipments through Bombay showed the heavier proportionate decrease of 23 per cent., the figures for the past two years being 484,963 tons and 373,924 tons, respectively. As regards the figures given at the head of this paragraph, it will be seen that Japan was again the largest purchaser of cotton exported from this port. The quantity shipped to that country, bowever, fell by 2,832 tons to 54,805 tons. Italy, which came next, reduced her requirements from 34,255 to 27,301 tons, while China, despite internal troubles, increased her purchases from 17,775 to 18,604 tons. Other continental countries also took less, but the fall was more marked in shipments to Germany, which purchased 14,823 tons as against 22,807 tons last year. Shipments to the United Kingdom also showed a considerable reduction of 55 per cent., the quantity being only 7,876 tons as against $17,55^{2}$ tons in 1925-26, but this substantial reduction is easily accounted for by the great coal strike and the general adverse conditions affecting the trade.

Wool, raw.-After a dull season in the previous year, the wool market showed some activity, eexports having risen by 12 per cent. to $26 \frac{1}{2}$ million lbs. in quantity and by 13 per cent. to Rs. $229 \cdot 91$ lakhs in value. A continuous fall in prices in the earlier part of the year, specially due to the slackness of demand by the Indian mills, accompanied by the tightness of the money market, compelled stockists to part with their holdings at rates advantageous to shippers. A brisk demand from the United Kingdom towards the middle of the year also gave an impetus to the trade, and substantial profits were realized on consignments shipped to Liverpool for September and October auctions, particularly the latter. This induced local dealers to export largely, and abnormally heavy shipments were made in December. The market in the United Kingdom had, however, declined by that time, and the prices realized for these shipments were not satisfactory. Turning to the share of the different countries in the trade, the United Kingdom took the most, viz., $24 \frac{1}{2}$ million lbs. as against $20 \frac{1}{2}$ million lbs. last year. The principal feature of the trade in that country was the stability of prices of all gualities of wool in contrast to the violent fluctuations in the preceding year. The United States of America, the only other important customer, after buying Indian wool freely in the previous two years, fell back, shipments thereto having declined from over $2{ }^{3}$ million lbs. valued at Rs. 20.95 lakhs in 1925-26 to $1 \frac{3}{3}$ million lbs. worth Rs. 14.52 lakhs in 1926-27. The deficiency was, however, more than made up by a large increase in purchases of foreign wool.

Seeds.-The export trade in seeds suffered a set-back for the third year in succession, the total quantity having fallen by 39 per cent. and the value by 27 per cent. as compared with shipments in the previous year. In contrast to the trade in the preceding two years, however, rapeseed, the chief item, showed a slight improvement, while the decrease was most noticeable under cotton seed and sesamum seed. The
following table compares the volume and value of exports of the different kinds of seeds to the principal countries during the past two years and the pre-war year :-

Rapeseed.-Exports of rapeseed, the principal item in the oilseeds trade, which in the previous two years recorded heavy decreases of 61,564 tons and 115,658 tons respectively, showed a slight recovery, the figures recorded, viz., 90,176 tons and Rs. 20671 lakhs, baving exceeded those of last year by 7,132 tons or 9 per cent. in quantity, and by Rs. 11.03 lakhs or 6 per cent. in value. Plentiful orders from the continent led to the increase. Italy which has been our principal customer for the last two years, increased her purchases further from 37,504 tons to 42,646 tons. The second largest buyer was France with 14,189 tons as against 7,455 tons in 1925-26, an increase of 90 per cent. The expansion in shipments to the Netherlands was also equally striking, •
the quantity taken by that country, viz., 11,112 tons, being double the. shipments in the previous year. The United Kingdom was the only important country which showed a notable decline, the quantity shipped thereto, viz., 6,456 tons being 12,589 tons less than in the previous year. The decrease was due to the fact that the United Kingdom found it more profitable to crush groundnuts in the place of rapeseed, her purchases of the former from the whole of India having risen from 9,670 tons in $1925-26$ to 16,969 tons in 1926-27. As usual, Karachi was the largest exporter of rapeseed, her share representing 96 per cent. of the total quantity, viz., 94,186 tons shipped from India.

Other seeds.-Shipments of all descriptions of seeds included under this head showed an all-round decrease during the year. Cotton seed was the principal item affected, exports having dwindled from 71,621 tons valued at Rs. 82.04 lakhs to the low figure of 6,720 tons valued at Rs. 6.62 lakhs, mainly in shipments to the United Kingdom. A keen demand from Marwar and Thar and Parkar in consequence of the failure of the crops of grass and other fodder raised local prices above the level of world prices, and hence the decrease in export to foreign countries. Exports of sesamum seed also fell from 3,094 tons valued at Rs. $9 \cdot 82$ lakhs to the negiigible figure of 66 tons valued at Rs. 21,261 . There was a complete cessation of shipments to the Netherlands and Italy which took 900 tons and 876 tons, respectively, last year, while only 25 tons went to Egypt against 1,062 tons in 1925-26. Shipments from the whole of India also dwindled from 39,896 to 1,567 tons. The yield of the all-India crop of this seed was estimated at 358,000 tons, showing a decrease of 2 per cent. as compared with the previous year. The decrease of 1,219 tons in exports of castor seed was noticeable in shipments to the United Kingdom, the chief customer. The seed is exported largely through Bombay. As in the previous year, no exports of linseed were made through this port, all the shipments from India having gone via Calcutta and Bombay.

Hides and skins, raw.-The following table compares the exports of raw hides and skins to the different conntries during the past two years :Tablef No. 17.

Raw Hides.-The bides market showed some activity during the year under report. As a result of famine conditions in certain districts in Sind and a shortage of fodder in parts of Rajputana, larger supplies were available, and the quantity exported rose by 34 per cent. to 2,929 tons and the value by 17 per cent. to Rs. $28 \cdot 79$ lakhs. The smallness of the percentage of increase in the value was partly due to lower prices and partly to shipments of inferior qualities. The improvement during the year occurred chiefly in exports to Germany and Spain, there being a brisk demand for coic hides in those countries. Shipments to Italy, on the other hand, contracted from 621 to 397 tons, solely in exports of buffalo calf skins.

Raw Skins.-The export trade in raw skins did not show any marked fluctuations, the total quantity having declined by 120 tons only. The decrease occurred in shipments of sheep skins to the United Kingdom. Goat skins, the principal article, which comprised 98 per cent. of the aggregate shipments of raw skins, on the other hand, showed an improvement of 93 tons in quantity and of Rs. $1 \times 16$ lakhs in value. A better demand from the United Kingdom, especially for skins suitable for colouring, caused the increase. The United States of America, the chief purchaser, on the other hand, took less, the figures for the past two years being 4,633 tons and 4,537 tons, respectively.

Miscelianeous.-Among other articles included under class II, exports. of raw silk expanded in ralue by Rs. $3 \cdot 87$ lakbs to Rs. 20.65 lakhs, mainly in shipments of mulberry silk to France, and Chasam or waste. silk to the United Kingdom. There was also an increase of Rs. $5 \cdot 09$ lakhs in the value of shipments of manures, consisting chiefly of crushed bones and bonemeal. Exports of the former, mostly to Belgiam, were valued at Rs. 25.99 lakhs, an increase of Rs. 3.18 lakhs. Bonemeal
worth Rs. 11.43 lakhs was exported during the year under report against Rs. 10 lakhs last year. The countries taking the principal amounts were the United Kingdom (Rs. 2.65 lakbs), Ceylon (Rs. 2.26 lakhs), the United States of America (Rs. 3.97 lakhs) and Japan (Rs. 1.51 lakhs). Shipments of chromite (chrome iron ore), a product of Baluchistan and the only metallic ore exported at this port, fell from 23,209 tons valued at Rs. 6.96 lakhs to 14,150 tons valued at Rs. 4.24 lakhs. Among the principal purchasers, the United Kingdom, Sweden and Belgitm reduced their requirements from 4,057 tons, 4,850 tons and 4,500 tons to 1,875 tons, 2,650 tons and 3,800 tons, respectively, while France took 4,075 tons against 3,600 tons last year.

## Class III.-Articles wholly or mainly manufactured.

15. The total value of the articles included under this rather unimportant class in the export trade contracted by Rs. $2 \cdot 50$ lakbs to Rs. 25.50 lakhs. Shipments of hides and skins, tanned or dressed, the principal article in the group, amounted to 211 tons valued at Rs. 9.26 lakhs as against 231 tons valued at Rs. 9.63 lakhs, the deficiency being noticeable in exports of tanned sheep-skins to the United Kingdom. The value of tanned goat skins, exported mainly to the United Kingdom, was maintained at Rs. 3.97 lakhs.

## Foreign Merchandise, re-exported.

16. The total value of re-exports of foreign merchandise amounted to Rs. $167 \cdot 69$ lakhs, showing a decrease of Rs. 18.74 lakls or 10 per cent. as compared with 1925-26. Raw wool, woollen manufactures and sugar, the three most important articles entering into the entrepót trade of this port, contributed 44 per cent., 26 per cent. and 10 per cent., respectively to this value. The re-export trade in raw wool, which suffered a considerable set-back in the previous year, showed a recovery, the total shipments, viz., 9 million lbs. valued at Rs. 73.53 lakhs having exceeded those in the previous year by 18 per cent. in quantity and 16 per cent. in value. Both the United Kingdom and the United States of America, the usual customers, drew larger quantities. As regards the shipments to the former country, the reasons given for the increase under Indian wool also hold good in the case of foreign wool. The expansion in purchases by the United States of America was due to the fact that the American carpet manufacturers, who largely use Chinese and Kandahar wool, were unable to secure sufficient quantities of the former variety on account of the domestic troubles in that country, and took more Kandahar wool from this port instead. The value of woollon-manujactures, consisting mainly of Persian carpets, contracted from Rs. $61 \cdot 88$ lakhs to Rs. 43.63 lakbs in shipments to the United Kingdom, the United States of America and Furopean Turkey. Re-exports of sugar at 5,536 tons valued at Rs. $17 \cdot 27$ lakhs maintained the level of the previous year. As usual the gulf ports absorbed the bulk, but the position as regards the principal countries participating in the trade was somewhat changed, in as much as, while Persia curtailed its purchases from

1,688 to 960 tons, the Bahrein Islands increased them from 700 to 1,908 tons. Among other articles, the trade in cotton piece-goods is worth notice. The total value, mainly representing coloured goods sent to Persia, stood at Rs. $9 \cdot 77$ lakhs as against Rs. $10 \cdot 91$ lakhs last year.

## III.-Coasting Trade.

17. The total value of the coasting trade of the Province of Sind receded by Rs. $80^{\circ} 60$ lakhs or 4 per cent. to Rs. 1,740 lakhs during the year under review.

## Chief Port-Karachi.

18. The following table shows the aggregate value of the coasting trade of the port of Karachi, including Government stores and treasure, for the last four years and the pre-war year :-

Tabee No. 18.

The aggregate value of the coasting trade of the chief port amounted to Rs. $1,725^{\circ} 56$ lakhs, showing a decrease of Rs. $80 \cdot 78$ lakhs or 4 per cent. as compared with the previous year. Both imports and exports suffered a set-back, the value of the former having fallen by Rs. $39^{\circ} 17$ lakbs to Rs. $1,123.91$ lakhs and that of the latter by Rs. 41.61 lakhs to Rs. $601 \cdot 65$ lakhs.

## Private.

19. The coasting trade in private merchandise between the chief port, Karachi and other ports in India, grouped by provinces, is shown in the following table:-

Table No. 19.

## Imports.

20. Indian Merchandise.-The value of Indian produce and manufactures imported into Karachi from the coast ports declined from Rs. 1053.95 lakhs to Rs. 1018.67 lakhs. The articles which contributed to the decrease were kerosene oil (-Rs. $15 \cdot 14$ lakhs) and Benzine and Petrol (-Rs. 5.87 lakbs) from Burma, cotton twist and yarn (一Rs. 12.06 lakhs), cotton grey piece-goods (-Rs. 20.68 lakhs) and turmeric (—Rs. 270 lakbs), from Bombay, gunny bags (—Rs. 588 lakhs), from Bengal and coconut oil (-Rs. 391 lakhs) from Madras. The following articles, on the other hand, showed increases :-Coal ( $+\mathrm{Rs} .10 \cdot 10$ lakhs) from Bengal, ghee ( + Rs. 2.52 lakhs) from Baluchistan and Kathiawar, pepper ( + Rs. $2 \cdot 17$ lakhs) from the Travancore State and Bombay, and teak wood (+Rs. 6.21 lakhs) from Burma.

Cotton piece-goods.-The table below gives the trade in Indian piecegoods imported coastwise during the past four years and the pre-war year under each of the three headings, grey, white and coloured :-

Table No. 20.

| Years. |  |  |  | Gres. |  | White. |  | Colorrcd. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 1020-27 | ... | ** | -* | 133,921,261 | 4,63,08,793 | 3,750,125 | 18,26,249 | 24,070,030 | 1,02, 34, 334 |

Foreign Merchandise. The total value of imports of foreign merchandise into Karachi fell by Rs. 8.09 lakhs to Rs. 88.48 lakhs, chiefly in receipts of cotton piece-goods, grey (—Rs. 2.73 lakhs), coloured (-Rs. 1.84 lakhs) and aniline dyes (-Rs. 2.96 Jakhs) from Bombay. An improvement, on the other hand, occurred in the arrivals of cigarettes ( + Rs, $1 \cdot 80$ lakhs) from Bombay.

Cotton piece-goods.-The following table shows the imports of foreign piece-goods coastwise for the past four years and the pre-war year under each of the three headings, grey, white and coloured :-

Table No 21.

## Exports

- 21. Indian produce and manufactures.-The total value of Indian produce and manufactures exported from Karachi to the coast ports declined from Rs. $534 \cdot 83$ lakhs to Rs. $021: 16$ lakhs. The articles responsible for the decrease were cotton (-Rs. 46.42 lakhs) to Bombay, rice, other sorts ( - Rs. 15.63 lakhs) to Madras, pulse ( - Rs. 4.98 lakhs) to Madras, Cutch and Kathiawar and cotton seed (-Rs. 2.83 lakhs) to Cutch and Kathiawar. An increase, on the other hand, was noticeable under wheat̃ ( + Rs. 46.43 lakhs) to Bombay, gram ( + Rs. 3.84 lakhs) to Madras, Jowari and Bajri ( + Rs. $3 \cdot 24$ lakhs) to Kathiawar and cleaned rice ( + Rs. 311 lakhs) to Cutch and Kathiawar. The following tableshows the exports of cotton to Bombay during the past four years and the pre-war year :-

Table No. 2.2.

Foreign Merchandise.-The value of exports of foreign merchandise from Karachi to coast ports decreased by Rs. 28.17 lakhs to Rs. 77.40 lakhs, mainly in shipments of sugar (-Rs. 10.81 lakhs) and kerosene oil (- Rs. 1183 lakhs) to Bombay.

## Subordinate Ports.

22. Keti Bandar and Sirganda.-The total value of the entire trade of these ports, which is confined to trade with coast ports, increased slightly from Rs. 14.26 lakhs to Rs. 1444 lalkhs, to which Keti Bandar contributed 66 per cent. and Sirganda 34 per cent. Rice is the chief produce of both these ports. During the year under report Keti Bandar exported 2,572 tons of rice to Cutch, 140 tons to Madras, 2 tons to Kathiawar and 1,275 tons to Karachi, while Sirganda sent 2,775 tons to Cutch exclusively.

## IV.-Miscellaneous.

23. Shipping.-The table below gives the number of vessels entered at and cleared from the ports of the Province of Sind during the past two years:-

Table No. 23.

|  |  |  | 1925-26. |  |  | 1926-27. |  |

| Total Consting Steam and Sailing .. |  |  |  | 6,647 | 2,759,204 | 6,198 | 2,868,011 |

Foreign trade.-It will be seen from the above table that the total number of vessels engaged in the foreign trade again decreased from 1,129 to 1,013 and their tomage from $1,850,089$ to $1,846,501$ tons. The contraction was most noticeable under sailing vessels, which accounted for a shortage of 91 vessels out of a total decrease of 116 . The number of steam vessels declined by 25 only. The average tonnage per steamer increased further from 2,838 tons to 2,961 tons. The sailing vessels comprised country craft trading to the Persian Gulf ports, East Africa, Madagascar, Aden and Zanzibar. The following figures show the
number of steamers of each nationality that entered the port of. Karachi during the year 1926-27 as compared with 1925-26:-

The figures recorded in the above table do not show any marked fluctuations. Though the slump in the export trade was greater, than in the previous year, the number of steamers of the principal nationalities entering the port was well maintained. In all 511 steamers flying the British flag entered the port, showing a decrease of 5 vessels only. This figure, however, compares very unfavourably with that recorded in 1924-25, when no less than 639 steamers visited the port, a large number being engaged in carrying wheat and cotton.

Freight.-Freight rates to the United Kingdom ruled easy during the first two months of the year in sympathy with the Bombay market, but the coal strike at home in May had a disorganising effect, and the subsequent months witnessed a considerable rise. The rates for wheat and rapeseed opened at $14 s .6 d$., and $13 s .6 d$. , respectively in April, and eased off to 11 s . and 10 s . in the first week of May. This favourable position was, however, not long maintained. A' steady rise soon followed in the subsequent months, and a level of 24 s . for wheat and 23 s . for rapeseed was reached in the third week of October, the quotations being more than double those in May. The scarcity of tonnage on this side raised the rates still further at the end of November, when 37s. for wheat and 3.ss. for rapeseed was demanded. Barring small bookings, no export business was, however, secured at such abnormal rates. A turn for the better was taken in Jannary, and this continued up to the end of the year, the closing rates on the 30th March being 19 s .6 d . for wheat and Jis. $6 d$. for rapeseed.
24. Exchange.-The year under report did not witness any violent fluctuations in the rates of exchange. At the commencement the rate
for demand drafts was quoted at $1 s$. $5 \frac{29}{3} d$., and subsequently rose to $1 s$. $6 d$. on 11th May 1926. With minor fluctuations in the succeeding months, it came down to $1 s .5 \frac{2}{3}$ d. on 30 th November 1926 , which was the lowest quotation of the year, but a rise soon set $i n$, and the highest figure of $1 s .6 \frac{1}{86} d$. was quoted on 28th December 1926. A downward tendency followed, however, and the rate at the end of March was $1 s .5 \frac{29}{3}$ d.

2\% Revenue.-The following table shows the total collections for the province on account of import and export duty and refunds therefrom, and the duty on imported salt, separately for the last four years and the pre-war year":-

Table No. 25.

Karachi-Private
$\begin{array}{lll}\text { Keti } & \ldots & . . \\ \text { Sirgendr } & \text {... } & \text {.. }\end{array}$
Total
ExPORT DIU15.

The total gross receipts of Customs revenue during the year under report amounted to Rs. $583 \cdot 68$ lakhs, showing an increase of Rs. $35 \cdot 12$ lakhs or 6 per cent. as compared with the previous year. Collections on account of import duty on private merchandise rose by Rs. 35.26 lakhs or 7 per cent. to Rs. $546 \cdot 15$ lakhs. The largest amount was recovered on sugar, viz., Rs. $181 \cdot 22$ lakhs, which was Rs. $34 \cdot 27$ lakbs in excess of the receipts last year, and accounted for 33 per cent. of the total import duty on private merchandise. Recoveries on cotton piece-goods; the next important item, from a revenue point of view, rose by Rs. 18.08 lakhs to Rs. $111 \cdot 86$ lakhs. Duty on liquors also increased by Rs. 1.01 lakhs to Rs. 44.54 lakhs. There was, on the other band, a decrease in realizations on tobacco, Rs. 14.08 lakhs ( - Rs. $6 \cdot 30$ lakhs), kerosene oil, Rs. 17.01 lakhs ( - Rs. 4.48 lakbs), matches, Rs. 14.14 lakhs ( - Rs. 3.27 lakhs) and iron and steel, including special protective duties, Rs. 27.67 lakhs (-Rs. 7.31 lakhs). The total amount of import duty recovered under the Steel Industry (Protection) Act amounted to Rs. 23.35 lakbs, showing a deficit of Rs. 7 ' 68 lakhs as compared with 1925-26. Protective duties on paper amounted to Rs. $2 \cdot 39$ lakhs as against Rs. 98,971 realized in the last six months of the previous year. The total amount of import duty on Government stores decreased slightly by Rs. 5,506 to Rs. 28.74 lakhs. The revenue from export duties also declined slightly by Rs. 8,232 to 8.79 lakbs. Receipts from rice, which totalled Rs. 2.77 lakhs, fell by Re. 49,102 , but the deficiency was to a great extent offset by an increase of Rs. 41,009 in collections on hides and skins amounting to Rs. 5.98 lakhs.
26. Changes in the rates of duty.-During the year under report the following important changes were introduced in the rates of import and export duty :-

| Articleg. Ofd rate. | New rate. |
| :---: | :---: |
| Import duty. | 1 |
| Currants . . . . 15 per cent.* | Re. I-4 per cwt. (with effec from 27th September 1926). |
| Saccharine (except in tablets). Rs. 20 per lb. . | R. 5 per lb. (with effeat from lst April 1926). |
| Saccharine tablets . . 25 per cent. ad valorem or. Rs. 20 per lb. of aaccharine contents, whichever is higher. | 15 per cent. ad valorem or Re. 5 per lb, of saccharine contents whichever is hisher iwith effect from $]_{\text {st }}$ April 1926), |
| Stick or seed lac . . . 15 per cent. ad valorem . | Free (with effect from $1_{8} t$ April 1926). |
| Tobacco, unmanafactured . Re. I Per lb. . . | Rs. 1-8 per lb. (with effect from lst March 1927). |

Note-For details see paragraph 2 at page 2.

## I.-GENERAL REVIEW OF FOREIGN TRADE:

1. General Position of Trade.-Taken as a whole, the year 1927-28 was more or less an uneventful one, and produced little or no achievement worthy of note towards the progress of the trade of the port. On a reference to the figures embodied in Table A of the Appendix it will be seen that though the total value of the entire maritime trade of the Province of Sind, which amounted to Rs. 7,648 lakhs, showed a slight increase of Rs. 105 lakhs or $l$ per cent over the figures recorded in the previous year-a year of great, depression-it compared very unfavourably with the values recorded in 192425 and 1925-26, viz., Rs. 10,976 lakhs and Rs. 8,404 lakhs respectively. The foreign trade with which this chapter exclusively deals accounted for 78 per cent of this value, or Rs. 5,932 lakhs, an excess of 2 per cent over 1926-27. The share of imporis in the total value of the foreign trade was 51 per cent and that of exports 49 per cent as against 54 per cent and 46 per cent, respectively last year.

The outstanding feature of the export trade was a partial revival in shipments of wheat-a factor which helped to relieve the situation to a considerable extent. The value of the total turnover of exports aggregated Rs. 2,877 lakhs, showing an inerease of Rs. 217 lakhs or 8 per cent as compared with 1926-27. A comparison of this figure with 1924-25 and 1925. 26 , however, reveals a considerable shortage of 48 per cent and 22 per cent, respectively. The chicf disturbing factor was a large reduction in shipments of raw cotton, which has now become the principal staple commodity in the export trade of the port, displacing wheat, the pre-war leading article. The financial crisis in Japan and the civil war in China had a decidedly adverse effect on the cotton busiuess, the value of the total purchases by these two countries during the year under report being only Rs. 333 lakhs as against Rs. 675 lakhs in 1926-27, Rs. 868 lakhs in $1925-26$ and Rs. 555 lakhs in 1924-25. A pleasing feature, besides the recovery in shipments of wheat, was a substantial expansion in exports of barley and raw hides. Other marked increases or decreases in the value of the more important articles included in the export trade will be found from a comparison of the figures embodied in Table D of the Appendix.

The aggregate value of the import trade declined from Rs. 3,143 lakhs in 1926-27 to Rs. 3,055 lakhs or by 3 per cent in 1927-28. If, however, the comparison were restricted to the figures of private merchaudise only, i.e., excluding imports on Government account, the decrease would be still higher, viz., 6 per cent. From the figures given in Table C of the Appendix it will be noticed that the contraction occurred chiefly in imports of colton manufactures and sugar, the two leading commodities, which between them accounted for 45 per cent of the total value of the import trade. Imports of metaks, fuel oil, provisions and motor cars and motor lorries, on the other hand, showed a healthy expansion.

Among the principal features responsible for the general depression in trade which existed throughout the gear were the extreme tightness of money
and a continuous fall jin prices which entailed many heavy losses and also resulted in the failure of a couple of firms of standing.

A detailed examination of the variations in the volume and value of all the important imports and exports classilied under the five main categories into which the trade is divided will be found in Section II of this Report.
2. Balance of Trade.-The following table shows the balance of trade in merchandise and treasure under foreign trade during the last ten years and the pre-war year 1913-14:-

Table No. 1.

| Years. | Including Goverunsent Trabsactlons. |  |  | lixeluding Governamenl Transactions. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Iunports. | Exports. | Hxcess of exports ovor ituporls. | Importa, | Hxports. | Exices of expurts over lingorts. |
| 1 | 2 | 3 | 4 | 5 | 0 | 7 |
|  | Rs, | 128. | Rs. | Its. | Rs. | Re. |
| 1913-14 | 20,17,20,615 | 40,07,06,481 | 6,40,70,806 | 16,43, 62,382 | 20,05,13,363 | 10,21,30,081 |
| 1918-19 | 12,70,92,632 | 22,62, 60,750 | 0,11,75,149 | 11,53,14,204 | 243,30,35,303 | 10,70,21,104 |
| 1919-20 | 20,77,71,267 | 10,01,18,670 | $-1,70,52,507$ | 17,10,40,367 | 18,2\%,30,5 ${ }_{4}$ | 1,11,10,167 |
| 1920-21 | 38,86,21,693 | 23,51,87,008 | $-15,34,34,6245$ | $34,80,86,804$ | 21,10,10,286 | 13,70,67,378 |
| 1921-22 | 31,78,66,737 | 26,25,60,650 | $-15,58,10,087$ | 26,38,31,451 | 16,30, 11,357 | -11,02,20,204 |
| 1924-23 | 20,60,64,007 | $25,36,1 \hat{1}, 30$ | $-1,33,46,750$ | 20,94,68,883 | 445,11,56,578 | 4,10,87,605 |
| 1928-24 | 26,47, 80,754 | 40,16,75,942 | 13,68,96,188 | 23,80,00,682 | 39,05,73,004 | 17,64,82,442 |
| 1924-25 | 33,42,12,849 | 54,08,15,503 | 21,50,02,744 | 90,03,48,932 | 5.1,86,76,464 | 23,02,97,632 |
| 1925-26 | 28,73,95,230 | 37,00,63, 304 | 8,35,67,760 | 25,96,55,8:2 | 40,05,16,520 | 10, $98,46,707$ |
| 1026-27 | 31,42,60,0\%5 | 26,60,44,772 | $-4,82,21,858$ | 28,24, 97,288 | 23,54,16,661 | -1,68, 30,1627 |
| 1027-28 | 30,54,53,820 | 28,77,34,070 | -1,75,10,750 | 26,55,97, 045 | 34,71,70,917 | 2,15,73,322 |

A study of the figures given in the above table, and the illustrations in the two graphs prefixed to this Report, will show that the aggregate balance of trade in merchandise and treasure, including transactions on Government account, was again adverse to the port, but it is somewhat encouraging to uote that the deljit balanre which last year reached the high figure of Rs. 482 lakhs was appreciably reduced to Rs. 177 lakhs duriug the year under report. The figures of private trade, excluding Government transietions, on the other band, reveal a more satisfactury position, the total value of exports having exceeded that of imports by as much as Rs. 216 lakhs.
3. Geographical Distribution.-The distrilution of the foreign import and export trade of Karachi by countries is shown in detail in Table B of the

Appendix with the percentage which each country bears to the whole. The following table compares the percentage shares of the principal countries during 1927-28 with those in 1926-27 and the pre-war year 1913-14:-

Import Trade.-During the year under report the share of the British Empive in the total value of the import trade of the port of Karachi was 54.26 per cent as against 53.54 per cent in the preecding year. The contribution of the United Kingdom was practically the same as in 1926-27, viz., 51 per cent, though the value of the goods received therefrom decreased by Rs. 79 lakhs to Rs. l, 344 lakhs. The agroregate turnover with foreign countries in burope also did not show any marked fluctuations. Germany, the principal country, retained the premier position, but the improvement in her trade with this port noticed in the preceding year was not maintained. The value of her sales fell from Rs. 206 lakhs to Rs. 142 lakhs in 1927-28, reducing the
percentage share from $\overline{7}$ to 5 per cent. The value of the goods purchased from Belgium increased by Rs. 4 lakhs to Rs. 105 lakhs, her quota of the total trade rising in consequence from 3 to 4 per cent. The progressive increase in the trade with Italy noticed during the last five years was further continued, the value of the total transactions advancing from Rs. 65 lakhs to Rs. 88 lakhs and the pexcentage share from 2 to 3 . Trade with the Netherlands which has increased in importance in recent years owing to a considerable growth in supplies of vegetable products (vegetable ghi, vegetable fat, etc.) again showed a marked development. No less than Rs. 84 lakhs worth of goods were received from that country as against Rs. 46 lakhs in 1926-27, which resulted in the percentage share going as high as $3 \cdot 20$ as against $1 \cdot 62$ last year. Among foreign countries in Asia, Java which takes the first place on account of her exports of sugar, retained the level of the previous year at 11 per cent in the percentage share, but lower prices brought about a falling off of Rs. 19 lakhs in the total value of her sugar, despite an increase of 8,844 tons in the quantity. Japan's contribution remained stationary at 3 per cent, though the value of her exports, consisting mostly of cotton grey goods, coutracted slightly by Rs. 3 lakhs to Rs. 83 lakhs. The value of imports from the United Sutes of America again suffered a set-back to the extent of Rs. 23 lakhs, but the percentage share was almost the same as in the previous year, viz., 7 per cent.

The position of the principal countries participating in the trade in the more important commodities is summarized in the following statement:

| Attictes. | $\begin{aligned} & \text { United } \\ & \text { Kig. } \\ & \text { dion } \end{aligned}$ | Foribin countrics. |  |  |  |  |  | Amortca. |

Export Trade.-The share of the British. Empire in the export trade, which in the preceding two years stood at the low level of 27 per cent as against

41 per cent in 1924-25 and in the pre-war year 1913-14, showed a partial recovery, having attained to 36 per cent of the total value of exports recorded during the year. The United Kingdom, as usual, accounted for the bulk of the trade. The total value of her purchases advanced by Rs. 281 lakhs to Rs. 921 lakhs and represented 32 per cent of the aggregate exports. The expansion was largely due to increased shipments of wheat during the year under report. Increases were also recorded in her purchases of cotton, barley, raw hides and rapeseed. Among continental countries, Italy continued to occupy the first place, though reduced takings of rapesced lowered the total value of exports thereto from Rs. 360 lakhs to Rs. 347 lakhs and the percentage share from 14 to 12 . But shipments of cotton, which comprised the bulk of Italy's purchases, showed an improvement. Germany followed close on Italy's heels, and the progress made by that country is worthy of note. The total value of her transactions rose to Rs. 339 lakhs (a figure almost double that recorded in 1926-27), which resulted in her quota of the total trade advancing from 7 to 12 per cent. The expansion occurred chiefly in shipments of cotton. Substantial increases were also recorded under barley and raw hides. Among the remaining countries in Europe, France and Belgium improved their positions by one poipt, by reason of increased takings of cotton, wheat and barley. As regards exports to Asiatic countries, the effect of the financial troubles in Japan and of the civil war in China were clearly visible in the figures recorded during the year. Both these countries greatly curtailed their orders for cotton and, in consequence, their respective shares receded from 19 and 6 per cent in 1926-27 to 11 and 1 per cent in 1927-28. The export trade with the United States of Anerica did not show any marked fluctuations, the percentage share remaining stationary at 5 . Wool, cotton and goat skins were the principal articles purchased. Shipments of the first two apprecisted somewhat, while those of goat skins registered a decline.

The present position of the principal countries as regards the more important commodities exported from Karachi is summarized in the following statement:-

4. Variations in the sverase prices of aticles.-The following table shows the variations in the average prices of certain articles imported
into and exported from the Province of Sind, the average prices of the years 1898-1899, 1899-1900 and 1900-1901 being taken as $100:$ -

Table No. 2.

The figures given in the above table show that, barring coal and cotton twist and yarn, the average price level for all important commodities imported during the year was lower than in the previous yesr. •The heavy drop of about 66 points in the price of dates was due to a bumper crop in Mesopotamia. The increase under cotton twist and yarn; despite a substantial decline under cotton piece-goods, is attributer to the control of selling prices by the Cotton Yarn Association in the United Kingdom. On the export side, while the prices for rice, wheat, rapeseed and sesamam seed declined, those for hides and skius, raw, cotton and wool exhibited a rise. The increase in the price of hides was particularly striking, and was the result of a world-wide demand.

The effect of the change in the level of prices since the outbreak of the great war is illustrated in the following table in which the volume of the trade in 1927-28 in some of the more important articles of the import and export trade is compared with the pre-war volume and its value recalculated at prewar rates:-

Table No. 2-A.

A study of the figures given in the above table discloses the actual position of the present values of imports as compared with the pre-war values. It will be noticed that though the actual total value of the selected articles in 1927-28 was higher than that of the pre-war average values by as much as 48 per cent, yet if it were recalculated at pre-war rates, this excess would be reduced to 12 per cent, the disparity between the two percentages indicating the extent of the present high level of prices. The increase in the value even at pre-war normal rates, however, proves that the volume of trade is now larger than in pre-war times.

The position in the case of exports was, however, not satisfactory. Both the actual values and values worked out at pre-war rates were lower than the pre-war average, the decrease in the case of the former being 3 per cent and that in the case of the latter 28 per cent.

## Treasure-Private.

5. Treasure Private.-The following table compares the imports and exports of treasure on private account for the last two years :-

Table No. 3.

Though the total value of imports of gold, which comprized mainly bar gold from the United Kingdom, increased slightly from Rs. 8.11 lakhs in 192627 to Rs. $8 \cdot 97$ lakhs in 1927-28, it fell far short of imports in the preceding three years, viz., 1923-24, 1924-25 and 1925-26, when values to the extent of Rs. 31.93 lakhs, Rs. 26.40 lakhs and Rs. 13 lakhs, respectively were recorded. Purchases of bur siver, which last year dwindled to the low figure of Rs. 41,271 from Rs. $4 \cdot 41$ lakhs in $1925-26$, showed a partial recovery at Rs. $2 \cdot 33$ lakhs, but the figure was also much below the quinquenial a verage.

It must be explained here that silver is also imported in large quantities by rail from Bombay, and the negligible direct imports from home recorded last year were due to purchases made at Bombay. It is reported that the total arrivals during the year under report, both direct and from Bombay by rail, were actually less than in the previous year. The general trade depression and the tightness of the money market were responsible for restricted imports of both gold and silver. Goternment of India rupees come here from the gulf ports for the purchase of food-stuffs and cloth, and the contraction of Rs. 5.94 lakhs in their value was due to smaller receipts from Persia (-Rs. 2.68 lakhs), Bahrein Islands (-Rs. $2: 37$ lakhs) and Muscat Territory and Trucial Oman (-Rs. 1 lakh).

There were no exports of gold during the year. The increase in exports of silver occurred solely in despatches of Gocernment of India rupees to the Bahrein Islands where they ate sent for the purchase of pearls. The value Rs. 4.32 lakhs recorded under 'other coins' represent shipments of krans purchased at favourable rates at Quetta and Chaman and sent through this port to Persia.

## Government Transactions.

6. Government Transactions.-The following table compares the items of importance to the commercial public in Government transactions with foreign countries during the two years 1926-27 and 1927-28:-

Table No. 4.

| Articles. | 1926.27. |  | 1927.28. |  |

|  |  |  |  |  |

Tarle No. 4-contd.

The aggregate value of stores imported on Government account during the year under report amounted to Rs. 398.57 lakhs, showing an increase of Rs. 78.87 lakhs or 25 per cent as compared with the previous year. The expansion was most noticeable under railuay plant and rolling stock, and was the result of larger arrivals of carriages and wayons and parts thereof from the United Kingdom and sleepers and keys of sieel and iron from Belgium for the North-Western Railway. The improvement of 28,811 tons in quantity and of Rs. $35 \cdot 24$ lakhs in value under metals occurred notably in receipts of steel rails and fish plates from the United Kingdom and dog spikes and tie bars from Belgium. Imports of velicles and machinery, mainly from the United Kingdom, on the other hand, suffered a set-back to the extent of Rs. 47.27 lakhs and Rs. 14.94 lakhs, respectively, the former owing to smaller arrivals of aeroplanes and parts thereof and the latter to a reduction in the orders placed for the Lloyd Barrage and the Sutlej Valley projects.

## II.-FOREIGN TRADE.

## IMPORTS.

7. The following table gives the value of the import trade under the five main classes for the last four years and the pre-war year 1913-14:-

## Class I.-Food, Drink and Tobacco.

The total value of the imports of the various articles included under class $I$ declined by Res 161-30 lakhs or 23 per cent to Rs. $544 \cdot 71$ lakhs. The reasons for the fluctuations in the principal articles are discussed below.

Sugar.-The following talle exhibits the imports, both from foreign countries and from Bombay, re-exports to foreign countrics and cosstwise exports of sugar, 16 Dutch Standard and above, inchuding beet sugar, for the past two years and for the year 1913-14 :-

Table No. 6.

The phenomenal expansion recorded in the previous year when the volume of business done reached the umprecedented figure of 230,807 tons was not maintained, and imports fell by as much as 80,352 tons or 35 per eont to $150,4.45$ tons in quantity and by Rs. 228.65 lakhs or 44 per cent to Rs. $245 \cdot 65$ baks in value. Several factors contributed to bring about the depression in the trade. The large carryover of aome 45,000 tons from the preceding year,
coupled with a continuous fall in prices throughout the year in consequence of a larger crop in Java, restricted business to a great extent. The uncertainty of future prices made forward commitments difficult. Dealers were reluctant to hold large stocks, and notwithstanding the extreme caution exercised in conducting their business they found the market against them when the goods arrived, which resulted in heavy losses being incurred. The world prices of sugar were also on the downward grade for most of the year, and the Cuban restriction of output had very little effect on them owing to a considerable growth of world production. The local prices of white Java which at the commencement of the year stood at Rs. 15-6-6 per cwt. rose to Rs. 15-10 in the last week of April, but a steady decline soon followed, and the quotation came down to Rs. 15-1 at the end of June. Prices contimued to weaken still further, and Rs. 14-5 was touched on the 2nd August. A slight temporary appreciation was noticed in September, but a re-action set in quickly, and the latter half of the year was marked by a more substantial and continued downward trend. From Rs. 14-2-6 in the middle of October prices dropped to Rs. 13-2 at the end of February, and the closing price on the 27th of March was Rs. 13, which was the lowest figure of the year. Besides the reasons given above, direct imports by some of the Kathiawar ports also to a certain extent adversely affiected the business of the port. Moreover the demand for despatches to Persia by land was also reduced owing to severe Russian competition with Indian traders in that country. It is further reported that the prices quoted by some of the leading local merchants were somewhat higher than in the Bombay market, in consequence of which some of Karachi's legitimate export business for both upcountry and gulf ports. was secured by that port.

Turning to the figures recorded in the table at.the head of this paragraph, it will be seen that the requirements during the year were almost entirely met by imports from Java. Arrivals of beet sugar, which last year aggregated 76,888 tons, dwindled to the low figure of 2,016 tons, representing imports in the first two months of the year. The prices of this article remained above the parity of Java sugar, and no new business was therefore possible. It may be noted that the stocks of sugar remaining on hand at the close of the year were estimated at 22,000 tons.
Liquors.

Ale, beer and porter.-The following statement compares the quantities imported from the chief sources of supply during the past two years:-

Following upon a corresponding decrease in the previous year, imports of ale, beer and porter expanded by 105,955 gallons to 799,968 gallons in quantity and by Rs. $2 \cdot 60$ lakhs to Rs. 20.32 lakhs in value, the outstanding feature being the advance of British beer, both bulk and bottled, at the expense of the German product. The United Kingdom supplied the whole of the beer imported in cask, the quantity amounting to 439,024 galions as against 364,926 gallous in 1926-27. Imports of bottled beer also advanced by 39,926 gallons to 337,133 gallons, but the improvenent was mainly in purehases from the United Kingdom, which sent 90,442 gallons, while Gernany, the chief supplier, sent slightly less, viz: 205,590 gallons as against 206,103 gallons last year.

Spirits.-Imports of whisky, mainly from the United Kingdom, again suffered a set-back to the extent of 8,933 gallons or 7 per cent in quantity and of Rs. 49,688 or 2 per cent in value, the comparative smalliness of the drop in the value being accounted for by larger importations of superior brands during the year. A decrease of 17,318 gallons or 22 per cent in quantity and of Rs. $1 \cdot 80$ lakhs or 19 per cent in value also occurred in arrivals of brandy, cliefly from France. The reduction in imports of both brandy and whisky was partly due to increased consumption of beer by the poorer classes and partly to the Army Canteen Board, on liquidation, having flooded the market, both here and in the Punjab, with their large surplus stocks at exceedingly low prices. Denatured spirit, shown as imported, was rectified spirit from Java denatured at the Custom House on arrival. This new enterprise, started in recent years as an experimental measure, has been found to be profitable, and all local and mofussil requirements, including some from the Punjab which were formerly met from Calcutta and Bombay, are now obtained at this port.

Wines.-As was the case in the previous year, an increase under wines was noticeable in arrivals of vermouth, both from France and Italy. This beverage finds favour with the Indian public, possibly on account of its rclative cheapness. Imports of port declined further by 859 gallons or 10 per cent as a result of higher prices in Portugal and the release of large stocks by the Army Canteen Board at very low prices.

Tobacco.-As anticipated in last year's report, the reduction in the local Municipal terminal tax on cigarettes had the desired eflect, and the port regained the trade which had been diverted to, Bombay last year. No less than $1,064,165 \mathrm{lbs}$. of tobacco, mainly cigarettes from the United Kingdom valued at Rs. 40.91 hakhs were imported during the year, the quantity showing an excess of 589,935 lbs. or 124 per cent and the value of Rs. $21 \cdot 89$ lakhs or 115 per cent over imports in 1926-27. The figures were also higher than in any of the previous years, except 1920-21, when imports amounted to $1,359,822 \mathrm{lbs}$. valued at Rs. 56.17 lakhs.

Fruits and Vegetables.-The total value of imports of fruits and vegetables declined by Rs. $2 \cdot 67$ lakbs to Rs. 31.91 lakhs. Arrivals of dates from the gulf ports form the bulk of the trade in this group. Lower prices consequent on a bumper crop in Mesopotamia reduced the value of this commodity by Rs. 2.77 lakhs to Rs. 27.38 lakhs, though the quantity expanded by 4,416 tons to 19,417 tons. Mesopotainia was, as usual, the chief supplier.

Provisions and Oilman's Stores.-There has been a remarkable further advance of Rs. 47.84 lakhs or 78 per cent in the total value recorded under this head, viz., Rs. 109 laklss. The following statement shows the variations in the quantities of some of the principal items imported during the year:-

It will be seen from the above siatement that the main cause of the enormous expansion in the provision trade has been the exceptionally heavy imports of veyetable products, an article imported chiefly from the Netherlands, and to
a less extent from Belgium and the United Kingdom, and used as a substitute for, and an adulterant of, indigenous ghi. The commodity was only put on the market in recent years, but, as the figures show, the trade has made very rapicl strides. Beginning with an insiguificant consignment of 7 cwt. in $1923-24$, imports have progressively advanced to 10,731 cwt. in 1924-25, 36,188 cwt. in 1925-26 and 53,435 cwt. in 1926-27, while during the year under review no less than $167,952 \mathrm{cwt}$. valued at Rs. $60 \cdot 90$ lakhs were imported. A reduction in the local Municipal terminal tax, this year, also stimulated imports to soms extent. It appears, however, that thero has been overtrading in the article, and imports in the coming year are not expected to be so high, especially in view of a decline in the price of pure ghi upeountry.

The decrease of $1,605 \mathrm{cwt}$. in arrivals of condensed milk is mainly attributed to the disposal of the surplus stocks of the Army Canteen Board which went into liquidation this year. Fluctuations in other descriptions of provisions were not considerable and need no comment.

Tea-The import business in tea, which showed a remarkable development during the five years previous to 1926-27 owing to a strong demand for Chinese green teis for despatch to Persia, was greatly curtailed last year, and the position during the year under report was also practically the same. This tea was imported here mostly for re-exportation to Meshed by land, whence it found its way to Russian Turkistin, It is understood that the latter country now obtains its requirements direct from China, a fact which accounts for the decline in the imports at this port. The following figures exhibit the course of the trade in green tea during the last five years:-

Bhack ten as usual came largely from Ceyon, the quantity inported rising slightly by 23,976 lbs. to 251,244 lbs. and its value by Rs. 21,916 to Rs. 2.42 lakhs. The bulk of this tea, as usual, cousisted of dust tea which is mostly consumed in Indian tea shops.

## Class II.-Raw materials and produce and articles mainly unmanufactured.

8. The aggregate value of the varions articles included in Class $/ /$ amounted to Rs. $150 \cdot 89$ latks, an increase of Rs. $18 \cdot 29$ lakhs or 13 per cent. The variations in the volume and value of some of the more iuportant commorlities are dealt with in the followiug paragraphs.

Oils.--The value recoded under this head rose by Rs. 14.46 lakhs to $R_{s}$. $138 \cdot 69$ lakhs, the bulk of the imports comprising minerul oils. The following
table shows the imports of mineral oils for the past two years and the pre-wat year, including, in the case of kerosene, imports from Burma.

| Total | 1,103,380 | 5,96,042 | 8,278,769 | 42,62,408 | 11,704,805 | 56,05,410 |

The outstanding features of the mincral oil trade were an import, after a lapse of thirteen years, of Russian kerosene oil, said to have been purchased from the Soviet Government of Russia, and the resultant price-cutting war during the latter part of the year amongst the principal companies who import keroscne oil at this port. As a result of this price war, kerosene oil is being sold at prices well below world parity, and in order to safeguard the Indian oil industry the Government of India have directed the Tariff Board to examine the question and to report on the gdvisability or otherwise of granting protection to indigenous oil against the dumping of foreign oil.

Turning to the figures given in the above table it will be seen that the decrease of 22 par cent mentioned in last year's report in the total quantity of kerosene oil imported from both foreigu countries and Burma was converted into an equivalent increase during the year under report, when imports stood at $22 \frac{1}{4}$ million gallons as against $18 \frac{1}{4}$ million gallons in the previous year. Both foreign and Indian oils contributed to the recovery, but the expansion was
more marked in the case of the latter. Arrivals from foreign countries rose by over 1 million galions or 9 per cent to nearly 12 million gallons in quantity and by Rs. 1.39 lakhs or 2 per cent to Rs. 80.66 lakhs in value. The United States of America, as usual, supplied most of the oil, but the quantity received from that country declined to $8 \frac{3}{4}$ million gallons from $10 \frac{3}{4}$ million gallons in 1926-27. The total quantity of Resssian oil referred to above amounted to $2 \ddagger$ million gallons. Persia was another country which sent kerosene oil this year for the first time after a number of years. Her supplies aggregated 737,376 gallons, 608,550 , gallons being bulk oil and 128,826 galions case oil: all the latter passed through this part in transit to Duzdap by land!

Imports of Burma oil aggregated over $10 \frac{1}{4}$ million gallons valued at Rs. 60.46 lakhs, an advance of nearly 3 million gallons or 41 per cent in quantity and Rs. 12.11 lakhs or 25 per cent in value.

Arrivals of fuel oil amounting to $10 \frac{1}{2}$ million gallons valued at Rs. $30 \cdot 46$ lakhs exceoded those of last year by 49 per cent in quantity and 47 per cent in value, and created a fresh record for the port, the previous best being 74 million gallons valued at Rs. 23.02 lakhs in 1925-26. Persia and British Borneo were the only two sources of supply, the quantity received therefrom being $6 \frac{3}{4}$ million gallons and 33 million gallons as against 4 million gallons and 24 million gallons, respectively in 1926-27. The demand for this oil is continuously on the increase owing to its extonsive use for bil engines, especially in the Punjab and also by oil-driven ships.

After a substantial increase in the previous year, imports of lubricating oits suffered a slight set-back to the extent of 135,347 gallous in quantity, but the value rese by Rs. 32,433 . The United States of America, as usual, supplied the bulk, viz., 822,906 gallons, the other principal amounts being 93,771 gallons from the United Kingdona and 40,580 gallons from Dutch Borneo.

Other mineral oils included an item of 134,400 gallons of motor spirit from Persia, which passed through this port in transit to Duzdap.

Coal.-The total quantity of foreign coal inported during the year under report increased by 16,520 tons or 115 per cent to 30,823 tons and its value by Rs. $4 \cdot 18$ lakles or 135 per cent to Rs. 7.27 lakls. The following statement shows the variations in the quantities imported from the principal foreign countries and also from Bengal during the past two years :-

It will be seen from the above table that Natal again supplied most of the non-Indian coal imported here, and was responsible for 76 per cent of the total increase in the quantity of foreign coal, this increase being due mainly to shipowners preferring Natal coal even at higher rates on account of its good quality. Supplies from the United Kingdom showed an improvement of 6,433 tons over the negligible quantity of 322 tons sent last year as a result of domestic troubles. Arrivals of Bengal coal, which, thanks to the efforts of the Indian Coal Grading Board, made great headway against foreign coal, and reached the record figure of 181,809 tons last year, receded by 32,180 tons to 149,629 tons, but notwithstanding this decrease the figure was the second highest on record.

## Class 1II.-Articles wholly or mainly manufactured.

9 . The aggregate value of the commodities classified under this category, which is the most important and accounted for no less than 71 per cent of the total value of the import trade amounted to Rs. $1876 \cdot 45$ lakhs, showing a decrease of Rs. $25 \cdot 29$ laklis or 1 per cent as compared with the previous year. The variations in the volume and value of some of the more important articles are dealt with in the following paragraphs.

Cotton Yarn and Mantafactures.-The import business in cotton goods remained depressed during the year under report. The total value contracted by 13 per cent as compared with the previous year, but the decrease was to a certain extent accounted for by a further fall in prices, the actual reduction in volume being 5 per cent only. A poor demand and cautious buying were the outstanding features of the trade during the year. The piece-goods market again showed a continuous downward tendency, and the consequent instability of prices coupled with losses entailed in disposing of high-priced stocks remaining in hand from arrivals in the concluding months of last year precluded the possibility of commitments being entered into to any large extent. Another disturbing factor which made replacements difficult was the fact that, notwithstanding the efforts of manufacturers towards a further reduction, home prices remained above the parity of the local market, especially in the latter part of the year. In fact there was a great lack of confidence on this side in the prices quoted by manufacturers, and the policy of purchasing for inmediate requirements was adopted. The position was further aggravated by the continued tightness of the money market which seriously affected the financial position, especially of weak holders. Other factors which were also partly responsible for the restriction in the volume of business were the increased consumption of Indian-made cloth and paucity of demand from the Afghanistan and Persian markets, which largely obtained their requirements from Russia and other countries direct. A redeeming feature was the elimination from the market of the speculative element which in recent years greatly interfered with the business of bona-fide traders. The judicious buying done during the year, however, had a beneficial effect on the market; stocks at the close of the year were reported to be much lighter, and with the serious attempts now made by the different cotton Associations at home to reduce cost of production, there is a probability of business being done on a larger seale and a sounder basis in the coming year,

The following table shows the quantity and value of cotton twist and yan aud other manufactures during the past two years and the pre-war year 1913:14:-

Table No. 9.

Cotton Twist and Yarn.--Imports of cotton twist and yarn which have been on the downward path during the preceding two years again receded by 51,175 lbs: or 6 per cent to $693,172 \mathrm{lbs}$. in quantity and by Rs. 36,679 or 4 per cent to Rs. 8-15 lakhs in value, the comparative smaller decline in the percentage of value being due to the control of selling prices hy the United Kingdom Cotton Yarn Assuciation which continued to function in the first seven months of the year. The decrease was most noticeable in arrivals of white yarns (-45,272 1bs.) from the United Kinglom and of coloured yarns, Nos. 26 to 30 ( $-34,221$ lbs.) from Switzerland, Italy and the Cnited Kinglom.

Foreign traports. (Cotton manafactures).

Import's of coloured yarin of higher coinits, viz.', $31-40$, on the other hand, rose from 454,590 lbs.'to 508,943 lbs., the principal amounts being received from the United Kingdom ( $374,686 \mathrm{llss}$.), Switzerland ( $63,809 \mathrm{lbs}$.) and the Netheriands ( $54,660 \mathrm{lbs}$. ). Arrivals of grey yams, which last year totalled $19,876 \mathrm{lbs}$., fell to the negligible figure of 100 lbs . owing to non-reccipt from Japan and the United Kingdom as against 11,066 lbs. and $8,010 \mathrm{lbs}$. respectively in 1926-27.

Piece-goods:-Imports of cotton picce-goōds amounted to 321 million yards walued at Rss. $884 \cdot 61$ lakhs, the yardage having contracted by 17 million yards or 5 per cent and the value by Rs. $133 \cdot 53$ lakhs or 13 per cent as compared with "imports in 1926-27. The decrease was shared by all the three principal sub-divisions, viz, grey, white and coloured. The following statement shows in a comparative form the imports of some of the important descriptions under the three main sub-divisions of piece-goods :-

| Desoription, | Quantity. |  | Walue, |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1926-27. | 1927.28. | 1020-27. | 1927-28. |
|  | Yds. | Ydạ. | $\mathrm{R}_{\text {c }}$. | Rs. |
| d. Grey (unbleacheld). |  |  | Lakhe. | Lakhs. |
| Longolotk and ahirtings . . | 21,898,982 | 22,495,008 | 63.70 | 58.91 |
| Gray dvills and jeans | 4,391,280 | 2,521,400 | 13.73 | 7.59 |
| Jaconots including madapollams, cuulla and cambries. | 1,247,175 | 1,392,504 | $2 \cdot 76$ | $2 \cdot 61$ |
| 2. White (bleached). |  |  |  |  |
| Checks, apote and atripes | 9,492,954 | 11,220,277 | 81.13 | 32.82 |
| Longoloth and shirtings . | 53,422,168 | 51,024,356 | 178.71 | 159.13 |
| Mulls . | 120,633,032 | 102,800,811 | 288.62 | 215.20 |
| Nainsoaks | 12,089,458 | 0.6,786,414 | $23 \cdot 80$ | 28.80 |
| 3. Colourel, printed and dyed. |  |  |  |  |
| Printed and dyed cambrics | 19,488,269 | 16,202,923 | 65.56 | 45.13 |
| Printed drills and joams . | 12,144,958 | 11,631,107 | 40.27 | 35.58 |
| Printod and dyed twills . | 13,259,330 | 15,796,273 | 44.04 | 45.10 |
| Printed earis and baarvos | 2,281,083 | 3,714,900 | $0 \cdot 84$ | 14.27 |
| Printed and dyed ehirtings | 25,413,333 | 29,395,100 | 80.06 | 92-19 |

Grey Goods.--Arrivals of grey goods declined by nearly 2 million yards to 27 million yards in volume and by Rs. 13.91 lakhs in value. Japan's competition in this description of piece-goods was again keen. The total yardage received from that country actually rose slightly by 33,000 yards to uearly 22 million jards, but the value declined by Rs. 5. 90 lokhs to Rs. 60.24
lakhs. Longeloth and shirtings were, as osual, the chief descriptions of grey goods supplied by Japan, the quantity amounting to $19 \frac{3}{4}$ million yards as against 18 million yards and the value to Rs. $53 \cdot 84$ lakhs as against Rs, $54 \cdot 96$ lakhs last year. Japan again competed successfully witlr the United States of America in her sales of drills and jeans, with a share of 84 per cent in the total value. Despatches of grey goods from the United Kingdom mainly consisting of longcloth and shirtings suffered a set-back of 1 if million yards in quantity and Rs. $5 \cdot 16$ lakhs in value.

White Goods.-The United. Kingdom maintained its supremacy in the supply of white goods, but imports recorded a heavy fall of $15 \frac{1}{2}$ million yards and of Rs. 90 lakhs, notably under malls and longcloth and shirtings.

Coloured Goods.-The import business in coloured goods also showed a reduction of over half a million yards in volume and of Rs. 30.70 lakhs in value, solely in purchases from the United Kingdom. Italy and Japan, on the other hand, supplied more, the vahte of their sales amounting to Rs. $28 \cdot 78$ lakhs and Rs. 14 lakhs as against Rs. 18 lakhs and Rs. 12 lakhs, respectively in the previous year. The following statement gives the average prices of a few selected varieties during the year:-

It will be noticed from the above statement that the decline in the price of piece-goods was more marked in the case of grey shirting, Asthi, white shirting, hand and key and white mulls 84. The price of Peppersll drill, on the other hand, exhibited an advance.

Woollen Goods.-The total value of imports of woollen manufactures, including yarn and knitting wool, advanced by Rs. 29.07 lakhs or 31 per cent to Ris. 121.24 lakhs, the figure being the highest ever recorded. The expansion was noticeable in almost all the important branches of the trade. Arrivals of yarn and knitting wool, chiefly intended for the Amritant market, rose by $107,26 \mathrm{l}$ lbs. to $470,066 \mathrm{lbs}$. in quantity and by Ths. $3 \cdot 56$ lakhs to Rs. $13 \cdot 99$ lakhs in value. The British sbare in the total supplias was the largest, viz., 183,634
lbs., other principal amounts having come from Germany ( 143,621 lbs.), France ( $72,972 \mathrm{lbs}$.) and Poland ( $52,231 \mathrm{lbs}$.). There was also a remarkable increase in arrivals of piece-goods, the yardage, viz., $5 \frac{3}{4}$ million yards showing an excess of nearly 2 million yards and the value, Rs. $79 \cdot 69$ lakhs, an excess of Rs. 19.82 lakhs over imports in the previous year. France was again the largest supplier, the value of her exports to this port, consisting mainly of shawl cloth and merinos, having risen from Rs. 22.77 lakhs to Rs. $41 \cdot 44$ lakhs. Supplies from the United Kingdom and Germany also increased in value by Rs, 0.53 lakhs and Rs. 2.03 lakhe to Rs. 19.47 lakhs and Rs. 8.98 lakhs, respectively. The value of carpets and rugs purchased during the year rose by as much as Rs. 8.67 lakhs or 107 per cent to Rs. 16.75 lakhs, imports comprising mainly urap and bed rugs from Italy. It is, however, reported that the imports of both piece-goods and carpets and rugs were somewhat in excess of requirements, and large stocks remained in hand at the close of the year.

Silk.-After a substantial improvement of 60 per cent in the previous year, the total value of imports of silk yam and manufactures fell back by Rs. 1.90 lakhs to Rs. 5.94 lakhs. The decrease was chiefly due to smaller receipts of silk piece-goods from China and of goods of silk mixed with other materials from Germany. As was the case last year, silk yarn almost entirely came from Italy.

Metal and Metal Manufactures.-The following table shows the quantities and value of the different descriptions of metals and manufactures of metal during the past two years :-

Table Nó. 10.

| Deseription. | 1926-27. |  | 1927-28. |  |
| :---: | :---: | :---: | :---: | :---: |

Iron and Steel.-The year 1927-28 has been a boom year for the import trade in manufactured iron and steel, imports having attained the highest level on record, viz., 122,067 tons valued at Rs. 196.53 lakhs, showing an increase of 37,817 tons or 45 per cent in quantity and of Rs. 55.59 lakhs or 39 per cent in value as compared with the previous year. An event of importance affecting the assessment of iron and steel to import duties was the replacement of the Steel Industry (Protection) Act, 1924, by the Steel Industry (Protection) Act, 1927, which came into force on 1st April 1927 and imposed differential duties on certain classes of British and non-British steel. The following table compares the share of each country in the total imports of iron- and steel for the past two years :-

Table No. 11.

|  | 1026-27. |  |  |  | 1927-28. |  |  |  |

During the year under report a great demand sprang up for iron and steel required for constructional works both in Sind and the Punjab, stimulated somewhat by a very low carryover at the beginning of the year and by a further reduction in prices. Large orders placed by the Indian Stores Department with local firms also gave an impetus to the trade during the year. Turning
to the figures given in the table at the head of this paragraph, it will be seen that suppries of British iron and steel, which on accoun't of the coat strike last year fell to only 17,877 tons from 26,534 tons in $1925-26$ showed a striking recovery, importations having aggregated no less than 40,405 tons, equal to 33 per cent of the total trade as against 22 per cent last year. The expansion was particularly noticeable in sales of steel maits, 30 lbs . per yard and over, galvanised sheets, tin plates, sheets and phates, not galvanised or tinned, wrought thubes, pipess and fittings and steel structures. The British steel industiry, which was almost complotely paralysed last year on account of the coal strike, enjoyed great activity during the year, and the output of steel reached $9,097,900$ tons, the highest figure since 1918 . It is, however, noteworthy that, notwithstanding the efforts made to secure lost markets by a further cutting down of prices, British manufactarers wene againe wndersotd by Continental producers. Belgium, despite higher rates of duty; supplied the largest quantity, viz., 66,125 tons, which was 16,293 tons in excess of imports in 1926-27. Her competition was particularly keen in supplies of angles, beams and joists and bars, other than cast steel. Her quota of the total trade in iron and steel, however, receded from 60 to 54 per cent. Arrivals from. France alse made a big advance, but Germany and the United Statea of America sent less. Of the total quantity of iron and stecl received during the year, viz., 122,067 tons, no less than 93,691 tons paid the protective duties. It may be mentioned that the trade in iron and steel has been overdone this year, sad a falling of is expected next year.

Other Metals.-Imports of copper amounted to $12,196 \mathrm{cwt}$. valued at Rs. 6.34 lakhs, showing a further reduction of $2,602 \mathrm{cwt}$. and Rs. $1 \cdot 50$ lakhs, chiefly under sheets from Germany. The decrease was partly due to a poor demand from Sind and the Punjat and partly to large stocks remaining unsold from the imports made in the previous year. Imports of bross also fell off slightlyy by 874 cwt . and Rs. 56,131 to $6,262 \mathrm{cwt}$. valued at Rs. $3 \cdot 28$ lakhs, mostly as a result of smaller exports of mixed or yellow metal for sheathing from Germany.

Machinery of all kiads.-There was again a lesser demand for machinery. from both Sind and the Punjab, and in consequence arrivals fell in value by Rs. 18.88 lakhs to Rs. 118.55 lakhs. The principal types of machinery imported and the skatistics with regard to each are shown in the following statement:-

It will be noticed that among the important descriptions, prime-movers (other than eleetrical) were down by Rs. $6 \cdot 50$ lakhs in value. Reduced purchases of oil engines from the United Kingdorn, especially dine to the tightness of the money market mostly accounted for the decline. The deficiency of Rs. 4.40 lakhs under textile machinery was the result of smaller importations of cotton machinery from the United Kingdom. Sewing and lonittirg machines declined in number from 34,279 to 33,585 , of which 22,835 were British and 10,614 German. Mining-machinery, on the other hand, inereased in value by Rs. 2.91 lakhs, chiefly owing to larger mequirements of oasing and drive pipes by the Attock Oil Company. The demand for electrical maschinery also continued to increase, the walue improving further by Rs. $1 \cdot 10$ lakhs. British supplies increased, while Germany lostyround. The steady advance recorded year by year in imports of lypewriters, mostly American, was noticeable this year also, the total number showing an excess of 230 machines over imports in 1926-27.

Railway Plant and Rolling Stock-As was to be expected, British manufacturers set themselves assiduously to work off the arrears of orders which sceuntulated duning the coals strike, and in consequence there has been a considerable expansion in imports of railway plant and rolling stock, mostly for the Jodlhpur Bikaner Railway. The total value advanced by Rs. 7-44 lakhs to Re. 21.70 lakhs, of which the United Kingdom alone contributed Rs. 18.24 lakhs. The increase was most noticeable in receipts of carriages and parts thereof ( + Rs. $7 \cdot 35$ lakhs) and wagons and parts thereof ( + Rs. 3.88 lakhs) from the Unitedl Kingdom and locomotive engines and tenders and parts thereof ( + Rs. $4 \cdot 09$ lakhs) from the United Kingdom and Germany. There were, on the other hand, no imports of sleepers and keys of steel or iron during the year as against a substantiat purchase to the extent of over Rs. 8 takhs made from Belgium last year.

Cutlery, Hardware, Implements and Instruments (excluding Electrical Instruments and Apparatus)...The total value under this group receded by Rs, 4.56 lakhs to Rs. 57.56 lakhs. Most of the decrease occurred under metal lamps, the value of which contracted by Rs. $3 \cdot 16$ lakhs to Rs. $5 \cdot 56$ lakhs. The reduction in the trade is ascribed to smaller imports from Germany and the United States of America on account of markets being overstocked. The value of cutlety, viz, Rs. 5:40. lakhs almost maintained the level of the previous year, the'principal' supplies coming from Germany (Rs. 4.02 lakhs) and the United Kingdom (Rs. 1.12 lakhs). Imports of builders' harduare decreased slightly in value from Rs. 6.32 lakhs to Rs. $5 \cdot 66$ lakhs to which Germany contributed Rs. 2.24 lakhs, Sweden Rs. 1.87 lakls and the United Kingdom Rs. 1.36 lakles. Ameng other important items, the value of implements and tools, other than agricultural implements and machine tools, amounting to Rs. 8.20 lakhs, also reconded a falling off of Rs. 89,789 as compared with the previous year. The United Kingdom, Germany and the United States of America were, as usual, the chief sources of supply.

Chemicals, Drugs and Medicines--The value of imports under this head totalled Rs. 42.72 lakhs, an advance of Rs. $5 \cdot 72$ lakhs over imports in 1926-27. The expansion was most notileable in receipts of chemicals, and was attributed to the opening of new agencies by a large importiag firm at various centres in Sind and the Punjab during the year under report. Imports of sodium cur-
bonate (soda ash and soda crystals), in particular, rose by $29,939 \mathrm{cwt}$. to 201,032 ewt. in quantity and by Rs. $1 \cdot 61$ lakhs to Rs. 12.02 lakhs in value, the United Kingdom being the chief supplier as usual. An improvement also occurred in imports of Bicarbonate of soda ( + Rs. 42,654 ), caustic soda ( + Rs. 22,833), and alum ( + Rs. 19,805), purchased almost entirely from the United Kingdom. Proprietary and patent-medicines, the principal item under drugs, also came in larger quantities, the vslue expanding by Rs. 24,469 to Rs. 3.96 lakhs, to which the United Kingdom alone contributed Rs. $2 \cdot 60$ lakhs.

Vehicles (excluding Locomotives, etc., for Railways).-The increase of Rs. 8 lakhs in the imports of velicles recorded in the previous year was followed by a further increase of Rs. 23.16 lakhs, and in consequence the total value rose to the high figure of Rs. 107.35 lakhs during the year under report. The number of the principal classes of vehicles imported during the past two years is given in the following statement:-

Motor cars.-After a slight set-back in the previous year, imports of motor cars rose in number from 1,825 to 1,979 and their value from Rs. $38 \cdot 76$ lakhs to Rs. $43 \cdot 92$ lakhs. The reduction in duty gave a considerable fillip to imports, especially of British cars. The following statement shows the number and value of motor cars imported during the past two years from the principal sources of supply :-

It will be noticed that the largest increase was recorded in arrivals from the United Kingdom which sent 374 cars as against 240 last year. A large number of these were used cars imported by private individuals. Canada, the chief supplier, on the other hand, sent a smaller number. The decrease was due to the almost complete cessation, for the greater part of the year, of receipts of Ford cars, the manufacture of which was suspended while machinery was being got ready for the production of a new model.

There was an extraordinary boom in the trade in commercial velicles during the year under report. No less than 2,053 motor omnibuses, vans and lorries of the value of Rs. $33 \cdot 30$ lakhs were purchased from foreign countries, the figures surpassing last year's record imports by 135 per cent in number and 96 per cent in value. The disparity between the two percentages is explained by lower prices ruling during the year. Of the total number imported, only 203 were complete trucks with bodies, while 1,850 or 90 per cent were chassis only. The largest number came from Canada, viz., 1,437-all chassis. Imports from the United States of America comprised 178 complete trucks and 339 chassis, while the British quota was 17 trucks with bodies and 41 chassis. The heavy import during the year is a definite indication of the extensive use to which they are put in both Sind and the Punjab, especially the latter, for the transport of goods and passengers, in the place of bullock carts and other similar conveyances.

The cycle trade, which has assumed considerable proportions during the last three years, made further progress. The total number received during the year was 22,593 , an excess of 647 machines over last year's figures, which were a record. Lower prices, however, reduced the value by Rs. 80,248 to Rs. 9.89 lakhs. Noarly 99 per cent of these came from the United Kingdom and were mostly machines of the cheaper type.

Other Articles.-The total value of imports of apparel, including boots and shoes, declined by Rs. 3.80 lakhs to Rs. 26.21 lakhs, mainly owing to smaller receipts of second-hand clolhing from the United Kingdom and the United States of America. Overtrading in the previons year checked imports. Dyes and colours rose in value by Rs, 2.38 lakhs to Rs. 20.38 lakhs as a result of larger arrivals of alizarine dyes from Germany and varnish from the United Kingdom. The total value of glassware and earthenware decreased ly Rs. 96,263 to Rs. $20-82$ lakhs, chiefly in receipts of beads and false pearls from Germany, Sodawater botles from the United Kinglom and Germany and sheet and plate glass from Belgium. There has been a reduction to the extent of Rs." 5.58 laklis in the value of paper, pasteboard and stationery amounting to Rs. $28 \cdot 22$ lakhs. The decrease was most noticeable in purchases of news printing paper from Austria and Germany and of writing paper from the United Kingdom and Germany, and is mainly ascribed to increased consumption by the Punjab of Indianmade paper. Imports of cement advanced by 994 tons to 5,360 tons in quantity and by Rs. 12,899 to Rs. 2.48 lakhs in value, chiefly owing to larger receipts of Portland coment from the United Kingdom. Arrivals of matches fell from 1,032,543 to 618,795 gross of boxes in quantity and from Rs. $11 \cdot 33$ lakhs to Re. 7.21 lakhs in value. Sweden continued to be the chicf source of supply, and the contraction was largely due to competition by matches of Indian manufacture. Among other items, the value of soap declined slightly by Rs. 38,228 to Rs, $14 \cdot 57$ lakhs, chiefly in imports from the United Kingdom.

## EXPORTS.

## Indian Produgee and Manufactures.

11. Agricultaral Conditions.-As the bulk of the export trade of this port ponsists of agricultural produce, it will be ubeful to give a brief review of weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces before entering into a detailed examination of the figures relating to the more important commodities.

In Sind the raisfall was excessive, and the consequent serious floods caused heavy losses both to the cultivators apd to the Government, especially in the Southern portion of the Thar and Parkar and Hyderabad districts. The inundation of 1927 was also not favourable. The river commenced to rise late and fell below the normal irrigating level earlier than usual, and the kharif crops were largely saved by resorting to the distribution of canal water by rotation. The prospects for the rabi crops are, however, feported to be good. In the Pumjab the monsoon appeared in the beginning of Juty, and gave sufficient rains all over the province, except in the west where it was light. Subsequent rains were, however, irregular, and the climatic conditions were not so favourable for the sowing of the kharif crops. The river supply was also not sufficient to meet the keen demand on the various canals. Winter rains, however, proved somewhat beneficial to the standing crops, but it is now reported that subsequent high winds and hailstorms at a criticad stage of development have seriously affected the rabi crops all over the province.

The rabi area in the Punjab up to the end of December 1927 was 5,843,673 acres as against $5,738,992$ acres during the corresponding period last year, an increase of 104,681 acres, which was mainly attributed to the commencement of irrigation on the Sutlej Valley canals. It may be mentioned here that an important stage in the progress of the Sutlej Valley project was reached this year in the completion of the Ferozepore weir, which was the second of its kind to be completed, the first being the Suleimanke weir opened in 1926. In the United Provinces the monsoon broke in June, and the khar if sowings commenced at the proper time. Heavy rains in October, however, damaged the crops to a certain extent The mabi sowings were, on the oth er hand, carried out under very favourable conditions, and a good harvest is expected.

In the following table the area and yield for the past two seasons of the three most important crops, in Bombay, the Punjab and the United Provinces, viz., wheat, rape and mustard seed and cotton are compared, the figures being taken from the returns furnished by the Directors of Agriculture for those provinces. In the case of wheat, rape and mustard seed, which are rabi crops, the figures for the season 1926-27 are compared with those for 1925-26 as the produce exported in 1927-28 relates mostly to the former season. In the

## Fokeign Exports. (Agricultural conditions.)

case of cotton, which is a kharif crop, exports relate to the season 1927-28, and therefore the crop figures for 1927-28 are compared with those for 1926-27.

Table No. 12

The above figures show that the total outturn of wheal in the three provinces increased by 5 per cent despite a curtailment of 1 per cent in the area. The improvement in the case of Sind and the Punjab was ascribed to a better yield in the irrigated areas, while in the United Provinces it was the result of good winter rains, which proved beneficial to the crops in many districts. The areas sown under rapeseed in both Sind and the Punjab were higher by 29 per cent and 17 per cent respectively than those in the previous year, and in consequence the outturn of the crops also rose by 21 per cent and 7 per cent. The United Provinces, on the other hand, produced 21,000 tons more, though the area cultivated contracted by 203,000 acres. The colton crops in the three provinces showed a decrease in both area and yield, the former to the extent of 24 per cent and the latter 6 per cent. In Sind the late inundation of the year was mainly responsible for the curtailment in the area and the consequent decline in the yield, and the production further suffered from heavy rains and floods in some of the districts and also as a result of the early fall of the river. The reduction of 26 per cent in the area in the Punjab was partly due to the heavy fall in the price of cotton last year and partly to the scarcity of rain at sowing time. The monsoon rains, however, proved beneficial, and the outturn increased slightly by $l$ per cent. Of the total area under cotton in the Punjab, viz., 2,074,000 acres, some $1,316,000$ acres were reported to be
under Desi and 758,000 acres under American cotton. In the Uwited Provinces, both the area and outturn registered a decline. Heavy rains at the time when the crop was in flower caused some damage in a number of districts. The total area and yield of these three crops in the whole of India were as follows:-

12. The following table gives the value of the export trade, including reexports, under the five main classes for the last four years and the pre-war year.

Roteign Exports. (Frood-grains and fiour.)

## Class E.-Food, Drink and Tobacco.

13. The total value of the articles included in class I rose from Rs. 449 lakhs to Rs. $7 \cdot 4$ lakhs, or by 66 per cent. The variations in the volume and value of some of the more important articles are discussed in the following paragraphs.

Grain, Pulse and Flour.-An all-pound expansion in the slipments of the various kinds of food-grains was the chief redeeming factor of the export trade of the Province during the year under report. The aggregate quantity of exports under this head rose by 87 per cent to 481,915 tons and its value by 67 per cent to Rs. 726.96 lakhs over the figures recorded in 1926-27.

The following statement compares the quantities of the different kinds of food-grains exported during 1927-28, 1926-27. and the pre-war year:-

Wheat.,-After passing through two years of acute depression the export business in wheat showed some activity, and /shipments which last year stood at the low level of 168,769 tons valued at Rs. 257 . 65 lakhs rose appreciably to 297,479 . tons valued at Rs. 434.62 lakhs, an increase of 128,710 tons or 76 per cent in quantify and of Rs, $176 \cdot 97$ lakhe or 69 per cent in value. A larger available surplus resulting from a better crop and a good demand from abroad coupled with more inclination on the part of holders to sell when selling was good, especially at the time when the produce of other exporting countries had not arrived on the market, made export business possible, and nearly 83 per cent of the entire shipments took place during the short period of three months June to August. The recovery, though satisfactory, can only be called partial when compared with the pre-war level of 893,000 tons. Indian wheat is now consumed in the country on a much larger scale than before. Moreover the world production during the year was ayain ample, and the abundant supply caused a keen competition among exporting countries, with
the result that prices were forced downward, especially during the latter part of the year, making business on a lurger scale dillicult. The local price of white wheat opened at Rs. 5-1-0 per maund on the 5th April and rose steadily to Rs. 5-6-6 in the first week of May, which was the highest figure of the year. This level was more or less retained for about the eext four weeks, but thereafter the arrival of the new crop in the market caused a decline, and the quotation fell to Rs. 5 -5-3 in the first week of June. A steady decline continued and after touching Rs. 0-2-6 in the last week of June, the price came down to Rs. 4-15-6 in the second week of August. The succeeding few weeks witnessed a slight appreciation, but a relaxation again set in, and Rs. 4-13-0 was recorded on the 26 th October, which was the lowest figure of the year. The situation in the following months continued to be easy, and with minor fluctuations the year closed at Rs. 4-14-6 on the 27th March. The following statement shows the distribution of wheat exports for the past two years and the pre-war year.

Table No. 14.

The above figures show that almost all the principal countries drew larger quantities than in the previous year, Shipments to the United Kingdom rose by 114,412 wns or 84 per cent. to 251,053 tons, and France and Bulgium, the next best customers, took 7,099 tons and 12,453 tons more than in 1926-27.

It may be noted that shipments of wheat from Karachi represented 99 per cent. of the total quantity ( 299,733 tons) exported from India.

Other Food Grains.-Barley was next in importance to wheat among the different food-grains, and it is satisfactory to note that shipments which, last year, dwindled to the low figure of 838 tons from 388,062 tons in 1924-25 and 34,473 tons in $1925-26$ rose to 68,902 tons valued at Rs. $81 \cdot 99$ lakhs in 1927-28. A good crop made it possible for shipments to be effected on a larger scale in response to a keen demand from abroad which resulted from a shortage in Europe and Canada. Of the total quantity exported, viz., 68,902 tons, the principal amounts went to the United Kingdom (31,577 tons), Germany (24,523 tons), Belgium (7,354 tons) and the Netherlands (2,710 tons). Karachi was the largest exporter of barley also, shipments representing 96 per cent. of the entire quantity ( 71,628 tons) exported from India. Maize was also in good demand, exports having advanced from the negligible figure of 16 tons valued at Rs. 2,230 in 1926-27 to 9,396 tons valued at Rs. 10-28 lakhs in 1927-28. Smaller crops in the United States of America and a delay in the movement of the Argentine crop led to an enquiry for Indian maize, the United Kingdom. and Belgium being the chief purchasers. Of the total quantity of maize exported from India, viz., 9,496 tons, the bulk, viz., 9,346 tons went through this port. The quantity of gram shipped during the year was 10,705 tons and its value Rs. 15.69 lakhs as against 8,904 tons valued at Rs. 14.07 lakhs in 1926-27. The increase was most noticeable in shipments to France $(+1,334$ tons) and Egypt ( +180 tons). The share of Karachi in the total quantity of gram shipped from India was 61 per cent. as against 64 per cent. last year. Shipments of wheat flour increased in quantity by 1,001 tons to 36,255 tons, but lower prices reduced the value by Rs. 1.41 lakhs to Rs. 73.08 lakhs. Egypt as asual, took the largest quantity, viz., 11,078 tons, but it was 4,443 tons less than that exported in 1926-27. The decrease was due to larger purchases from Australia where prices were more favourable than those at this port. Aden and Italian East Africa, on the othor hand, took more, viz., 5,632 tons and 2,080 tons as against 3,223 tons and 266 tons, respectively in the previous year. There was also a healthy expansion in the export business in rice during the year under report. The aggregate shipments amounting to 47,296 tons valued at Rs. 94.77 lakhs were the highest in the quinquennium, and showed an excess of 13,612 tons or 40 per oent. in quantity and of Rs 22.73 lakhs or 32 per cent. in value over the figures recorded last year. Heavy shipments of boiled rice to Muscat Territory and Trucial Oman ( $+5,498$ tons) and Other Native States in Arabia ( $+6,337$ tons) mainly accounted for the improvement. Bengal xice generally finds most favour with the consumers in Gulf ports, but that rice being dearer this year, by about Rs. 18 per candy, larger purchases were made at this port.

## Class IL-Raw Materials and Produce and Articles Mainly Unmanufactured.

14. The total value of exports of the various articles included under this class 'fell by Rs. 59.85 lakhs or 3 per cent. to Re. 1,936.73 lakhs. The fluctuations in the trade in some of the principal articles are explaned below :-

Raw Cotton.-The following table shows how cotton exports were distributed during the past two years and the pre-war year 1913-14 :-

The financial crisis in Japan and the civil war in China have left their mark on Karachi's trade in raw cotton, shipments of which fell heavily by 15,437 tons or 11 per cent. to 131,558 tons in quantity and by 1 ks .96 .76 lakhs or 7 per cent. to Lis. $1: 262.68$ lakhs in value during the year under report. These
two countries, which between them took 73,409 tons or half the entire quantity exported last year, purchased only 34,705 tons, a shortage of 38,704 .tons. The banking crisis in Japan severely affected the textile industry of the country, and mills were obliged to work short tine in consequence. Notwithstanding this falling off, Japan again proved to be our best customer, her total purchases 3mounting to 32,698 tons. The decrease of 38,704 tons in shipments to Japan and China was, however, to a great extent, counterbalanced by the substantial increase of 23,233 tons in exports to European countries, all of which took larger quantities than in the previous year. Italy stood first with a total purchase of 29,888 tons, an advance of 2,587 tons over the figures recorded in 1926-27. Germany and the United Kingdom, which came next, purchased as much as 24,402 tons and 11,823 tons as against 14,823 tons and 7,876 tons, respectively in the previous year. It may be remarked here that the prices obtainable during the year were more favourable than in the previous year, and business on a larger scale, especially with European countries, should have been possible, were it not for the fact that some dealers again preferred to hold back their cotton in the expectation of higher values. It is understood that they received greater financial support from some of the local banks, this year, and were therefore in a position to hold their stocks for a longer time than in previous years. Notwithstanding the restricted volume of business done, shipments of cotton were the third highest on record, and accounted for 46 per cent. of the total value of the export trade of the port as against 55 per cent. in 1926-27. As in the previous two years, the United Provinces and Rajputana sent some cotton for export at this port, the former to the extent of about 6,000 to 8,000 bales and the latter about 15,000 bales. It may be noted that shipments of cotton through Bombay again showed a heavier proportionate decrease, viz, 19 per cent., the figures for the past two years being 373,924 tons and 303,755 tons, respectively.

Wool, raw.-The increased trading done in the previous year was further improved upon during the year under report, shipments rising by $3 \frac{1}{2}$ million lbs. or 13 per cent. to 30 million lbs. in quantity and by Rs. 31 lakhs or 14 per cent. to Rs. $260 \cdot 97$ lakhs in value. Price stability and abrisk demand throughout the year were among the principal fuctors which brought about the expansion. The United Kingdom, our usual chief customer, took $26{ }_{4}^{2}$ million lbs. valued at Rs. 22.82 lakhs, an increase of $1 \frac{1}{2}$ million lbs. in quantity and of Rs. $14 \cdot 81$ lakhs in value as compared with 1926-27. Good prices realized at the Liverpool auction sales stimulated exports, and shipments to the United States of America also made a big advance, the figures recorded, viz., $3_{4}^{1}$ milliou lbs. and Rs. 28.26 lakhs, showing an increase of $1 \frac{1}{2}$ million lbs. or 91 per cent. in quantity and of Rs. 13.74 lakhs or 95 pe cent. in value as compared with the previous year. It may, however, be noted that the increase of $3_{2}^{1}$ million lbs. in the exports of Indian wool mentioned above was partly offset by a decrease of 2 million lbs. in re-exports of foreign wool, mostly Kaudahar wool. This variation is dealt with at a later stage in this report.

Seeds.-The steady decline in exports of seeds, which has been such a noticeable feature of the past three years, continued during the year under report also, and the total shipments were further reduced by 18 per cent. to 80,198 tons in quantity and by 28 per cent. to Rs. $155 \cdot 33$ lakhs in value. The
following table compares the volume and value of exports of the different kinds of seeds to the principal countries during the past two years and the prewar year.

Tabie No. 16.

Rapeseed.-Shipments of rapeseed, which represented nearly 75 per cent. of the volume of the oilseeds trade of the port, contracted by 30,122 tons in quantity and by Rs. $74 \cdot 12$ lakhs in value. Several factors contributed to bring about the depression in the trade. Though the crop was slightly larger than in the previous year, the inferior quality of the toria variety made overseas buyers reluctant to purchase on a larger scale. Moreover an increased internal consumption also restricted exports to a certain extent. It is further reported that rapeseed was displaced in many mills at home and on the continent by telatively cheaper groundnuts, the all-India 1927-28 crop of which was the highest on record. From the figures given in the above table it will be seen that Italy, the chief purchaser of rapeseed in recent years, took only 19,372 tons as against 42,646 tons in 1926-27, while shipments to France also declined from 14,189 tons to 9,365 tons. It is significant to note that the allIndia exports of groundnuts to Italy and France, which, last year, stood at 50,333 tons and 125,379 tons rose as high as 79,776 tons and 143,400 tons, respectively during the year under report. Shipments of rapeseed to the United Kingdom showed a partial recovery at 11,485 tons, but the figure was far behind the quinquennial average of 24,737 tons. As usual, Karachi was the chief exporter of rapeseed, her share representing $91 \%$ of the total quantity, viz., 66,259 tons shipped from India.

Other seeds.-.-Of these, cotton seed is the only important item worth notice. After a heavy fall of 64,901 tons in the previous year, shipments of this seed tose by 12,207 tons to 18,927 tons in quantity and by Rs. $12 \cdot 60$ lakhs to Rs. $19 \cdot 21$ lakbs in value. The United Kingdom was practically the sole purchaser as usual. Exports of sesamum and castor seeds' were insignificant and need no comment.

Hides and skins, raw.-- The following table compares the exports of raw lides and skins to the different countries during the past two years:-

Table No. 17.

Table No. 17-contd.

Raw Hides.--Shippers of raw hides had a busy and prosperous year. A world shortage created a large demand for Indian hides, both from the United Kingdom and the continent, and exceptionally high prices were paid. In consequence, the aggregate shipments advanced considerably by 3,595 tons or 123 per cent. to 6,524 tons in quantity and by Rs. 51.78 lakhs or 180 per cent. to Rs. $80 \cdot 57$ lakhs in value. Germany took the largest quantity, viz., 2,733 tons valued at Re. $35 \cdot 47$ lakhs, an excess of 1,910 tons and of Rs. $26 \cdot 17$ lakhs over shipments in the previons year. The bulk of her purchases comprised cow hides and cow calf skins, The United Kingdom also drew heavily (mostly cow hides), her purchases rising from 428 tons valued at Rs. 3.66 lakhs in 1926-27 to 1,034 tons valued at Rs. $12 \cdot 82$ lakhs in 1927-28. Spain, last year's chief customer, on the other hand, took 108 tons less, but higher pricess raised the value by Rs. $1 \cdot 16$ lakhs.

Raw Skins.-The export trade in raw skins did not share the good fortune of the hides trade. The aggregate slipments amounting to 4,587 tons valued at Rs. 66.51 lakhs showed a further set-back to the extent of 598 tons or 11 per cent. ìn quantity and of Rs. 601 lakhs or 8 per cent. in value as compared with the previous year. The reduction in the trade was due to the diversion to Calcutta of large quantities of Punjab skins, which formerly came to this port for shipment. Goat skins, the principal article, decreased in quantity from 5,075 tons to 4,321 tons and in value from Rs. 70.91 lakhs to Rs. 61.53 lakhs, mostly in shipments to the United States of America. Exports of sheep skins, on the other hand, showed an improvement of 152 tons as a result of a better demand from Italy and Germany.

## Trade.

Miscellaneous.-Among articles of lesser importance the following deserve notice. Exports of raw silk increased further in value by Rs. 5.73 lakhs to Rs. 26.38 lakhs owing to larger purchases of mulberry silk, raw by the United Kingdom and of chasam or waste silk and cocoons by France. The value of manures advanced by Rs. $1 \cdot 16$ lakhs to Rs. $39 \cdot 54$ lakhs, shipments mainly consisting of crushed bones (Rs. 26.72 lakhs) and bone-meal (Rs. 11.43 lakhs). The former went mostly to Belgium, Germany and France, while bone-meal was chiefly taken by the United Kingdom, Ceylon, Germany and the United States of America. Exports of chromite (chrome iron ore), a product of Baluchistan which, last year, registered a decline of over 9,000 tons made a partial, recovery, the quantity increasing by 6,836 tons to 20,986 tons and the value by Rs. 2.05 lakhs to Rs. 6.29 Jakhs. The chief purchases were made by Belgium ( 11,916 tons), France (4,000 tons) and the Netherlands (3,900 tons).,

## Class III.-Articles Wholly or Mainly Manufactured.

15. The aggregate value of the articles included under this rather unimportant class rose by Rs. 5.86 lakhs to Rs. 31.36 lakhs. Shirmeuts of skins, dressed or tanned, the principal article, were valued at Rs. 10.09 lakhs an increase of Rs. $\mathbf{J} 64$ lakhs, which was due to a larger demand for sheep skins, from the United Kingdom.

## Foreign Merchandise, Re-exported.

16. The total value of foreign merchandise re-exported during the year under report declined by Rs. $28-21$ lakhs to Rs, $139 \cdot 48$ lakhs. The decrease was shared by all the three principal articles entering into the entrçôt trade of this port, viz., raw wool, woollen manufactures and sugar. Exports of raw wool fell by 2 million lbs. to 7 million lbs. in quantity and by Rs. 15 lakhe to Rs. 58.53 lakhs in value, mainly owing to smaller shipments to the United Kingdom and the United States of America, which took more Indian wool instead. Exports of tcoollen manufactures, which contributed Rs. 37.33 lakhs to the total value of the re-export trade, exhibited a contraction of Rs. 6.30 lakhs. Shipments consisted mostly of Persian Carpets, and the decrease was due to a reduced demand from the United States of America. Re-exports of sugar amounted to 4,340 tons valued at Rs. 11.09 lakhs, a decrease of nearly 1,200 tons in quantity and of Rs. 6.18 lakhs in value as compared with the previous year. The bulk of the sugar, as usual, went to the Gulf ports, and the decrease was most noticeable in shipments to the Bahrein Islands and Muscat Territory and Trucial Oman, which, this year, drew much larger quantities from Bombay, where the prices quoted were somewhat more favourable than at this port.

## III.-Coasting Tyade.

17. The total value of the Coasting trade of the Province of Sind declined by R.s. 24 lakhs or 1 per cent. to Rs. 1.716 lakhs during the year under review.

## Chief Port-Karachi.

18. The following table shows the aggregate value of the Coasting trade of the port of Karachi. including Government stores and treasure, for the last four years and the pre-war year :-

Table No. 18.

The aggregate value of the coasting trade of the chief port amounted to Rs. 1,708.07 lakhs, a decrease of Rs. $17 \cdot 49$ lakhs or 1 per cent. as compared with 1926-27. Both imports and exports registered a decline, the value of the former having fallen by Rs. $13 \cdot 80$ lakhs to Rs. $1,110 \cdot 11$ lakbs and that of the latter by Rs. $3 \cdot 68$ lakhis to Rs. 597.97 lakiks.

## Private.

19. The coasting trade in private merchandise between the chief port, Karachi and other ports in India, grouped by provinces, is shown in tho following table :-

Table No. 19.

*"A" represents Indian produce.
$\dagger$ "B" represents Foreign merchandise:

## Imports.

20. Indian Merchandise.-The value of Indian produce and manufactures imported into Karachi from the coast ports fell from Rs. 1,018.67 lakhs to Rs. $1,009 \cdot 26$ lakhs. The articles responsible for the decrease wese collon twist and yarn (-Rs. 13.52 lakhs), grey piece-goods (-Rs. 18.96 laklss), white piece-goorls (-Rs. $5 \cdot 82$ lakhs) and candles (—Rs. $2 \cdot 24$ lakhs) from Bombay, coal (-Rs. 6.51 lakhs) from Bengal. copra or coconvt-kernel (—Rs. $12 \cdot 40$ lakhs) from Madras and pepper (-Rs. 1.37 lakhs) from Travancore. The following articles, on the other hand, showed increases :-Benzine and petrol ( + Rs. $32 \cdot 19$ lakhs) and kerosene oil ( + Rs. 12 lakhs) from Burma, cotton coloured piece-goorls ( + Rs. 2-70 lakihs) and matches ( + Rs. $1 \cdot 60$ lakhs) from Bombay, and fresh vegetables ( + Rs. 243 lakhs) and gram ( + Rs. $2 \cdot 17$ lakhs) from Kathiawar.

Cotron Piece-goons.-The table below gives the trade in Indian piecegoods imported coastwise during the past four years and the pre-war year under each of the three headings, grey, white and coloured :-

Table No. 20.

Forcign Meichandise. The total value of imports of foreign merchandise into Karachi declined by Rs, 3.76 lakhs to Rs. 84.72 lakhs chiefly irr receipts of cotton grey piece-goods (-Rs. 2.42 lakhs) and cigarettes (-Rs. 1.26 lakhs) from Bombay. An increase was, on the other hand, noticeable in arrivals of cotton coloured picce-goods ( + Rs. 5.35 lakhs) from Rombay.

Cotton Piece-goons.-.-The following table shows the imports of foreign piece-goods coastwise for the past four years and the pre-war year onder each of the three headings, grey, white and coloured:-

Table No. 21.

## Exports.

21. Indian Produce and Manufactures.--The total value of Indian produce and manufactures exported from Karachi to the coast ports receded by Rs. 12.56 lakhs to Rs. 508.61 lakhs. The articles which contributed to the decrease were wheat (—Rs. 33.79 lakhs) to Bombay, Rice (-Rs. 19.17 lakhs) to Cutch, Kathiawar and Goa, Jowari (-Rs. 8.06 lakhs) to Cutch and Kathiawar, cottonseed (-Rs. 3.67 lakJs) to Kathiawar, and fish dry, unsalted (-Rs. $3 \cdot 30$ lakhs) to Burma. Increases, on the other hand, occurred under cotton ( + Rs. 14.78 lakhs), to Bombay and Madras, gram ( + Rs. 6.06 lakhs), pulse ( + Rs. 6.14 lakhs) and wheat flour ( + Rs. 8.70 lakhs) to Madras, rapeseed ( $+\mathrm{Rs} .4 \cdot 23$ lakhs) to Calcutta and lerosene oil ( $+\mathrm{Rs} .4 \cdot 19$ lakhs) to Kathiawar.

The fcllowing table shows the exports of cotton to Bombay during the past four years and the pre-war year :-

$$
\text { Table No. } 22 .
$$

Foreign Derce andise.-The total value of exports of foreign merchandise from Karachi to coast ports advanced by Rs. 9.76 lakhs to Rs. 87.16 lakhs, mainly in shipments of fruits, dried ( + Rs. 8.88 lakhs) to Bombay. A decrease was, on the other hand, noticeable in shipments of sugar (-Rs. 4.87 lakhs) to Madras.

## Subordinate Ports.

22. Keti Baniar and Sirganda.-The total value of the entire trade with these two ports, which is confmed to trade with coast ports, declined from Rs. $14 \cdot 44$ lakhs to Rs. $8 \cdot 26$ lakhs to which Keti Bandar contributed 70 per cent. and Sirgonda 30 per cent. Rice is the chief produce of both these ports. During the year under report Keti Bandar exported 1.207 tons of rice to Cutch and 330 tons to Karachi, while Sirganda sent $], 687$ tons to Cutch exclusively.

## IV. Miscellaneous.

23. Shipping.-The table below gives the number of vessels entered at and cleared from the ports of the Province of Sind during the past two years:-

Table No. 23.

Foreign Trade.-The total number of vessels engaged in the foreign trade increased from 1,013 to 1,193 and their tonnage from $1,846,501$ to $2,024,908$ tons. The improvement occurred under both steam and sailing vessels, the number of the furmer advancing from 611 to 675 and that of the latter from 402 to 518 . The average tomage par steamer decrased slightly from 2,961 tons to 2,927 tons. The sailing vessels were native craft trading to the Persian Gulf ports, Aden and Dependencies, Zanzibar, Kenya Colony, Somaliland Protecterate and Madagascar.

The following figures show the number of steamers of each nationality that entered the port of Karachi during the year 1927-28 as compared with 1926-27:-

Table No. 24.

It will be seen from the above table that the total number of steamers entering the port rose by 57 , the major portion of the increase, viz., 33 being appropriated by vessels flying the British flag, whose number went up to 544 from 51 i in $1926-27$. Foreign steamers exhibited a net increase of 5 , but the share of the vessels of the various nationalities participating in the trade showed some notable fluctuations. German vessels, in particular, made a big advance, their number having increased from 42 to 54 , mostly at the expense of Italian, Danish and Jugo-Slavian vessels. The expansion in the export trade in wheat and other food-grains, raw hides and wool mainly accounted for the increased steamer tonnage during the yewr under report.

Freight.-Freight rates to the United Kingdum which kept at the low level of $17 s$. $6 d$. for wheat and $16 s$. 6 fl . for rapeseed rose to $23 s$. and 22 s . in
the second week of June, the highest figures of the year. This high level was, however, maintained for about two or three weeks only. A decline set in thereafter, and the closing rates on the 28th of March were 20s: 6d. for wheat and $19 s$. $6 d$. for rapeseed.
24. Exchange.-Exchange fluctuated within narrow limits during the year, the extremes being $1 s .5_{16}^{13} d$. and $1 s .6 \frac{1}{16} d$., reached on the 27 th April and 15th December 1927, respectively.
25. Revenue.-The following table shows the total collections for the province on account of import and export duty and refunds therefrom and the duty on imported salt, separately for the last four years and the pre-war year:-

Table No. $2 \overline{0}$.

| Import Duty on Sult-Cthuyern. meul. |  | 106 |  |  | $\cdots$ |

The total Customs duty realized during the year under report amounted to Rs. 570.84 lakhs, showing a decrease of Rs. 12.83 lakhs or 2 per cent. as compared with the previous year. Collections on account of import duty on private merchandise declined by Rs. 27.78 lakhs to Rs. 518.37 lakhs, mainly under sugar and cotton picce-goods, the two leading articles of the import trade. Realizations on sugar fell by Rs. $44 \cdot 14$ lakhs to Rs. $137 \cdot 08$ lakhs, while those on cotton piece-goods by Rs. $14 \cdot 70$ lakhs to Rs. 97.16 lakhs. Decreases were also recorded under matches, Rs. $10 \cdot 68$ lakhs (-Rs. $3 \cdot 46$ lakhs), motor cars, motor cycles and parts, Rs. 10.36 lakhs ( - Rs. 2.65 lakhs) and liquors, Rs. $42 \cdot 20$ lakhs ( - Rs. $2 \cdot 34$ lakhs). There was, on the other hand, an increase in receipts from tobscco, Rs. $30 \cdot 14$ lakhs ( + Rs. 16.00 lakhs), kerosene oil, Rs. 18.50 lakhs, $(+$ Rs. 1.49 lakhs), iron and steel, including special protective duties, Rs. 35.55 lakhs ( + Rs. 7.89 lakhs), woollen-yarn and other manufactures, Rs. 17.39 lakhs ( + Rs. 4.54 lakhs) and provisions, Rs. 16.47 lakhs ( + Rs. 7.58 lakhs). It is noteworthy that of the total import duty on provisions, viz, Rs. 16.47 lakhs, vegetable products claimed the bulk, viz., Rs. $1 \mathrm{I} \cdot 28$ lakhs. Protective duties on iron and steel rose by Rs. $7 \cdot 14$ lakhs to Rs. $30 \cdot 38$ lakhs, but those on paper fell slightly from Rs. 2.39 lakhs to Rs. $2 \cdot 36$ lakhs. The import duty on Government stores was Rs. $42 \cdot 22$ lakhs, an increase of Rs. $13 \cdot 49$ lakas as compared with the previous year. The total recoveries on account of export duty advanced by Rs. $1 \cdot 46$ lakhs to Rs. $10 \cdot 25$ lakhs, to which rice contributed Rs. 3 -08 lakhs (+Rs. 31,296) and raw hides and skins, Rs. $7 \cdot 13$ lakhs ( + Rs. $1 \cdot 16$ lakhs).
26. Changes in the rates of dity.-Various important changes were effected in the rates of import duty during the year under report.' In pursuance of the recommendations of the Tariff Board, the Steel Industry (Protection) Act 1924, which was due to expire on the 31st March 1927, was replaced by the Steel Industry (Protection) Act, 1927 with effect from 1st April 1927. The new act provided for the continuance of protection to the Steel Industry for a further period of seven years and also introduced a system of differential duties under which certain articles of iron and steel of British manufacture pay a lower rate of duty than the same articles of foreign make. Towards the middle of the year, the Bamboo Paper Industry (Protection) Act, 1925 which was found defective in certain respects was modified by a further Act, whereby printing paper containing no mechanical wood pulp was, according to the original intention of the Legislature, brought within the scope of the protective duty of one anna per lb . with retrospective effect from 21st Septamber 1925, the date on which the Bamboo Paper Industry (Protection) Act became law. The amended Act also made it clear that for determining the rate of duty to be levied on paper, the percentage of mechanical wood pulp was to be calculated on the fibre content and not on
the totai weight. Another Act passed in September $192 \overline{7}$ exemioted certain machinery and mill stores from import duty as from 1st October, the details of which will be found along with other changes effected by the Indian Tariff (Cotton Yarn Amendment) Act, 1927 in the table below :--

| Articles. | Old rate. | New rate. |
| :---: | :---: | :---: |
| 1. Sago flour . . . . . | 15 per cent. ad valorem | Free, with effect from 1st October 1927. |

IMPORTS

Ten years' balance of trade from 1919-20 to 1928-29 and the pre-war year 1913-14.

## GENERAL REVIEW OF FOREIGN TRADE.

1. General Position of Trade.-The aggregate value of the entire maritime trade of the Province of Sind for the year 1928-29 increased by Rs. 140 lakhs or 2 per cent to Rs. 7,789 lakhs. This total would have been considerably greater, but for a heavy reduction in exports of raw cotton and imports of cotton goods coastwise to and from Bombay respectively owing to the labour troubles there.

In the foreign trade, which totalled Rs. 6,350 lakhs or 7 per cent more than last year, exports at Rs. 2,924 lakhs showed an increase of Rs. 47 lakhs or 2 per cent, while imports were up by Rs. 371 lakhs, the total being Rs. 3,425 lakhs, and the increase no less than 12 per cent as compared with the previous year. These figures contrast somewhat shis.rply with the deep depression so prevalent in commercial circles in Karachi. It is true that owing to the partial failure of the crops, exports of wheat were small, but the exports of cotton were the second highest on record, while the quantities of wool and raw hides and skins shipped were only exceeded twice previously. As regards insports, the figures for iron and steel, mineral oils, woollen goods and motor vehicles established a new high record, and sugar imports were not far below the total for 1926-27, the record year. In fact the total volume of the import trade is a record in the history of the port, the excess of value in 1920-21 being due to higher prices. The widespread. pessimism referred to above must therefore be ascribed to the keenness of competition coupled with the diversion of trade, not to other ports, but to new channels based on Karachi.

Bearing in mind the approaching completion of the Sutlej valley and Sukkur barrage irrigation projects, and the great quantities of surplus produce which must then be available for export, and considering also the additional imports required to meet the wants of the population in the new irrigated areas, a very large increase in the trade of Karachi in the near future seems to be assured. Meanwhile, the far from unsatisfactory present volume of trade has the undoubted advantages arising from a stable exchange. •

It is noteworthy that whereas the value of imports of private merchandise from foreign countries into Karachi improved by Rs. 511 lakhs, the corresponding figures for Bombay record a decline of Rs. 227 lakhs.

As regards the coasting trade, an event of outstanding importance was the starting by private enterprise of a new industry for the manufacture of white salt, mainly for the Calcutta market, advantage being taken of the special concessions granted by Government for the shipment of non-duty paid salt in bond to that port. Shipments to Calcutta during the year amounted to 7,675 tons. The industry is however at present severely handicapped by the lack of adequate facilities for transport by water from the works to the exporting vessels, and developments on a large scale cannot be expected until this drawback is removed.
2. Balance of Trade.-The aggregate balance of trade in merchandise and treasure, including transactions on Government account, was not only adverse for the third year in succession, but the debit balance of Rs. 177 lakhs recorded last year increased to Rs. 501 lakhs. Large and exceptional imports
of wheat amounting to Rs. 152 lakhs in value, belped to swell this figure. Excluding Government stores, the debit balance was, however, much less, diz,s Rs. 255 lakhs. The position as regards the extent of imports and exports as well as the balance of trade during the past ten years is illustrated in the two graphs prefixed to this report.
3. Geographical distribution-The total value of the foreign trade, viz., Rs. 6,350 lakhs represented 82 per cent of the entire turnover during the year. Imports contributed 54 per cent and exports 46 per cent to this value. The value of the import trade amounting to Ris. 3,425 lakhs was higher than in any previous year, except the boom year 1920:21, when it amounted to Rs. 3,886 lakhs. The value of the export trade, v.z., Re. 2,924 lakhs exceeded the amounts recorded in 1926-27 and 1927-28 by 9 per cent ond 2 per cent;, respectively, but it was much behind the figures for $1924-25$ and $1925-26$ which totalled Rs. 5,498 lakhs and Rs. 3,710 lakhs. The distribution of the foreign import and export trade of Karachi in private merchandise by countries is shown in detail in Table B of the Appendix, with the percentage which each country bears to the whole. The following table compares the percentage shares of the principal countries during 1928-29 with those in 1927-28 and the pre-war year 1913-14:-

| - |  |  |  |  | Imports. |  |  | Exports. |  |  |

Import Trade.-The total value of the goods purchased from countries in the British Empire during the year under report amounted to Rs. 1,696 lakhs, representing 53.80 per cent of the total turnover of the import trade of the port as against 53.28 per cent in 1927-28. The bulk of the business was, as usual, done with the United Kingdom. Her sales rose by Rs. 120 lakhs to Rs. 1,464 lakhs, the improvement being most noticeable in the supplies of entton piece-goods. The percentage share in the total trade was, however, less, viz., 46 per cent $x$ against 51 per cent last year. The import trade with Auscralia, which is ordinarily insignifiesnt, attract notioe this year owing to the large importations of wheat amounting to 103,426 tons valued at Rs. 149 lakhs. Among foreign countries in Europe, Germany maintained the leading position. She supplied more machinery, metals, hardware and haberdashery, and in consequence the value of her transactions advanced by Rs. 33 lakhs to Rs. 175 lakhs. Italy came next, displacing Belgium which held the second position last year. Imports therefrom, consisting chiefly of cotton coloured piece-goods, cotton and artificial silk piece-goods and woollen blankets, have, in recent years, made rapid strides, and, during the year under report, the total value reached the record figure of Rs. 133 lakhs, exceeding last year's total by no less than Rs. 45 lakhs. Italy's share in the total trade also rose in consequence from 3 to 4 per cent. Imports from Belgium suffered a set-brek, the total value declining from Rs. 105 laklis to Rs. 96 lakhs and the percentage share from 4 to 3, mainly as the result of reduced supplies of metals. The improvement of Rs. 31 lakhs in the value of imports from France occurred chiefly under metals, woollen piece-goods, and pneumatic motor covers, while reduced purchases of 'vegetable product' solely accounted for the contraction of Rs. 7 lakhs in the value of imports from the Netherlands. Among foreign countries in Asia, Java was, as usual, easily first. Heavy purcheses of sugar from that country raised the total value of imports by no less than Rs. 68 lakhs to Rs. 360 lekhs, a figure next in importance to that of the United Kingdom. The total value of imports from Japan amounted to Rs. 98 lakhs, an inerease of Rs. 14 lakhs due to larger supplies of cotton grey and coloured piece-goods. The share of the United States of America in the total trede dropped from 7 to 5 per eent and the total value of imports from Rs. 188 to Rss, 170 lakhs owing chiefly to reduced arrivals of kerosene and lubricating oils.

The present poi,ition of the principal countries as regards the more important commodities imported is summarized in the following statement:-

Export Trade. The share of the British Empire in the aggregate value of the export trade of the port, which last year showed some recovery at 35 per cent declined to 30 per cent, the defiriency occurring in transactions with the United Kingdom. The total value of exports to that country decreased by Rs. 148 lakhs to Rs. 773 lakhs and the percentage share from 32 to 27 per cent, which was due chiefly to reduced shipments of wheat. Among continental countries, a noteworthy feature was the recapture by Germany of the premier position occupied by Italy for the last five years. Exports to Germany advanced considerably in value from Rs. 338 lakhs in 1927-28 to no less than Rs. 472 lakhs in 1928-29, her share in the aggregate exports rising in consequence from 12 to 16 per cent. The expansion occurred chiefly in puxchases of raw cotton, barley and chrome ore. Italy's transactions with the port were valued at Rs. 312 lakhs, a decrease of Rs. 35 lakhs, the result of reduced orders for cotton and rapeseed. Belgium fared better, the total value of her trade having advanced by Rs. 9 lakhs to Rs. 171 laklis because of larger takings of cotton, wool, barley and cow hides. The position as regards the trade with France was not quite satisfactory as greatly reduced purchases of cotton and wheat resulted in a considerable fall of Rs. 54 lakhs in the total value amounting to Rs. 171 lakhs. As regards trade with Asiatic countries, Japan, our principal customer, has apparently not yet recovered from the bad effects of last year's financial crisis. The value of her purchases, consisting mainly of cotton, which in 1926-27 stood at the high figure of Rs. 503 lakhs dropped to Rs. 315 lakhs in 1927-28, and during the year under report declined further to Rs. 289 lakhs, thereby reducing the percentage share from 11 to 10 per cent. The trade with China, also largely in cotton, showed a partial recovery despite internal chaos. The total value of exports to that country advanced from Rs. 19 lakhs in 1927-28 to Rs. 86 lalks in 1928-29, but it was still much behind the figure recorded in 1926-27, viz., Rs. 174 lakhs. There was a notable expansion in the trade with the United States of America. The value of the entire turnover, amounting to Rs. 193 lakhs, was higher than in any of the previous eight years, and as compared with 1927-28 showed an increase of Rs. 47 lakbs. A brisk business in raw skins, wool, woollen carpets, cotton, goat hair, and casings caused the improvement. The present position of the principal countries as regards the more important commodities exported from Karachi is summarized in the following statement:-

4. Variations in the average prices of articles.-The following table shows the variations in the average prices of certain articles imported into and exported from the Province of Sind, the average of prices of the years 1898-1899, 1899-1900 and 1900-1901 being taken as $100:-$

A study of the figures in the above table will show that under imports, the prices of sugar, kerosen= oil, dat $3 \mathrm{~s}, \mathrm{c}$ cal and cotton coloured pise :-goods were on the down grade during the year under report. The fall under the first two was most pronounoed, and was due to a large world-production of sugar and crude oil during the year. The decrease in the price of dates is attributed to receipts of inferior varieties. The prioes of copper, cotton twist and yarn and grey cotton and woollen piece-goods, on the other hand, appreciated somewhat, but the fluctuations were not important, except in the case of woollen piece-goods, the prices of which rose in sympathy with the home market. Under exports, the prices of most of the articles were down, with the exception of raw hides and wool. A good demand, especially in the beginning of the year, accounted for the rise in the prices of these articles. Prices of rapeseed aweakened a little as the resalt of a better crop in the Pumjab.

The effect of the change in the level of prices since the outbreak of the great war is illustrated in the following table in which the volume of the trade in 1928-29 in some of the more important articles of the import and export trade is compared with the pre-war volume and its value recalculated at prewar rates :-

| Total Pas. | -• | 26,39,89,036 | -• | 25,65,73,732 | 10,22,56,529 |

From an examination of the figures in the foregoing table, it will be seen that though under imports, the total value of the selected articles in 1928-29 showed an excess of 80 per cent over the pre-war average value, yet if pre-war rates were applied, the increase would be reduced to 44 per cent only, the difference indicating the discrepancy between pre-war and present price levels. A satisfactory feature of the year was the advance to a point above the pre-war level in the volume of trade in all the selected articles, excepting cotton twist and yarn and piece-goods. These latter would also compare favourably but for the inclusion of two exceptionally good years, v.z., 1912-13 and 1913-14 in the period selected for comparison. In the case of exports, while the actual total value of the selected articles decreased by only 3 per cent as compared with the pre-war average value, the value worked out at pre-war rates shows a deficiency of no less than 27 per cent. The volume of the trade in grain and pulse and seeds was of course far below the prewar average, but this decrease has been considerably set off by the large expansion in the exports of raw cotton, which has been such a noticeable feature in recent years. The volume of business in raw hides and skins and wool also rose above the pre-war level during the period under review.

## Treasure-Private.

5. Treasure, Private.-The following table compares the imports and exports of treasure on private account for the last two years:-

Table No. 2.

| Descriptlon. | 1927.28. | 1928-20. | Description. | 1927-28. | 1928-26* |
| :---: | :---: | :---: | :---: | :---: | :---: |

| Total | B,09,622 | 14,62,648 | Total | 18,55,450 | 17,20,150 |
| Currency Notes | . | . | Currency Notes | $\cdots$ | $\cdots$ |
| Grand Totab | 15,07,265 | 22,47,759 | Gramd Total | 13,55,450 | 17,20,150 |

Imports of gold, which consisted mainly of bar gold from the United Kingdom, declined in value by Rs. 1-12 lakhs to Rs. 7.85 lakhs. Gold coins, shown as imported, were sovereigns, received chiefly from the Bahrein Islands.

There were no exports of gold as in the previous year. Exports of silver consisted of coins, and the improvement of Rs. $3 \cdot 65$ lakhs in their value was due to larger despatches of Government of India rupees to the Bahrein Islands, where they are sent for the purchase of pearls. The decrease of Rs. 1-50 lakhs under the head ' other coins' was the result of smaller shipments of $\mathrm{krans}^{2}$ which are purchased at the frontier and sent through this port to Persia.

## Government Transactions.

6. Government Transactions.-The following table compares the Government transactions with foreign countries of importance to the commercial public during the two years 1927-28 and 1928-29:-

Table No. 3.

| Acticles, | 1927-28. |  | 1928-29. |  |
| :---: | :---: | :---: | :---: | :---: |

|  | . | 3,98,56,734 | . | 2,50,53,366 |
|  |  |  |  |  |
| Re-exports . . . . . . | $\cdots$ | 2,58,556 | ' | 4,38,415 |
| Exporte | $\cdots$ | 3,04,597 | * | 69,924 |
| Treasure | $\cdots$ | .. | $\cdots$ | 2,000 |
| Grand Totat | . | 5,03,153 | . | 5,02,339 |
| Total entire Foreign Trado | $\cdots$ | 4,04,19,887 | . | 2,55,55,705 |

It will be seen from the above table that there has been a considerable reduction, to the extent of Rs. 148 lakhs or 37 per cent in the total value of stores imported on Government account during the year under report. The falling off was most marked in receipts of railway carriages and wagons and parts thereof from the United Kingdom and Belgium, rails and fisk plates of steel or ivon from the United Kingdom and sleepers and keys of steel or iron from Belgium and the United Kingdom for the North-Western Railway. Laports of locomotive engines and parts, mainly from the United Kingdom, on the other hand showed a rise, partly due to larger requirements by the North-Western Railway, and partly to the importation of more costly engines for heavy loads.

## II. FOREIGN TRADE.

g

## IMPORTS.

7. The following table shows the value of the import trade under the five main classes for the last four years and the pre-war year 1913-14 :--

Table No. 4.

| Exports in Coasting Trade | 8,590 | 17,2e,822 | 2,623 | 7,79,570 | 2,602 | 7,30,030 |

The most noticeable feature of the year in the sugar trade has been the enormous world-production and the resultant low level of prices-the lowest witnessed in recent years. The local market showed markedly increased activity, and imports rose to the high level of 209,624 tons valued at Rs. 333.61 lalkhs, an increase of 59,179 tons or 39 per cent in quantity and of Rs. 67.97 lakhs or 23 per cent in value, as compared with 1927-28. The quantity imported was the second highest on record, the record total being 230,807 tons in 1926-27, It is also interesting to note that this quantity was higher by about 6,675 tons than that imported at Bombay during the year under report. It must, however, be admitted that the business done was not all remunerative. Dealers were induced to place large orders in the hope of realizing good profits as the forward prices quoted by the exporters: in Java were somewhat below the parity of the local market at the beginning of the year, but local prices gave way under the pressure of huge sup*
plies, and heavy losses were incurred. The local prices of white Jara, which opened at Rs. $13-6$ pet cwt. in the beginning of April, commenced to rise at the end of that month, and touching Rs. 15-3-6 in the first week of May, reachel Rs. 16-2 towards the middle of June, which was the highest quotation of the year. The rise was due to the depletion of stocks in the local market. Subsequently, on the arrival of the new crop in July, prices wenkened, and Rs. 14-10 was quoted in the first week of that month. Thereafter the market showed a continuous downward tendency, and prices came down to Rs. 12-9-6 at the end of December, which was the lowest quotation of the year. The clo.ing price on the 31st March was Rs. 13-4. It will be seen from the figures recorded in the table at the head of this paragraph that Jara again supplied most of the sugar to this port, the continental variety not being able to compete successfully with the Java product. The outturn of the 1928-29 crop in Java was much larger than in the previous season, the expansion being attributed to the introduction of improved varieties of cane and scientific methods of cultivation. It is reported that at the end of the year exporters in Java found it difficult to fulfil their contracts, and actually rebought a certain quantity from India. Some 20,000 tons were thus resold by this port to that country, and in consequence, local dealers turned their attention to the Continent for their requirements. The small quantity, viz.; 1,349 tons of beet sugar imported during the year came in the last month of the official year, and some 10,000 tons are expected to arrive in the beginning of the coming year. Lower prices however caused increased consumption, and a fall in the production of Indian sugar also stimulated imports. Russian competition with Indian traders in Persia continued to be keen, and in consequence, the demand for export to that country by land was considerab!y reduced. It may be noted that the stocks of sugar remaining on hand in Karachi at the close of the year were estimated at about 26,000 tons.

Liqnors.
Table No. 6.

## Foreigh Imports.

(Liquors)
Ale, beer and porter.-The following statement compares the quantities imported from the chief sources of supply during the past two years:-

Notwithstanding large stocks of continental beer remaining in hand from the previous year, arrivals of ale, beer and porter rose further by 41,922 gallons to 841,890 gallons in quantity and by Rs. 35,527 to Re. 20.68 lakhs in value, and were a record for the port. As in the previous year, the expansion occurred in receipts of British beer, while German beer lost ground. Bulk beer came wholly from the United Kingdom, and the quantity increased from 439,024 gallons to 461,894 gallons. Imports of bottled beer, amounting to 365,055 gallons, exceeded the total of the previous year by 27,922 gallons, the United Kingdom having sent 125,891 gallons as against 90,442 gallons in 1927-28. The improvement was due to a greater demand for British light beer which is gaining popularity both among the civil and military population. German supplies of bottled beer, which have been on the downward grade for the last two years, again declined by 10,449 gallons to 195,141 gallons in 1928-29.

Spirits.-Imports of whisky, which, last year, registered a decrease of 8,933 gallons, showed a partial recovery of 6,232 gallons, owing chiefly to favourable prices. Imports of brandy improved slightly by 5,641 gallons to 64,021 gallons, but the figures were much lower than in the preceding two years, when they amounted to 71,035 gallons and 75,698 gallons, respectively. The quantity of rectified spirits imported from Java and denatired at the Custom House on arrival increased further from 27,798 to 29,820 gallons. This industry, started in recent years, continues to make steady progress.

Wines.-Imports of wines were practically on a level with those in the preceding two years, the small decrease of 1,640 gallons being noticeable chiefly in receipts of port wine from the United Kingdom.

Tobacco.-Following a heavy increase to the extent of 124 per cent in quantity and 115 per cent in value in the previous year, the second highest on record, imports of tobacco, mainly cigarettes from the United Kingdom, suffered a set-back during the year under report. The quantity imported, viz., $873,865 \mathrm{lbs}$. contracted by 18 per cent and its value, viz., Rs. 33.83 lakhs, by 17 per cent as compared with 1927-28. Increased consumption of Indian-made cigarettes also tended to reduce foreign imports.

Froits and Vegetables.-The total value of fruits and vegetables imported during the year receded by Rs. $5 \cdot 74$ lakhs to Rs. $26 \cdot 16$ lakhs. The bulk of the imports, as usual, consisted of dates. Arrivals of this commodity totalled 17,823 tons valued at Rs. $22 \cdot 23$ lakhs, showing a decrease of 1,594 tons or 8 per cent in quantity and of Rs. $5 \cdot 16$ lakhs or 18 per cent in value, which occurred in receipts from Iraq, the chief source of supply. The greater $\mathrm{f}_{\mathrm{al}} \mathrm{I}$ in the percentage of the value was due to receipts of inferior varieties during the year. A smaller crop in Iraq and the resultant high prices restricted business, which also suffered on account of certain Malabar ports having taken some of their supplies direct instead of through this port.

Provisions and Oilman's Stores.-The total value of imports under this head contracted by Rs. $14 \cdot 84$ lakhs or 13 per cent to Rs. $94 \cdot 16$ lakhs. The following statement shows the variations in the quantities of some of the principal items imported during the year :-

The above table shows that there has been an increase in imports of most of the important kinds of provisions, with the exception of 'vegetable product'. As predicted in last year's report, the overtrading in 'vegetable product' in the previous year caused depression in the market, and imports, mainly from the Netherlands and partly from Belgium, declined by 12,906 cwt. or 7 per cent to $155,046 \mathrm{cwt}$. in quantity and by Rs. $14 \cdot 64$ lakbs or 21 per cent to Rs. $55 \cdot 26$ lakhs in value, the fall in the percentage of value being particularly striking. Moreover indigenous Copra oil is now competing with 'vegetable product' owing to a considerable reduction in its price. Imports of other descriptions of provisions showed no fluctuations worthy of note.

Tea.-Imports of Chinese green tea, which had assumed considerable proportions during the five years previous to 1926-27, when the yearly average was about $624,000 \mathrm{lbs}$. dwindled to $56,069 \mathrm{lbs}$. in $1926-27$ and $52,020 \mathrm{lbs}$. in 1927-28, and during the year under report fell to the negligible figure of 4,910 lbs. valued at Rs. 5,814. As explained in last year's report, this tea used to be imported here for transmission by land to Persia and other adjoining territory, but it is reported that these countries now obtain their supplits direct from China through Russia.

The total quantity of black tea imported during the year advanced by $100,565 \mathrm{lbs}$. to $351,809 \mathrm{lbs}$. and its value by Rs. 88,550 to Rs. 3.31 lakhs. Ceylon was, as usual, the chief source of supply, the total quantity received therefrom amounting to $289,837 \mathrm{lbs}$. as against $227,280 \mathrm{lbs}$. in 1927-28. The bulk of this import was dust tea, which, it is understood, is mostly consumed in Indian tea shops. China and Java also increased their supplies from 22,742 lbs. and 374 lbs. to 49,529 lbs. and 11,750 lbs., respectively.

Grain, Pulse and Flour.-Inports under this head, which are ordinarily insignificant, assumed considerable proportions, their total value having expanded from Rs. 90,019 in $1927-28$ to Rs. $153 \cdot 72$ lakhs during the year under report. The partial failure of the Indian wheat crop necessitated heavy imports from Australia, which sent no less than 103,426 tons of this commodity of the total value of Rs. 148.89 lakhs. There was also a small consignment from Kenyd Colony, consisting of 2,081 tons valued at Rs. $3 \cdot 12$ lakhs.

## Class $I I$.-Raw materials and produce and articles mainly unmanafactured.

8. The total value of articles included. in class 11 increased from Rs. 156.89 lakhs to Rs. $173 \cdot 27$ lakhs. The variations in the trade in some of the more important commodities are deait with in the following paragraphs.

Oils.--The total value of imports of oils amounted to Rs. 151.97 lakhs, showing an excess of Rs. $13 \cdot 28$ lakhs over the value recorded last year. The bulk of the imports, as usual, comprised mineral oils, and the total quantity imported during the year, viz., 33 million gallons was a record for the port. The following table shows the imports of mineral oils for the past two years and the pre-war year, including, in the case of kerosene oil and petrol, importa from Burma.

* Inclusive of othar kinds of metheral oile.

It will be noticed from the above table that the aggregate guantity of both foreign and Indian kerosene oils, which amounted to $23 \frac{3}{3}$ million gallons did not show any marked variation, being only $1 \frac{1}{2}$ million gallons or 7 per cent in excess of the quantity imported last year, but unlike last year, there was a great disproportion between the figures of the quantity imported from foreign countries and that impo:ted from Burma. Imports of foreign oil advanced from 12 million gallons to no less than 221 million gallons, while those of Burma oil dropped from 104 million gallons to only $1 \frac{1}{2}$ million galons. The shortage in Burma oil was made up by heavy imports from Persia, which sent 104 million gallons as agninst only a little over half a million gallons last year. The United States of America
sent only 2 a million gallons as against 8 million gallions in 1927-28, but the deficiency was made up by large imports of Russian oil, which rose from 21 million gallons last year to 9 million gailons during the year under report.

Imports of fuel oil, which, last year, created a record at $10 \frac{1}{2}$ million gallons, fell slightly by 1 million gallons during the year under report. The decrease was due to smaller receipts from Persia, which supplied $8 \frac{1}{2}$ million gallons. as against $6 \frac{9}{4}$ million gallons in 1927-28. Arrivals from British Borneo, on the other hand, increased by million gallons to 4 million gallons.

The quantity of lubricating oils, imported during the year, declined by 256,941 gallons to 765,667 gallons and the value by Rs. $3 \cdot 22$ lakbs to Rs. $16 \cdot 64$ lakhs. The United States of Americs was, as usual, the chief source of supply, and the decrease is said to be due to the increased consumption of the Attock Oil Company's products in the areas served by that company, on account of their cheapuess.

The quantity, viz., 166,000 gallons of foreign petrol, shown as imported, came wholly from Persia for transmission by land to Duzdap. Coastwise imports from Burma decreased slightly by 75,000 gallons to $6,472,645$ gallons.

Coal-Imports of coal, mainly for bunkering purposes, suffered a considerable set-back. A slack export season and more oil-burning steamers were the principsl factors which contributed to the total decrease of 26,790 tons. Purchases of foreign coal declined by 5,567 tons to 25,256 tons in quantity and by Re. 1.72 lakbs to Re. $5 \cdot 55$ lakhs in value. The following statement shows the variations in the quantities imported from the principal foreign countries and also from Bengal during the past two years.

It will be seen from the above statement that almost all the principal exporting countries sent less. The bulk of the foreign coal again came from Natal, and the deficiency of 4,863 tons in arrivals therefrom was partly made up by an increase of 1,975 tons in despatches from Portuguese East Africa. Supplics from the United Kingdom contracted by 2,123 tons. Purchases of Bengal coal suffered the most, the quantity having receded by 21,223 tons to 128,406 tons and its value by Rs. 6.74 lakhs to Rs. 23.81 lakhs.

## Class 1II.-Articles wholly or mainly manufactured.

9. The total value of the articles included under this group, which is the most important group in the import trade, rose by Rs. $304 \cdot 60$ takhs or 16 per cent. to Rs: 2,181.06 lakhs. The fluctuations in the trade in the principal articles are explained below:-

Cotton Yarn and Manufactures.-As anticipated in last year's report, the year's record shows a substantial advance of 15 per cent. in both the volume and value of imports of cotton goods over the figures recorded in the previous year. Light stocks held at the commencement of the year, coupled with a good demand, both local and upcountry, stimulated imports, and also enoouraged dealcre to enter freely into forward commitments. The increase in the demand from upcountry was also attributable to the imposition of restrictions on the importation of certain classes of goods into Calcutta by the Marwari Chamber of Commerce, which resulted in the diyersion to this port of some business, chiefly from the Delhi and Cawnpore markets, that would ordinarily have passed through Calcutta. The continuous mill strikes in Bombay also helped the disposal of foreign goods, a fact borne out by the recorded figures, which show that, while imports of Indian piecegoods from Bombay decreased by 40 million yards in quantity and Rs. 122 lakhs in value, those from foreign countries expanded by 50 million yards and Rs. 133 lakhs. The spurt oreated by the above conditions was, however, not long sustained, and the boycott movement started during the latter part of the year, together with the closing of the Afghan markets had a considerable adverse effect on trade. Prices of grey goods, which soared for a time, suffered the most, and those of coloured goods also declined considerably. The demind from Persian markets continued poor throughout the year. That country now obtains most of its requirements from Russia, which offers its goods at lower prices with easier facilities for payment. Stocks, other than those intended for Afghanistian, were said to be more or less normal at the close of the year. The prices in the home market ruled steady throughout the year, and good results may come from the attempts of home manufacturers to reduce the cost of production and offer their goods at lower prices. The following table shows the quantity and value of cotton twist and yarn and other manufactures during the last two years and the pre-war year 1913-14:-

Cotton Twist and Yarn.-Imports of cotton twist and yarn, which fell progressively from $1,221,653 \mathrm{lbs}$. in $1924-25$ to $828,841 \mathrm{lbs}$. in 1925-26, 744,347 Ibs. in 1926-27 and 693,172 lbs. in 1927-28 declined further to $439,099 \mathrm{lbs}$. during the year under report. The decrease was most noticeable in receipts of coloured yarn Nos. 31 to 40 from the United Kingdom, and was the result of increased consumption of yarn dyed in factories in the Bombay Presidency, the latter being found to be cheaper than foreign dyed yarns. The specific duty of $1 \frac{1}{2}$ annas per lb . imposed last year led to restricted imports of heavily weighted foreign yarns. Imports of while yarn, almost wholly from the United Kingdom, on the other hand, increased from 57,155 Ibs. in 1927-28 to 127,905 Ibs. in 1928-29.

Piece-goods.-Imports of cotton piece-goods amounted to 371 million yards valued at Rs. 1,017.62 lakhs, an increase of 15 per cent. in both quantity and value as compared with the previous year. The yardage was the third highest on reoord, the previous higher imports being 384 million yards in 1912-13 and 414 million yards in 1913-14. It is also interesting to note that the aggregate arrivals of cotton piece-goods, both foreign and Indian, viz., 006 million yards were also higher than those in 1927-28 by 11 million yards. All the sub-divisions of piece-goods, viz., grey, white and coloured shared in the improvement. The following statement shows in a comparative form the imports of some of the important descriptions under the three main subdivisions of piece-goods :--

| Description | Quantity. |  | Value |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1927.28. | 1928-29. | 1927-28. | 1928-29. |

| Woven coloured goods . | 7,588,202 | 9,451,620 | 35•35 | 58.74 |

Grey goods.--Imports of grey goods rose by $6 \frac{1}{2}$ million yards to $33 \frac{3}{8}$ million yards in quantity and by Rs. 19.38 lakbs to Rs. 90.56 lakhs in value. Japan, as usual, supplied the largest quantity, viz., 69 per cent., and the value of her exports, comprising mainly longcloth, shirtings, drills and jeans, expanded by Rs. 5.71 lakhs to Rs. 65.95 lakhs. Purchases from the United Kingdom also increased in value by Rs. 5.94 lakhs to Rs. $15 \cdot 22$ lakhs, chiefly under bordered
dhutis ( + Rs. 3.21 lakhs) and longeloth and shirtings ( + Rs. $1 \cdot 15$ 1akhs) and jaconets, including madapollams, mulls and cambrics ( + Rs. 1.82 lakhs). A feature during the year was a heavy import from China of longcloth and shirtings, amounting to 34 million yards in quantity and Rs. 8.69 lakhs in value as against 160,000 yards valued at Rs. 40,449 last year. Most of the consignments came during the last quarter of the year, and the expansion was due to a temporary reduction in prices by exporters in China, who had large surplus stocks on hand. It must, however, be stated that considerable quantities of grey goods imported here were intended for the Afglan market, and heavy stocks therefore remain unsold.

White goods.-Imports of white goods, mainly British, expanded by 321 million yards and Rs. 81 lakhs to 223 million yards valued at Rs. $554 \cdot 96$ lakhs, chiefly in receipts of mulls and longcloth and shirtings.

Coloured goods.-There has also been a considerable expansion to the extent of 11 million yards in quantity and Rs. $30 \cdot 27$ lakhs in value in imports of colonred goods, amounting to $112 \frac{1}{2}$ million yards valued at R.s. $365 \cdot 32$ lakhs, the United Kingdom being, as usual, the largest supplier, sending more prints and chintz and woren coloured shirtings and coatings, but less drills and jeans and printed sateens. Italy's competition in the supplies of coloured goods was again very keen. The total value of imports therefrom, which stood at Rs. $28-78$ lakhs in 1927-28 rose appreciably to Rs. $44 \cdot 92$ lakhs in 1928-29. The principal descriptions, which recorded increases, were printed tovills, dyed flannel and fannclettes and woven coloured shirtings. The following table gives the average prices of a few selected varieties during the year:-

It will be noticed that, while the prices of Asahi grey shirtings and poperill drill rose above the lerel of the previous year, those of all the three descrip-
tions of white goods registered a decline. The prices of both gualities of coloured goods were on a par with those in 1927-28.

Woollen goods.--Imports of woollen manufactures, including yarn and knitting wool, have created a record for the second year in succession, the total value, viz., 128.02 lakhs surpassing last year's figure by Rs. 6.79 lakhs or 6 per cent. The expansion was particularly striking in receipts of blankets and shawLs. Imports of yarn and knitting wool, mainly intended for the Amritsar market, receded slightly by 36,403 lbs. to 433,663 lbs. in quantity and by Rs. $1 \cdot 60$ lakhs to Rs. 12.38 lakhs in value. The decrease followed a heavy increase in the previous year, and occurred chiefly in purchases from France and Poland. The United Kingdom and Germany, the two largest suppliers, on the other hand, sent more, enz., $205,198 \mathrm{lbs}$. and 155,659 lbs. as against $183,634 \mathrm{lbs}$. and $143,621 \mathrm{lbs}$., respectively. Arrivals of piece-gooda contracted by 286,971 yards to $5,529,004$ yards in volume, but their value increased by Rs. 1.71 lakhs to Rs. 81.40 lakhs. France, as usual, sent the most and also increased her sales by Rs. $3 \cdot 28$ lakhs to Rs. $44 \cdot 72$ lakhs. The bulk of her exports comprised shawl cloth, consumed in the Amritsar market. It is interesting to note that her supplies of cheap coatings are also increasing year by year at the expense of Bradford. Despatches of piece-goods from the United Kingdom receded in value from Rs. 19.46 lakhs to Rs. 15.02 lakhs, but those from Germany advanced by Rs. 1.77 lakhs to Rs. 10.76 lakhs. The total value of blankets, including carpets and rugs rose from Rs. $18 \cdot 18$ lakhs to Rs. 21.52 lakhs, the bulk of the imports comprising cheap wrap and bed rugs from Italy. This country has secured a firm hold on the market in this particular line, and defies all competition. Imports of shawh were valued at Rs. 6.75 lakhs as against Re. $4 \cdot 25$ lakhs in 1927-28, Germany being, as usual, the chief source of supply.

Silk.-The aggregate value of imports of silk yarn and manufactures amounted to Rs. $9 \cdot 18$ lakhs, an excess of Rs, $3 \cdot 24$ lakhs, which was due chiefly to larger purchases of silk yarn, noils and warps from Italy and goods of silk mixed with other materials from Germany.

Metal and Metal manufactures.-The following table shows the quantities and value of the different descriptions of metals and manufactures of metals during the past two years:-

Table No. 9.

Table No. 9-contd.

| Description, | 1027-28. |  | 1928-29. |  |

Iron and Steel.-lmports of iron and steel last year reached the then unprecedented level of 122,067 tons of the total value of Rs. 196.53 lakhs, and in view of a certain amount of overtrading during that year, it was feared that the volume of business in the year under review would not come up to that level. It is therefore gratifying to note that, contrary to expectation, the iron and steel trade witnessed another year of healthy expansion, the total imports recorded, viz., 127,375 tons valued at Rs. $205 \cdot 36$ lakhs having actually surpassed last year's figures by 4 per cent. in both quantity and value. The progress was at first slow : large unsold stocks and high prices on the Continent did not permit of business being done to any great extent in the first few months of the year, but a brisk demand, especially from upcountry, later on caused the accumulated stocks to move into consumption. The output in the Tata Iron and Steel Works suffered a considerable set-back owing to strikes, and in consequence large quantities of foreign steel were drawn from this port by the Punjab and the United Provinces for construc-
tional work generally. Big orders placed by the Indian Stores Department with local and upcountry firms also materially helped the trade during the year. The following table compares the share of each country in the total imports of iron and steel for the past two years :--

Table No. 10.

| -m | 1027-28. |  |  |  | 1028-29. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Other countries | 057 | 1\% | 92,201 | 1\% | 1,489 | 1\% | - 2,86,398 | 1\% |
| Total | 122,067 | 100\% | 1,90,62,728 | 100\% | 1,27,875 | 100\% | 2,05,36,268 | 180\% |

It will be seen from the above table that imports from the United Eingdom advanced slightly by 649 tons to 41,054 tons, representing a share of 32 per cent in the total arrivals as against 33 per cont last year. The general improvement was most noticeable in purchases of steel angle and tee, sheets and plates, not galvanized or tinned and bars, other than cast steel. Supplies of plain galvanized sheets, wrought tubes, pipes and fittings and rails, chairs and fishplates and tinplates, on the other hand, were greatly curtailed. British manufacturers are still faced with intensely keen competition from continental countries, where the cost of production is much lower, and this mainly accounts for the low selling prices in recent years. Belgium's share in the supplies of iron and steel was again the largest, but it was reduced by 10,162 tons from 54 to 44 per cent. Heavy bookings of orders from China, Japan; Africa and other foreign countries, coupled with a good demand from the United Kingdom and other places for semi-finished products, prevented that country from executing orders promptly, and hence the decline. The contraction was most noticeable in supplies of steel angle and tee, bars, other than cast steel, beams and joists, sheets and plates, other than galvanized or tinned and urought tubes, pipes and
futings. As a reault of the above conditions, local dealers turned their attention to france, a faot which accounts for the rise in her supplies from 5,298 tons in 1927-28 to 12,312 tons in 1928-29. The United States of America and Germany also sent more during the year. Of the total quantity of iron and steel imported, viz., 127,375 tons, 88,275 tons paid the protective duties. It may be noted here that the head 'Sleepers and keys of steel or iron for railways', which was formerly included in the major head 'Railway plant and rolling stoek' has, with effect from lst April, 1928, been classified under 'Iron and steel '. For the purposes of comparison the figures of imports of this article in the previous year have been taken into account under this head.

Other Metals.-Following a decrease in the two previous years, imports of copper registered a substantial increase amounting to $8,165 \mathrm{cwt}$ or 67 per cent in quantity and Rs. 4.54 lakhs or 72 per cent in value, mainly in arrivals of sheets from Germany and France. The quantity imported was the highest in the quinquennium. Low stooks and high prices gave a fillip to the trade. The improvement of $4,656 \mathrm{cwt}$. in the quantity of brass was most noticeable under mixed or yellow metal for sheathing from the United Kingdom and Germany.

Machinery of all kinds.-A greater demand from industrial concerns, both in Sind and the Panjab, stimulated somewhat by the removal of the import duty, brought about an improvement of Rs. $21 \cdot 23$ lakhs or 17 per cent in the total value of machinery, amounting to Ra. $146 \cdot 19$ lakhs. The principaI types of machinery imported and the statistics with regard to each are shown in the statement given below. It may' be noted that 'railway locomotive engines and tenders and parts '. which were formerly classified under the head 'Railway plant and rolling stock' have, with effect from list April 1928, been included ander the head 'Machinery and millwork'. Fior the purposes of comparison last year's figures for this article have also been taken into account under this head.

The expansion undor mining machinery is partioularly striking, and was due to arrivals of large consignments for the Attock Oil Oompany. The principal supplies came from the United Kingdom (Re. 11 lakhs) and the United States of America (Rs. 10 lakhs).

Prime-movers, other than locomotives, largely comprised oil engines, mainly British. It is interesting to note that, while the number of these engines rose by 142 or 47 per cent to 441 , their value increased only by Rs. 75,085 or 7 per cent as compared with the previous year. This anomaly was due to increased importations of engines of a smaller type, made in response to a rising demand for small units for grinding cereals and pumping water. The value of imports of electrical machinery advanced by Rs. 1.54 lakbs to Rs. 24.79 lakhs, notable advances in receipts occurting in generators, altemators and dynamos from the-United Kingdom, which were required for private and public lighting installations. The decrease of Rs. 3.81 lakhs in the value of railuay locomotive engines and tenders and parts is ascribed partly to smaller requirements by the Jodhpur Bikanor Railway and partly to reduced purchases by local and upcountry dealers, who supply to the North-Western Railway. Imports of sewing and knitting machines again suffered a set- back, the numberreceived being 31,593 as against 33,585 last year. The decrease was almost wholly due to reduced purchases from the United Kingdom, which sent 17,856 machines as against 22,835 in 1927-28. German machines, on the other hand, came in larger numbers, viz., 13,512 against 10,614 in 1927-28. The sale of the batter is on the increase on account of their cheapness. The number of typeuriters, imported during the year, increased from 1,831 to 2,066 , of which no less than 1,925 were Ameriean machines.

Railway plant and relling stock.-This head has been omitted from the trade returns with effect from 1st April 1928, and the artiches formerly classified under that head have been included under the appropriate heads in the classified lists.

Catlery, Hardware, Implements and Instruments.-The bulk of the cutlery imported came from Germany, and its total value, viz., Rs. $5 \cdot 28$ lakhs fell slightily by Rs. 11,808 as compared with the previous year. The head 'Hardware' includes various articles, such as agricultural implements, other implements and tools, builders' bardware, domestic hardware, enamelledware, metal lamps, safes, stoves, etc. The total value recorded under that head advanced by Rs. $13 \cdot 76$ lakhs to Rst $52 \cdot 32$ lakhs during the year under report. Among the prineipal descriptions, the value of builders' hardware comprising lockis, hinges, door bolts, etc. rose by Rs. 1-82 lakhs to Rs. $7 \cdot 48$ lakhs, to which Germany contributed Rs. $3 \cdot 15$ lakhs, Sweden Rs. $2 \cdot 45$ lakhs and the United Kingdom Rs. $1 \cdot 65$ lakhs. Lower prices ruling during the year gave an incentive to the trade. Inports of metal lamps, which suffered a heavy set-back last year, made a complete recovery. The total value, which amounted to Rs. 9.53 lakhs, showed an excess of Rs 3.97 lakhs over the value recorded in the previous year, and was the highest in the quinquennium. Most of the lamps were from Germany (Rs. $\overline{5} \cdot 99$ lakhs) and the United States of America (Rs. 2.81 lakhs). The total value of implements and tools, other than agricultural implements and machine tools, also increased from Rs. $8 \cdot 20$ lakhs to Rs. 10.23 lakhs, chiefly in supplies from Germany and the United States of

America. The aggregate value of instruments and apparatus expanded by Rs. $10 \cdot 62$ lakbs to Rs. 36.95 lakhs, 50 per cent of which represented imports of electrical instruments. Among the remaining items, imports of wircless apparatus are worth notice, the total value having risen from Rs. 13,004 in 1927-28 to Rs. 2-10 lakhs in 1928-29, chiefly in reccipts from France.

Chemicals, Drags and Medicines.-After a substantial advance of Rs. 5.72 lakhs in the previous year, the total value of imports under this head declined slightly by Rs. 86,395 to Rs $41 \cdot 86$ lakhs to which chemicals contributed Rs. 28.79 lakhs and drugs and medicines Rs. $13 \cdot 07$ lakhs. The United Kingdom continued to hold its own against foreign competition in the supplies of heavy chemicals. Alum, caustic soda and bicarbonate of soda recorded small decreases in value to the extent of Rs. 76,872, Rs. 95,914 and Rs. 29,995, respectively, while imports of sodium carbonate (soda ash and soda crystals) rose in value by Rs. 99,660.

Vehicles (excluding Locomotives, etc.) for Railways.-The following statement shows the imports of the principal classes of vehicles during the past two years:-

Motor cars.-This trade, as is to be expected, continues its upward course, and imports this year have created a fresh record for the port. In all 2,178 motor cars of the total value of Rs. $49 \cdot 69$ lakhs were received, showing an excess of 199 cars and Rs. 5.77 lakhs over imports in the previous year. The following statement shows the number and value of motor cars, imported during the past two years from the principal sources of supply :-

| Origin. | 1027-28. |  | 1928-29. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Nos. | Value. | Nos. | Vaile. |
|  | 663 | Rs. Lakis. | 810 | $\xrightarrow[\text { Re, }]{\text { Renhs }}$ $21 \cdot 23$ |
| Canada | 738 | 12.90 | 819 | 13.37 |
| United Kingdom . | 374 | 9.89 | 371 | 9.12 |
| Italy . | 177 | 3.93 | 148 | 4.79 |
| France . | 20 | 0.56 | 16 | $0 \cdot 62$ |
| Other Countrics | 9 | 0.18 | 13 | 0.56 |
| Total Imports | 1,079 | 43.92 | 2,178 | 40.69 |

It will be noticed that the increase was practically confined to purchases from the United States of America and Canada, the usual largest suppliers. The British and Italian models, on the other hand, suffered a set-back. Following a record importation in the previous year, the number of motor omnibuses, motor vans and motor lorries declined slightly by 38 to 2,015 , but their value rose from Rs. $33 \cdot 30$ lakhs to Rs. 37.72 lakhs, the disparity being due to imports of heavier lorries during the year. The decrease in the number occurred in receipts of chassis only, the figures for the past two years being, 1850 and 1,754 , respectively. The number of complete acagons, imported with bodies, on the other hand, rose from 203 to 261 or by 29 per cent and their value from Rs. 5.64 lakhs to Rs. $10 \cdot 30$ lakhs or by 83 per cent. Of the total number of commercial vehicles received during the year, viz., $2,015,1,410$ were Canadian and 494 American, while the rest came from the United Kingdom, Italy and Germany. There has again been an extraordinary boom in the cycle trade. No less than 28,840 cycles of the total value of Rs. $13 \cdot 02$ lakhs arrived during the year, the figures showing an excess of 6,247 machines and Rs. 3•13 lakhs over imports in 1927-28, which was a record year. Nearly 98 per cent of these were English machines, mostly of a cheap type. It may be noted here that the sub-heads 'carriages and parts thereof' and 'wagons and parts thereof ' for railways, which were formerly included under the head 'Railway plant and rolling stock' have, with effect from 1st April 1928 been classified under the head 'vehicles.' The total value of imports of ' carriages and parts for railways,' almost wholly from the United Kingdom, advanced by Rs. 6.05 lakhs to Rs. 14.74 lakhs. The increase was due to heavy orders placed by the North-Western Railway with private firms. The decrease of Rs. $1 \cdot 45$ lakhe in the value of imports of 'wagons and parts thereof ' appears to be dus to some of the material (such as plates, sheets, etc.). required for their construction having been received in its original form and classified as such in the trade returns.

Other articles.-Among articles, other than those dealt with in the foregoing paragraphs, the following deserve notice. Imports of apparel, including boois and shoes recovered in value from Rs. $26 \cdot 21$ lakhs to Rs. $32 \cdot 56$ lakhs, mainly under second-hand clothing from the United States of America and canvas shoes with rubber soles from Canada and Germany. The trade in second-hand elothing with the United Kingdom continued to be poor. The value of dyes and colours advanced further by Rs. 3.68 lakhs to Rs. 24.06 lakhs, chiefly in receipts of aniline dyes from the Netherlands. Imports of these dyes, which last year stood at $310,099 \mathrm{lbs}$. valued at Rs. $4 \cdot 42$ lakhs expanded to $597,276 \mathrm{lbs}$. valued at Rs. 7.59 lakhs in 1928-29. It is understood that whereas prior to last year, aniline dyes were imported on indentors' account according to requirements from time to the, they are now being stocked locally in large quantities by agents of the German manufacturers. Though lower prices resulting from the removal of the import duty stimulated consumption, large stocks were said to be, in hand at the close of the year. Imports of glassware and earthenware improved from Rs. 20.82 lakhs to Rs. $23 \cdot 13$ lakhs. Taere were no important variations in this trade, except an increase of Rs. $1 \cdot 28$ lakhs under porcelainuware due to larger receipts from Japan. There has been a considerable expansion to the extent of Rs. $9 \cdot 89$ lakhs in the total value of paper, pasteboard and stationery, amounting to Rs. $38 \cdot 11$ lakhs. The largest
increase was recorded under printing paper, viz., Rs. 4.45 lakbs, to which news-printing paper contributed Rs. $2 \cdot 92$ lakhs and other printing paper Re. 1.53 lakhs. Sweden, Austria and Italy sent larger quantities of newsprinting paper, while other printing paper came mainly from the United Kingdom, Germany and the Netherlands. It is stated that the Indian paper mills are not able to cope with the growing demand from printing presses, the number of which is increasing. Imports of cement declined by 1,708 tons to 3,725 tons in quantity and by Re, 56,476 to Rs. $2 \cdot 02$ lakhs in value. The decrease occurred in arrivals from the United Kingdom, and was the result of the competition of Indian Cement Works. The total value of imports of matches, mostly Swedish, fell from Rs. $7 \cdot 20$ lakhs in 1927-28 to Ris. 3.52 lakhe in 1928-29. Increased consumption of matches made in Indian factories accounted for the reduction in the trade. The contraction was particularly striking in receipts of sulphur matches, the value recorded, viz, Rs. 1.61 lakhs being less than that in the previous year by Rs. $3 \cdot 21$ lakhs. Imports of safety matches were valued at Rs. $1 \cdot 91$ lakhs as against Rs. $2 \cdot 39$ lakhs in 1927-28. -The value of rubber manufactures fose from Rs. 36.70 Jakhs to Rs. 54.32 lakhs, the expansion being most noticeable in receipts of pneumatic motor covers from Canada. The United Kingdom and France also sent morc. Among the remaining items, the value of soap advanced by Rs. 1-05 lakha to Rs. 15.62 lakhs, chiefly in imports of houselold and huundry soap from France and toilet soap from the United Kingdom and United States of America.

## Class V.--Postal articles not specified.

10. The figures registered under this head exclude the imports by post of the five specified articles, riz., (1) Gold and silver thread, (2) Cinematograph films, (3) Jewellery, (4) Precious stones and (5) Cigarettes, which are included under the relative heads in the general imports. The total value of postal articles, not specified declined by Rs. 4.80 lakbs to Rs. 57.96 lakhs to which the United Kingdom contributed Rs. 49.56 lakhs. The total number of parcels dealt with during the year was 115,447 as against 118,913 in 1927-28. Besides these, 55,743 letter packets were assessed to duty as against 54,965 last year. The decrease in the number of parcels is attributable to the raising by the Postal authorities of the limit of the maximum weight of a parcel from 11 to 20 lbs. The total amount of import duty realized on all articles imported by parcel post increased from Rs. $11,06,007$ to Rs. $11,20,550$, but that on articles. contained in letter packets decreased from Rs. 74,411 to Rs. 61,942.

## EXPORTS.

## Indian Produce and Manufactures.

11. Agricultural Conditions.-As the bulk of the export trade of this port consists of agricultural produce, it will be useful to give a brief review of weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces before entering into a detailed examination of the figures relating to the more important commodities.

In Sind, the rainfall during the year was scanty, but the intundation was favourable on the whole. The river kept a fairly good level for an unusually long period, and the final rise in September to $13-2$ feet at Bukkur was of great benefit to the maturing kharif crops. The rabi orops were expected to be good, but the severe frost in January had a considerable adverse effect. The wheat crop which promised well at first, suffered damage in many places, while almost the whole of the rapeseed crop, except a small percentage sown late, was totally destroyed, and is being used as food for cattle. In the Punjab, though the early rains were less active than usual, the fall at the end of August was excessive. It eaused disastrous floods in the Jhelum, the Chenab and the Ravi rivers, and much damage was done to crops and cattle in the riverain areas. The November rains, however, proved useful to the standing crops, and made possible the sowings of extensive wheat areas. The river supply was above normal, and the canals well supplied in consequence. The prospects of the rabi crops were expected to be generally about the average, but severe cold and frost at the end of January and the beginning of February considerably damaged the wheat crop. In the United Provinces, the monsoon rains were insufficient for the requirements of the kharif crops, and the short rainfall in September also caused anxiety for the $\gamma$ rbii sowings, Good showers in October, however, improved the prospects, and the sowings of wheat, though delayed, were carried out under fairly good conditions. But intense cold and frost adversely affected the rabi crop.

In the following table the area and yield for the past two seasons of the three most important crops, in Sind, the Punjab and the United Provinces, viz., wheat, rape and mustard seed and cotton are compared, the figures being taken from the returns furnished by the Directors of Agriculture for those provinces. In the case of wheat and rapeseed and mustard seed, which are rabi crops, the figures for the season 1927-28 are compared with those for 1926-27, as the produce exported in 1928-29 relates mostly to the former season. In the case of cotton, which is a kharif crop, exports relate to the season 1928-29, and therefore the crop figures for 1928-29 are compared with those for 1987-28.

Foreign Exports. (Agricultural conditions.)

Table No. 11.

| Province. | Wheat. |  | Rape and Mustard aceds. |  | Cotton. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1026-27. | 1927-28. | 1926.27. | 1927-28. | 1927-28. | 1928-29. |
|  | Arca. |  |  |  |  |  |
|  | Acres. | Acres. | Acres. | Acres. | Acres. | Acres, |
| Sind | 497,000 | 386,000 | 180,000 | 150,000 | 271,000 | 382,000- |
| Punjab | 10,620,000 | 10,304,000 | 913,000 | 912,000 | 2,067,000 | 2,825,000 |
| United Provinces | 6,831,000 | 7,588,000 | 2,390,000 | 2,751,000 | 643,000 | 715,000. |
|  | Yield |  |  |  |  |  |
|  | Tons. | топв. | Tons. | Tods. | Bales of | Bales of |
|  |  |  |  |  | 400 lbs . | 400 lbs . |
| Sind | 113,000 | 88,000 | 17,000 | 14,000 | 72,000 | 114,000 |
| Punjab | 3,431,000 | 2,700,000 | 147,000 | 156,000 | 602,000 | 616,000. |
| United Provinces | 2,514,000 | 2,394,000 | 449,000 | 296,000 | 190,000 | 255,000. |

The above figures show that the reduction of 22 per cent in the area under wheat in Sind resulted in a corresponding decrease in the yield. The premature fall of the river was responsible for the curtailment in the average, and the outturn further suffered from frost in many places in the unirrigated area and from rust in the irrigated area in lower Sind. The position of this crop in the Punjab was disastrous. It will be noticed that while the cultivated area decreased by only 3 per cent, the yield was reduced by as much as 19 per cent. This was mainly due to the strong dry winds and severe dust storms which. swept the Province in early March.

In the United Provinces the outturn figures reveal a shortage of 5 per cent, despite an increase of 11 per cent in the area. This was due to the prevalence of unfavourable weather conditions during the critical months when the crop was maturing. The area and yield of the rapeseed crop in Sind declined by 15 per cent and 18 per cent, respectively, while in the Punjab the former increased by 3 and the latter by 6 per cent. The season in the Punjab was favourable for sowings. In the United Provinces, though the acreage rose by 15 per cent, the outturn was reduced by as much as 34 per cent. Excessive rainfall when the seed was in flower seriously affected the yield, particularly in the eastern distriets.

The figures for the cotton crop in all the three provinces were higher than in the previous year, both in area and yield. In Sind the area and yield improved by 41 and 58 per cent, respectively, the expansion in the area being the result of the steady character of the inundation at the time of sowing.

In the Punjab, though the area sown under cotton rose by 37 per cent, the outturn increased by only 2 per ceut. The, smallness of the yield was chiefly the result of the considerable damage done by heavy floods in certain areas referred to above. Of the total area under cotton in the Punjab, viz., 2,825,000 - acres, some $1,864,000$ acres were reported to be under Desi and 961,000 acres under American cotton. The United Provinces returns indicate a rise of 11 per centin the acreage and 28 per cents, in the production over the figures recorded last year. The outturn for the Province is estimated at 75 per cent of the normal The total area and yield of these three crops in the whole of India were as follows :-

| Crop. | Aroa. | Percentage of imereased or decrease. | Yield. | Porcentage of incrosse or docreaso. |
| :---: | :---: | :---: | :---: | :---: |
|  | $\stackrel{4}{ }$ |  |  |  |
| Wheat | Acres. $32,211,000$ | $+3$ | Tons. |  |
| Rape and mustard seed | 5,931,000 | $+7$ | 846,000 | $-16$ |
| Cotton | 20,484,000 | +7 | $\left\lvert\, \begin{gathered} \text { Bales of } 400 \mathrm{lbs} . \\ 5,638,000 \end{gathered}\right.$ | -5 |

12. The following table gives the value of the export trade, including re-exports, under the five main classes for the last four years and the pre-war year:-

Table No. 12.

## Class I.-Food, Drink and Tobaceo,

13. The total vafue of the articles included in slass I declined by Rs. 197.73 lakhs to Rs. $545 \cdot 82$ lakhs. The fuctuations in the volume and value of some of the more important commodities are explained in the following paragraphre

Grain, Pulse and Flonr,-The aggregate shipments under this head declined by 122,255 tons or 25 per cent to 359,660 tons in quantity and by Rs. 198.21 lakhs or 27 per cent to Rs. 528.75 lakhs in value, the decrease having occurred chiefly in exports of wheat. The following statement compares the quantities of the different kinds of food-grains exported during 192829 and 1927-28 and the pre-war year :-

Wheat-As an inevitable result of the markedly adverse climatic conditione and the resultant poorness of the crop described in paragraph 12 shipments of wheat dwindled by 187,950 tons or 63 per cent to 109,529 tons in quantity and by Res. $275-30$ lakhs or 63 per cent to Rs. 159.32 lakhs in value during the year under report. Ninety-seven per cent of this quantity was exported during the first five months of the ycar. The 1928 outturn of the Indian what crop, viz., $7,762,000$ tons was the lowest since 1921, and was insufficient to meet India's own requirements. It fell short of that of 1927 bry no less than $1,211,000$ tons, and was far below the average yield for the five years ended 1926, which was nearly 9 million tons. This comparative failure, coupled with the increased consumption noticeable in recent years, resulted in the importation of no less than 562,000 tons to relieve the situation. The share of Karachi in this import was 105,507 tons, which was equal to 96 per cent of the quantity ( 109,529 tons) exported to foreign countries during the year under report. The world production of whatt in 1928 was, on the other hand, almost a record since the war. Canada, the Argentine, Australia, and the Uaited States of America, the four major exporters, had an exceptionally good harvest, and world prices ruled
low in consequence. Indian prices, however, kept above the world-parity for most of the year during which the local market witnessed many erratic fluctuations. The price of white wheat, which opened at Rs. 4-14.0 per maund on Srd April, gradually rose to Res. 5-5-0 in the second week of May, but arrivals of large quantities from upoomtry caused a decline to Rs. 4-15-0 in the third week of June, and reports of rain in the Punjab resulted in a further drop to Rs. 4-11-0 on the 4th Septernber, the latter being the lowest quotation of the year. Prices, however, hardened during the succeeding four months, the important quotations recorded being Rs. 5-2-6 in the last week of September, Rs. 5-11-0 in the first week of October and Rs. 5-15-6 in the last week of November. Arrivals of large quantities of foreign wheat, however, caused a keakening in January, but reports of damage by frost to crops in the Punjab and the United Provinces led to a rise in February, and Rs. $6 \cdot 2 \cdot 0$, the highest figure of the year, was registered on the 5th and 19th of that month. Easiness again prevailed in March, and"the closing price on the 26th of that month was Rs. $5-10-0$. The following statement shows the distribution of wheat exports for the last two years and the pre-war year.

Table No. 13.

## toreign Exports. <br> (Food-grains and flour.)

It will be noticed that shipments to the United Kingdom, our chief cistomer, declined by 176,210 tons to 74,843 tons, while Belgium and France also reduced their purchases from 19,675 tous and 20,499 tons to 9,280 tons and 2,600 tons, respectively. Egypt, on the other hand, took more, viz., 9,205 tons as against 192 tons last year. The total shipments of wheat froma India amounted to 114,707 tons to whioh Karachi contributed 95 per cent as against 99 per cent in the previous year.

Other Food-grains.-The most noticeable feature of the export buainess in other food-grains was a considerable further advance in shipments of barley, the article next in importance to wheat, the quantity exported, viz., 127,913 tons showing an excess of 59,011 tons or 85 per cents and its value, viza, Res. 152.95 lakhs an excess of Rs. 70.97 lakhs or 87 per cent over the figures recorded in the previous year. The expansion was most noticeable in despatches to Germany, which took no less than 77,865 tons as againsk 24,523 tons last year. The United Kingdom, on the other hand, reduced its purchases from 31,577 tons to 25,167 tons. Nearly 99 per cent of the shipments took place in the first five months of the year, a fair proportion of them being from the 1927 crop. The increase was due to a good crop and high prices paid by Germany during the winter of 1927-28 owing to the failure of European crops. The demand continued until the European crop of 1928 was in sight. As asual, Karachi was the chief exporter of barley also, shipments during the year representing 93 per cent of the entire quantity ( 137,847 tons) exported from India. Exports of maize were again satisfactory. The total quantity shipped rose by 7,563 tons to 16,959 tons and the value by Rs. $7 \cdot 94$ lekhs to Rs. 18.22 lakhs, mainly in despatches to Italy, which purchased 12,013 tons as against only 693 tons in 1927-28. The European crop is reported to have suffered considerably from drought. It may be noted that 98 per cent of the total shipments of this commodity from India passed through this port. Shipments of gram suffered a set-back, the total figures recorded, viz., 7,631 tons valued at Rs. 11.96 lakhs being less by 3,074 tons in quantity and by Rs. 3.73 lakbs in value than those in the preceding year. The decrease was due to a reduced demand from Egypt and France. The share of Karachi in the All-India shipments of gram, viz., ( 13,969 tons) was 55 per cent, the balance having gone chiclly through Bombay and Burma. Exports of wheat flour amounted to 33,969 tons valued at Rs. 67.79 lakhs, showing a decrease of 2,286 tons and Rs. $5 \cdot 29$ lakhs, which occurred mainly in supplies to Ceylon, Mauritius and Persia. Egypt, the largest purchaser, on the other hand, took more, viz., 11,687 tons 28 against 11,078 tons, last year. Exports of rice rose by 3,049 tons to 50,345 tons in quantity and by Rs. $4 \cdot 67$ Iakhs to Rs. $99 \cdot 45$ lakhs in value. The expansion occurred mainly in shipments of boiled rice to the Bahrcin Islands, Acen and Dependencies, Other Native States in Arabia and Italian East Africa. Muscat Territory and Persia, on the other hand, bought less. The increase in the outturn of the crop in Sind from 390,000 tons in 1:27-28 to 502,000 tons in 1928-29 stimulated exports.

## CTass II.-Raw Materials and Produce and articles, mainly unmanafactuged.

14. The total value of the articles included under this class rose by Rs. 201.30 lakhs to Rs. 2,138 lakhs. The variations in the trade in some of the principal articles are explained below.

Raw cotton.-The following table shows how cotton exports were distributed during the past two years and the pre-war year 1913-14:-

| Exports ta Bombay | 12,002 | 03,00,040 | 10,841 | 1,51,06,785 | 8,806 | 34,00,349 |

A considerable expansion in this valuable conmodity has been the chief redeeming feature of the export trade of the port during the year under review. The aggregate shipments amounting to 148,600 tons valued at Rs. 1,426-40 lakhs were higher than those in the previous year by 17,042 tons or 13 per cent in quantity and by Rs. $163 \cdot 72$ lakls or 13 per cent in value, the quantity being the second highest on record, the record total being 179,679 tons in 1925-26. A bigger crop in Sind, Punjab and the United Provinces, coupled with some improvement in the parities between Indian and American cotton gave an impetus to the trade. Local prices also ruled lower than in the previous year in sympathy with the world market. It will be seen from the figures given in the above table that Germany was the largest purchaser, displacing Japan, and the total quantity taken by her, vie., 30,772 tons showed an increase of 6,370 tons as compared with the previous year. Shipments to
the United Kingdom also rose by 8,097 tons to 20,820 tons. Exports to China, which last year fell to the low figure of 2,007 tons owing to the chaos in that country, showed a marked recovery at 9,116 tons. It is, however, discouraging that Japan and Italy, our two leading customers in recent years, bought less. Japan which, last year, curtailed its requirements to 32,698 tons from 54,805 tons in 1926-27 reduced them further to 29,439 tons in 1928-29. Large stocks of low grade American cotton in hand, coupled with the general trade depression caused by the after effeets of last year's financial crisis, precluded the possibility of business being done on a larger scale, and the position was further aggravated by the anti-Japanese movement in China. Italy took 2,254 tons less than in the previous year, the decrease being ascribed to the unsatisfactory state of the spinning industry in that country. It must be recorded that although the volume of business done during the year was on an increased scale, large stocks remained in hand at the close of the year. The local dealers again held one cotton crop until another was in sight in the hope of realising better prices, but this speculative policy was once more fraught with disaster. Not only were heavy losses incurred owing to a fall in prices, but the accumulation of huge stocks in the Thole Produce Yard undoubtedly helped to increase the extent of the great fire there in April last year,--easily the biggest conflagration that has over occurred in Karachi-and clains paid by Insurance Companies in respect of it amounted to the gigantic sum of nearly Rs. 45 lakbs. As a result of this and other numerous subsequent fires, not only have insurance rates been substantially increased, but some companies have declined further business. This trend of affairs should make it more difficuld in future to finance the undue holding up of enormous stocks of cotton, which also has the undeairable effect of immobilising funds on a large scale.

Wool, raw.-The steady expansion in exports of raw wool, which has been such a noticeable feature of the past two years, continued during the year under report, and the total shipments increased further by 6 per cent to $313_{4}$ million lbs. in quantity and by 7 per cent to Rs. 278.83 lakhs in value. The prospect of a material shortage in the Australian clip created a strong buying movement in the earlier months of the year, which was helped by the fear of short supplies later on. Subsequent events, however, proved that the position had been entirely misjudged. The estimated decrease in production was grossly exaggerated, and the prices realised at the London sales in September were therefore very low. The concluding sales of the year were, however, marked by a keen and well-sustained demand. The expansion during the year occurred chiefly in shipments to the United States and Belgium, the former raising its purchases by $1 \frac{1}{4}$ million lbs. to $4 \frac{1}{2}$ million lbs. in quantity and by Rs. 10.30 lakhs to Rs. 38.57 lakhs in value and the latter by over $\frac{3}{4}$ million lbs. to 14 million lbs. and by Rs. 8.17 lakhs to Rs. 11.75 lakbs. Increased efforts to influence direct trade with the United States resulted in larger quantities being seat on consignment to that country by Indian dealers. Shipments to the United Kingdom, the chief purchaser, raceded by a little over half a million Ibs. to $25 \frac{1}{2}$ million lbs. and by Rs. $2 \cdot 61$ lakhs to Rs. $225 \cdot 61$ lakhs, but this decrease was set off by an increase of half a million lhs. and Res. 8 lakhs in purchases of Kandahar wool. This variation is dealt with at a later stage in this Report.

Seads.-The total quantiby of seeds exported duaing the year deareased by 4,724 tons or 6 per cent to 75,474 tons, but the value rose by. Rs. 1.71 lakha or 1 per cont as compared with the previous year. The following table compares the volume and value of exports of the different kinds of seeds to the principal countries during the past two years and the pre-war year ;-

Rapeseed:-Shipments of rapesecd aggregated 68,670 tons valued at Rs. $146 \cdot 49$ lakhs, showing an increase of 8,516 tons or 14 per cent in quantitg and of Re. 1388 dakhs 10 per eent in value, as compared with 1927-28,
most of the exports were toria. The United Kingdom was the largost purchaser, and the quantity taken by her, viz., 25,662 tons was 123 per cent in excess of that in 1927-28. The improvement was due to a strong demand for oilcake and meal, on both home and export account. Italy, last year's chief purchaser, on the other hand, took much less, viz., 9,273 tons as against 19,372 tons. As usual, Karachi was the largest exporter of rapeseed, her share representing 88 per cent of the total quantity, viz., 77,496 tons shipped from India.

Other seeds.-As regards the trade in other seeds, the United Kingdom greatly curtailed its orders for cotton seed, the principal itam, and in consequence shipments of that commodity, which last year stood at 18,927 tons valued at Rs. 19.21 lakhs, fell to 4,187 tons valued at Re. $3 \cdot 88$ lakhs.

Hides and Skins, raw.-The following table compares the exports of raw hides and skins to the different countrics during the past two years:-

Table No. 16.

| Articles | Exporte during |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1927-28. |  | 1028-29. |  |
|  | Tons. | Rs. | Tons, | Ra. |
| United States of AmericaVia Atiantic Coast | 3,800 | 61,44,768 | 6,146 | 69,19,896 |
| Other countries . . | 58 | 1,07,164 | 188 | 3,97,146 |
| Total | 4,587 | 66,51,322 | 6,126 | 85,92,000 |
| Cuttinge of Hides and Skins | 356 | 63,675 | 482 | 1,02,498 |
| Grand total of Hides and Skins, raw. | 11,467 | 1,47,71,690 | 13,399 | 1,76,72,281 |

Raw Hides.-Despite a heavy increase of 123 per cent in quantity and 180 per cent in value in shipments last year, raw hides continued to be in good demand in the earlier months of the year owing to a shortage in various quarters, and high prices were again paid. Exports during the year aggregated 6,791 tons valued at Rs. 88.78 lakhs, showing an excess of 4 per cent in quantity and 10 per cent in value over the figures recorded in 1927-28. The improvement was most noticeable in purchases of cow hides by Spain, Italy and Belgium and buffalo hides by the United States and Bulgaria. Shipments to the United Kingdom and Germany, mostly consisting of cow hides, on the other hand, decreased by 413 tons and 424 tons, respectively. It is, however, reported that the demand for raw hides, both at home and on the Continent, slowed down considerably towards the end of the year resulting in a slump in values.

Raw Skins.-After a set-back in the two previous years, exports of raw skins at 6,126 tons valued at Rs. 85.92 lakhs showed a substantial improvement of 34 per cent in quantity and 89 per cent in value as compared with 1927-28, the quantity reaching a level which was the third highest on record, the two previous higher shipments being 9,650 tons in $1916-17$ and 8,360 tons in 1919-20. Shipments during the year, as usual, largely consisted of goat skins, the quantity rising from 4,321 to 5,537 tons and the value from Rs. $61 \cdot 53$ lakhs to Rs. $78 \cdot 40$ lakhs. The United States, the chief purchaser, took nearly 91 per cent of this quantity.

Miscellaneous.-Among other articles included in class II, the value of manures declined by Rs, 2.53 lakhs to Rs. 37 lakhs to which bones alone contributed Rs. 34 lakhs. The decrease was due to smaller shipments of crushed bones to Belgium and bone meal to the United States. Exports of raw silk also fell in quantity from $487,944 \mathrm{lbs}$. to $343,956 \mathrm{lbs}$. and in value from Rs. $26 \cdot 38$ lakhs to Rs. $19 \cdot 26$ lakhs, owing chiefly to France having curtailed its orders for mulberry silk, raw, chasam or waste and cocoons. Exporte of chromite (chrome iron ore), a product of Baluchistan, were valued at Rs. 6.97 lakhs, but Belgium, last year's chief customer, reduced its purchases from Rs. 3.57 lakhs to only Rs. 46,500 , while Germany, which made no purchases in 1927-28, took nearly Rs. 4 lakhs worth this year.

## Class III.-Articles wholly or mainly manuiactured.

15. The total value of the articles included under this class advanced further by Rs. $4-04$ lakhs to Rs. $35 \cdot 40$ lakhs. The improvement occurred mainly in exports of leather, the value of which rose from Rs. 10.78 lakhs to Rs. 13.78 lakhs as a result of the United Kingdom taking more cow hides, dressed.

## Foreign Mierchandise, Re-exported.

16. The total value of re-erports of foreign merchandise anounted to Rs. 177.73 lakhs, showing an increase of Rs. $38 \cdot 25$ lakhs or 27 per cent, as compared with the previous year. Shipments of row toool, mostly Kandabar wool, the most important article in this entropot trade, advaneed by nearly a million lbs, to 8 million lbs. in quantity and by Rs. $13 \cdot 21$ lakhs to Rs. 71.74 lakhs in value, owing to a better demand from the United Kingdom and the United States. The position as regards the wool trade generally has been explained in paragraph 14 under Indian wool. The value of reexports of woollen manufactures, mainly Persian carpets, also rose from Rs. $37 \cdot 10$ lakhs to Rs. 49.96 lakhs chiefly in despatches to the United Kingdom and the United States, the two largest cestomers. Sugar, which came next, was also exported in larger quantities, the figures for the past two years being 4,340 tons valued at Rs. 11.08 lakhs and 6,174 tons valued at Rs. $12 \cdot 28$ lakhs, respectively. The increase occurred in shipments to the Bahrein Islands and Ceylon.

## III.-Coasting Trade.

17. The value of the entire coasting trade of the Province of Sind deelined by Ris. 277 lakhs or 16 per cent to Ris. 1,439 lakhs, owing mainly to the heavy reduction in the trade with Bombay due to the labour troubles there.

## Chiei Port-Karachi.

18. The following table shows the aggregate value of the coasting trade of the port of Karachi, including Government stores and treasure, for the last four years and the pre-war year :-

Table No. 17.

The aggregate value of the coasting trade of the chief port, amounted to Rs. 1,428 lakhs, showing a decresse of Rs. 280 lakhs or 16 per cent., as compared with the previous year. Both imports and exports suffered a setback, the value of the former having fallen by Rs. 128 lakhs to Rs. 982 lakhs, and that of the latter by Rs. 152 lakhs to Rs. 446 lakhs.

## Private.

19. The coasting trade in private merchandise between the chief port, Karachi and other ports in India, grouped by provinces, is shown in the following table:-

Table No. 18.

## Imports.

20. Indian merchandise.-The total value of Indian produce and manufactures, imported into Karachi from the coast ports contracted by Rs. 143.50 lakhs to Rs. $865 \cdot 76$ lakhs. By far the largest portion of the decrease occurred in receipts of cotton grey piece-goods (-Rs. 100.59 lakhs) and coloured piecegoods (-Rs. $25 \cdot 85$ lakhs) from Bombay, and was the result of the continuous mill-strikes at that port during the year. Other articles, which also partly contributed to the decline, were cotton twist and yam (-Rs. 4.32 lakhs) from Bombay, coal (-Rs. 6.71 lakhs), wrought iron (-Rs. 5.35 lakhs), and gunny bags (-Rs. 3.61 Lakhs) from Bengal and kerosene oil (-Rs. 52.71 lakhs) from

Burma. The following articles, on the other hand, showed increases:-rice ( + Rs. 8.17 lakhs) from Bombay and Buama, eigarelles ( + Rs. 4.55 lakhs), white piece-goods ( + Rs. 3.32 lakhs) and matches $\{+$ Rs. 3.02 lakhs) from Bombay, whect ( + Rs. $4 \cdot 12$ lakhs), gram ( + Rs. $3 \cdot 69$ lakhs) and sesamum seed ( + Rs. 1.91 lakhs) from Kathiawar, teak wood ( + Rs. $3 \cdot 14$ lakhs) from Burma and castor seed ( + Rs. I-89 lakhs) from Cutch and Kathiawar.

Cotton piece-goods.-The table below gives the trade in Indian piecegoods imported coastwise during the past four yeara and the pre-war year under each of the three headings, grey, white and coloured:-

Table No. 19.

|  | Years, |  | Grey. |  | White. |  | Coloured. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Yards, | ${ }_{\mu} \mathrm{R}$ R. | Yards, | Ra. | Yards. | 193. |
| 1018-14 | - | - | 118,202,860 | 1,87,37,078 | 1,353,702 | 2,09,589 | 44,482,077 | 08,04,094 |

| 2097-28 |  |  | 133,609,075 | 4,44,54,620 | 2,002,825 | 10,43,660 | 32,062,800 | 1,05,063 016 |
| 1028-20 | - | . | 109,150,244 | 3,43,52,769 | 8,250,347 | 18,75,457 | 22,185,374 | 79,18,055 |

Foreign merchandise.-The aggregate value of imports of foreign merchandise into Karachi from the coast ports rose by Rs. $10 \cdot 40$ lakhs to Rs.'95-12 lakhs, the increase being most noticeable in arrivals of cotion wohite piece. goods ( + Rs. 1-11 lakhs), coloured piece-goods ( + Rs. 2.16 lakhs), carriages ard carts ( + Rs. $1 \cdot 85$ lakhs) and silk piece-goods ( + Rs. $1 \cdot 34$ lakhs) from Bombay.

Cotton piece-goods.-The following table shows the imports of foreign piece-goods coastwise for the past four years and the pre-war year under each of the three headings, grey, white and coloured:-

Tabie No. 20.

| Years, |  | Gruy. |  | White. |  | Coloured. |  |

## Exports.

21. Indian Produce and Manufactures.-The total value of Indian produce and manufactures exported from Karachi to coast ports amounted to Rs. 369.52 lakhs, a decrease of no less than Rs. 139.09 lakhs, as compared with the previous year. This unsatisfactory position was due to a heavy fall to the extent of Rs. $143 \cdot 82$ lakhs in shipments of raw cotton clicfly to Bombay, There was also a considerable set-back in despatches of rice (-Rs. 13.27
lakhs) to Kathiawar and Goa, and gram (-Rs. $11 / 76$ lakhs) to Madras. Shipments of wheat, on the other hand, showed a substantial increase of Rs. 43.29 lakhs, mainly due to Calcutta having purchased 28,572 tons of that commodity against none last year.

As stated in the preamble, a feature of outstanding importance in the export coasting trade durirg the year was the commencement of shipments to Calcutta of locally manufactured white salt the quantity exported being 7,675 tons and the value Rs. 3.75 lakhs. Further developments in this new industry are hoped for in the near future.

The following table shows the exports of cotton to Bombay during the past four years and the pre-war year :-

Table No. 21.

Foreign Merchandise.-The total value of exports of foreign merchandise from Karachi to coast ports receded from Rs. 87.17 lakhs to Rs. 75 lakhs, mainly owing to reduced shipments of fruits dried (-Rs. $9 \cdot 68$ lakhs). and cotton white piece-goods (-Rs. $2 \cdot 23$ lakhs) to Bombay.

## Subordinate Ports.

22. Keti Bandar and Sirganda.-The total value of the entire trade with these two ports, which is confined to trade with coast ports, rose from Rs. 8.26 lakhs to Rs. 10.68 lakhs to which Keti Bandar contributed 73 per centand Sirganda 27 per cent. Rice is the chief produce of both these ports. During the year under report Reti Bandar exported 1,463 tons to Karachi, 1,171 tons to Cutch, 488 tons to Madras and 2 tons to Kathiawar, while Sirganda sent 2,045 tons to Cutch.

## IV.-Miscellancous.

23. Shipning.-The table below gives the number of vessels entered at and cleared from the ports of the Province of Sind dnuing the past two years:-

Table No. 22.

| Total Coasting Stoam and Sailing | 5,528 | 3,026,234 | 6,744 | 3,185,537 |

Foreign Trade.-The total number of vessels engaged in the foreign trade increased slightly from 1,193 to 1,195 , and their tonnage from $2,024,908$ to 2,101,428 tons. The improvement occurred under steam vessels only, their number rising from 675 to 687 . The average tonnage per steamer also rose from 2,927 tons to 2,993 tons. The number of sailing vessels, on the other hand, declined from 518 to 508 . The sailing vessels were native craft trading to Persian Gulf ports, Kenya Colony, Ceylon, and the Somaliland Protectorate.

The following figures show the number of stemers of eacla nationality that entered the port of Karachi during the year $1928-29$ as compared with 1927-28:-

Table No. 23.

It will be noticed from the above table that during the year under report 938 steamers entered the port as against 915 in 1927-28. The number of vessels flying the British flag rose by 8 to 739 and those of foreign nationality by 15 to 199, the increased tonnage being required to deal with larger exports of cotton, wool, barley and raw hides and skins and partly to bring wheat from Australia. In all 17 steamers arrived with wheat, 16 from Australia and 1 from Natal. As regards arrivals of foreign steamers, a noteworthy feature was the increase in the number of Norwegian steamers from 11 to 23.

Freight.--Freight rates to the United Kingdom which, at the beginning of the year stood at 20 s . 6 d . for wheat and 19 s . 6 d . for rapeseed, declined to 169 . and 15s. at the beginning of September, the lowest figures of the year. An advance, however, soon followed, and the highast fgures of the year, viz.,

2ks. for wheat and 23 s . for rapeseed were registered in the first week of January. This level was, however, not long maintained, and the closing rates on 27th March were 19s. for wheat and 18s. for rapeseed.
24. Exchange.-As in the previous year, exchange fluctuated within narrow limits, the extremes being 1s. $5 \frac{3}{3} \frac{7}{3} d$. and $1 s .6 \frac{6}{6} d$. reached on 22 nd June and 25th October 1928, respectively.
25. Revenue.-The following table shows the total collections for the province on account of import and export duty and refunds therefrom and the duty on imported salt, separately for the last four years and the pre-war year:-

Table No. 24.

(a) Iacludee Fts. 7,76,8s7 on account of Refunds and Drawbacke paid in cabl for gooda eent to Afghanistai.

The total gross receipts of Customs Revenue during the year under report amounted to $630 \cdot 92$ lakhs, showing an increase of Rs. $59 \cdot 13$ lakbs or 10 per cent. as compared with the previous year. These figures are a new high record
for the port. Collections on account of import duty on private merchandise, exclusive of salt, rose by Rs. 80.23 lakhs or 15 per cent. to Rs. 599.54 lakhs. The increase was most noticeable in receipts for sugar, the leading article, whioh advanced by no less than Rs. 47.93 lakhs to Rs. 185.01 lakhs. Recoveries on cotton piece-goods, the next important item from a revenue point of view, rose by Rs. 15.05 lakhs to Rs. $112 \cdot 21$ lakhs, and a substantial improvement of Rs. $13 \cdot 88$ lakhs also occurred in the import duty realized on kerosene oil amounting to Rs. $32 \cdot 38$ lakhs. Other important articles, which yielded more revenue, were motor cars, motor cycles and parts, Rs. $11 \cdot 39$ lakhs ( + Rs. 1.03 lakhs) and pneumatic tyres and tubes for motor cars, motor lorries and motor cycles, Rs. 6.23 lakhs ( + Rs. 2.24 lakhs). There was, on the other hand, a decrease in realizations on iron and steel, including special protective duties, Rs. $33 \cdot 30$ lakhs (-Rs. $2 \cdot 25$ lakhs), tobacco, Rs. $25 \cdot 87$ lakhs (-Rs. 4.26 lakhs), matches, Rs. $5 \cdot 11$ lakhs ( - Rs. $5 \cdot 57$ lakhs) and provisions, Rs. $14 \cdot 38$ lakhs (-Rs: $2 \cdot 09$ lakhs). The decrease under iron and steel was due to larger importations of goods of British manufacture, which pay preferential duties and also of descriptions charged with non-protective rates of duty. The decline under provisions occurred in receipts for 'vegetable product,' which fell from Rs. 11.28 lakhs to Rs. $9 \cdot 40$ lakhs. Protective duties on iron and steel decreased by Rs. $2 \cdot 86$ lakhs to Rs. $27 \cdot 52$ lakhs. The total amount of import duty recovered on Government stores declined by Rs. 21.35 lakhs to Rs. 20.88 lakhs. The revenue from export duties increased by Rs. 24,680 to Rs. $10 \cdot 49$ lakhs to which raw hides and skins contributed Rs. 7.34 lakhs ( + Rs. 20,439 ) and rice Rs. 3-12 lakbs ( + Rs. 3,637 ).
26. Changes in the rates of duty.-The statement below shows the important changes introduced in the rates of import duty during the year under report. Besides these, the existing rates of import duties on matches and match splints and veneers, which were formerly treated as ordinary revenue duties were, with effect from 25th September 1928, brought under ' protective duties.'

## REPORT

ON THE

# MARITIME TRADE 

OF THE

## PROVINCE OF SIND

## FOR THE OFFICIAL YEAR ENDING 31st MARCH 1930.

## I.-GENERAL SUMMARY.

1. During the year $1929-30$ the Province of Sind, in common with the rest of the world, suffered from a general wave of trade depression caused largely by the universal fall in prices. The Province was also hard hit by excessive rains, serious flood damages and ravages ly locusts. The unprecedented speculation on the New York Stock Exchange is said to have caused some of our customers to curtail their purchases.

A reference to the table on pages 2 and 3 , in which are recorded the values of the entire maritime trade of the Province, will show that the values of both imports and exports in the foreign trade fell short of tine totals recorded in the previous year, whereas thoee in the cossting trade showed some improvement. Foreign imports decreased by Rs. 466 lakhs, or 14 per cent, cotton piece-goods being responsible for more than half this decrease. Although larger quantities of sugar were received the low prices resulted in a decrease in the value. Foreign exports decreased by Rs. 348 lakhs, or 12 per cent. Wheat and barley accounted for 83 per cent. of this decrease and wool, rapeseed, raw hides, maize and rice accounted for most of the remaining 17 per cent. On the other hand the quantity of raw cotton exported was a record one but here again low prices prevented a proportionate rise in value. In the coasting trade it is satisfactory to notice that the new Salt industry increased its shipments to Calcutta from 7,675 tons to 19,289 tons.

## TABLE No. 1.

Table showing the values of the entire maritime trade of the Province of Sind, both foreign and coasting, during the last five years.

## IMPORTS.

British Empire.-On the import side the United Kingdom's share was as usual the largest, viz., 46.6 per cent.-almost exactly the sume percentage as last year-though the value was Rs. 230 lakhs less than in 1928-29 and was the lowest since 1922-23. Cotton piece-goods were responsible for a decline of Rs. 249 lakhs. Decreases also occurred in receipts of piece-goods of cotton and artifioial silk, woollen piece-goods and iron and steel. On the other hand, imports of beet sugar, cigarettes, pneumatic motor covers and lubricating oils showed an improvement. The very unusual imports of wheat from Australia, which attracted notice towards the end of 1928-29, continued for the first few monthe of the current year. These special imports were due to the bad harvests in Northern India and were consequently not confined to the port of Karachi but were especially heavy at Calcutta and Bombay also. The total quantity of Australian wheet imported into Karachi from January to July 1929 amounted to approximately 134,1000 tone, valued at Rs. 192 lakhs, of which 103,426 tons, valued at Rs. 149 lnkhs, was recorded in last year's statistics. In Jannary 1930 a further consignment of about 500 tons was imported,

Europe.-Germany's share of imports increased slightly to 6 per cent., but the value decreased by Rs. 16 lakhs, chiefly owing to smaller sales of woollen piece-goods, piece-goods of cotton and artificial silk, lace and embroidery gold and silver thread, sewing machines and iron and steel. Arrivals of beet sugar, cotton weaving machinery, wool machinery and aniline dyes, however, showed some expansion. The value of imports from Italy, which last year reached the record figure of Rs. 133 lakhs, suffered a set-back of Rs. 44 lakhs, due chiefly to reduced supplies of coloured cotton piece-goods, piecegoods of cotton and artificial silk and woollen blankets and rugs. Imports from France contracted by Rs. 19 akhs to Rs. 89 lakhs, chiefly in receipts of iron and steel, pneumatic motor covers and woollen piece-goods. Belgian goods decreased in value to the extent of Rs. 15 lakhs, mainly in supplies of iron and steel. Imports from the Netherlands declined by Rs. 17 lakhs to Rs. 60 lakbs: the result of smaller receipts of vegetable products and aniline dyes.

Asia.-Greatly reduced orders for sugar and a heavy fall in its price brought about a contraction of Rs. 115 lakhs in the value of imports from Java and a fall in the percentage from 11 per cent. to 9 per cent. Japan's share increased from 3 per cent. to 5 per cent. and the value from Rus. 98 lakhs to Rs. 129 lakhs, the highest yet recorded. This increase was mostly due to larger quantities of grey and coloured cotton piece-goods and piecegoods of cotton and artificial silk being received.

America.-The value of imports from the United States of America advanced by Rs. 4 lakhs to Rs. 174 lakhs and the share by 1 per cent. to 6 per cent. The improvement was most noticeable in arrivals of pneumatic motor covers and kerosene oil. Motor cars and motor-trucks however, arrived in smaller numbers.

## EXPORTS.

British Empire.-On the export side the United Kingdom's share, which a few years ago (1923-24) amounted to over 40 per cent. in the total value of the export trade, stood at the low figure of 21 per cent. ss against 27 per cent. in $1928-29$ and 32 per cent. in 1927-28. The value amounting to Rs. 543 lakhs exhibited a shortage of Rs. 229 lakhs, largely accounted for by reduced purchases of wheat and to a lesser degree of barley, rapeseed, wool and cow hides.

Europe.-The value of exports to Germany decreased from Rs. 472 lakhs to Rs. 302 lakhs and the percentage from 16 per cent. to 12 per cent. There were no exports of barley to Germany compared with Rs. 93 lakhs' worth in 1928-29. There was also a decrease in the shipments of cow hides and rapeseed. Italy's share dropped from 11 per cent. to 9 per cent. She received less rapeseed but more cotton. France purchased more cotton than in the previous year and her share rose from 4 per cent. to 5 per cent. The value of exports to Belgium decreased from Rs. 171 lakhs to Rs. 119 lakhs and the percentage from 6 per cent. to 5 per cent. Smaller shipments of barley, wheat, raw wool sad cow hides were partly counter-balanced by larger shipments of rapeseed and bones.

Asia. The export trade with Japan and China showed considerable expansion, chiefly due to heavy purchases of cotton. Japan's share of the value of exports went up from 10 per cent. to 16 per cent. and that of China from 3 per cent. to 8 per cent.

Ameriea.-Exports to the United States of America advanced by Rs. 17 lakhs to Rs. 211 lakhs-the highest level in the decade. Goat slins, raw cotton and woollen carpets were in good demand but shipments of wool decreased.
3. Prices.-The following table shows the variations in the average declared prices of certain important commodities, the average for the three years ending 1900-01 being taken as $100:-$

TABLE No. 3.
Prjees.

8
Govmrnaent Trangactions.

The increase in the value of locomotive engines and tenders and parts thereof is attributed to imports by the North Western Railway of more costly engines for heavy loads and also of a large number of oil-burning boilers to replace those burning coal. Other kinds of vebicles were mainly aeroplanes and parts thereof.

## II.-FOREIGN TRADE. IMPORTS.

The sugar market experienced another year of depression. Suppliez were plentifuly and in excess of the demant and consequently the downivand trend: of prices witnesset in $1928-29$ continued titoughout the year under tepor: The local price of white Java opened at Rs. 13nt-0 per efrt: on 2nd Aprii 1929, which was the highest quetation of the year, but dropped to hs. \#2-13-0 in the fizst week of may where it inemained until the end of ofuly. A gradual devline followee until Rs. 12-3*0 was queted at the end of August. The subsequent three months witnessed a slight mise but a weakening then set in and the lowest price of the year was recomded on 25th February 1930 et Rs. 11-4-6. The clesing price on the 25 坞 Horch whas Re. 12-8-6. The low prices tended to increase consumption, and the total quantity imported. reached 220,586 toins, a figtire which was 10,962 tops in excess of imports last year, and was the second lighbest on reeow. Unfortuantely however, the business done was not remunerative. The increase in imponts of Continental sugar was due to the prices being more farourable than in the previeus year.

Beer.-Imports from the United Kingdom increased ly 88,26 gallons to 690,810 gallons whilst those from Germany decreased by 29,656 gallons to 165,485 gallons. There was also a decrease of 6,258 gallons from the Netherlands which supplied 33,213 gallons. British brewed light beers of the Pilseaer type have become more popular among the better class of consumers.

Spirits.-The consumption of brandy is said to have increased this year owing to the unusually cold winter. A feature of the trade in both brandy and whisky was the importation of large consignments of the cheaper brands. The expansion under the head "Other sorts" was due solely to larger arrivals of rectified spirit from Java for denaturation at the Custom House, the quantity imported having risen from 29,820 gallons to 45,091 gallons. Some of the traders in the Punjab who formerly obtained their requirements from Calcutta are now making their purchsses at this port.

Wines.-Larger imports of French Vermouth ware chiefly responsible for the improvement.

Tobacco.--Imports of tobacco, amounting to over a million pounds valued at Rs. $39 \cdot 60$ lakhs, showed an incresse of $142,000 \mathrm{lbs}$. in quantity and of Bs. $5^{* 77}$ lakhs in value and made up for an almost corresponding decrease last year. The bulk of the imports consisted of cigarettes from the United Kingdom. A good up-country demand for cigarettes also gave an impetus to the trade.

Fruits and Vegetables.-The aggregate value of imports, consisting mainly of dates and potatoes, increased by Rs. $1 \cdot 45$ lakhs to Rs. 27.61 lakhs. Dates came chiefly from Iraq and the total value recorded, viz., Rs. $22 \cdot 14$ lakhs, practically maintained last year's level. Potatoes came entirely from Italy, and their total value rose from Rs. 2.44 lakhs to Rs. 3.88 lakhs.

Provision:--The decrease of Rs. $8 \cdot 12$ lakhs in the total value, viz., Rs. 86.05 lakhs was due to amaller imports of vegetable products from the Netherlands. Increased use of indigenous copra and groundnut oils, on account of their cheapness, reduced the demand for vegetable products, especially from the Punjab. The variations in the quantities of some of the principal articles are shown in the following statement:-

Tea.-Tmponts of tea amounted to 435,468 ths. valued at Rs. $3 \cdot 73$ lakehs, an increase of $78,749 \mathrm{~ms}$. in quantity and of Rs. 36,994 in value. The bulk of the imponts, viz., 383,210 Ibs., censisted of black tea mestly from Geylon, and the remuinder was green tea from China.

Grain, Pulse and Flour.-As in the previous year, imports under this head consisted chicfly of Austratian wheat to which a reforence has been made in the Geograplical distribution of trade (page 5).
8. Class H. - Hap materials and produce and articles mainly unmana. facturfect.

Oils.-The following table shows the imports of mineral oils.for the past five years, including, in the case of kerosene oilland petiol, imports from Burma:-
Foreign Imports.

The decrease in imports of kerosene oil, both from foreign countries and Burma, was due to large stocks being carried over from the previons year. This "carry-over" would have been greater still had there not been heavy despatches from this port by rail to areas normally served by Calcutta and Bombay during the period of the labour strikes at the oil installations at those ports. Half the total quantity of fuel oil was received from Persia and half from British Borneo. The entire quantity of petrol imported by sea from Persia was re-exported to that country by land via Duzdap. The fall in receipts from Burma was due to the increased use of the indigenous oil produced by the Attock Oil Company.

Coal-Imports as usual were mainly for bunkering purposes. Forcign coal increased by about 5,000 tons to 30,000 tons, valued at Rs. $6 \cdot 20$ lakhs, almost all of which came from Natal. Indian (Bengal) coal increased by about 6,000 tons to about 234,500 tons, valued at Rs. 24.91 lakhs.

## 9. Class III.-Articles wholly or mainly manufactured.

Cotion Yarn and Manufactores. -The import business in cotton goods during the year under report was disappointing. The value of the entire turnover declined by Rs. 255 lakhs, or 25 per cent., to Rs. 784 lakhs, a figuro which was the lowest for seven years. Several factors contributed to the slump in this trade. The continued fall in the prices of cloth (due largely to the lower cost of raw material), coupled with the disparity between the home and local prices, the latter being lower than the former for most of the year, and the tightness of the money market caused great depression in both the local and up-country markets and seriously affected the stability of many dealers. In several cases goods had to be resold in a falling market owing to the inability of the merchants to liquidate their commitments. All this resulted in several failures. Consumption also decreased considerably owing to the reduction in the purchasing power of the people, especially the agricultural classes whose harvests were adversely aftected by the heavy rains and by the ravages of locusts. There was very little demand from Afghanistan and Persia.

The following table shows the quantity and value of cotton manutactures imported during the last five years :-

Cotton Twist and Yarn.-The decrease occurred chiefly in receipts of coloured yarns Nos. 31 to 40 from Switzerland. Piede-goods.-The aggregate volume of receipts of piece-goods decreased by 21 per cent. and the value by 25 per cent. as compared with the previous year. The following table shows the imports of some of the more important descriptions under the three main sub-divisions of piece-goods :-

## table No. 11 . <br> Piece-goons.

Grey Goods.-Japan increased her share from 73 per cent. to 79 per cent. in the total value of grey goods. The bulk of her supplies consisted of longcloth and shirtings and drills and jeans. She also sent bordered dhutis worth Rs. 2.66 lakhs against only Rs. 42,774 in 1928-29. The shortage in British goods occurred in receipts of longcloth and shirtings. On the other hand, bordered dhutis, saris and scarves showed an improvement.

White Goods.-The United Kingdom's share in the supplies of white goods, chiefly mulls, longeloth and shirtings, was well maintained at 94 per cent.

Coloured Goods.-The United Kingdom's share in the total value of the trade in coloured goods was 75 per cent. as against 80 per cent. in the previous year. The value of imports from Italy dropped from Rs. 44.92 lakhs to Rs. 25.04 lakhs. The progressive increase in supplies from Japan continued, 50 per cent. of the imports therefrom consisting of printed drills and jeans.

Woollen Goods.--Yarn and knitting wool imported at this port is mainly intended for the Amritsar market. The total value of these imports rose by Rs. 1 lakh to Rs. 13 lakhs, chiefly in receipts from Germany. Imports of woollen piece-goods, which form the bulk of the trade in woollens, suffered a set-back from Rs. $81 \cdot 40$ lakhs to Rs. 70.62 lakhs. The three principal suppliera, aiz., France, the United Kingdora and Germany, sent less. France, which supplies mostly shawl cloth for the Amritsar market, claimed 59 yer cent. Imports of blankets, which consisted mainly of cheap rugs from Italy, fell in value from Rs. 20.82 lakhs to Rs. 15.31 lakhs.

Silk.-The total value recorded under this head increased by Rs. 1 lakh to Rs. 11 lakbs, the principal imports consisting of yarn, noils and warps (Rs. 5 lakhs) chiefly from Italy, piece-goods (Rs. 3 lakhs) from China and Japan and goods of silk mixed with other materials (Rs. 2 lakhs) from Germany.

Artificial Silk.-Imports of artificial silk declined in value from Rs. 48 lakhs to Rs. 24 lakhs, mainly owing to reduced purchases of piece-goods of cotton and artificial silk from Italy, the United Kingdom and Germany.

Metals and Metal Manufactures.-The following table shows the quantities and values of the different descriptions of metals imported during the past five years:-
TABLE No. 12.

Iron and Steel.-After the activity of the two previous years, imports of iron and steel receded as the result of $(a)$ the large stocks in hand, $(b)$ the increased use of Indian products for constructional works and the preference given to these by the Indian Stores Department and (c) the reduced demands for the Lloyd Barrage and other projects now nearing completion. Of the total quantity of iron and steel imported, viz., 110,032 tons, 74,797 tons paid the protective duties. The following table compares the share of each country in the total imports of iron and steel for the past two years :-

TABLE No. 13.

## Iron and Steel.

Other Motals.-The decresse of nearly 50 per oent. in the value of copper imports was due to smaller receipts of sheets from Germany.

Machinery of ail kinds.-The following table shows the principal types of machinery imported during the past five years:-

TABLE No. 14.
Machinery.

| Description. | 1925-26. | 1926-27. | 1927.28. | 1928-29. | 1929.30. |

| Type-writers * . . | 1.75 | $2 \cdot 48$ | 273 | 2.93 | 2-47 |
| Other sorts . | 21.59 | 29.93 | 21,32 | 32.09 | $30 \cdot 51$ |
| Total | 165.90 | 13976 | 124.06 | 148.69 | 148.62 |

The total value of machinery imported during the year increased by Rs. 1.92 lakhs. The United Kingdom supplied the bulk of the electrical machinery. The improvement in imports of textile machinery occurred in receipts of wool machinery from Germany. The figures of mining machinery more or less represent normal requirements. The decrease under sewing machines was shared by both the United Kingdom and Germany who are the principal suppliers.

Cutiery, Hardware, Implements and Instruments.- The total value recorded under this group amounted to Rs. $63 \cdot 11$ lakhs, showing a decrease of Rs. 16 lakhs as compared with 1928-29. Large stocks in hand and a fall in prices mostly accounted for the contraction.

Chemicals, Drugs and Mediejnes.-Imports under this head showed a marked recovery, the value increasing by Rs. 6.67 lakhs to Rs 48.53 lakhs, which is the highest level reached for five years. The improvenent was due chiefly to larger imports of caustie seda, soda ash and medicines from the United Kingdom.

Vehicle, excluding Looomotives for Railways.-The following statement shovs the imports of the principal classes of vehicles during the past five years:-
TABLE No. 15.

The effect of the opening by a big manufacturing Corporation of an assembly plant in Bombay is to a certain extent reflected in the reduced imports of motor cars from foreign countries during the year : the shortage of direct imports being partly made up by the arrival of 322 cars from Bombay. The United Kingdom supplied 319 motor cyeles as against 222 last year. The decrease in the number of commercial vehicles occurred mainly in receipts from Canada. Bombay supplied 174 motor trucks. Cycles imported were mainly British. Though their number did not reach the record figure of 1928-29, yet the imports were the second highest on record. Railway carriages and wagons were imported almost entirely from the United Kingdom.

Other Articles.-Among the articles not dealt with in the foregoing paragraphs, the following deserve notice.-The total value of apparel, including boots and shoes, contracted by Rs. 6 lakhs to Rs. $26 \cdot 10$ lakhs, mainly in receipts of gold and silver thread from Germany and canvas shioes with rubber soles from Canada. Imports of dyes and colours were valued at Rs. $21^{\cdot} 98$ lakhs, showing a decrease of Rs. $2 \cdot 07$ lakhs, which was most noticeable in supplies of aniline dyes from the Netherlands-the result of overstocked markets. The value of glassware and earthenware amounted to Rs. 18.72 lakhs, as against Rs. $23 \cdot 13$ lakhs, the dimiuution being due to smaller imports of sheet and plate glass from Belgium and porcelain from the United Kingdom and Japan. Imports of paper, pasteboard and stationery improved in value from Rs. 38.11 lakhs to Rs. $40 \cdot 42$ lakhs, owing mainly to larger supplies of newsprinting paper from Austria. There was a notable expansion in the trade in rubber manufactures, the value recorded, viz., Rs. $78 \cdot 93$ Iakhs, being Rs. $24 \cdot 61$ lakhs in excess of imports last year. The increase was due to the importation of a large number of pneumatic motor covers from the United States of America and the United Kingdom to meet the local and up-country demand, as well as for re-exports to Persia. Imports of matches at Rs. $3 \cdot 88$ lakhs practically retained last year's level.
10. Class V.-Fostal Articles not specifed.-The figures recorded under this head exclude the imports by post of the following five specified articles, -(1) Gold and silver thread, (2) Cinematograph films, (3) Jewellery, (4) Precious stones and (5) Cigarettes, which are included under their relative heads in the general imports. The total value of postal articles not specified rose by Rs. 151 lakhs to Rs. $59 \cdot 47$ laklss to which the United Kingdom contributed Rs. $50 \cdot 47$ lakhs. The number of parcels dealt with during the year was 96,037 as against 115,447 in $1928-29$. Besides these, 49,322 letter packets were assessed to duty as against 55,743 last year. The total amount of import duty realized on all articles imported by parcel post declined from Rs. $11 \cdot 21$ lakhs to Rs. $10 \cdot 89$ lakhs and that on articles contained in letter packets from Rs. $\mathbf{6 1 , 9 4 2}$ to Rs. 60,825.

## Exports.

## Indian Produce and Manufactures.

11. Agricultural Conditions.-As the bulk of the export trade of this port consists of agricultural produce, a brief review of weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces will be helpful in examining the exports of the more important commodities.

In Sind the rainfall was unprecedentedly heavy and caused considerable damage to the kharif crops. The cotton crop suffered not only from the floods of July and August 1929 but also from the ravages of locusts later on. On the other hand the rabi crops were benefitted by the floods. The condition of the wheat crop is reported to be satisfactory.

In the Punjab plentiful rains in July and August benefitted the kharif crops but by continning late in August they caused severe floods in the Indus, Jhelum and Chenab which resulted in much damage to crops and cattle. Seasonable rains in December ensured a good supply of water in the rivers and canals and consequently the conditions and prospects of the rubi crops are reported to be generally good in the irrigated areas.

In the United Provinces the monsoon rains were unevenly distributed and inadequate and the yield of the kharif crops was greatly reduced in consequence. The rabi sowings were also carried out under unfavourable conditions, moisture being insufficient in many places. Well-distributed rain in January however, proved of great value and there is every prospect of a good harvest.

The following table gives the area and yield of the three most important crops in Sind, the Punjab and the United Provinces, viz, wheat, rape and mustard seeds and cotton, for the past two seasons, the figures being taken from the crop reports published by the Directors of Agriculture for those Provinces. In the case of wheat and rape and mustard seeds, which are rabi crops, the figures for the season $1928-29$ are compared with those for 1927-28, as the produce exported in 1929-30 relates mostly to the former season. In the case of cotton, which is a kharif crop, exports relate to the season 1929-30, and therefore the crop figures for 1929-30 are compared with these for 1928-29.

TABLE No. 16.

| Province. | Wheat, |  | Rrape and mustard seods. |  | Cotton. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1927-23. | 1828-20. | 1927-28. | 1028-29. | 1928-29, | 1029-30. |
|  | Area. |  |  |  |  |  |
|  | Aores. | Acres. | Aores. | Acres. | Acres, | Aores. |
| Sind | 421,000 | 392,000 | 120,000 | 169,000 | 375,000 | 317,000 |
| Punjab | 10,304,000 | 11,299,000 | 951,000 | 1,597,000 | 2,841,000 | 2,496,000 |
| United Provinces | 7,588,000 | 7,218,000 | 2,751,000 | 3,016,000 | 715,000 | 932,000 |
|  | Yiold. |  |  |  |  |  |
|  | Tons. | Tons. | Tons. | Tone. | Bales of 400 lbs . | Bales of 400 lbs. |
| Sind . | 81,000 | 80,000 | 13,000 | 10,000 | 107,600 | 47,000 |
| Punjab | 2,764,000 | 3,423,000 | 150,000 | 166,000 | 619,600 | 788,000 |
| United Provinces | 2,304,000 | 2,518,000 | 206,000 | 351,000 | 255,000 | 342,000 |

The total area and yield of the above three crops for the whole of India were as follows :-

| Orop. | Area. | Percentage of increase or decrease. | Yield. | Percentage of incrange or deoreage. |
| :---: | :---: | :---: | :---: | :---: |
|  | Acres. |  | Tons. |  |
| Wheat | 32,011,000 | -1 | 8,507,000 | +9 |
| Rape and mustand seed | 6,823,000 | +15 | 808,600 | +8 |
| Cotton . . . . | 25,682,000 | -5 | (en of 400 lbs. | -9 |

## Foroign Exports.

The Iadian wheal crop was again much below the average, and consequently the surplus atailable fer export was very small. As in the previous year, it was possible to import Austradian wheat at a profit (vide page 5 ). The local price of white wheat opened at Rs. $5-8=0$ per mannd of $82 \%$ lbse at the beginning of the year and closed at Rs. 4-2.0 at the end of the year; these being the highest and lowest levels reachod.

Barley,-The heary drop in shipments of banley was due to the poor crop in India and to the tow prices offered by the consuming countries who were well supplied with cheap bandey from the good harvests in Europe.

Maize, Gram and Rice.-The failing off was due to poor crops and the low surplus available for expert.

Wheat Flour.-The decrease was the natural zesult of the shortage of wheat and was most noticeable in shipments to Hgypt and Aden, the chief consaming markets.
15. Class II.-Raw Ifaterials and Produce and Ayticles mainly upmanufactured.

Raw Coltoz:-cthe following table shows the quantities and walue of zaw cotton exported to foreign countries during the past five years:-
TABLE NO. 2 l .
Cotron.

An abandant crop of rawo cotton, both in the Punjab and the United Provinces, enabled tho quantity shipped to
reaoh a record figure.
Wool.-The following table shows the quantity and value of Indian raw wool exported to foreign countries during the
past five years :-

Raw-Hides:-There was a decline in the exports of raw hides owing to a stoadily fadling market and unfavourable prices. This centinuous downward. trend made business insecure jo meny quartets and number of important tusiness hoouses, parcicularly in Germany and in the Baltan States, are reponted to have come to grief.

Ráw Skin 3.-Larger purchases by the Enibed States of America of goat shins accounted for the improvement.

Miscellaneous.-Awong other articles included in "Class II-Raw materials, etc." the following deserve notice. -fixports of bones were well maintanied at Rs. 34 lakts, Belgium being the largest purchaser. Exports of naw silk advaiced fom Rs; $19 \cdot 26$ liatchs to Rs. $21-52$ lakhs; owing to larger shipments of raw mulbervy sill to the United Kingdom and Itaily. The value of chromite fchrome iron orej, ar produc̈t of Baluchistan, doclined from Rs. 6.97 lakhs tọ Rs. 2.82 lakhs, shipments to Gemany and France being less.

## 

Leather.-Exports of leather, the imporitant aiticle in this class, receded slightly in value from Rs. $13 \cdot 78$ lakds to Rs. $\mathbf{d 3} \cdot 24$ laliths, the bulk of the shipmeuts comprising tanned or diessed stins to the United Kingdom.

## Foreign Merehandise remexported:

Indian Froduce and Manufactures.-Gram and pulse were exported fargely to Madeas, gowar and bajra to Bombay, Kathiawar and Cutch, rice to Kathiswar, Cutch and Goa, wheat to Sombay, Bengai and Cutch, wheat flous to Madnas, Kathinwaf, Bombay and Goa, Kcrosene oil to Kathiawor and Cutch, cotton to Bomibay mad salito Calcutta, A mote regarding solt is given on page 1.

Foreign Iferchandise. -Shipments of dried fruits and white cotton piecegoods trent mainly to Bembay, coloured cotton piece-goods to Baluchistan and sugar to Bombay and Madras.

## Subordinate Ports.

24. Keti Bandar and Sirganda. - The total value of the entire trade of tliese tive porits, which is sonfoned tio ooasting trade, declined from Rs. 10.68 lakhs to Rs. $9.2 \%$ lakhs, to which Feti Bundar contributed 59 per centiond singanda 41 per cent. Rice is the chief article in the trade of both these jorts. Keti Bandar exported 800 tons of rice to Karachi, 687 tons to Cutcb and 9 tons to Kathiarwar, white Sirganda sent 3,146 tons to Cutch, 29 tons to Rafachi and 8 tons to Bombey.

> 1V.--Miscellaneous.
23. Shiping--The table helow gives the number of vessels entiered at and eleared from the ports of the Province of Sind durng the past five years:-
TABLE No. 30.
Shipring.

Foreign Trade.-The average tomnge per steamer rose from 2,993 tons to 3,099 tons. The sailing vessels engaged in the foreign trade were country oraft trading with the Persian Gulf ports, Kenya Colony, Somaliland, Ceylon and Madagascar. Tae following table shows the number of vessals, other than country craft, of each nationality that entered the port of Karschi during the past five years :-

Freight.-The fluctuations in the rates of freight are those for wheat (per 18 cwt .) to the United Kingdom. The rates for rapesced (per 16 cwt .) were 1 s . below those for wheat.

- The opening rate in April 1929 was 19s. but a gradual decline soon followed and 17s. was quoted at the end of June. Towards the end of July however, the rate began to rise and the highest level of 21 s .6 d . was reached by the end of October. Then followed'a steady decline and the lowest level of 15s. was reached early in March 1930. The closing rate was $16 s$. 6 d .

24. Erehange.-As in the previous year, exchange fluctuated within narrow limits, the extremes being $1 s .5 \frac{1}{1} d$. and $1 s .5 \frac{1}{1}{ }^{\mathrm{D}} d$. reached in August 1929 and January 1930, respectively:
25. Revenue.-The following table shows the total collections of import and export duty, the duty on imported salt, and refunds for the last five years :-

mounts adjusted up to dnte,
The ohief receipts of import duty were for sugar, Rs. 206.73 lakhs ( + Rs. $21 \cdot 7 \mathrm{l}$ lakhs), cotton piece-goods, Rs. $86 \cdot 42$ lakhs ( - Rs. $25 \cdot 78$ lakhs), liquors, Rs. $45 \cdot 43$ lakbs ( + Rs. $2 \cdot 93$ lakhs), kerosene oil, Rs. 31.65 lakhs (-Rs. 73,719), iron and steel, including special protective duties, Rs. 26.92 lakhs (-Rs. $6 \cdot 38$ lakhs), tobacco, Rs. 27.41 lakhs ( + Rs. 153 lakhs), woollen yarn, knitting wool and other manufactures, Rs. 15.42 lakhs (-Rs. 2.95 lakhs), provisions, Rs. 13•37 lakhs, (-Rs. 1 lakh) and motor cars, motor cycles, etc., Rs. $9 \cdot 70$ lakhs ( - Rs. $1 \cdot 69$ lakhs). Protective duties on iron and steel decreased by Rs. 6.08 lakhs to Rs. $21 \cdot 44$ lakhs. Of the total amount of export duty, viz., Rs. $10 \cdot 41$ lakhs, Rs. 7.56 lakhs were recovered on hides and shins and Rs. $2 \cdot 82$ lakbs on rice.
28. Chauges in tho rates of duty.-The statement below shows the important changes introduced in the rates of import and export duty during the year under report :-

The Steel Induatry (Protection) Act, 1930, which came into force on the 20th Maroh 1930, brought all round and square steel bars and rods of certain qualities over 7.16 inch size under protective doties ao as to make the protection granted to $\frac{1}{2}$ inch bars fully effoctiva. The Aat also brought under protective duties tie-bars for cast iron sleepers, which whre assessable at 10 per cont. ad valorem.

Under the Indian Tariff (Amendment) Act, 1930, the duty on bangles and beads of material, other than glass, was raised from 15 per cent. to 30 per cent. ad valorem with effect from 28th February 1930.

G. N. BOWER, Offg. Collector of Customs.

## REPORT

ON THE

## MARITIME TRADE

4. 

OF THE

## PROVINCE OF SIND

## FOR THE OFFICIAL YEAR ENDING 31st MARCH 1931.

## I.-GENERAL SUMMARY.

1. The Province of Sind along with the rest of the world suffered from the effects of the general trade depression that commenced during the preceding year and continued to cast its ever-increasing shadow daring the whole of theyear under review. The period was marked by a steady fall in the prices of all articles, raw and manufactured, the former being affected more than the latter, mainly due to over-production and its concomitant evils. Add to the economic distress caused by the trade depression, political troubles of a grave nature accompanied by the Civil Disobedience Movement, the boycott of foreign cloth, etc., struck at the root of the internal peace and greatily hampered trade and commerce.

The cumulative effects of the world causes and internal troubles are clearly reflected in the figures recorded in Table 1 of this Report, which shows the values of the entire Maritime Trade of the Province. The values of both imports and exports were much lower than in the preceding year, which itself was one of great depression. Foreign imports depreased by Rs. 557 lakhs or 19 per cent. Taking the figures of private trade alone, i.e., excluding Government stores, the fall was still greater, viz., Rs. 704 lakhs or 26 per cent. Cotton piecegoods accounted for more than half this decrease. Although the quantity of sugar imported was somewhat in excess of that recorded in the preceding year, the extremely low level of prices caused a considerable reduction in value. Foreign exports were down by Rs. 755 lakhs or 29 per cent. Raw cotton, largely on account of the phenomenal collapse in its price and partly also to less demand was responsible for over 81 per cent of this decrease, and wool, raw hides and skins and rapeseed accounted for most of the remaining 19 per cent. On the other hand exports of wheat showed a considerable expansion, but here again unprecedentedly low prices prevented a proportionate rise in value. The coasting trade showed some improvement under both imports and exports. The progress made by the new Salt industry laat yoar was, however, arrested this year, slipmonts to Calcutta having decreased by 2,624 tons to ]6,665 tons.

TABLE No. I.

IMPORTS.
British Empire.-The total value of the import trade with the United Kingdom decreased by Rs. 428 lakhs to Rs. 806 lnkhs, which was the lowest value recorded since 1916-17. Her relative share in imports also fell from 47 to 41 per cent. Cotton piecegoods accounted for a decline of Rs. 255 lakhs, and receipts of most of the other important articles were also less, the principal ones being iron and steel, machinery, beet sugar, cigarettes, railway carriages and wagons and parts, woollen piecegoods, cycles, pneumatic motor covers and lubricating oils. Imports from other countries in the Empire also suffered a setback mainly as the result of reduced arrivals of pneumatio motor covers and tubes and motor lorries from Canada and wheat from Australia.

Europe.-Germany maintained the lead with a percentage share of 6.69 per cent. as against 6 per cent. last year, though the value of her sales contracted by over Rs. 28 lakhs. The articles which suffered the most wore beet sugar, woollen piccegoods, yarn and knitting wool, wool machinery and sewing machines. On the other hand aniline dyes, iron and steel and electrical instru: menta came in larger quantitios. Belgium also improved its share slightly to
$3 \cdot 89$ per cents, despite a decrease of Rs. 5 lakhs in the value. Iron and steel, as usual, formed the bulk of the imports, the quantity received representing over half the total supplies during the year. Southern Russia, whose re-entry in the import trade of the Province dates from 1926-27, displaced Italy and France and attained the third rantr, the percentage share having gone up from 1. 57 per cent. to 3.73 per cent. and the total value of imports from Rs. 42 lakhs to Rs. 73 lakhs. Kerosene oil and sugar were the only articles supplied. The values of imports from Italy and France fell to the extent of Rs. 33 lakbs and Rs. 38 lakhs, respectively. The decrease in the case of Italy was mostnoticeable in receipts of coloured cotton piecegoods, woollen blankets and rugs, piecegoods of cottom and artificial silk and silk yarn, while the depression in.the case of France was due to reduced supplies of woollen piecegoods, brandy and beet sugar. Italian motor cars, however, came in larger numbers. Transactions with the Netherlands decreased in value by Rs. 22 lakhs owing mainly to a shortage of arrivals of vegetable products.

Asia.-Java recovered its percentage share, but the slump in the prices of sugar brought about a contraction of Rs. 26 lakhs in the value in spite of a substantial increase in the quantity supplied. The value of imports from Japan declined by Rs. 59 lakhs : mainly the result of reduced orders for grey and coloured cotton piecegoods. Supplies of white longcloth and shirtings, on the other hand, increased somewhat.

America.-The share of the United States of America in the import trade, which last year stood at 6.57 per cent., advanced to 8.82 per cent., but the value of imports therefrom decreased by Rs. 2 lalshs. Arrivals of kerosene oil, motor cars, pneumatic motor covers and mining machinery decreased, while those of electrical machinery, petrol and iron and steel showed an improvement.

## EXPORTS.

British Empire..-The total value of exports to the United Kingdom improved by Rs. 34 lakhs, and her percentage share, which last year fell to the low level of 21 per cent, rose to 32 per cent, as a result of the revival of shipments of wheat. Exports of cotton increased in volume but decreased in value, while the demand for raw wool, woollen carpets, raw silk, barley, raw skins and cotton seed remained greatly restricted.

Earope.-Italy's share was well maintained at 9 per cent, but the value of her transactions contracted by Rs. 75 lakhs, raw cotton alone being responsible for a decline of Rs. 69 lakhs. Purchases of raw silk were also curtailed, but those of rapeseed and woollen carpets recorded an advance. The German quota of the export trade was reduced by 3 per cent. as the result of a fall of Rs. 143 lakhs in the value, which occurred chiefly shipments of cotton. Rapeseed, raw hides, bones and chromite were also in less demand. The value of exports to Belgium receded by Rs. 27 lakhs to Rs. 93 lakhs. She took less cotton, wool, rapeseed and oilcakes, but more wheat and crushed bones. Exports to France decreased by Rs. 43 lakhs, the bulk of the deficit being moticeable in shipments of cotton. Her orders for woollen carpets, bones, rapeseed and raw silk were also restricted, but purchases of wheat and raw goat skins appreciated somewhat.

Asia..-Exports to Japan and China decreased in value by Rs. 183 lakhs and Rs. 127 lakhs, respectively owing solely to reduced purchases of cotton and
low prices thereof. In consequence, Japan's share in the export trade fell by 3 per cent. and that of China was reduced by half.

America.-Exports to the United States of America were valued at Rs. 123 lakhs, showing a decrease of Rs. 87 lakhs, which occurred mainly in shipments of raw wool, raw goat skins, raw cotton and woollen manufactures.
3. Prices.-The following table shows the variations in the average declared prices of certain important commodities, the average for the thee years ending $1900-01$ being taken as $100:-$

The increase of Rs. 33 lakhs in the value of locomotive engines and tenders and parts thereof was due to larger imports by the North Western Railway of heavy engines of a new pattern from the United Kingdom. The complete stoppage of iron sleepers and keys is reported to be due to surplus stocks in hand. Imports recorded under the head 'Other sorts of vehicles' comprised mainly acroplanes and parts thereof.

The world sugar position went from bad to worse during the year under repert. A heavy carry-over from the previous year coupled with furthet over-production in all growing centres proved detrimental to prices, which fell to the lowest level witnessed in recent years. The lecal prices of white Juva opened at Rs. $128-6$ - per cwt. on list April 1930 and rose, after a shight yelapse in the middte of May, to Re. 13-5 on hat July, which was the highest quetation for the year. Thereafter there was a sharp decline to Rs. $1 \begin{aligned} & 1-1 /\end{aligned}$ in the third week of July. The succeeding eight weeks witnessed miaor fluctuations, except for a sharp rise to Rs. $13-2$ at the end of September ewing to deficient stocks: With fresh arrivals, however, the prices again showed a continuous sagging tendeney until on the 9th December, the lewest quatation. for the year, viz., Rs. 11-1-6 was reached. The end of February witnessed a recovery on rumours of a probable inerease in the rates of import duty, and the closing price on the 3list March 193i was Ris. 12. The effects of the low prices. are reflected in the figures recordeat in the above table from which it with be seen that, though the quantity imported was 3 per cent. in excess of mports last year, the value declined lyy 24 per cent. The defieieney in arrivals of bect sugar from the United Kingdom, Hungary and Germany was qartly made up.
 sugar, which was offered at cheaper rates. A larger quantity of the Russian sugar is expected in the coming year.

A vigorous anti-drink propaganda and picketing of liquor shops conducted by political organizations throughout the country restricted imports of alf potable liquors. Some of the important variations are described below :-

Beer.-The total quantity received was only 3 per cent. less than in 1929-30, A demand from the frontier for supply to the military helped to maintain the trade. Arrivals from the United Kingdom increased by 13,987 gallons to 704,797 gallons, whilst those from Germany decreased by 34,433 gallons to 131,052 gallons.

Spirits.-The comparative smallness of the decline under whisky was due to the import of large quantities during the last quarter of the year in anticipation of an increase in the rates of import duty. Imports of rectified spirits from Jata for denaturation at the Castom House continued to increase, the quantity reoeived being 65,714 gallons as against 45,079 gallons in 1929-30. This explains the improvement under "Other sorts of spirits."

Wines.-The decrease occurred in the arrivals of vermouth from France.
Tobaceo..-Foreign tobacco also fell a victim to the boycott movement started during the year, and in consequence imports, which consisted mainly of cigarettes from the United Kingdom, declined by $356,851 \mathrm{lbs}$ to $659,508 \mathrm{lbs}$, in quantity and by Rs. $13 \cdot 48$ lakhs to Rs. $26 \cdot 12$ Jakhs in value. The deficit was made up by increased consumption of the indigenous prcduct.

Fruits and Vegetables.-Importa, consisting mainly of dutes and potatoes, receded by Rs. 6.80 lakhs to Rs. 20.81 lakhs. Dates came largely from Iraq as usual, and though the total quantity imported, viz., 18,130 tons did not show any marked fluctuation, low prices reduced the value by Rs. 6.09 lakhs to Rs. $15-45$ lakhs. Potatoes were imported solely from Italy, their value being maintained at Rs. 3.99 lakhs,

Provisions.-The aggregate value of provisions imported during the year was Rs. $64 \cdot 17$ lakhs, a decrease of Rs. 21.87 lakks, which occurred mainly in receipts of vegetable products. The demand for this article was reduced partly due to a sufficient quantity of ghi being available at reasonable prices and partly to increased consumption of indigenous copra and groundnut oils on account of their relative cheapness. The variations in the quantitjes of some of the principal articles are shown in the following statement :-

Tea..-lmperts of tea rose by 114,513 lbs. to $549,981 \mathrm{lbs}$. in guantity and by Rs. 43,183 to $4 \cdot 19$ qakhs in value. The improvement occurred in receipts of green tea, mostly from China, and is attributed to a revival of demand from the Peshnwar and Afghanistan markets. Arsivals of black tea; mainly from Ceylon, on the other hand, decreased by $43,710 \mathrm{lbs}$. to $389,500 \mathrm{lbs}$.

Grain, Pulse and Flour.-The aggregate value of imports under this head amounted to Rs. 8.46 dakhs as against Rs. 49.42 lakis tast year. The decrease was due to reduced arrivals of wheat from Australia, which sent only 7,915 tons as against 30,938 tons last year. A bumper crop in India obviated the necessity of foreign imports.
8. Classifi.-Raw materials'and produce and articles mainly unmanufaeturea;:

The increne in arrivils of forcign kerosene oil was due to a yush of imports. at the end of the gear to escape the anticipated rise in impert duty. The pregressive fall in imports from Burma is explained ky heavy replacements from Persiö. - As in the prieviaus yeer, hadf the total. quantity of fuel oit came from Bitish Bemee and halif from Persia: The expansion in receipts of petrol was due to an increased demanid from both Sind and the Pumjati. A ieduction in the output of the Attock Oil Company necessitated heavy imports from Burma to meet the requirements of thie Punjab, where motor traffic is ever on the increase owing to facilities afforded by the construction of new trunk roads. The whole quantity of the petrel imported by sea from Persia was re-exportedto that country by land via Duzdap.

Coal Coul is imported heie mainly for bunkering purposes. Imports of foreign coai, mostly Natal coal, were well maintained at about 32,000 tons walued at:Rs. $6 \cdot 14$ lakhs but those of Imalian (Bengal) ceal decreased by about 65,000 tons to about 80,000 tons valued at Rs. 14.32 lalkhs.

Cotion Yarn and Mhanutactires. - During, the year under report the: imparit business in cetton goods was greatly hampered by the boyeatt movement:started eaty in April throughout the country. Determined efforts were made by picketing aipd intimidation to stop all sales and purchase of imported plothi, partieularly British clath In consequence, the total value of imports of cotton manufactures, including, twistaud yarn was reduced by nearly Rs. 367 ladibs or 47 per centito Rs. 417 lalchs, which was, the low west value recorded during the last. $2 \theta$ years, The general trade depression and the fall in prices consequent on the eatremely: lop cost of the inay material alse accounted for the neduction in the value to some extent. It may benoted that despite the embargo, the local dealers, managed to dispose of a fuirliy goed portion of their stocks secretly thinough unusual channells, and stocks at the close of the year were light.

Foreign Imports.
(Cotton manafactures.)
of
Piecogoods. -The aggregate volume of imports of cotton piecegoods decreased by 37 per cent. and the value by 47 per cent. The following table shows the imports of some of the more important descriptions under the three main sub-divisions TABLE No. 11.
Piece-goods.

Grey goods.- The share of Japan in the total value rose from 79 per cent. to 82 per cent. Longcloth and shirtings and drills and jeans were practically the only descriptions supplied by that country, and all of them recorded decreases. The drop in imports of British grey goods occurred in receipts of all the principal descriptions, viz., bordered dhutis, saris and scarves, mulls and jaconets and longcloth and shirtings.

White goods.--The bulk of white goods, as usual, came from the United Kingdom, her share in the value being 93 per cent as against 94 per cent last year. There was, however, an all-round decrease in the different varicties imported, mulls and longeloth and shirtings being the most affected.

Coloured goods.-Though the total value of imports of coloured goods from the United Kingdom contracted by Rs. 82.78 lakhs, her share improved by 4 per cent. to 79 per cent. Italy curtailed its supplies of printed twills and woven coloured coatings and trouserings, and hence the decrease of Rs. $15 \cdot 65$ lakhs in the value. IImports from Japan suffered a set-back of 57 per cent. in value, notably in receipts of printed drills and jeana and woven coloured shirtings.

Woollen goods.-Though the total quantity of yarn and knitting wool imported was slightly in excess of arrivals last year, the value decreased by Rs. 1.40 lakhs to Rs, 11.58 lakhs. This artiele is mostly intended for the Amritsar market. Germany and Poland were the chief sources of supply during the year. Imports of woollens suffered a serious decline owing to the general trade depression and a heavy fall in the prices of the raw material. The value of pece-goods, which form the bulk of the trade in woollens, was reduced by no less than 56 per cent. to Rs. $31 \cdot 30$ lakhs, supplies from all the principal countries, viz., France, the United Kingdom and Germany being much less than in the previous year. France, which mostly supplies shawl cloth for the Amritsar market, had, as usual, the largest share, viz., 53 per cent. Imports of blankets, consisting mainly of cheap ruys from Italy, decreased by R.s. 6.95 lakhs to Rs. $8 \cdot 36$ lakhs.

Silk.-Tmports of silk were valued at Rs. 8.21 lakhs, showing a decrease of Ru. 2.96 lakhs, which was noticeable mainly in the receipts of yarn, noils and warps from Italy. Silk piecegoods, on the other hand, increased in value from Rs. 3.07 lakhs to Rs. 4.03 lakhs, notably in the arrivals from China.

Artificial silk.-The aggregate value of the imports of artificial silk, consisting mainly of piecegoods of cotton and artificial silk, receded by Re. 8.04 lakhs to Rs. 18.42 lakhs. The shortage occurred in the arrivals from Italy, Germany, the United Kingdom and Switzerland. Japan, on the other hand, increased its sales from Rs. $4 \cdot 42$ lakhs to Rs. $12 \cdot 62$ lakhs.

Foneign Imports.

Iron and Steel.-The total quantity of iron and steel imported during the year showed a decrease of 4 per cent., which in view of the acute trade and economic depression does not need any comments. It is, however, significant to note that the quantity supplied by the United Kingdom was 41 percent. less than in the previous year. This was due to an increased use of the indigenous products, the intense competition from Continental countries and the propaganda against the use of British goods. Of the total quantity of iron and steel imported, viz., 105,651 tons, 69,494 tons paid the protective duties. The following table compares the share of each country in the total imports of iron and steel for the past two years :-

TABLE No. 13.

Other metals.-Imports of copper showed a substantial recevery at Rs. 8.73 lakhs. The improvement was most noticeable in the receipts of sheets and was due to a greater demand from Afghanistan.

Machinery of all kinds.-The following table shows the principal types of machinery imported during the past five years:-

TABLE No. 14.

| A TOTAL | 138.76 | 124.56 | 148.68 | 148.62 | 110.22 |

The total value of imports of machinery receded by Rs. $32 \cdot 40$ lakhs : mainly the result of the general trade depression. The United Kingdom and the United States of America sharod the decrease under mining machincry, while the reduction under textile machinery occurred in the supplies of cotton weaving and wool machinery from Germany. Imports of sewing machines were also less, both the United Kingdom and Germany having curtailed their supplies. Electrical machinery, on the other hand, continued to be in good demand. The United States of Ameriea secured much larger orders, while arrivals from the United Kingdom decreased somewhat.

Cutlery, Hardware, Implements and Instruments.-The aggregate value of the articles included in this group declined by Rs. 7.23 lakhs to Rs. $55 \cdot 88$ lakhs. A restricted demand due to financial stringency combined with lower prices accounted for the contraction.

Chemicals, Drugs and Medicines.-Although the total value of imports under this group amounting to Rs. $44 \cdot 84$ lakhs was Re. $3 \cdot 70$ lakhs less than in the previous year, it was well above the quinquenmial average. The shortage occurred mainly in the receipts of soda ash from the United Kingdom, and is ascribed to a leading firm having stopped importing for about four months in order to effect certain changes in the existing arrangement of the storage of its goods.

Foreign Imports. 44 (Vehicles.)

Imports of motor cars from foreign countries again recorded a decline, the newly erected assembly plant at Bombay having met some of the local and upcountry requirements as in the last year. Karachi imported 220 motor cars from Bombay as against 322 last year. Of the total number (viz., 307) of motor cycles imported, 283 came from the United Kingdom. Though the number of molor omnibuses, vans and lorries was slightly in excess of imports last year, it was much below the number imported in the preceding two years. The reason given above for the decrease under motor cars holds good in this case also. 176 motor trucks came to Karachi from Bombay as against 174 in 1929-30. The hcavy drop under cycles, imported mainly from the United Kingdom, was due to the disinclination to buy British goods, more particularly in the Punjab. The United Kingdom was again the largest supplier of railway carriages and wagons, but the value decreased by Rs. $9-28$ lakhs.

Other articles.-Among the articles not dealt with in the foregoing paragraphs, the following deserte notice :-The total value of apparel, including boots and shoes, decreased by Rs. 8.02 lakihs to Rs. $18 \cdot 10$ lakhs, owing to reduced supplies of second-hand clothing from the United States of America and boots and shoes from the United Kingdom and Germany, though shipments of the latter from Japan increased to a great extent. Larger arrivals of aniline dyes and synthetic indigo from Germany led to the increase of dyes and colours from Rs. $21 \cdot 98$ lakhs to Rs. $25 \cdot 46$ lakhs. The value of electrical goods and apparatus (other than machinery) amounting to Rs. $28 \cdot 88$ lakhs showed an improvement of Rs. 12.04 lakhs, mainly in arrivals from the United Kingdom and Germany. Imports of glassware and earthenware valued at Rs. 18.05 lakhs, practically retained the last year's level. The value of paper, pasteboard and stationery fell from Rs. $40 \cdot 42$ lakhs to Rs. 30.88 lakhs, chiefly owing to smaller imports of newsprinting paper from Austria and old newspapers from the United Kingdom. Arrivals of rubber manufactures amounted to Rs. 58.58 lakhs, showing a decrease of Rs. 20.36 lakhs, which occurred mainly in receipts of pneumatic motorcovers from Canada, the United Kingdom and the United Statcs of America. Imports of matches valued at Rs. $1 \cdot 33$ lakhs exhibited a decline of Rs. $2 \cdot 54$ lakhs: the result of the increased consumption of Indian-made matches.
10. Class V.-.Postal articles not spocified.- The figures recorded under this head exclude the imports by post of the following five specified articles (1) Gold and silver thread, (2) Cinematograph films, (3) Jewellery, (4) Precious stones and (5) Cigarettes, which are included under their relative heads in the gencral imports. The total value of " postal articles not specified" decreased by Rs. $10-83$ lakhs to Rs. $48 \cdot 64$ lakihs to which the United Kingdom contributed Rs. $42 \cdot 95$ lakhs. The number of parcels dealt with during the year was 97,082 as against 96,037 in 1929-30. Besides these, 50,165 letter packets were assessed to duty as against 49,322 last ycar. The total amount of the import duty realized on all articles imported by parcel post declined from Rs. $10 \cdot 89$ lakhs to Rs. 7.68 lakhs and that on articles contained in letter packets from Rs. 60,825 to Rs. 56,946 .

Foteign Expotts. (Agricultaral conditions.)

## EXPORTS.

## INDIAN PRODUCE AND MANUFACTURES.

11. Agricultural Conditions.-As the bulk of the export trade of this port consists of agricultural produce, a brief review of the weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces will be belpful in examining the exports of the more important commodities.

In Sind the rainfall was below the average, but the inundation was favourable on the whole, though the floods caused some damage to the kharif crops in the Sukkur and Larkana districts. The cotion crop suffered further somewhat from boll worm and locusts and according to the final memorandum, dated 7th April 1931 issued by the Department of Agriculture, Bombay, " is expected to yield about two-thirds to threc-fourths of the normal instead of a full normal as was once anticipated." The prospects of the Raki crops are however good. The wheat crop is reported to be in a satisfactory condition in all parts of the Province.

In the $P_{u n j} b$ the monsoon was fairly active in June and July, but deficient rainfall in August and September reduced the yield of the lharif crops to a certain extent. The supply in the rivers remained low, and would have beon insufficient to meet the keen demand for the rabi crops, but for the light rains in the months of January, February and March, which improved the conditions and prospects of the standing crops on the irrigated areas.

In the United Provinces the monsoon rains were generally good, and the kharif crops fared better than in the previous year. The rabi crops were greatly benefited by a good rainfall at the end of December and also in February, and there is every prospect of a good harvest.
$\because$ Thio following table gives the area and yield of the three most important crops in Sind, the Punjab and the United Provinces, viz., wheat, rape and mustard seeds and cotton, for the past two scasons, the figures being taken from the crop reports published by the Directors of Agriculture for those Provinces. In the case of wheat and rape and mustard seeds, which are rabi crops, the figures for the season 1929-30 are compared with those for 1928-2y, as the produce exported in 1930-31 relates mostly to the tormer season. In the case of cotton, which is a kharif crop, exports relate to the season 1930-31, and therefore the crop figures for 1930-31 are compared with those for 1929-30.

The Indian wheat crop for the season $1929 \cdot 36$ was a record one, but the velume of export business done during the year under report, though much higher than in the preceding year, tid not at all come up to expectations. With an estimated surplus at not less than a million tons, it should have been possible to export a much lainger quantity, but abnormal cropsin ether wheatproducing countries: restricted the demand to a great extent. There was however an inquiry during the first quarter of the year, but it is understoed that full advantage was not taken of the opportunity owing to cultiwators holding out for higher prices, which were never realized. The overstecked condition of the woild markets resulted in the prices talling to an almost unprecedented low level. The local price of white wheat opened at Rs. 4 per maund of $822^{2} \mathrm{H}$ Hs. on 1 st April, and rose slightly to tis. $4-1 \cdot 6$ at the beginning of the feurth week of that month, which was the highest quetation of the year. Thereafter the market showed a continuous downward tendency and Rs. $2-\mathrm{k}-3$, the lowest quotation of the year, was reached in the middde of December. The clesing price on the 3lst March was Res 2-5-6.

Wheat lour.-The quanatity exporited, vir., 26,493 tons, was almost oxactity the same as in 1929-30, but low pricès brought about a fall of Rs. 13-61 lakhs in the value. Egypt; Mauritius, Aden, Arabia and Italian East Africa were the chief eopanming centres,

Batley.-The deeline in experts was due to Indian priees having remained far above expert paxity throughout the yeat.

Other tood grains.- EXxports of gram-increased as the result of a better demand from Franoe and Egypt, while the improvement under sice occurred in despatches of boiled rice to Arabia and Aden,

## 

Raw cotton.-The following table shows the quantities and value of raw cotton exported to foreign countries during the past

Foteiqn Exporta.
(Wool.)
Although the total quantity of cotton exported during the year under teport decreased by 12 pef cent. as compared with the previous year, which was a record year, it was nevertheless the second bighest on record : a position which cannot be regarded as anything but satisfactory, considering that the year was one of intense depression, abundant supplies and diminished consumption. The collapse il price principal purchasers took less. The of the descriptions exported riâ Bombay. rather unfavourable as compared to Wool.-The following table shows the quantity and value of Indian raw wool exported to foreign countries during the past five years :-

34
Wool.

Kaw hides.-The export brade in raw hides again remained greatly dephessed ouring to the downivaid trend of priceê, whach stanted last year, liaving continued right theoughout the year under report. Moreover the values of Indian lifdes having leept at a comparatively higher level than those of the descriptions offerod by other countries made business mere difficult.

Rdw Slizns. - The decrease followed an increase in the preceding two years, End was due to reduced purchases of goat shins loy the United States of America.

Miscallanoous.-Among other articles included in "Class II -Raw matoridils, êtc.;"bones, waiv sill and chromite desserve notice. Expoits of Woines were vaiued at Rs. 36.02 ladhs, shoving an Snorease of Rs. 1.62 lakhs, which was due to largor shlipments of crushed bones to Belgium, the chief eustomes. The totial yaltue of yaw silic exported fell from Rs. 21.52 lalshs to kis. 2 i4 15 lakths; owing to gieathy reduced ordeis for mulberry silk from the United Kinglom añe Italy. The wahe of chromite (chrome iron ore), a product. of Bailuclistan; stood at Rs: $3=3$ l lakhs as against pos. 2.82 laklhs last year, Norway and Germiny boing the êhet purchasors:
-16: Class III.-Aptieles whony or mainly manufactured.
Léatioer-Exports of leatiler, the impertant anticle ip this ciass, decined By Rs. 5.75 tailchs to Rs. 7.50 ladchs owing to emaller shipments of tamed on dressed slins to thie Unitêd Kingdom.
Foreign Merchandise, rewexported
17. The following table shows the quan tity and value of the principal articles re-exported during the past five yeurs :TA BLE No. 25.
RIE-EXPORTs.

The reasons for the decline in re-exports of forcign wool, mostly Kandahar wool, are the same as those given in paragraph 15 for the fall in exports of Indian wool. Re-exports of woollen manufactures consisted entirely of Persian carpets to the United Kingdom and the United States of America. The value of re-exports of rubber manufactures at Rs. $25 \cdot 26$ lakhs retained the last year's level, lraq and Persia being the chief consuming centres.

## III.-COASTING TRADE. <br> CHIEF PORT-KARACHI.

Foreign Trade.-The average tonnage per steamer declined from 3,099 tons to 2,990 tons. The sailing vessels engaged in the foreign trade were country craft trading with Persian Gulf ports, Zanzibar, Kenya Colony, Somaliland and Madagascar. The following table shows the number of vessels, other than country craft, of each nationality that entered the port of Karachi during the past five years:-
TABLE No. 31.
Shipping.

Freight-At the commencement of April, the rate to the United Kingdom on a wheat basis (riz., per 18 cwt.) was 168 ., and it fluctuated between 158. and 17 s . till the end of November. During the succeeding two months, it remained at a fairly high level, viz., between 20 s . 6d. and $24 s$. in Decermber and between $22 s$, and $206.6 d$, in danuary. The last two months witnessed a decline, and the closing rate on 25th March was 178. 6d. The rates for rapeseed (per 16 civt.) were 1 s . below those for wheat.
24. Exchange.-The exchange rate ruled in the vicinity of $1 s$. 5 需d: on an average duting the year under roport:
25. Revenue. The following table shows the total collections of import and export duty, the duty on imported salt, and refunds for the last five years:-

## TABLE OF CONTENTS.

## GENERAL SUMMARY.

1. During the year 1931-32 the maritime trade of the Proviare of Sind suffered a further deeline from the already low level of the precoding yetr. Tho continuance of world-wide economic depression coupted with political unrest in India throughout the year and the instability of certain formign exchanges during tho second half of the year following the suspension of the: gold standard by Great Britain were the chicf factors interforing with the normal courbe of trade. It is eignificant that whereas foreign trade, which forms 63 per cent. of the entire trade, decreased by R.s. 11,13 lakhs or 26 per cent. cousing trade increased by Rs. 2,37 lakhs or 15 per cent. giving a net decreaso of Rs. 8,76 lakhs or 15 per cent. (vide Table No. 1). Taken as a whole the fall in foreign trade was mainly due to a decrease in volume but Table No. 3 gives an indication of the generally lower lovel of prices.

Foreign imports decreased by Rs. 5,83 lakhs or 24 per cent. for which almost ali articles except machinery, artificial silk and arms and ammuition were responsible, the decrease being most marked under sugar metals, oils, provisions, liguor and motor cars and lorries. Cotton piece-goods decreased somowhat in value but increased in quantity. Foreign erports decreased by Rs. 5,30 lakhs or 29 per cent. Cotton and wheat accounted for 94 par cent. of the decrease ; raw wool and rapeseed being the only important articles showing an increase.

Coasting imports increased by Rs, 74 lakhs or 7 per ecnt. for which minmal oils, cotton yarn and piece-goods, cigarettes and iron and stem were responsiblo. Cousting exports showed a considerable improvoment of lts. 1,63 laklis or 32 per cent. owing to unusually large shipments of wheat to Calcutta and Bombay and to heavy exports of cotton to Bombay and Mardras. The new salt industry of Karachi showed satisfactory progress, shipmente to Caleuttat laving increased from 16,665 to 30,905 tons.

It will be seen from Table No. 2 that the United Kingdom maintaned her supremacy in both tho import and export trade and handled 40 per ceint. of the total trade with foreign countries. Noxt in importance were lapan 11 per cent., Germany $8 \cdot 6$ per cent., America 8.5 per cent. and Italy 6 per cent. Except for a steady improvement of 3 per cent. per annum in the case of tho United Kingdom these figures have shown but little variation during the last three years.

Tables Nos. 29 and 30 give the comparative position of shipping using the port of Karachi: the figures generally refect the trend of the trade outlined above.

The gross collections of Customs duty amounted to Rs. 5,65 lakhs compared with Rs. 6,37 lakhs daring 1930-31 : a decrease of 11 per cont. in spite of the much higher rates of duty in force.

An event of the utmost importance to the future export trale of this Province was the completion of the Lloyd Barrage and Canals at Sukkur. This great irrigation project, thr largest of its kind in the world, will not onls. hring immense areas of wasto land under cultivation but will abso increase the productivity of much of the present eultivated area and must ineritalily result in a tremendous increase in the prosperity and effective purebasing power of the people lioth of the Previsce of Sind in general athe of the pont of Karacha in particular.
table No. 1.
Table showing the values of the entire maritime trade of the Province of Sind.

British Empire.-The value of the total trade with the United Kingdom decreased by Rs. 2,55 lakhs or 18 per cent. to Re. 11,28 lakhs mado atp of imports Rs. 7,65 lakhs and exports Rs. 3,63 lakhs both of which have fallen by about 50 per cent. in the last four years. Imports were the lowest since $1915-16$ and exports since 1921-22. Whilst the United Kingdom's skare of the total imports improved from 41 to 48 per cent. her sharo of the total exports foll from 32 to 29 per cent. : the not result is an increase from 37 to 40 per cent. of the whole trade. Among imports liquors, cigarettes, iron and steel, railway carriages, eloctrical instruments, machinery (other than electrical), motor cars and tyres and cotton piece-goods were adversely affected, whilst beet sugar, electrical machinery, arms and ammunition, motor lorries, sewing machines and lubricating oils showed an improvement. Among exports wheat and cotton were in defect while wool, barley and rapeseed were in good demand. In the case of other British Possessions Canada sent fewer motor cars, lorries and tyres, British Borneo less fuel oil, Straits Settlements less petrol and Natal less coal.

Europe.-Germany's share showed a slight improvement from 7.7 to 8.6 por cent. but owing to smaller purchases of cotton and the low prices prevailing the value was Rs. 47 lakhs below that of the previons year. Larger quantities of beet sugar, machinery, piece-goods made of cotton and artificial silk and smaller quantities of iron and steel, aniline dyes, beer, metal lamps and vegetable products were received. Italy's share showed a slight improvement under both imports and exports, but in each case the value was considerably lowor (imports minus Rs. 7 lakhs and exports minus Rs. 38 lakls). Fewer motor cars, woollen blankets and rugs were received whilst smaller shipments of cotton were partly offset by larger shipments of rapesced. Imports from France decreased by Rs. 11 lakhs and exports to that country by Rs. 39 lakhs; brandy, woollen piece-goods, iron and steel accounting for the former and cotton, rapeseed and wheat for the latter. Belgivm's share declined considorably, imports being less by Rs. 37.6 lakhs owing to fewer orders for iron and stecl and exporte by Rs. 50 lakhs shared by cotton, bones and wheat. Imports from the Netherlands decreased by Rs. 21 lakhs chicfly due to less demand for vegetable products. Exports declined by Rs. 4 laklis, shipments of cotton being less by Rs. 8 la'ths, whilst those of rapeseed increased by Rs. 5 lakhs. Trade with Russia was confined to Rs. 22 lakhs' worth of sugar from Southern Russia and Rs. 35 lakhs' worth of korosene oil from Batoum.

Asia.-After the United Kingdom Japan was Sind's most important customer. Her share of the total trade improved from 8 to 11 per cent., of which imports rose from 3.6 to 5.5 per cent. and by Rs. 17 lakhs in value due to larger receipts of cotton piece-goods (other than grey) and artificial silk piece-goods and exports from 129 to 18.5 per cent. although the value was Rs. 2 lakhs less. Cotton as usual was the chief export. Trade with Java dwindled from Rs, 2,19 lakhs to Rs. 61 lakhs: the result of very much smaller receipts of sugar. Inports from Persia showed a slight improvement, and consisted chiefly of kerosene and fuel oils.

America.-The value of the trade with the United States of America fell by Rs. 54 lakhs to Rs. 2,42 lakhs, imports being less by Rs. 21 lakhs and exports by Rs. 33 lakhs. Imports of motor cars and lorries, tin phates, kerosone and lubricating oils and mining machinery declined and motor tyres, electrical machinery and cottcu fents improved. Exports of woollcu carpets, raw goat skins and cotton were smaller, but those of wool were somewlat larger.

Foreign Imports
(Sugat.; 10
7. Class I.-F'ood, Drink and Tobacco.
TABLE No. 7.
Sugar.

The heavy drop of aver 50 per cent. in imports of sugar was due mainly to the greatly curtailed purchasing power and to the very high import duty, the latter acting as a protective measure fevouring increased consumption of indigenous sugar. The local price of white Java opened at Rs. 12-3 per ewt. in April 1931: the lowest quotation of the year. The price fiuctuated between Rs. 12-I1 and As. 12-9 during June to September. Thereafter the increase in tmport duty causod a rise to Rs. $14-11$ in the beginning of October and reached Rs. 10-2, the highest figure of the year, towards the middle of December. A weakening set in in March, and the jear clased with the price at Rs. 14-4.

Liquors.-The bigh cost of liquor resulting from the increases in import duty led to diminished consumption. The Army found imported beer too expensive and patronized local Breweries instead. Similarly many of the poorer class of people who formerly consumed considerablo quantitics of brandy and whisky now content themselves with country liquor.

The denatured spirit shown in Table No. 8 was rectified spirit from Java denatured at the Custom House on arrival.

Tobacco--Imports of tobacco, consisting mainly of cigarettes from the United Kingdom, amounted to $320,117 \mathrm{lbs}$. valued at Rs. $11 \cdot 64$ lakhs, a decrease of 51 per cent. in quantity and 56 per cent. in value, which was due mainly to the boycott movement and to increased consumption of Indian" biris".

Pruits and Vegetables.--Imports under this head, consisting mainly of dates from Iraq and potatocs Jrom Italy, declined in value by Rs. 2.36 lakhs to Rs. $18 \cdot 45$ lakhs. The former rose in quantity from 18,130 tons to 19,069 . ton's, but decreased in value from Rs. $15 \cdot 45$ lakhs to Rs. $14 \cdot 90$ lakhs. The latter were greatly affected by increased local cuitivation and the value receded from Rs. 3.99 lnkhs to Rs. 2.86 lakhs.

Provisions.-A further reduction in imparts of vegetable products was chietly responsible for the fall of Re. 28.22 lakhe in the total value of provisions. Indigenous copra and groundnut oils and ghi, on account of their cheapness, are rapidly onsting imported vegotable products from public favour. The variations in the quantities of some of the principal descriptions of provisions are shown in the following statement:-

Tea.-Imports of black tea rose by 102,581 Ihs. to $442,081 \mathrm{lbs}$. in quantity and by Rs, 9,517 to Rs. 2 -68 lakhe in value. This was mostly cheap dust tea from Ceylon, which is largely used in bazaar tea shops. Arrivals of green ea decreased somewhat, the figures for the past two years being $210,481 \mathrm{lbs}$. valued at Rs. $1 \cdot 60$ lakhs and 185,384 1bs. valued at Rs. $1 \cdot 12$ lakhs, respectively. China supplied Jtise, but Caylon sent more.
8. Class II.-Raw materials and produce and articles mainly unmanufactured.

Prineral Bils.-The decrease under kerosene oul and petrot was athibutable movinly to reduced consumption on account of financiol stringency and the thigh ineidence of customs chaty, The whale quantity of the petiol imported by sea frem Persia was ree-exported to that country by land via Zajidan. Puel oil came chiefly from Persia and British Bornea, receipts from the fomer increasing at the expense of the latter.

Coal-Imports were mainly for bunkering purpeses. Foreign com,
 lakhs and Indian coal from Bengal by 9,480 tons to 70,958 tons valued ats Rs. 12:18 lalchs:

## 9. Clase In. $=$ Articies wholly or mainly manafactared.

Gotifot Mannfactures.-In-spite of the abnormal conditions under whick business jpicotton goods laboured, imports af cotion piece-goods actually increased in volume by ig per cent. though their value decreased slighthy by 1 per cent. Although the baycott of foreign cloth continued, no difficulty was experienced in disposing of consignments in up-country markets. fenteraf trade depression havever, prevented much headway being made. The share of the United Kingdom in the total value of impaits of cotton peoetgoods dropped from 82 to 79 per cent., while that of Japan rose from 10 to 12 per cent. The consumption of Indian piece-goods continued to be on the increase.

Cotton Twist and Yarn.-The small increase in British yarns was shared by all the descriptions, excepting white (bleached) Nos. 31 to 40 . Imports from Japan consisted entirely of mercerised cotton yarn two folds (doubles).

Grey Goods.-Japan was as usual the largest supplier, her share of the total value again being 82 per cent. Longeloth and shirtings arrived in smaller quantities but supplies of drills and jeans increased. The United Kingdom contributed 10 per cent. consisting mostly pf mulls, jaconets, longcloth and shirtings, and bordered dhutis, saris and scarves.

White Goods.-The United Kingdom supplied 91 per cent. of white gaods : the quantity increased by 10 per cent. but the value docreased by 7 per cent. More mulls and less longeloth and shirtings wero received. Japan's share rose from 1 to 5 per cent. made up of longcloth, shirtings and bainsooks.

Coloured Goods.-Imports from the Unitod Kingdom improved both in quantity and value. Arrivals from Italy and Japan also showed an advance, the former under woven coloured and printed flannels and fanuelettes and the latter under printed shirtings.

Woollen goods.-Imports of yarn and knitting wool, intended mostly for the Amritsar market, rose in value by Rs. 38,000 to Rs. 11.96 lakhs, Germany, Poland and the United Kingdom being the principal suppliers. Woolkn piece-goods increased from $2 \frac{1}{3}$ million yards to 23 million yards but lower prices reduced the value by Rs. $4 \cdot 18$ lakhs to Rs. $27 \cdot 12$ lakhs. About half of this value was represented by imports of slawel cloth from France. Blankets were mainly cheap rugs from Italy, and their value declined by Rs. 3.76 lakhs to Rs. $4 \cdot 60$ laklis.

Silk,-Reduced purchases of silk piece-goods from China were chiefly responsible for a fall of Rs. 1.96 lakhs in the total valuc of imports of silk amounting to Rs. 6.25 lakhs.

Artificial Silk.-The value of imports of artificial silk advanced by Rs. 9.95 lakhs to Rs. 28.37 lakhs, 71 per cent. of which consisted of pieco-goods from Japan. In spite of the heavy increase in import duty Japan has been able to supply aver Rs. 20 lakhs' worth of these goods as against Rs. 13 lakhs' worth in the previous year, defying all competition by means of a gradual but substantial cut in prices.

Iron and Steel. - The main factors contributing to the decline of nearly 45 per cent. were the comparative cheapness of Indian products, the completion of the Lloyd Barrage and other projects, direct imports by certain Kathinwar ports and general economic depression. Of the total quantity imported, viz., 58,358 tons, 30,903 tans paid the protective duties.

The United Kingdom supplied 18,000 tons valued at Rs. 39 lakhs compared with 21,800 tons valued at Rs. 43 lakhs in the previous year. Belgium supplied 20,620 tons valued at Rs. 23 lakhs compared with 52,200 tons valued at Rs. 60 lakhs. Other Continental cauntries supplied 18,900 tens valued at Rs. 25 lakhs as against 27,240 tons valued at Rs. 49 lakhs, whilst the United States of America only sent 560 tons valued at Rs. 2.5 lakhs compared with 4,000 tons valued at Rs. 13.5 lakhs.

Other Metals.-A good demand from up-country and Afghanistan ac* counted for the increase of $5,793 \mathrm{cwts}$. in the quantity of copper imported though there was no propartionate increase in value.

The value of imports of machinery was Rs. 23.17 lakhe in excess of that in the previous year. The increase under railway engines and tenders was most noticeable in arrivals from Belgium and Italy. Imparts af electrical machinery advanced chiefly as the result of further developments in the Uhl River Valley Hydro-electric scheme.

Cutlery, Hardware, Implements and Instruments.-Imports were valued at Rs. $67 \cdot 19$ lakhs, $\vec{a}$ decrease of Rs. 15.51 lakhs for which electrical instruments from the United Kingdom and Germany, and metal lamps from Germany were mostly responsible.

Chemicals, Drugs and Medicines.-The value contracted by Rs. 2-14 lakhs to Rs. $42 \cdot 69$ lakhs to which chemicals contributed Rs, 28.62 lakks and druge and medicines Rs. 14.07 lakls,

Vehicles.-Apart from the general economic depression and adverse exchange rates, the increase in customs duty, coupled with the heavy excise duty on petrol, etc., brought the imports of motor cars and lorries almost to a standstill. Latterly Karachi's requirements have largely been met from the new assembly plant at Bombay and from the sale of second-hand lorries by the Military Authorities.

Other Articles.-The value of imports of apparel receded by Rs. 1.79 lakhs to Rs. $16 \cdot 31$ lakhs owing chiefly to smaller arrivals of boots and shoes from Germany and the United Kingdom. Imports of dyes and colours were valued at Rs. 22.05 lakhs, showing a decrease of Rs. 3.41 lakhs notably in receipts of aniline dyes from Germany. The value of glassware and earthenware, amounting to Rs. 16.60 lakhs, suffered a set-back of Rs. $1 \cdot 44$ lakhs, mostly in imports of glass beads afd false pearls from Czechoslovakia. Imports of paper and pasteboard, valued at Rs. $21 \cdot 16$ lakhs, did not show any marked variation but imports of stationery, valued at Rs. $7 \cdot 12$ lakhs, contracted by Rs. 2.01 lakhs. An interesting feature during the year was the opening of a factory in Karachi for the manufacture of carbon paper, typewriter ribbons and stamping pads, said to be the first of its kind in India. The value of rubber manufactures, 82 per cent. of which represented imports of motor tyres, amounted to Rs. 58.37 lakhs, almost reaching last year's figure. America's share improved at the expense of that of the United Kingdom. The steady decline in imports of matches continued, the value having fallen to the low figure of Rs. 45,773 as against Rr. $1 \cdot 33$ lakhs in 1930-31. Matches made in India have succeeded on account of their cheapness in ousting most forcignmade matches from the market.
10. Class V.-Postal Articles not specified.-Figures for gold and silver thread, cinematograph films, jewellery, precious stones and cigarettes imparted by past are included under their relative heads in the general imports. The value of other articles imported by post decreased by Rs. $9 \cdot 37$ lakhs to Rs. $39-27$ lakhs to which the United Kingdom contributed Rs. $34 \cdot 62$ lakhs. The number of parcels dealt with was 86,336 as against 97,082 in the previous year. In addition 54,574 letter packets were assessed to duty as against 50,165 . The total amount of import duty realized on all articles imported by parcel post rose from Rs. $7 \cdot 68$ lakhs to Rs. $10 \cdot 46$ lakhs and that on articles contained in letter packets from Rs. 56,946 to Rs. 80,580 ; the chief reason for the increase being the higher rates of duty in force.

Fozeign Expotts. (Agricultural conditions.)

## Exports.

## Indian Produce and Manufactures.

11. Agricultural conditions.-As the bulk of the export trade of this port consists of agricultural produce, a brief roview of the weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces is given below.

In Sind the rainfall was very scanty and consequently inundations suffered. The kharif crops were matured by judicious use of canal ratations and the outturn has been fairly good. The official forecast is that the yicld of the cotton crop is likely to fall between 55 and 75 per cent. of the normal. The rabi cultivation is expected to be a little below normal owing to poor inundation. The autturn of the wheat crop is estimated to be between 65 and 85 per cent. of the normal, while that of rapeseed is expected to be between 50 and 75 per cent.

In the Punjab the conditions for the sowing and maturing of the kharif crope were not very favoursble as the rainfall was below normal in Junc and supplies of canal water were generally short and late. The catton crop Was damaged by wind storms and boll-worm, the attack being more severe on desi cotton than on American. The October rains helped the rabi sowings and a further moderate fall in January and February proved beneficial to the standing crops.

In the United Provinces the general ralnfall in August greatly benefited the kharif crops, but excessive rains and high winds in the subsequent two months caused some damage. The rabi sowings were carried out under favourable conditions, but the winter rains proved deficient and the standing crops suffered in consequence.

The following table gives the area and yield of the three most important crops in Sind, the Punjab and the United Provinces for the past two seasons, the figures being taken from the crop reports published by the Directors of Agriculture for those provinces.

Wheat.-A smaller crop coupled with a good internal cemand kept the prices of ladian wheat above the hevel of world prices, which ruled easier owing to large surphe stocks in other wheat-producing countries with the result that there was almest a complete absence of feveign demaind for Indian wheat. Bren the substantial neduction in the mates of railway freight to the potis failed to buing the prices down to export parity. The local pitice of white wheat opened out Rs. $260^{\circ}$ per maund of $82 \frac{2}{7}$ hos. but gratuathy dropped to Qus. 1-i3 on the ruth of July, the lowest quotation of the gear. The price then rose te Ras 2-2 around which it remained during Angist and September. Considerable improvenent then set in and by the end of October the price was Ris. 206 and continued to itise until Rs. $3 \cdot 3$ - was reached on the $22 n d$ December, the highest quotation of the year. "This Wigh level continued during Januayy, but thereafter the manket showed a downward tendency,
 yemp.

Wheat flour,-Reduced purchases-by Mauritius, Bahrein and Ceylon, partly counteibalanceal bylargen supplies to Arabia, Aden añd Itodian East A frica acconted tor the dechine of 1,635 tons in the total quantity shipped, viz., 27, , 858 tons.'

Barley-The prortial failure of the American crop created a demand for Indian barley, the Jnited Kingdom being the principal purchaser with 21,599 tons against ony 894 tons last year. Belgium and Germany, neither of which made purcliases in $1930-31$, accounted for 3,305 tons and 1,683 tons, respectively.

Other Pood-grains, -Tliere was a good crop of gram and larger shipments Were inade to France, but the prices realised were poor. Shipments of nice decreased as the wesult of reduced orders from Arabia Aden and Ceylon for boiled ricey
(Cotton.)

Cotton.--Exports of cotton decreased by 29 per cent. in quantity and 33 per cent. in value owing chiefly to general trade dnpression in most consuming centres and to the unfavourable parities of Indjan cotton to American cotton as a result of a smaller crop and a greater demand by the Indian mills. The total quantity shipped, viz., 128,476 tons, was lower than in any of the preceding six years. Japan was our best castomer and accounted for 35 per cent. of the total exports. "ghipments to other countries declined, noticeably those to the United Kingdom ( $-13,000$ tons), China ( $-10 ; 000$ tons), Italy ( $-9,700$ tons) and Germany ( $\sim 6,100$ tons). The extent of the demands of the Indian mills is indicated by shipments of 14,074 tons

 which will be brought under irrigation by the Sukkur barrage.

Rapeseed is the most important seed exported from this province. A shortage of the Indian groundnut crop created a demand for toria rapeseed and substantial shipments were made, particularly in the concluding months of the year.

[^10]Miscellaneous.-Greatly reduced orders from Belgium for bones brought about a fall of Rs. 20.18 lakhs in the value of exports of bones and bone meal amounting to Rs. 15.83 lakhs. The value of shipments of ruw silk receded further from lis. $3 \cdot 65$ lakhs to Rs. $1 \cdot 17$ lakhs, mainly in shipments of mulberry sill: to Italy. Exports of dhromite (chrome iron ore), a product of Bialuchistan, were valued at Rs. $1-21$ lakhs. The decrease of Rs. 2.09 lakhs was largely due to an entire absence of demand from Norway.
16. Class III.-Articles wholly or mainly manufactured.
Leather.-The value of exports of leather, the most important article in this class, fell from Rs. 7 . 50 . lakhs to Rs. $4 \cdot 38$ lakhs owing to a smaller demand for dressed goat and sheep skins from the Enited Kingdom. 1\%. Foreign Merchandise, re-exported.

As in the case of Indian wool, foreiga wool, mostly from Kandahar, was exported in larger quantities to the United Kingdom in the hope of improved prices. Woollen manufactures re-exported consisted as usual almost entirely of Persian carpets to the United Kingdom and the United States of America. Rubber manuffactures, comprising subber tyres and tubes, were reshipped mainly to Iraq and Pursia. The increase under fruits and vegetables was due chiefly to larger purchases of dried fruit by the United Kingdom.

(a) Inclosive of Exaise duty.

## IMPORTS.

Indian Merchandise.-Cotton yarn and piece-goods and eigarettes were imported mainly from Bombay, coal, iron and steel and gunny bags from Bengal, mineral oils and timber from Burma, copra and spices from Madras and Travancore, groundnuts from Kathiawar, fruits and vegetables from Kathiawar, Bombay and Madras and matches from Bombay and Burma.

Foreign Merchandise.-Imports of cotton yarn and piece-goods, cigarettes sugar, motor cars and lorries were mostly from Bombay.

## EXPORTS.

Indian Produce and Manufactures.-Exports of wheat increased mainly as the result of unusually large shipments to Calcutta and Bombay, which respectively took 94,397 tons and 95,324 tons, as against 3,062 tons and 55,150 tons in the previdus year. The imposition of an import duty on foreign wheat created a good demand from the Indian mills for indigenous wheat, and the reduction in railway freight from the Punjab to Karachi, which was intended to stimulate exports to foreign countries, made it advantageous for Calcuta to import Punjab wheat by sea from Karachi. Substantial quantities were also sent to Burma, Madras, Cutch and Kathiawar. Wheat flour was sent chiefly to Madras, Bombay, Burma, Bengal, Kathjawar and Goa, gram to Madras, rice to Goa, Cutch, Kathiawar, Madras and Bombay, pulse to Madras, Cutch and Kathiawar, jowar and bajra to Cutch and Kathiawar, cotton to Bombay ( 14,074 tons), Madras ( 7,028 tons), Pondicherry ( 1,507 tons) and Bengal ( 617 tons), herosene oil to Cutch and Kathiawar, fish to Burma, fodder to Bombay, Cutch, Kathiawar and Madras, salt to Bengal and seeds to Kathiawar, Bengal, Madras and Cutch.

Foreign Morchandise.-Cotton piece-goods went; mainly to Bombay, sugar to Madras, dried fruits and carriages and carts to Bombay.

## SUBORDINATE PORTS.

22. Keti Bandar, Sirganda and Shah Bandar.--In August 1931 the new port of Shah Bandar was opened. The total value of the entire trade with these three ports, which is confined to the coasting trade, declined from Rs. 7.73 lakhs to Rs. $5 \cdot 63$ lakhs, to which Keti Bandar contributed 58 per cent., Sirganda 30 per cent. and Shah Bandar 12 per cent. Rice is the chicf article of trade, and Keti Bandar exported 803 tons of rice to Cutch and 45 tons to Karachi, and Sirganda and Shah Bandar respectively sent 2,039 tons and 743 tons to Cutch. Keti Bandar also exported firewood worth Rs. 47,212 to Kathiawar, Rs. 24,717 to Cutch and Rs. 216 to Karachi.

TABLE No, 30.
Table showing the number of vessels; other than country craft, of each nationality that entered the port of Karachi.

Shipping.-The average tonnage per steamer declined further from 2,990 tons to 2,869 tons. The sailing vessels engaged in the foreign trade were country craft trading with Persian Gulf ports, Zanzibar, Kenya Colony and Somaliland.

Froight.-The rate to the United Kingdom on a wheat basis (i.e., per 18 cwt.) opened at 17s. and fluctuated between 188 . and $14 s$. 6d. until the end of Scptember. From October to the end of the year the rate varied between $19 s$. and 228 , the closing rate being $20 s .6 d$. The rates for rapeseed were $1 s$. below those for wheat.

## Traffic by air.

24. As Karachi is the principal air port in India, the following brief review of the traffic by ait is giver.

There were five regular weekly services running to and from England, France, Holland, Java and French Cochin China, and intervening countries. During the year 214 aeroplanes called at Karachi air port as against 111 in 1930-31, an increase of 93 per cent. Statistics of goods carried by air are included under their appropriate heads in the sea-borne trade returns.

## GENERAL SUMMARY.

1. During the year 1932-33, the Province of Sind continued to suffer from the effects of the general depression which still bolds the world in its grip. The progressive decline in purchasing power reduced the demand for goods to the minimum, and exchange restrictions and tariff barriers tended to cartail the volume of international trade.

It will be noticed from the figures given in Table No. 1 of this Report that both the foreign and coasting trade of the Province showed a further decline, the former to the extent of Rs. 1,08 lakhs or 3 per cent. and the latter to the extent of Rs. 3,26 lakhs or 18 per cent., the net result being a contraction of Rs. 4,34 lakhs or 9 per cent. in the total trade as compared with the previous year, which itself was a year of great depression.

Foreign imports receded by Rs. 31 lakhs or 2 per cent., but the decrease was confined to imports of Government stores. Imports on private account (i.e., excluding Government stores) increased by Rs. 51 lakbe or 3 per cent. A brisk business in cotton piccegoods and woollen manuiactures largely contributed to the recovery in the trade. Increases on a smaller scale also occurred under instruments, hardware, paper, artificial silk, chemicals and drugs, baberdashery and soap. The increase was, however, to a great extent offset by notable decreases under mineral oils, sugar, machinery, metals, rubber manufactures, motor cars and lorries, provisions, arms and ammunition and tobacco. Foreign exports decreased by Rs. 77 lakhs or 6 per cent., the articles most responsible for the fall being wool, raw hides and skins, rice, barley, wheat and wheat flour. In fact, shipments of wheat ceased entirely. A redeeming feature was the welcome expansion in shipments of rapeseed, the value of which rose from Rs. 71 lakhs to Rs. 1,49 lakhs or by 110 per cent. Shipments of cotton, gram, pulse and bones als $\alpha$ improved somewhat. The decrease of 6 per cent. under foreign exports mentioned above woutd have been much greater but for the large shipments of gold, the value of which expanded from Rs. 7 lakhs in 1931-32 to Rs. 63 hakhs during the year under report.

The extent to which the price factor operated to bring about the decline in the foreiga trade is indicated in Table No. 3.

An event of great economic importance was the Empire Trade Agreement at Ottava. The effects of the mutual preference enjoyed by certain empire goods from January 1933 as the result of this agreement will no doubt begin to be felt during the coarse of the coming year.

Coasting imports declined by Rs. 2,59 lakha or 23 per cent. owing mainly to reduced arrivals of Indian cotton piece-goods from Bombay, which alone accounted for a fall of Rs. 2,21 lakhs. Coasting exports contracted by Ra. 67 lakhs or 10 per cent. : mainly the result of decreased shipments of cotton to Bombay and Madras and wheat to Bombay, Calcutia and Burma. The new Salt industry of Karachi showed further progress, shipments to Calcutta having increased from 30,905 tons to 33,505 tons. .

A reference to Table No. 2 will show that the United Kingdom retained the premier position in both the import and export trade, her transactions with the port representing a share of 39 per cent. of the total trade with foreigny countries as against 40 per cont. $l_{\text {ast }}$ year. Japan, which came next, raised its share of the total trade from 11 to 13 per cent., the big jump from 5.52 per cent. to 9.58 per cent. in her quota of the import trade being particularly atriking. The continued depreciation of the Yen aud the resultant meconomic prices at which Japanese goods of all descriptions, particularly cotton piecegoods, were offered for sale gave a stimulus to the trade.

The gross collections of Customs duty rose from Rs. 5,65 lakhs to Rs. 6,26 lakhs, showing an increase of Rs. 61 lakhs.

The Lloyd Barrage and Canals, which were formally opend in January 1932, have brought immense areas of waste land under cultivation. Regolar irrigation from these eanals commenced from the kharif seasou of 1932, aud over one million acres were ctitivated. The rabi sowings are reported to be good, and it is anticipated that about one mullion acres will be brought under cultivation.

British Empire.-Imports from the United Kinglom increased in value by Rs. 75 lakhs or 10 per cent. to Rs. 8,40 lakhs, representing a share of $51 \cdot 66$ por cont. in the total import trade of the province as against $48 \cdot 25$ per cent. in 1931-32. Cotton piece-goods showed the largest increase, and an improvement also occurred in receipts of electrical instruments, beet sugar, motor cars, clectrical machinery, pneumatic motor covers, woollen piece-goods and sonp. Imports of iron and steel, motor lorries, arms and ammunition, sewing machines, lubricating oils, cigarettes and prime-movers, however, remained restricted. The United Kingdom's share of the export trade declined from 29 to 21 per cent. and the valuo of the turnover from Rs. 3,63 lakhs to Rs. 2,40 lakhs or by 34 per cent., the articles contributing to the decrease being wheat, barley, rapeseed, wool, woollen carpets and dried fruits. The demand for cotton, gram and pulse increased somewhat. As regards the trade with other countries in the British Empire, Ceylon and British Borneo secured larger orders for copra and fuel' oil, respectively, but Canadian supplies of motor cars and tyres were further curtailed.

Europe.-Imports from Germany deelined by Rs. 11 lakhs, but exports thereto recovered by Rs. 15 lakhs, the net result being a rise in her share of the aggregate turnover from $8 \cdot 57$ to 8.88 per cent. On the import side, beet sugar, machinery and woollen yarn and knitting wool were adversely affected, whilst metal lamps, copper sheets, woollen shawls and piece-goods made of cotton and artificial silk showed an improvement. Among exports, cotton, rapeseed and barley wore in good demand, but raw hides were in defect. Transactions with Italy increased by Rs. 9 lakhs under imports and by Rs. 59 Iaklis under exports, thereby raising her quota of the total trade from 6.20 per cent. to 8.76 per cent. That country supplied more woollen blankets and rugs and woollen piece-goods, but less coloured cotton piece-goods, motor cars and railway locomotive engines. Her purchases of rapeseed increased considerably, but those of cotton again declined. Imports from France expañded by Rs. 17 lakhs and exports thereto by Rs. 19 lakhs, woollen piece-goods accounting for the former and gram, cotton and rapesced for the latter. The value of imports from Belgium amounted to Rs. 48 lakhs, an increase of Rs. 10 lakhs, which occurred under diamonds reeeived through the post. Iron and steel, the principal article of imports, came in larger quantities, but there was a contraction in its value. Exports to Belgium rose by Rs. 15 lakhs, shared by cotton, bones and rapeseed. The Netherlands sent less vegetable products, but took more cotton and rapeseed, which resulted in a net increase of Rs. 10 lalihs in the total trade. As in the previous year, the trade with Russia was confined to imports of kerosene oil from Batoum and sugar from Southern Russia, the value of the oil being Rs. 31 lakhs and that of sugar Rs. 4 lakhs.

Asia.-Imports from Japan made very rapid strides during the year under report. The heavy fall in the prices of Japanese goods, which resulted from the depreciation of the Yen, gave an impetus to the trade. The value of imports from Japan expanted from Rs. 88 lakhs to no less than Rs. 1.56 laths or ly 78 per cent. In consequence, Japan raised its quota from 5.52 per cent. to $9: 58$ per cent. and captured the second place in the import trade of the province, displacing Germany. Her supplies of cotton piece-goods were particularly heavy. Arrivals of artificial silk piece-gaods also showed a substantial inerease of 44 per cent. in quantity, but owing to low prices prevailing, the value was

10 per cent. below that of the previous year. Among various other articles supplied, notable inereases also occurred under cotton hosiery, electrical instruments; cyeles and accessories, rubber manufactures and green tea. On the export-side, Japan was again easily the second with a share of 18 per cent., almost the same as lest year, though a restricted business in cotton reduced the value of the turnover by Rs. 25 . lakhs to Rs. 2,06 lakhs. The total value of the trade with Java, consisting mainly of imports of sugar, which last year dwindled to Rs. 61 lakhs from Rs. 2,19 lakhs in' 1930-31, practically retained that low level. Persia sent only 260,000 gallons of kerosene oil as against $10,060,000 \mathrm{gallons}$ in the previous year, and hence the fall of the share in the total trade from $2: 71$ per cent. to 0.91 per cent.

America.--The value of the trade with America declined by Rs. 1,07 lakhs to Rs. 1,34 lakhs, made up of imports Rs. 83 lakhs and exports Rs. 51 lakhs, botl of which showed a reduction of about 45 per cent. as compared with the previous year. As the result the percentage share was reduced from 8.54 to 4.85 per cent. The contraction under imports was nostly shared by pneumatio -motor covers, electrical machinery, kerosene oil, motor cars and lorries, cotton fents and iron and steel, while raw goat skins, cotton and wool were responsible for the diminution under exports. A feature was the importation for the first time of a consignment of sugar from Euuador, consisting of 5,400 tons valued at Rs. 5 lakhs.

Foreign Imp:rts. 10
7. Class I.-Food, Drink and Tobacco. I

The decline of 21 percent. in imparts of sugar is attributable to the increased production in India which is developing rapidly under the protection afforded by the present rates of import duty and the decreased purchasing power of the consuming public. The local price of white Java, which opened at Rs. $14-4$ per cwt. on the 5th April 1932, witnessed a slight relapse in May, but showed an upward tendency at the end of June and rose to Rs. 14-9-6 in the first week of September, which was the highest quotation of the year. A gradual weakening set in in October, and Rs. 13-12, the lowest quotation of the year, was recorded
 1933 was Rs. 14-3.

Liquors.-Imports of liquors were again much below the quinquennial average, the natural result of heavy increases of Customs duty and the general trade depression, which reduced consumption to a very great extent.
Spirits.-Imports of brandy, mainly from France, decreased by about 2,400 gallons, but those of whishy improved by 8,500 gallons owing to large arrivals of cheaper brands during the latter half of the year. The denatured spirit shown in the table ahove was rectified spirit from Java denatured at the Custom House on arrival. The decrease of 25,400 gallons is ascribed to
the establishment of distilleries in the Punjab and the United Provinces, which formerly drew largely from this port. In fact spirit has become a by-product in places where sugar factories have come into existence.

Wines.-Larger arrivals of vermouth and ginger wine chiefly accounted for the increase.

Tobacco.-Imports of tobncco, consisting mainly of cigerettes from the United Kingdom, again suffered a set-loack, the guantity boing reduced by 33 per cent. to 215,845 lbs. and the value by 44 per cent. to Rs. 6.41 lakhs. The imposition of heavy import duties has resulted in the manufactare in India now of certain brands that formerly came from the United Kingdom. There was also $\mathfrak{a}$ curtailment in the demand from Kashmir.

Fruits and Vegetables.-Imports, consisting mainly of dates and potatoes, amomind to lis. $17-53$ lakis as against Rs. $18 \cdot 15$ lakhs hast yemr. Dates. as ustal, enme largely from Jraq, and their value declined by Rs. 1 lakh to Rs. 13.85 laklis owing to a smaller demand from the Punjab, where the poorer classes fook to gur (jaggery) on account of its cherpness. The value of potatoes, solefy from Italy, recovered slightiy by about Rs. 42,000 to Rs. $3 \cdot 28$ lakhs.

Provisions.-The progressive fall in imports of provisions noticed in recent years continued, the total vahue recorded, viz., Rs. $30 \cdot 08$ lalkhs being Rs. 5.87 lakhs less than in the previous year. The commorlity most affected was $v: g e-$ table products, the demand for which was considerably reduced owing to (1) the manufacture of this article in Bombay, (2) increased use of indigenous copra and groundnut oils and ghi and (3) consumption of edible whale oil received from Belgium and Denmark and of edible fish oil from Japan. The variations in the quantities of some of the principal descriptions of provisions are shown in the following statement:-

Tea.-Imports of black tea, mostly from Ceylon, amounted to 412,042 libs. valued at Rs. $2 \cdot 14$ lakhs, a decrease of $29,139 \mathrm{lbs}$. and Ra. 54,000 , which was due to increased consumption of Indian tea on account of its eheapness. Arrivals of green tea, on the other hand, rose by, $142,122 \mathrm{lbs}$ to $327,506 \mathrm{lbs}$. in quantity and by Rs. 78,600 to Rs. 191 lakles in value, a featuro being the introduction of cheap Japanese tea in the market, this year.
8. Class II.-Raw materials and produce and articies mainly unmanufactared.

Mineral Oils.-The totall imports of kerosene oil, both forcign and Indian, exhuibited a further drop of 25 per cent. in quantity and 27 per cent. in value which is mainly nttributable to the poor econemic condition of the people, Foneign oil was imporbed in much smaller quantities, the decreased consumption being met by inchigeṇous supplies. Petrol came langely from Buma, foreign imports being greatly seauced. The whofe: guantity of the petrol. imported by sea from Persia was re-exported to that country by land vid Zabidan. Imports of fuel oit incroased in guantity, but decreased in value, Persia; British Borneo ondi Roumania being the chief sources of supply.

Coal-Coal is mponted here mainly for bunkering purposes. Foreign coal (mostly Natal coall) decreasea by 949 totis to 12,230 tons in quantity and by Res, 59,000 to Rs. 1.86 lakth in value. Acrivals of Indaun (Bengall) cooil; aggregating 58,806 tens valued at $\mathrm{Rs}_{;} 8 \cdot 72$ Iphas, also showed a shortage of 11,552 tons and Rs. 3 秋 lakds. Decpeased bunlkering requiremento due tol trade depression accounted for the reduction in imports.

## 9. Miass III.-Articles Whoily or Mainly Manufactared.

Cotton Manufactures.-The impert business in cotton piecegoods, which remained greatly gepressed duaing the preceding three ycans, shewed some activity; the total yardage imported having increased by 39 per cent. and the value by 31 per cent. as compared with imports in the previeus year; A fall in prices, patticularly the heavy fall in the prices of Japanese goeds, stimulated imports, and the waning influence of the boycott movement which; for all practical porposes; was absent in Sind, māde trading conditions more easy during the year under report. The recovery was shared by both the Chited Kingdom and Japan, but the increase in imperts trom Japan was particularly striking. While British goods increased by 33 per cent. in quantity and 26 per cent. in vailue, supplies from Japan increased by no less than 130 per cent. in quantity and 103 per cent. in value. The share of thie United Kingdom in the totak value ef imports of cotton piece-goods diropped from 79 to 76 per cent., but that of Jiapañ advanced from l'2 to 19 per cent. It is peported that large stecks of imported geods were remaising on hand at the close of the jear.
Cotton manuractures:

Cotton Twist and Yarn.-Imports did not show any marked variations. British yarns were received in increased quantities, while supplies from Switzerland and Japan were curtailed.

Grey Goods.-Japan's share in the value of grey goods rose from 82 to 85 per cent. Arrivals of longeloth and shirtings increased considerably, but those of drills and jeans declined. A large quantity of Japanese goods found its way to Afghanistan. Supplies from the United Kingdom consisted mainly of mulls, jaconets and bordered dhutis, all of which showed an increase.

White Goods.-The increase in imports from the United Kingdom was most noticeable in receipts of mulls, checks, muslins, nainsooks and twills. Japan mostly supplied longeloth and shirtings, mulls and nainsooks. The United Kingdom's quota of the total value of imports declined from 91 to 85 per cent., but that of Japan increased from 5 to 11 per cent.

Coloured Goods.-Most of the principal descriptions imported from the United Kingdom showed an increase. The share of the United Kingdom in the total value, however, receded from 77 to 72 per cent. Japan's competition was extremely keen, her share having gone up to 21 per cent., almost double that of last year. Supplies from that country consisted mainly of printed goods and woven coloured velvets.

Woollen Goods.-Imports of yarn and knitting qooot, intended mostly for the Amritsar market, increased in value by Rs. $7 \cdot 10$ lakhs to Rs. $19 \cdot 06$ lakhs. The expansion of the textile industry in India created a good demand for yarn during the yoar under report. Poland, France and the United Kingdom sent more, but Germany lost ground. Imports of woollen piecegoods also showed a considerable expansion, the total value amounting to Rs. 62.63 lalks being 131 per cent. above that recorded in the previons year. The increase followed a heavy decrease in the preceding two yoars, which resulted in the stocks being greatly depleted. France supplied about half the quantity of the cloth imported during the year. The blankets imported consisted mainly of cheap rugs from Italy, and their value advanced by Rs. 6.70 Iakhs to Rs. $11 \cdot 29$ lakhs.

Silk.-Imports of silk were valued at Rs, $7 \cdot 02$ lakhs as against Rs, 6.25 lakhs, the small increase being noticeable in arrivals of yarn, noils and warps from Italy.

Artificial Silk.-Lärieer supplies of piece-goods made of cotton and artificial silk by Germany and of artificial silk yarn by Italy acconnted for an increase of Rs. 1.96 lakhs in the total value amounting to Rs. 30.33 lakis. Imports of pure artificial silk piece-goods, almost wholly from Japan, jnereased by 44 per cent. to $9,660,000$ yards in quantity, but decreased by 9 per cent. to Rs. 18.77 lakhs in value, the disparity indicating the extent to which that country was able to cut down the priees during the year under report,

Iron and Steel.-Imports of iron and steel amounting to 51,588 tons were 12 per cent. below those of the preceding year. Increased use of Indian products on account of their comparative cheapness and a lesser demand due to the general trade dopression chiefly accounted for the reduction in the trade. Of the total quantity imported, viz., 51,588 tons, 24,684 tons paid the protective duties. The United Kingdom's contribution to the total trade was 12,900 tons valued at Rs. $27 \cdot 53$ lakhs compared with 18,000 tons valued at Rs. 39 lakhs in 1931-32. Belgian imports increased from 20,620 tons to 21,300 tons, but their value deereased from Rs. 23 lakhs to Rs. 21 lakhs. Though the quantity supplied by other Continental countries declined by about 2,000 tons to 16,900 tons, its value increased by Rs. 3 lakhs to Rs. 28 lakhe. Arrivals from the United States of America dwindled from 560 tons to only 64 tons in quantity and from Rs. 2:5 lakhs to Rs. 38,000 in value.

Other Metals.-The increase of Rs. $3: 87$ lakhs in imports of brass was due to larger arrivals of mixed or yellow metal for sheathing from the United Kingdom. Imports of copper increased by Rs. 1.73 lakhs mainly in receipts of sheets from Germany". Lower prices and the resultant good demand espocially from the frontion induced imports.

| Total | 1,46'69 | 1,48'62 | 1,16.22 | 1,30-40 | 1,12.76 |

The total value of imports of machinery declined by Rs. 26.64 lakhs to Rs. 112.76 lakhs. The decrease under prime-movers was due to smallor arrivals of railway locomotive engines and tenders from Belgium, Italy and the United Kingdom, while the United States of America suffered the most in the supplies of electrical machinery. The general trade depression to a great extent accounted for the reduction in the demand for most types of machinery, the decrease in the case of electrical machinery being also partly due to the completion of the Uhl River Valley Hydro-electric Scheme. Imports of sugar maohinery, on the other hand, showed an expansion, which was due to the opening of new sugar factories in the Punjab and the United Provinees, the plant having been imported from Belgium, Germany and the United Kingdom.
Cutsery, Hardware, Implements and Instruments.-The aggregate value of imports under this head advanced by Rs. $15 \cdot 10$ lakhs to Rs. $82 \cdot 29$ lakhs chiefly owing to larger supplies of electriqal instruments by the United Kingdom, and metal lamps by Germany. Chemicals, Drugs and Medicines.-Imports rose by Rs. 3.45 lakhs to Rs. 4475 lakhs to which chemicals contributed Rs. $30 \cdot 97$ lakhs and drugs and medicines Rs. 13.78 lakhs. TALLLR No. 14.

Vehicles.-The further reduction in the offtake of motor cars and lorries is again attributable to the general economic depression and high Customs duties. The increase of 60 per cent. in the namber of British cars is, however, significant, the preferential rates of duty having particularly attracted imports during the last quarter of the year when no less than 217 cars were received out of a total of 556 imported during the year. Favourable rates of exchange also to a great extent improved the oompetitive position of British cars. Arrivals from Bombay, consisting mainly of cars sent out by the new assembly plant, numbered 81 as against 157 last year. The decrease in the number of lorries was mostly shared by the United States of America (-223) and the United Kingdom (-116).

Other Articles....The total yalue of apparel decreased by Rs. $1 \cdot 70$ lalshs to Rs. 10.83 lakhs notably in receipts of second-hand clothing from the United States of America. Imports of boots and shoes also declined by Rs. 1-94 lakhs to Rs. 1.83 lakhs owing to reduced supplies of rubber soled boots by Japan. The contraction of Rs. $1 \cdot 24$ lakhs in the value of dyes and colours amounting to Rs. 20.81 lakhs was most noticeable in arrivals of coal tar dyes from Germany and the United Kingdom. The value of glassware and earthenware fell from Rs. $22 \cdot 05$ lakhs to Rs. 20.81 lakhs, chiefly owing to smaller imports of soda water bottles from Germany and sanitary ware from the United Kingdom. Imports of paper, pasteboard and stationery at Rs. $34 \cdot 43$ lakhs showed an increase of Rs. 6.15 lakhs, due to largor arrivals of old newspapers from the United Kingdom, packing paper from"Sweden, news-printing paper from Finland and pencils from Germany. The value of imports of rubber manufactures amounting to Rs. 38.93 lakhs showed a heavy drop of Rs. 19.44 lakhs. The decrease was most noticeable in receipts of pneumatic motor covers from the United States of America, and was largely due to direct imports by Persia and Iraq, which formerly drew their requirements through this port and partly to the general trade depression. Arrivals of pneumatic motor covers from the United Kingdom, on the other hand, showed a substantial improvement. Here again favourable rates of exchange enabled the British product to compete with the American product, and large imports were also made in anticipation of the introduction of preferential ratos of duty. Imports of matches dwindled to the negligible figure of Rs, 17,900 compared with Rs. 45,773 in 1931-32 and Rs. 1•33 lakhs in 1930-31. Indian-made matches have almost completely ousted forcign-made matches from the market,
10. Class V.-Postal Articles not Specified.-Figures for gold and silver thread, cinematograph films, jewellery, precious stones and cigarettes imported by post are included under their relative heads in the general imports. The value of other articles imported by post decreased by Rs. 6.34 lakhs to Rs. 32.93 lakhs to which the United Kingdom contributed Rs. 28.66 lakhs. The number of parcels dealt with was 79,523 as against 86,336 in the previous year. In addition 05,040 letter packets were assessed to duty as against 64,574. The total amount of import duty realized on all articles imported by parcel post declined from Rs. $10 \cdot 46$ lakhs to Rs. $9 \cdot 56$ lakhs, but that on articles contained in letter packets rose from R9, 80,580 tọ Rs. 3.73 lakhs,

Foreign Exports. 22

## Exports.

## Indian Produce and Manufactures.

11. Agricultural Conditions.-As the bulk of the export trade of the port consists of agricultural produce, a brief review of the weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces is given below.

In Sind the inundation was fairly good on the whole. The cotton crop, the principal kharif crop, suffered from drought and frost in certain places, and its outturn is estimated to fall between 60 and 80 per cent. of the normal. The rabi sowings were carried out under favourable conditions, and both wheat and rapeseed crops are reported to be doing well.

In the Punjab the monsoon appeared in the second week of July and gave general rains almost all over the Province, followed by further falls in August and Scptember. These rains were beneficial to the kharif crops, but dry weather in the subseguent two months adversely affected their outturn. The area under cotton was greatly curtailed owing to deficiency of rains at sowing time and also to the low prices realized in the preceding year. The crop was damaged by boll-worms in certain districts. The rabi sowings were carried out under unfavourable conditions, the supply in the rivers being insufficient to meet the keen demand on the various canals. The outturn of the wheat crop is expected to be generally below normal to normal on irrigated areas and below normal on unirxigated areas.

In the United Provinces the kharif crops suffered from seanty rains in the carlier stages, but the september rains improved the situation to a great extent. Sufficient moisture in the soil considerably helped the rabi sowings, and the crops were benefited by the winter rains. Frost and hailstorms, however, adversely affected the outturn almost all over the provinces, and according to the third forecast issued in the beginning of April 1933, the outturn of the wheat crop is estimated at 80 per cent. of the normal.

The following table gives the area and yield of the three most important erops in Sind, the Punjab and the United Provinces for the past two seasons, the figures being taken from the crop reports published by the Directors of Agriculture for those provinces.

Wheat.-The Indian wheat crop was again small and only sufficient for local requirements. In consequence the prices remained well above export parity, the world prices being again easier owing to the existence of large surpius stocks in other wheat-exporting countrics. As the result there was a total absence of demand for Indian wheat, and not a ton was exported to Europe, the small quantity shown as exported having gone mainly to Arabia and Ceylon. The local priee of white wheat opened at Rs. $2-9$ per maund on 5 th April 1932 and did not show any marked variation during that month. It, however, rose steadily during May to October, the highest quotations respectively recorded in each of those months being Rs. 2-12, 2-15-6, 3-1-6, 3-7-9, 3-9 and 3-9-3. November witnessed a slight relapse, when the price fluctuated between Rs. 3-4 and Rs. 3-6-6, but it again raliied to Rs. 3-9-9 at the end of December. There was a further stiffening in the next two months, Rs. 3-11-6 being quoted towards the end of January and R2s. 3-13 on the 14th of February 1933, which latter proved to be the highest quotation of the year. After a slight weakening, the year closed with the quotation at Rs. 3-11-6 on the 29th March 1933.

Wheat flour.--The decrease in exports was the natural result of the conditions which affected the wheat trade. All the principal purchasers, viz., Port Sudan, Aden, the Persian Gulf ports, Ceylon, Italian East Africa and Mauritius took less. It is understood that most of these markets were captured by Australia.

Barley.-Exports of barley decreased. by 10,102 tons to 16,578 tons, of which 12,600 tons were shipped to the United Kingdom and 3,400 tons to Germany. Practically the whole quantity was exported during the first three months of the year, when a shortage of crops in other countries created a demand for Indian barley. The demand ceased on new crops from other sources being offered at cheaper rates.

Other Food-Grains.-The quantity of gram exported, viz., 25,433 tons was 131 per cent. above the exports of the previous year, and was the highest sinee 1924-25. A bumper crop in the Punjab and the resultant fall in prices stimulated exports. France took 16,831 tons as against 6,168 tons, while the United Kingdom, which made no purchases last year, took 6,651 tons. The decrease of 9,500 tons in the exports of rice occurred mainly in shipments of boiled rice to Arabia, the Bahrein Jslands and Aden, which drew a good deal of their requirements direct from Calcutta and Rangoon.

Cotton.-Although exports of cotton, which amounted to 128,666 tons; showed an increase of 190 tons as compared with the previous year, which was a poor one, they were much below the level of any of the six years previous to 1931-32. Short crops in two successive seasons and the consequent high level, for a greater portion of the year, of prices of Indian cotton in the world market relatively to those of American cotton prevented business-being clone on a larger scale, the cultivators
 31 per oent. of the total exports. Her purchases, however, fell short of those of the last year by 4,661 tons. Among other countries, the United Kingdom and most of the Continental countries, excepting Italy, took,more, while Italy, China and Amorica took less. Coastwise exports decreased by 8,600 tons to 14,620 tons, mainly in shipments to Bombay and Madras.

quality of the seed, compled with the fact that the price at which it was placed on the market compared favourably with the prices of other oilseeds, created a good demand, especially from Italy, which purchased nearly 60 per cent. of the total quantity exported during the year.

Raw Hides.--The decrease acemxed in shipments of covo hides te Gernrany and Spain. Enereqsed suppties of domestic hides at greatly weetuced prices available in Contipentan countries reduced the deinand for Indian hides; and the trade wras alse to a certain extent hampered by credit anct exchange restrictions and politicall disturbanees on the Continent.;

Raw slins.-A restricted demand frem the United States of Amexica and tiie loy prices offered accounted for the fadt in the exporits of raw skins.

Miscellaneous.- Dxperits of bones incteased is value by Res. 3.56 faths te Rs. 15.09 ladihs owing mainity to a recovery of demand from Belgium. The value of exponts of ravo sith awindled from Rs. 1 17 laklis to only: Res. 4, 400 mainly as the fesult of an entive absence of demand for mulberry sill from Italy. Shipments of chromite (chrome irem eres, a product of Baluchistan, increased from Ris. 1.27 lakds to Rs. 175 lakhs, Norvay and Germpny being the principal purehasers.

## 16. Class 1II. Articles wholly or mainily Manufactured.

Leather.-The volue of exports of leather, the most important anticle in this class, contracted' by Ras. $2 \cdot 20$ lukds to Rs. 2-18 lakhs owing mainly to reduced purchases of dressed sheep skins by the Chited Kingdom.
17. Foreign Merchandise, Re-exported.

| Total | - | 1,77.73 | - | 1,66.72 | -• | 1,10.44 | $\cdots$ | 91.41 | - | 60.70 | The reasons given in paragraph 15 for the declino in shipments of Indian wool are applicable also to the exports of foreign

wool, mostly Kandahar wool. It is further reported that Russia bought Kandahar wool direct in the frontier markets. Re-exports wool, mostly Kandahar woo. It is further reported that Russia bought Kandahar wool direct in the frontior markets. Re-exports
of woollen manufactures consisted mostly of Persian carpets, and the decrease of Rs. 2.98 lakhs in their value was due to a smaller demand from both the United Kingdom and the United States of America, the usual chief purchasers. The falling off of Rs. 11.21 lakhs under rubber manafnctures was the result of direct takings by Iraq and Persia of rubber tyres and tubes from foreign countries instead of via Karachi. Reduced purchases of dried fruits by the United Kingdom accounted for the contraction of Rs. $2 \cdot 93$ lakhs in the value of fruits and vegetables, re-exported during the year.

(a) Inclasive of Excise duty.
Coasting Trade. 38

## Imports.

Indian Merchandise.-Cotton yarn and piece-goods and cigarelles were imported mainly from Bombay, coal, iron and stcel and gunny bags from Bengal, mineral oils and timber from Burma, copra from Travancore and Madras, spices from Travancore, Madras and Bombay, groundnuts from Kathiawar, fruits and vegetables from Kathiawar, Madras and Bombay and matches from Bombay and Burma.

Foreign Merchandise.-Imports of cotton yarn and piece-gools, cigavettes, motor cars and lorries were mostly from Bombay.

## Exports.

Indian Produce and Manufactures.-Jowari and bajra and kerosene oil were exported largely to Cutch, Kathiawar and Bombay, gram to Madras, pulse to Madras, Cutch and Kathiawar, rice to Goa, Cutch, Kathiawar, Madras and Bombay, wheat to Bengal ( 79,135 tons), Bombay ( 53,153 tons), Buıma ( 6,360 tons), Cutch ( 3,624 tons) and Madras ( 2,487 tons), wheat flour to Bombay, Bengal, Madras, Burma, Kathiawar and Coa, salt to Bengal, secds to Kathiawar, Cutch, Madras and Bengal, cotton to Mombay ( 8,708 tons), Madras ( 4,275 tons), Bengal ( 866 tons) and Pondicherry ( 723 tons), fish to Burma and fodder to Cutch, Bombay, Kathiawar and Goa.

Foreign Merchandise-Carriages and carts went mainly to Bombay and Madras, dried fruits to Bombay and Bengal, cotton piece-goods to Bombay and Baluchistan and sugar to Madras and Baluchistan.

## SUBORDINATE PORTS.

22. Keti Bandar, Sirganda and Shahbandar.-The total value of the entire trade witb these three ports, which is confined to the coasting trade, rose from Rs. 5.63 lakhs to Rs. 6.69 lakhs to which Keti Bandar contributed 56 per cent., Sirganda 18 per cent. and Shahbandar 26 per cent. Rice is the ehief article of trade. Keti Bandar exported 896 tons of rice to Cutch and 8 tons to Karachi, and Sirganda and Shahbandar respectively sent 1,411 tons and 2,030 tons to Cutch, Keti Bandar also exported firewood worth Rs. 58,569 to Kathiawar and Rs. 25,521 to Cutch.
Miscellaneous.
23. Shipping.-Table sbowing particulars of vessels entering and clearing from the ports of the Province of Sind.

## TABLE No. 30.

Shipping.-The averago tonnage per steamer declined from 2,869 tons to 2,833 tons. The sailing vessels engaged in the forcign trade were country cruft trading with the ports in the Persian Gulf and Kenya Colony.

Freight.- The rate to the United Kingdom on a wheat basis (i.e., per 18 ewt.), which opened at 20 s .6 d . in April, rose to 22 s . and 23 s . in the same month and to 25 s . in May owing to a general pancity of liner tonnage. This high levol was, however, not maintained and the rate dropped to 23 s . and 19 s . in the first and second weeks of June, respectively. Thereafter it fluctuated between 19 s . and $16 s$. from the middle of June to the end of August and between 23s. and 20 s . from September to March, the closing rate on 29th March 1933 being 22s. The rates for rapeseed were $1 s$. below those for wheat.

## Traffic by. Air.

24. As Karachi is the principal air port in India, the following brief review of the traffic by air is given.

There were tive regular weekly services rumning to and from England, France, Molland, Dutch East Indies and French Indo-China and intervening countries. During the year 284 acroplanes called at Karachi air port as against 214 in 1931-32, an increase of 33 per cent. The chief feature of the year under report was a number of private flights to and across India by persons of different nationalities, i.e., Roumanian, Spanish, British, Swisis, Australian, German, American and Freuch. Statistics of goods carried by air are included under their appropriate heads in the sea-borne trade returns.

## GENERAL SUMMARY.

1. During the year 1933-34, the Province of Sind continued to struggle against the coonomic depression. Growth of economic nationalism in most countries and the measures adopted for its achievement, such as, tariff barriers, exchange restrictions and other impediments to foreign trade again clogged the wheels of international trade; and the fluctuating currencies of many foreign countries coupled with the uncertainty of the Indian Tariff rates drove local dealers to adopt a policy of hand to mouth business. In the course of the year from July to December the Provinee had to face the boycott of onewof its principal exports, viz., cotton. Prices of its principal products-cotton, rapeseed, wheat and other food graing-were on lower levels than in the preceding year.

Foreign amports (vide Table"1) deelined by Rs, 3,78 lakhs or 21 per cęnt., ootton piece-goods alone being responsible for a fall of Rs. 2,39 lakhs. Woollen goods, sugar, artificial silk, iron and steel, tobacco, haberdashery, paper, arms and ammunition, silk manufactures, copper and fruits and vegetables were also adversely affected, but machinery, liquors, mineral oils, motor cars and lorries, dyes, glassware, cycles and parts, coal and chemicals showed some improvement. The falling off in the import trade was, however, to a great extent offset by a substantial increase in foreign exports, which rose by Rs. 2,23 lakhs or 18 per cent. The most encouraging feature of the export trade for the year was a good all-round demand for Indian cotton, shipments of which expanded by no less than Rs. 3,19 lakhs in value. Appreciable increases were also recorded in exports of wool and raw hides and sking, but a considerable reduction in shipments of rapeseed, rice, barley, wheat flour, hones, gram, pulse and woollen carpets prevented much headway being made.
The Ottawa preferences stimulated the trade with the United Kingdom, and it is anticipated that the reciprocal advantages, which they are intended to give, will be fully secured when the trade attains normal proportions and business is done more freely than at present.

The outstanding event of the year in regard to India's trade was the conclusion of the Indo-Japanese Agreement, which ensures the export of a specified quantity of Indiản cotton annually to Japan in exchange for a specified maximum quantity of cotton piece-goods, which that country may export to India.

Coasting imports deolined from Rs. 8,76 lakhs to Rs. 8,08 lakhs or by 8 per cent. and coarting exports from Rs. 6,03 lakhs to Rs. 5,84 lakhs or by 3 per cent. The new Salt Industry of Karachi continued to show progress, shipments to Calcutta having advanced from 33,505 tons to 34,517 tons.

The geographiest distribution of Karachi's trade is given in Table 2. The United Kingdom held the premier position in both imports and exports, but her share of the total trade was reduced by aboit 2 per cent. The trade with the Continent of Europe retained the last year's level, while that with Japan and America increased by 1 per cent. and 14 per cent., reapectively.

The gross collections of Customs duty deoreased from Re, 6,26 lakhs in 1932-33 to Rs. 4,85 lakhs in 1933-34.

The Lloyd Barrage and its off-taking canals functioned very satisfactorily during the year under review. Further details are recorded in paragraph 11 of this Report.

## 'TABLE Nò. 2.

52. Freographical Distribution.-Table showing the distribution during 21933-34 of the foreign trade in private merchandise by countries.

British Empire.-The total value of imports from the United Kingdom amounting to Ka . 6,52 lakhs registered a heavy decline of Rs. 1,88 lakhs to
which cotton piece-goods alone contributed Rs. 1,79 lakiss. The percentage share of that country in the total value of imports was, however, not much affected. It stood at $50 \cdot 30$ per cent. as against $51 \cdot 66$ per cent. in the previous year. Electrical machinery, cigarettes, sewing machines, cartridges, beet sugar and firearms were some of the principal articles, besides cotton piecegoods, which contributed to the decrease in the value. Notable increases were, on the other hand, recorded under sugar machinery, pneumatic motor covers, cycles and parts, prime-movers, boilers, woollen yarn and hnitting wool, provisions, copper sheets, whisky, motor cars and chemicals. Iron and steel also came in larger quantities, but there was a decrease in its value. The position on the export side was much satisfactory, the total value, viz., Rs. 3,53 lakhs having exceeded the last year's figure by Rs. 1,12 lakhs or 47 per cent.-mainly the result of heavy shipments of cotton, the quantity exported being nearly double of that recorded in 1932-33. Wool and rapeseed were also in good demand, but shipments of barley, gram, pulse and woollen carpets were much roduced. The United Kingdom's quota of the total exports advanced from $21 \cdot 03$ to $24 \cdot 80$ per cent. Among other countries in the British Empire, Ceylon supplied less coconut oil and tea, and though arrivals of copra seed actually increased by 389 tons in quantity, lower prices cansed its value to drop by Rs. 3 laihs. Canada and the Union of South Africa slightly improved their positions due to larger orders secured respectively for rubber tyres and Natal coal. Fuel oil was practically the only article imported from British Borneo, and its value decreased by Rs. I lakh as compared with the previous year. Imports from the Straits Setllements rose by Rs. 1 lakih to Rs. 3 lakhs, notably in peceipts of unwrought tin.

Europe.-Imports from Germany recorded a further decline of Rs. 18 lakhs, but exports thereto expanded by Rs. 56 lakhs. On the import side, reduced arrivals of cotton and artificial silk piece-goods, copper shieets, woollen yarn and knitting wool, metal lamps and woollen piece-goods were partly offiet by increased supplies of ooal tar dyes and implements and tools, while greatly inereased purchases of cotton and a better demand for raw hides and gram caused the improvement under exports. Italy lost ground under both imports ( - Rs. 21 lakhs) and exports (-Rs. 35 lakhs), coloured cotton piece-goods, woollen piece-goods, cotton and artificial silk piece-goods and pneumatic motor covers mainly accounting for the former and rapeseed for the latter. That country, however, sent more woollen blankets and potatoes and took more cotton and raw skins. France curtailed her supplies of woollen piece-goods, woollen yara and knitting wool and iron and steel, but purchased more cotton and rapeseed, the net result being a decrease of about Rs. 5 lakhs in the total trade. Imports from Belgium contracted by Rs. 3 lakhs as a sequel to restricted supplics of diamonds and irou and steel, despite larger consignments of sugar machinery being reccived. She cut down her orders for cotton and bones, and hence a drop of Rs. 11 lakhs under exports thereto. Appreciable imports of sugar machinery and increased shipments of cotton were the only noticcable variations in the trade with the Netherlands, in consequence of which imports therefrom rose by Rs. 4 lakhs and exports thereto by R9, 13 lakins. Kcrosene oil was the only article received from Russia. Among other foreign countries in Europe, Poland supplied less woolien yarn and kniting wool and iron and steel; but took more cotton, Czechoslovaliou sent nore sugar machinery, and Roumasiat
more kerosene and other mincral oils, while Spain reduced her orders for cotton by about 11 per cent.

Asia.-Japan's share of the import trade was well maintained at 9.58 per cent., despite a decrease of Rs. 32 lakhs or 20 per cent. in the total value of the goods supplied. The shortage occurred in only two articles, namely, cotton piece-goods and artificial silk piece-goods, which suffered a reaction after the heavy dumping experienced in the previous year. The decrease was also partly due to inereased rates of import duty. Japan, however, considerably pushed on her sales of woollen yarn and knitting wool, woollen piece-goods, pheumatic motor covers, iron and steel, porcelain, Portland cement and tea. The value of exports to Japan, 98 per cent. of which represented exports of cotton, expanded by Rs. 51 lakhs or 25 per cent. Java's share of the import trade declined from 3.72 to 2.63 per cent. owing to a further contraction in the sugar trade. The increase of Rs. 1.83 lakhs in imports from Persia occurred mainly under fuel oils, kerosene and petrol. Among other foreign countries in Asia, the only variation worth notice was an increase of Rs. 50 lakhs in exports to China, consisting mostly of cotton.

America-Imports from America suffered a set-back of Rs. 15 lakhs or 19 per cent., pneumatic motor covers and tubes and electrical machinery being the articles most affected. Arrivals of cotton fents, lubricating oils and metal lamps, however, showed an improvement. Exports to America, on the other hand, appreciated by Rs. 48 lakhs or 94 per cent., due mainly to a substantial increase in shipments of wool and raw goat skins.

TABLE No. 4.
4. Government transactions.-Table showing the values of the more important Government transactions.

The total value of imports of Government stores decreased by Rs. 57.62 laklas to Rs. 80.28 lakhs mainly, in receipts of aeroplanes and parts and arms, ammunition and military stores from the Uuited Kingdom and fuel oils from Persia. The total quantity of fuel oil imported from Persia was 7,226,206 gallons valued at Rs. $9 \cdot 69$ lakhs compared with 11,373,713 gallons valued at $\mathrm{R}_{\mathrm{s},} \mathbf{1 5} 24$ lakhs in the preceding yeur.

$\underset{\substack{\text { Foreigu Imports. } \\ \text { Sugar.) }}}{ } 10$
7. Class I.-Food, Drink and Tobacco. table No. 7.

The continued growth of indigenous production, stimulated by the high protective duties, is gradually leading to the elimination of foreign sugar. The total quantity ( 61,688 tons) imported during the year was 31 per cent. less than that in 1932-33 and was equal to only 27 per cent. of the imports in 1930-31. Decreased consumption due to low purchasing power of the people has also partly contributed to the reduction in the trade in recent years.
The local price of white Java, which was Rs. 14-2-0 per cwt. in the beginning of April, rose to Rs. 14-3-6 in the middle of May and to Rs. 14-6-0 in the middle of June, the latter being the highest quotation of the year. It remained more or less
steady in July, but thereafter a gradual downward tendency followed, Rs. 13-15-0 being recorded at the end of October Rs. 13-9-0 at the end of December and Rs. 13-4-0 (the lowest quotation of the year) at the end of January 1934. The next two months witnessed a partial recovery, and the quotation stood at Rs. 13-11-8 at the close of the year.

[^13]Wines.-The improvement under wines occurred in receipts of champagne and other sparkling wines, mostly from France, and was due to a better demand from upcountry.

Tobacco.-Imports of tobacco, consisting mainly of cigarettes from the United Kingdom, which have been continuously on the decline after 1929-30, were reduced to a further low level of $81,743 \mathrm{lbs}$. valued at Rs. $2 \cdot 31$ lakhs, a decrease of 62 per cent. in quantity and 64 per cent. in value as compared with 1939-33. The quantity imported was equal to only 13 per cent. of the average of the preceding five years, the contraction in the trade being due to the high level of import duties, which have given an impetus to the manufacture in India of certain brands of cigarettes formerly supplied by the United Kingdom.

Fruits and Vegetables.-Dates and potatoes formed the bulk of the imports under this head, the value of which receded by Rs. $3 \cdot 56$ lakhs to Rs. 13.98 lalihs. Arrivals of dates, largely from Iraq, decreased by Rs. $4 \cdot 45$ lakhs to Rs. $9 \cdot 40$ lakhs owing to a poor crop in that country and the resultant
~ high prices. Potatoes came solely from Italy, and their value advanced from' Rs. $3 \cdot 28$ lakhe to Rs. 4.32 lakhs.

Provisions.-The total value of imports of provisions rose slightly from Rs. 30.08 lakhs to Rs. 30.94 lakhs, the United Kingdom claiming the largest share, viz., 72 per cent. The vegetable products trade, mostly with the Netherlands, which in recent years showed great activity, has now practically disappeared, the total value of imports this year being only Rs. 3,000 as against Rs. 1.13 lakhs last year and an average of over Rs. 26 lakhs in the preceding quinquennium. Indian vegetable product manufactured at Bombay is replacing the foreign product. The variations in the quantities of some of the principal descriptions of provisions are shown in the following statement:-

| Provisions | Quanticy |  |
| :---: | :---: | :---: |
|  | 1932-33. | 1933-34. |
|  | $\underset{\substack{\text { Cuts. } \\ 3,852}}{ }$ | Cwts. 77 |

| Piokles, chatnies, mauces and condiments | 1,238 | 1,879 |
| Other sorts . . . . | 14,204 | 16,030 |

Tea.-Imports of black tea, mostly from Ceylon, dwindled from 412,942 lbs. valued at Rs. $2 \cdot 14$ lakhs to only 102,754 lbs. valued at Rs. 50,492 , the figures being the lowest recorded sinee 1918-19. High prices ruling in the Ceylon markets made it difficult for Coylon tea to compete with Indian tea, which was available at much chesper rates. Imports of green tea, mostly intended for the Aighan markets, rose by 29 per cent. to $422,218 \mathrm{lbs}$. in quantity and by 10 per cent. to Ks. 2.09 lalihs in value, wholly in receipts from Japan, which supplied 88 per cent. of the total quantity.

Mineral Oils.-Imports of kerosene oil, both foreign and Indian, showed a slight excess of 4 per cent. over the quantity recorded last year, but the figures are still much below the quinquennial average, the low economic condition of the people having reduced consumption to a great extent. Unlike last year, Burma oil was imported in smaller quantities, the deficit being made up by foreign supplies. A feature, this year, was the importation of 1 本 million gallons from Roumania. Imports of petrol fell short of those of the preceding year by about 13 per cent., the general trade depression having kept consumption at a lower level. Fuel oil came largely from Persia and British Borneo, and a small quantity was also imported from Roumania. The improvement under lubricating oils occurred chiefly in receipts from the United States of America.

Coal-Coal is imported here mainly for bunkering purposes. Foreign coal, largely from Natal, increased by 13,413 tons to 25,643 tons in quantity and by Rs. 1.96 lakhs to Rs. 3.82 lakhs in value owing partly to a slight improvement in the demand and partly to the low prices at which this coal was available. Imports of Indian (Bengal) coal, aggregating 59,399 tons; also showed an improvement of 593 tons, but its value, viz., Rs. 8.37 lakhs contracted by about Rs. 35,000 .

## 9. Class LII.-Articles Wholly or Mainly Manufactured.

Cotton Masafactures.-The over-stocking of the markets in the previous year was the main factor responsible for the fall of 44 per cent. in the volume and 45 per cent. in the value of imports of cotton piece-goods during the year under report. The restricted purchasing power of the cultivating classes due to uneconomic prices of Indian produce continued to keep consumption at a low level. British goods suffered to the extent of 46 per cent. in yardage and 45 per cent. in value, while supplies from Japan fell off by 35 per cent. in yardage and 43 per cent. in value, the decrease in the latter case being also partly attrlbutable to the imposition of a heavy import duty on non-British goods. The share of the United Kingdom in the total value of cotton piece-goods advanced from 76 to 77 per cent. and that of Japan from 19 to 20 per cent.

Cotton Twist and Yarn.-Increased use of yarns of local manufacture by the Indian mills mostly accounted for the fall in imports of foreign yarns.

Grey Goods.-Japan curtailed its supplies of longcloth and shirtings, and in consequence her share in the total value of grey goods declined from 85 to 81 per cent. The United Kingdom slightly improved its position on account of larger despatches of bordered dhuties, though supplies of mulls and jaconets fell short.

White Goods.-The United Kingdom was, as usual, the chief supplier of white goods, with a share of 86 per cent. in the total value as against 85 per cent. last year. Japan also increased its share from 11 to 12 per cent. Of the principal varieties, imports of longeloth and shirtings from the United Kingdom fell from Rs. 65.36 lakhs to Rs. $45 \cdot 80$ lakhs and those from Japan from Rs. $24 \cdot 17$ lakhs to Rs. $13 \cdot 43$ lakhs. Supplies of mulls from the United Kingdom decreased from Rs. 177.51 lakhs to Rs. 83.11 lakhs and those from Japan from Rs. 7.71 lakhs to Rs. $5 \cdot 44$ lakhs.

Coloured Goods.-The share of the United Kingdom in the supplies of coloured goods advanced from 72 to 82 per cent., but that of Japan receded from 21 to 17 per cent. Extremely low prices quoted by Japan coupled with high import duties made it difficult for Italy to compete, the value of imports therefrom having dwindled to an insignificant figure of Rs. 25,000 ano against Rs. 6.92 lakhs in 1932-33 and Rs. 10.94 lakhs in 1931-32.

Woollen Goods.-Imports of yarn and kniting wool, mostly intended for the Amritsar market, amounted to Rb. 12.07 lakhs, a decrease of Rs. $6 \cdot 99$ lakhs, which followed an increase of Re. $7 \cdot 10$ lakhs in the previous year. Poland, Germany and France sent less, but favourable prices quoted during the year attracted larger imports from Japan ( + Rs. 4.87 lakhs) and the United Kingdom ( + Rs. $1 \cdot 70$ lakhs). The woollen piece-goods trade remained depressed owing to the accumulation of stocks held over from imports in the previous year. The total value amounting to ${ }^{\prime}$ Rs. $37 \cdot 25$ lakhs showed a deficiency of Rs. $25 \cdot 38$ lakhs, which was shared niostly by France, Italy and Germany. Arrivals from Japan, on the other hand, rose appreciably from Rs. 29,000 to Rs. 3.31 lakhs and those from the United Kingdom also showed a slight improvement. Imports of blankets, consisting mostly of cheap ruge from Italy, increased from Rs. $11 \cdot 29$ lakhs to Rs. $12 \cdot 47$ lakhs.

Silk.-Reduced arrivals of yarn, noils and warps from Italy and of goods of silk mixed with other materials from Germany caused a decrease of - Rs. 2.32 lakhs in the total value amounting to Rs. 4.70 lakhs.

Artificial Silk.-Imports contracted by Rs. 16.08 lakhs to Rs. 14.25 lakhs as the result of a considerable reduction in receipts of pure artificial silk piece-goods from Japan and of piece-goods made of cotton and artificial silk from Germany and Italy, the increased import duties having affected the sales of these articles to a great extent. The decrease was also partly due to the manufacture of artificial silk piece-goods in the Punjab from imported yarn.

Foreign Impents.
18

Iron and Steel.-Imports of iron and steel, which have recorded a progressive fall from 1929-30, largely on account of the general trade depression and the increased use of Indian products, were reduced to a further low level of 48,504 tons valued at Rs. $71 \cdot 35$ lakhs, showing a decrease of 6 per cent. in quantity and 8 per cent. in value as compared with the previous year. Belgium supplied the largest quantity, viz., 17,185 tons or 35 per cent. compared with 21,351 tons or 41 per cent. in 1932-33. Excepting Germany, which increased its supplies from 4,297 tons to 5,454 tons, most of the other continental countries also sent less. Arrivals from the United Kingdom, representing a share of 28 per cent. compared with 25 per cent. last year, advanced from 12,938 tons to 13,656 tons, due to the stimulus given by the Ottawa preferences. Imports from Japan, which stood at only 298 tons last year, rose to 1,566 tons, comprising mostly galvanised sheets, wire, wire nails, wire netting, barbed wire and wrought tubes, pipes and fittings. America supplied 123 tons as against 64 tons in 1932-33. Of the total quantity ( 48,504 tons) of iron and steel imported during the year, 23,845 tons paid the protective duties.

Other Metals.-The only important variation among other metals was a decrease of Rs. $2 \cdot 16$ lakhs in imports of copper, which was due to smaller despatches of sheets by Germany. The United Kingdom, on the other hand, secured larger orders.

| Total | 1,48.62 | 1,16.22 | 1,39-40 | 1,12.76 | 1,27•16 |

The improvement of Rs. $14 \cdot 40$ lakhs or 13 per cent. under this head was due to increased imports of sugar machinery, boilers and prime-movers, which more than offset the heavy decline in electrical machinery. The expansion of the sugar industry in India created a demand for sugar machinery, which came from the United Kingdom (Rs. 26 lakhs), Belgium (Rs. 10 lakhs), the Netherlands (Rs. 6 lakhs) and Czechoslovakia (Rs. 5 lakhs). The boilers were imported from the United Kingdom (Rs. 4 lakhs) and Czechoslovakis (Rs. 1 lakh), while the increase under prime-movers occurred in receipts of
steam engines from the United Kingdom and Belgium. The demand for electrioal machinery was greatly curtailed owing
to the completion of the Uhl River Valley Hydro-electric project,
Cutlery, Hardware, Implements and Instruments.-Imports at Rs, 83.55 lakhs, practically retained the last year's level.
Chemicals, Drugs and Medioines.-The aggregate value under this head advanced by Ra. 1.90 lakhs to Rs. 46.65 lakhs,
mainly in receipts of sodium earbonate from the United Kingdom and the United States of America and proprietary and patent
medicines from the United Kingdom.

venicles.-Imports of motor cars, though slightly in excess of those in the previous year, were much below the average, the general trade depression having prevented much headway being made. British cars numbering 669, however, established a further record and represented a share of 86 per cent. of the total number (781) received during the year, the preferential rates of duty having greatly facilitated their imports. A large number of these cars were used second-hand cars. The new assembly plant at Bombay sent 155 cars as against 81 last year. Canada supplied the largest number of lorries, viz., 134 compared with 98 in 1932-33, and the remainder came from America (72), the United Kingdom (26), Japan (10) and Germany (1). Imports of cycles and parts rose by Rs. $1-29$ lakhs to Rs. $15 \cdot 42$ lakhs, to which the United Kingdom contributed Rs. 11.54 lakhs ( + Rs. $2 \cdot 39$ lakhs) and Japan Rs. 2.70 lakhs (-Re. 0.58 lakhs).

Other Artieles.-Imports of apparel increased in value by nearly Rs, I lakh to Rs: 1181 lakhs, notably in receipts of gold and silver thread and other articles of apparel from Germany. The value of boots and shoes almost kept the last year's level at Rs. $1 \cdot 90$ lakhs, 52 per cent. of which represented imports of rubber soled shoes from Japan. Imports of dyes and colours valued at Rs. 22.75 lakhs increased by Rs. 1.94 lakhs, mainly in receipts of coal tar dyes from Germany owing to a good upcountry demand, particularly by the woollen mails. The value of glasszoare and earthenware amounting to Rs. $\mathbf{1 6 . 4 5}$ lakhs showed a recovery of Rs. $2 \cdot 69$ lakhs, chiefly in imports of bottles and phials from Sweden and porcelain from Japan. Imports of paper, pasteboard and stationery receded in value by Rs. 4.42 lakhs to Rs. 30.02 lakhs, chiefly in receipts of packing and ptinting paper from Sweden and pencils from Germany. The value of rubber manufactures, 67 per cent. of which represented imports of pneumatio motor covers, amounted to Rs. 38.50 lakhs, a decrease of only Rs. 43,000 as compared with the previous year. It is, however, significant to note that while imports of motor covers from the United States of America and Italy decreased by Rs. 6.95 lakhs and Rs. 1-61 lakks, respectively, those from the United Kingdom stimulated by the preferential rates of duty rose by Rs. $5 \cdot 46$ lakhs. Japan and Canada also supplied more. Imports of coment increased from 4,184 tons to 7,108 tons in quantity and from Rs. $1-15$ lakhs to Rs. 1.83 lakhs in value. The bulk of the imports comprised Japanese cement, which competes successfully with Indian cement on account of its cheapness. Imports of matckes again recorded a low value of Rs. 19,000 as against Rs. 18,000 last year.
10. Class V.-Postal Articles not Specified.-Figures for gold and silver thread, cinematograph films, jewellery, precious stones and cigarettes imported by post are included under their relative heads in the general imports. The value of other articles imported by post decreased by Rs. $7 \cdot 66$ lakhs to Rs. $25 \cdot 27$ lakhs, to which the United Kingdom contributed Rs. $21 \cdot 89$ lakhs. The number of parcels dealt with was 84,174 as against 79,523 in the previous year. In addition 64,955 letter packets were assessed to duty as against 65,040 . The total amount of import duty realized on all articles imported by parcel post rose from Rs. 9.56 lakhs to Rs. 9.70 lakhs, but that on articles contained in letter packets declined from Rs, 3.73 lakhs to Rs. 1-13 lakhs.

#### Abstract

Foreign Exports.

\section*{Exports.}

\section*{Indean Produce and Manufactures.}

11. Agricultural Conditions.-As the bulk of the export trade of the port consists of agricultural produce, a brief review of the weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces is given below.

In Sind, the inundation was one of the best on record. The Lloyd Barrage at Sukkur and its off-taking canals functioned very satisfactorily during the year under report. The canals received a good and steady supply of water throughout the kharif season, when some $1,455,000$ acres of land were brought under cultivation in the Barrage Zone alone, including 555,000 acres under cotton, the area under this crop in the whole of Sind in the prebarrage days being 280,000 acres only. The cotton crop, however, suffered from insect attacks and frost in certain places, and the yield is likely to fall * between 65 and 75 per cent. of the normal. Ample supply of water led to an increase in the area under rabi sowings, but the frost in January adversely affected the yield in many districts. The wheat crop in the Larkana and Upper Sind Frontier districts is expected to yield from 85 per cent. of the normal to a full normal, but in the remaining districts it is likely to range between about 50 and 70 per cent. of the normal.

In the Punjab, the area under kharif sowings increased considerably owing to sufficient rain fall and adequate supplies in the rivers, and the cotton crop. is expected to return a larger yield than in the previous year, though constant and excessive rains caused some damage in many districts. The rabi sowings were also carried out under favourable conditions, and the area sown with wheat increased in consequence. Severe cold and frost, however, adversely affected the yield which is expected to be generally below normal to normal.

In the United Provinces, the monsoon rains were unevenly distributed, being excessive in some places while deficient in others. The heavy rains in August, September and October particularly proved injurious to the yield of the cotton crop. Ample moisture in the soil, however, helped the rabi sowings considerably. The condition of the wheat crop is reported to be fairly satisfactory, though some damage was caused by hail, frost and strong winds in several districts. Taking the province as a whole, the ontturn of this crop is e tim ated at 80 per cent. of the normal.

The following table gives the area and yield of the three most important crops in Sind, the Punjab and the United Provinces for the past two seasons, the figures being taken from the crop reports published by the Directors of Agriculture for those provinces.

TABLE No. 19.

Wheat.-As in the previous year, there was a total absence of demand for Indian wheat, internal consumption having kept its prices at a level well above world prices. Not a ton was exported to Europe, which itself harvested a record crop during the year under report, the smail quantity ( 739 tons) shown as exported having gone mainly to Arabia and Ceylon. The local prices of white wheat opened at Rs. 3-9 per maund on the 4th April and rose to Rs. 3-9-6 on the 11th of that month, which was the highest quotation of the year. They, however, dropped to Rs. 3-6-6 and Rs. 2-13-3 in the 3rd and 4th weeks of April, respectively. They rallied somewhat during the next three months, Rs. 3-2-9 being touched in May and June and Rs. 3-7 in July. A downward tendency again followed, Rs. 3-3 being queted in the beginning of August, Rs. 2-13-6 in the beginning of September and Rs. 2-8-6 in the middle of October. The succeeding four months witnessed a partial recovery but the prices came down to Re. 2-7-6 on the 27th March, which was the lowest quotation of the year.

Wheat Fbour.-The continued decline in exports of wheat flour is the natural result of the conditions which affected the wheat trade, the requirementa of most of the consuming centres having been largely met by supplies from Australia. Of the total quatity exported, viz., 6,180 tons, the principal amounts went to Arabia ( 2,868 tons), Aden ( 2,255 tons), Bahrein Islands ( 229 tons), Anglo-Egyptian Sudan (218 tons), Ceylon (213 tons) and Italian East Afrioa ( 204 tons).

Barley.-There was almost a complete cessation of exports of Indian barley, a good internal demand having kept its prices much above export parity during the year under report.

Other Food-Grains.-Though the total quantity of gram ( 25,008 tons) exported during the year was less by 425 tons than that in the previous year, the figures were higher than any of the seven years previous to 1932-33. France took the most, viz., 18,216 tons ( $+1,385$ tons) and Germany, which made no purchases last year, took 4,764 tons. France, however, eeased to be a buyer during the last quarter of the year owing to the imposition of a heavy Customs duty on gram in that country. The United Kingdom, on the other hand, reduced its purchases from 6,651 tons to only 397 tons. Shipments of rice decreased as the result of reduced orders for boiled rice from Arabia, Bahrein Islands and Aden which, it is reported, drew a good deal of their requirements direct from Rangoon, Rangoon rice being cheaper than Sind rice.
15. Class II.-Raw materials and Produce and Articles mainly unmanufactured.

Cotton.-A larger crop both in Sind and the Punjab and favourable parities of Indian cotton as compared to cotton produced by other countries resulted in increased takings by almost all the principal countries during the year under report. The total quantity exported, viz., 200,404 tons was 56 per cent. in excess of the shipments in the previous year and was the second highest on record, the record total being 205, 150 tons in 1929-30. Japan, despite its boycott on Indian cotton for a considerable portion of the year, was the largest purchaser with a share of 48,979 tons or 24 per cent., of which no less than 31,491 tons were taken during the last quarter of the year. There was also a notable expansion in the off-take of Indian cotton by the United Kingdom, which nearly doubled its purchases and came second with a share of 19 per cent. of the total exports as against 15 per cent. last year, and Germany, Italy and China were the other important countries which sent much larger orders. The increase in coastwise exports occurred mainly in despatches to Bombay, Madras and Pondicherry. TABLE No. 21. Wool.

The increase of 50 per cent. in the value of exports of Indian wool followed a decrease of 58 per cent. in the previous year. Both the United Kingdom and the United States of America took larger quantities. A rise in prices in the Liverpool market in the latter half of the year attracted shipments to the United Kingdom, while the improvement in the demand from the United States of America was due to a shortage in the lower styles of colonial wools and the comparative cheapness of East Indian m wool.

## Foreign Exports:

Raw Thabs. - Theugh the expert trade in waw hides experienced a better year than its immediate two predecessers, shipments were still beloxv the average. All the countries took larger ginantities, but the inicrease was more marked in shipments of cow hides to Genmany, buffalo and cow hides to Grece and buffolo call skins to the United States of Amexica.

Raw Skins.-There was also a brisk demand fer raw skins, particularly for goat skins by the United States of America and to a desser extent for sheep skins by Itoiky and Germany.

- Mirceldandous-Reduced erters for bones oy Belginm and Germany brought about a fall of Ris. 8.48 laliths in the value of bones and bonemeal
 lakchs to Rs. $1-49$ lakhs, mainly in despatches of chasam or waste silk to the United Kingdom and Kitaly. Shipments of chromite (chiome iron one), a preGuct of Baluchistan, rose by Rs. 1.75 inklis to Rs. 3.50 ialds, the principal purchasers being Norway (Ris. 2.25 lakhsh) and the United Kingaom (Rs. 1.23 idatelisy).

## 16. Claśs PIL.-Articles Wholly or Inainly Mitautactured.

LeATher.--ixports of leather, the most imporitont miticle in ,this class, rese by Rs. 80,000 te Rs. $2 \cdot 98$ lakidis, of which Ris. l-24 lakhs representedt the value ef dressed sheep skins sent to the United Kingdom, Gormany and Japan.

States of America ( + Rs. 10.33 lakhs) and the United Kingdom ( + Rs. $1 \cdot 10$ lakhs). The reasons given in paragraph 15 for the increase in exports of Indian wool are applicable in the case of foreign wool also. The decrease under woollen manufac-
 America, though European Turkey pian carpets, occed more. Reduced takings of rubber tyres and tubes by Iraq and Persia mainky accounted for the fall in exports of rubber manufactures. Raw skins went wholly to the United Kingdom, while sugar was purchased mostly by Arabia (Rs. $3 \cdot 30$ lakhs) and the Bahrein Islands (Rs. $1 \cdot 06$ lakhs). Foreign cotton re-exported was Persian cotton despatched to Germany ( 238 tons) and Japan ( 132 tons). The contraction of Rs. 1.89 lakhs in the value of fruits and vegetables was most noticeable in shipments of dried fruits to the United States of America.

## Imports.

Indian Merceandise.-Cotton yarn and piece-goods and cigarettes were imported mainly from Bombay, coal, iron and steel and gunny bags from Bengal, mineral oils and timber from Burma, copra from Travancore and Madras, spices from Travancore, Madras and Bombay, groundnuts from Kathiawar, fruits and vegetables from Kathiswar, Madras and Bombsy and matches from Bombay and Burma.

Foreign Merchandise.-Imports of cotton yarn and picce-goods, cigarettes, motor cars and lorries were mostly from Bombay.

## Exports.

Indian Produce and Manufactures.-Jowari and Bajra, rice and seeds were exported largely to Cutch and Kathiawar, gram to Madras, pulse to Madras, Cutch and Kathiawar, wheat to Bombay ( 68,985 tons), Calcutta ( 36,224 tons), Burma ( 5,072 tons) and Madras ( 2,908 tons), wheat flour to Madras, Bombay, Bengal and Burma, kerosene oil to Kathiawar, sall to Bengal, cotton to Bombay ( 9,611 tons), Madras ( 4,946 tons), Pondicherry ( 1,902 tons) and Bengal (724 tons), fish to Burma and fodder to Bombay, Cutch, Kathiawar, Madras and Goa.

Foreign Merchandise.--Carriages and carts went mainly to Bombay, dried fruits to Bombay and Bengal, sugar to Baluchistan and cotton piecegoods to Bombay and Baluchistan.

## Subordinate Ports.

22. Keti Bandar, Sirganda and Shahbandar*-The total value of the entire trade with these three ports, which is confined to the coasting trade, declined from Rs. 6.69 lakhs to Rs. 4.80 lakhs, to which Keti Bandar contributed 67 per cent., Sirganda 19 per cent. and Shahbandar 14 per cent. Rice is the chief article of trade. Keti-Bandar exported 887 tons of rice to Cutch and 25 tons to Karachi, and Sirganda and Shahbandar respectively sent 1,079 tons and 680 tons to Cutch. Keti-Bandar also exported firewood worth Rs. 45,033 to Kathiawar, Rs. 21,049 to Cutch and Rs. 1,061 to Karachi, while Shahbandar sent Rs. 988 worth to Kathiawar and Rs. 174 worth to Cutch.
Miscollaneous.
TABLE No. 29.
23. Shipping.-Table ahowing particulars of vessels entering and clearing from the ports of the Province of Sind.

TABLE No. 30.
Table showing the number of vessels, other than country craft, of each nationality that entered the port of Karachi.

Shpring.-The average tonnage per steamer rose from 2,833 tons to 2,862 tons. The sailing vessels engaged in the foreign trade were country craft trading with the ports in the Persian Gulf, Somaliland Protectorate, Zanzibar, Kenya Colony and Madagascar.

Frefght.-The rate to the United Kingdom on a wheat basis (i.e. per 18 cwt.) opened at 22 s. in April, and after a relapse in the next week rose to $23 s .6 \mathrm{~d}$. in the third week of that month. It , however, fell sharply to 19 s . soon after. The succeeding four months witnessed an upward tendency, the highest quotations touched being 24s. in May, 25s. in June, 26s. in July and $24 s$. in August. The rate ruled between $23 s$. and $20 s .6 d$. during September to November and between $24 s$. and $22 s$. during December to February. The average rate for March was 21s. The rates for rapeseed were $1 s$. below those for wheat.

## Tiraffic by Air.

24. There were five regular weekly services running to and from England, France, Holland, Dutch East Indies and French Indo-China and intorvening countries. During the year the Indian Trans-Continental Airways started operations, and, in conjunction with the Imperial Airways, extended the London-Karachi service in the first instance to Calcutta and then to Rangoon and finally to Singapore. 332 aeroplanes called at Karachi Air Port in 193334 as against 284 in 1932-33, an increase of 18 per cent. The chief feature of the year was the increasing number of private flights to and across India by persons of different nationalities, i.e.. British, Portuguese, French, Dutch, Australian, Finn, Chinese, Italian and German.

## TABLE OF CONZENTS.

## GENERAL SUMMARY.

1. It is gratifying to record that, during the year 1934-35, the Province of Sind made some headway towards trade recovery, despite the prevailing world-wide depression, which, however, showed signs of gradually abating. The value of the entire maritime trade amounted to $\mathbf{~} \mathbf{7} .49$ crores, an increase of Rs. 7 crores, or 17 per cent., as compared with 1933-34, both imports and exports, foreign as well as coastwise, individually participating in the improvement. This figure also compares favourably with the total values recorded in the two years previous to 1933-34, the increase over 1932-33 being. 11 per cent. and that over 1931-32 being 1 per cent. It must, however, be stated that the year's record, though satisfactory, remains far behind the average of tho pre-depression years, and even offers a poor comparison with 1930-31, when the total value stood at Rs .58 crores. There is therefore still much leeway to be made up. The continued uncertainty of international trading, resulting from an excessively nationalistic mentality amongst the nations, tariff barriers and the chaotic monetary conditions of many countries, coupled with the present slump in prices of the primary products of the Province, romain the chief hindrances to a roturn to normal eonditions, but such increases aa have occurred indicate that the year under roview, taken as a whole, was one of definite progress, and that the Province is slowly emerging from the lowest depths of the long depression.

Foreign imports (vide Table 1) advanced by Rs. 2,34 lakhs, or 17 per cent. Cotton piece-goods, the leading article, had the largest share, viz, Rs. ],35 lakhs, the major portion of the balance being accounted for by woollen piece-goods, artificial silk, silk manufactures, iron and steel, copper, motor cars, motor lorries, hardware, instruments, dyes and colours, peper and pasteboard, cycles and parts, provisions, glassware, chemicals and drugs and rubber manufactures. Machinery, sugar, arms and ammunition and soap were, on the other hand, adversely affected. Foreign exports were up by Rs, 2,17 lakhs, or 15 per cent., a record shipment of cotton being the outstanding feature of the trade during the year. The value of this commodity representing 76 per cent. of the total value of the export trade of the Provinco appreciated by no less than Rs. 2,94 lakhs. Minor increases also occurred under barley, wheat, other sorts of pulse and rice, but greatly restricted markets for rapeseod, wool, raw hides and skins, gram and woollen carpets deprived the port of a good deal of the advantage gained.

The Ottawa preferences continued to help the trade with the United Kingdom.
Coasting imports inoreased from Re. 8,08 lakhs to Rs. 8,60 lakhe, and coasting exports from Rs. 5,84 lakhs to Rs. 7,88 lakhs, assisted to a great extent by a large demand for cotton by the Indinn mills and the low coastal freights that prevailed during a considerable portion of the year. The new Salt Industry of Karachi made further remarkable progress, shipments to Calcutta having expauded from 34,517 tons to 83,311 tons, or by 141 fer cent.

The gross collections of Customs duty increased from Rs. 4,85 lakhs in 1933-34 to R.s. 5,38 lakhs in 1934-35.

Britich Empire.-The valio of the total trade of the Province of Sind with the United Kingdom amouuted to Rs. 11,94 lakhs as against Rs. 10,05
lakhs in 1933-34, showing an increase of Rs. 1,89 lakhs to which imports contributed Rs. 150 lakhs and oxports Rs. 39 lakhs. Of the total increase of Rs. 1,50 lakhs recorded on the import side, cotton piece-goods claimed the bulk, viz., Rs. 1,11 lakhs, and most of the remainder was shared by woollen piece-goods, yarn and knitting wool, pneumatic motor covers, sowing machines, iron and steel, cycles and parts, motor cars, old nowspapers and copper sheets. Sugar machinery and beet sugar, on the other hand, suffered a decrease. The improvement on the export side was largely the result of increased purchases of cotton ( + Rs. 44 lakhs). Notable increases also occurred under barley, gram, wheat and pulse, but shipments of wool and rapeseed were adversely afiected, the former to the extent of Rs. 28 lakhs and the latter Rs. 7 lakhs. The percentage share of the United Kingdom in the total value of imports advanced from 50.30 to 52.58 per cent., but that under exports receded from 24.80 to 23.87 per cent. Among other countrics in the British Empire, Ceylon sent copra seed worth Rs. 6 lakhs (-Rs. 3 lakhs) and coconut oil worth Rs. 3 lakhs ( + Rs. 2 lakhs), while the value of tea supplied dwindled further to Rs. 17,000 . Dry salted fish and food-grains wore the principal articles purchased by Ceylon, the value of the former being Rs. 8 lakhs ( - Rs. 47,000 ) and that of the latter Rs. 5 lakhs ( + Rs. 2 lakhs). The value of imports from Canada practically retained the last year's level, motor cars, motor lorries and pneumatic motor covers being the chief articles reccived. Imports from the Union of South Africa at IRs. 4 lalkhs maintained the former position, Natal coal being the only article of trade, but those frem British Borneo, sololy of fuel oil, dropaed from Rs. 6 laklis to Rs. 2 lakks. The import trade with the Straits Selllements recorded a furthor advance of Rs. 1 lakh, notably in receipts of unwrought tin.

Europe.-An adverso trade balance was the noticeable feature of the transanctions with Germany, imports having exceeded exports by Rs. 22 lakhs. On the import side, the increase of Rs. 22 lakhs was most noticeable in arrivals of iron and steel, coal tar dyes, sugar machinery, sowing and knitting machinos and parts, metal lamps and electrical machinery, while the big drop of Rs. 76 lakhs on the export side was largely the result of greatly reducod ordors for cotton (- Rs. 60 lakles), a contraction having also occurred under rapeseed, gram and raw hides. Germany's quota of the impurt trade rose from 7.97 to 8.23 per cent., but that of the export trade dropped from 12.65 to 6.32 per cent. The value of inports from Italy appreciated by Rs. 4 lakhs, but that of exports thereto decreased by Rs. 3 lakhs. Larger receipts of woollen blankets and rugs, cotton and artificial silk piece-goods and coloured cotton picce-goods partly offeet by smaller supplies of woollen piece-goods mostly accounted for the improvement noder imports, while a reduction in the demand for rapeseed was mainly responsible for the fall under exports. Tho quantity of cotton purchased by Italy was the sume as in the previous year, butits value ineroased by Rs. 1 lakh. Imports from France fell from Ris. 35 lakhs to Rs. 23 lakhs: the result of very much smaller receipts of woollen piece-goods. Heavy shipments of cotton, on the other hand, caused an increase of Rs. 7 lakhs under exports, despite a considerable decline under gram and rapeseed. Imports from Belyiuin were valued at Rs. 28 lakhs, a decrease of Res. 18 lakhs, which occurred in receipts of sugar machinery, though iron and steel, the chiof artiele of imports, came in larger quantities. The export trade with Belgium expanded by lia. 25 lakhs,
almost wholly under cotton, the percentage share rising from 3 to 4 per cent., in consequence. The trade with the Netherlands suffered a set-back under both inports (- Rs. 5 lakhs) and exports (- Rs. 17 lakhs), sugar machinery being responsible for the former and cotton and rapeseed for the latter: Kerosene oil was again practically the only article imported from Russia, and its value increased from Rs. 34.94 lakhs to Rs. $36 \cdot 68$ lakbs. Among other foreign countries in Europe, Spain took less cotton, Czechoslovakia secured larger orders for iron and steel, but fewer orders for sugar machinery, Roumania curtailed its supplies of mineral oils and Poland, which sent no beet sugar last year, supplied Rs. 3 lakhs worth this year, and purchased more cotton.

Asia.-The trade with Japan made phenomenal strides during the year under report. The total value of imports therefrom advanced by Rs. 70 lakhs or 57 per cent. as compared with the previous year, and was the highest yet recorded, the expansion being most marked under yarn and knitting wool ( + Rs. 23 lakhs), woollen piece-goods ( + Rs. 15 lakhs), cotton piece-goods ( + Rs. 13 lakhs) and artificial silk piece-goods ( + Rs. 7 lakhs). Exports to Japan expanded by no less than Rs. 2, 77 lakhs or 108 per cent. to Rs. 5,34 lakhs. Cotton was, as usual, the only important article exported, and the total quantity shipped, viz., 99,525 tons established a record. As a sequel to the increases enumerated above, Japan improved her percentage share of imports from 9.58 to 12.75 per cent., maintaining the second place, while a big jump from 18.09 to 32.65 per cont. enabled her to secure the first place on the export side, displacing the United Kingdom for the first time in the history of the port. Lower prices of sugar ruling during the year caused a decline of Re. 5 lakhs in the value of imports from Java, though the quantity supplied actually increased somewhat. As regards other Asiatio countries, the increase of Rs. 6 lakhs in imports from Persa oecurred in receipts of fuel oil, and the falling off of Rs. 34 lakhs in exports to China was due to a considerable reduction in the demand for cotton.

America.-Imports from America at Rs. 74 lakhs showed a recovery of Rs. 6 lakhs. Arrivals of copper sheets, motor lorries and parts of mechanically propelled vehicles showed an improvement, but those of lubricating oil, pneumatic motor covers and cotton fents suffered a set-back. On the export side, reduced takings of raw goat skins and wool were partly counterbalanced by an increase in shipments of cotton, the net result being a decrease of Rs. 26 lashs, which followed an increase of Re. 48 lakhs in the previous year. America's share of the import trade was reduced from 5.24 to 4.83 per cent., and that of the export trade from $6 \cdot 95$ to 4.46 per cent.

[^14]Foreign Imports. (Liquors.)
to Rs. 13 at the end of September. They remained steady at that figure up to the middle of January, hat the fourth week of that month recorded a further drop to Rs, 12-14-0, which was the lowest quotation of the year. A slight appreciation was in evidence during February and the first three weeks of March, but the prices were foread back to Rs. 12-14-0, the closing price on 26th March.

Ale, Beer and Porter.-The increase occurred in receipts of both bulk and bottled beer from tho United Kingdom and of bottled beer from the Netherlands. Japan's supply, consisting solely of bottled beer, was, on the othes hand, reduced from 68,468 to 29,752 gallons.

Spirits.-Imports of brandy amounting to 20,515 gallons did not show any marked variation, France being, as usual, the chief supplier. Arrivals of whisky, mainly from the United Kingdom, rocorded a decrease of 4,797 gallons, which followed an increase of 5,128 gallons in the previous year. The denatured spirit shown as imported was rectified spirit from Java donaturod at the Custom house on arrival. Imports of this spirit were reduced to a further low level of 18,530 gallons. As explained in
the last year's report, increased production of spirit in India and the imposition of heavy vend fees on methylated spirit are bringing about a gradual restriction in foreign imports.

Wines.-Imports of wines suffered a set-back, mainly in receipts of vernouth from France and Italy.

Tobacco.--Imports of tobacco, consisting mainly of cigarettes from the United Kingdom, continued to fail off, the total receipts being reduced to $40,426 \mathrm{lbs}$. valued at Rs. $1 \cdot 48$ lakhs from the already low level of $81,743 \mathrm{lbs}$. valued at Rs. $2: 31$ lakhs reached last year. It is reported that most of the upcountry requirements are now met from stocks held in Bombay, imports at this port being largely intended for local consumption and for despatch to Persia and Afghanistan.

Fruits and Vegetables.-The total value of imports uxder this head improved by Rs. 3.47 lakhs to Rs. 17.45 lakhs, dates and potatoes forming the bulk of the imports. Datës came from the gulf ports, and their total quantity increased from 14,531 tons to 20,897 tons and their value from Rs. $9 \cdot 40$ lakis to Rs. $13 \cdot 25$ lakhs. It is reported that a drastic eut in the rates of steamer freights owing to severe competition among the shipping companies attracted larger quantities this year. The value of potatoes, almost wholly from Italy, declined from Rs. 4.32 lakhs to Rs. 3.51 lakhs.

Provisions.-Imports of provisions were valued at Rs. $32 \cdot 51$ lakhs, an increase of Rs. $1 \cdot 57$ lalfhs as compared with the previous yoar. The United Kingdom was, as usual, the main supplier with a share of Rs. $22 \cdot 95$ lakhs as against Rs. $22 \cdot 13$ lakhs in 1933-34. The variations in the quantities of some of the principal descriptions of provisions aro shown in the following statement:-

Tea.- Imports of black tea, mostly from Ceylon, which last year diwindled to 102,754 lbs vahted at Rs. 50,000 from 412,942 lbs. valued at lRs. $2 \cdot 14$ lakhs in 1932-33 were reduced to negligible proportions during the year under report, the quantity received being only 28,400 lbs. and its value Rs. 19,000 . Ceylon tea on account its higher prices could not compete with Indian tea. Arrivals of green tea, on the other hand, showed a considerable expansion, the figures recorded, viz., $865,120 \mathrm{lbs}$. and Rs. $4: 20$ lakks being more than double, of those in the previous year. The incrense was most marked in receipts from Japan, which sent $710,107 \mathrm{lbs}$. $(+3 \cdot 10,450 \mathrm{lbs}$.), and is ascribed to the opening at this port of a new firm. which formerly supplied the requiremants of the Punjab and other upcountry markets through Bombay. Imports from China also increased from 18,193 lbs. to 155,007 lbs.

Minerall Oils.-The total imports of kerosene oil, both foreign and coastwise, adoanced by 9 ger cent. in quantity and It per cent. in value. The increase is explained by the fact that certain guadities of fuel oil, which, on account of their cheapness, were used as an illuminant in wick lamps, haye now to payt the same rate of duty as kerosene oil and cannot therefore compete. limperts of petrol, which last year remained greatily depressed, showed \& substantial recevery, che to increased conewmption, particularly in the willages, where motor traffic is-ever on the increase owing to facilities afforded by the construction of better feads. Fuel ail also came: in larger quantities. Persia sent mofe, 'but supplies from British Bornee were greathy curtailed. Eatge stocks remaining unsold! from imports in the previous year caused a deeline in meceipts of hubricationg oil.

Coat,-Coal is imponted here mannly for bunkering purposes. During the year under report 26,925 tons of foreign coal valued at liks. $3: 96$ liakhs were imported as against 25,643 tens valued at 7 ll . $3: 82$ lakhs in 1933-34, Natal being the chief souree of supply. Bengal coal was received in much lamger angatities, imports.at $70,11.7$ tons valued at Rs. 10.03 lafills, showing an excess of 30,718 tons and !Rs. 1.66 lakhs over these in-the previous year.

## 9. Class M. M .Articles Wholly or Mainly Manufactured.

Cotton Harufactures-The impert business in cotton piece-goeds, which laist year remained greatly tepressed, owing to large surphus stocks having memained unsold from imports in $7932-33$, showed a sulbstantial secowery of蛙 per cent. in volume and 48 per cent in value the old stocks having gra, dually movedinto consumption. . British strpplies increased by 54 per cent. in yardage and b1 per cent. in value, and those from Japan, which liad to be kept. Within the guota laid down by the Iodo-Japanese Trade Agreement; improved by 9 per cent. in yasdage and 24 per ecnt. in walue as compared ivith the previous year. The Whited Kingdom's guota of the total value of imports advanced inom 77 to 80 per cent., but that of Japan dropped from 20 to, 17 per cent. The following taible indicates the imports inte Karachi of grey, white and colouved piece-goods from foreign countrios.

Foreign Imports.

Grey Goods.-British grey goods increased in value from Rs. $5 \cdot 03$ lakhs to Rs. 5.70 lakhs, mainly in receipts of mulls, sales of which were considerably affected in the previous year. Bordered dhutis were imported in smaller quantities. The value of Japanese grey goods, consisting largely of shirtings, advanced by Rs. 2 lakhs to Rs. 22.79 lakhs, thie reduction in the rate of duty having given some stimulus to the trade.

White Goods.-The United Kingdom was, as usual, the largest supplier with a share of 87 per cent. in the total value amounting to Rs. 236.04 lakhs ( + Rs. 67.25 lakhs), mulls and longeloth and shirtings, the principal varieties showing a considerable expansion. Imports from Japan decreased in volume by $1 \frac{3}{4}$ million yards to $13 \frac{1}{2}$ million yards, but increased $\mathrm{in}_{1}$ value by Rs. I lakh to Rs. 22 lakhs owing to a better quality of the goods supplied. Longcloth and shirtings and mulls formed the bulk of the imports.

Coloured Goods.-Imports of coloured goods appreciated in value from Rs. 84.44 lakhs to Rs. $149 \cdot 43$ lakhs to which the United Kingdom contributed 81 per cent. as against 82 per cent. and Japan 17 per cent., the same as in the previous year. Among the principal descriptions supplied by the United Kingdom, printed shirtings showed the largest increase, the printers having cut down the prices of a particular quality to a great extent. Notable increases also occurred under printed and dyed cambrics, dyed Italian cloth and sateens and twills, printed drills and jeans and saris and scarves and woven coloured shirtings. The expansion in the supplies of coloured goods by Japan was most noticeable under printed drills and jeans, printed shirtings, woven coloured velvets and velveteens and dyed drills and jeans. That country secured a substantial portion of the business in printed goods by introducing a number of new designs in the market.

Woollea Goods.-Imports of yarn and knitting wool made very rapid strides during the year under report, the total value amounting to Rs. 38.89 lakhs showing an increase of no less than 222 per cent. over imports in 1933-34. The expansion was due to a brisk demand for yarn by the Punjab woollen mills for the manufacture of piece-goods and hosiery. Japan, whose incursion into the woollen goods trade is only of recent origin, had the largest share, viz., Rs. 28.89 lakhs as against Rs. 5.81 lakhs last year. That country has been sending out very cheap yarn and is likely to oust other countries in the course of time. Imports from the United Kingdom also advanced from Rs. 4.07 lakhs to Rs. 8.93 lakhs, the preferential rates of duty having helped her to compete favourably with other countries. Arrivals of woollen piece-goods decreased in yardage from $4 \frac{1}{2}$ million yards to $3 \frac{1}{2}$ million yards, but their value appreciated by Rs. 4.31 lakhs to Rs. 41.56 lakhs. Here again the intensity of Japanese competition was very striking, imports which last year stood at a low level of 373,000 yards valued at Rs. 3 lakhs having risen to as mach as $1 \frac{1}{2}$ million yards valued at Rs. 17.93 lakhs. The alternative minimum specific duty checked continental exports, which declined from Rs. 25.85 lakhs to Rs. 6.62 lakhs, but apparently failed to affect the cheap Japansse stuff to any great extent. The United Kingdom also greatly improved its position because of a demand for superior qualities, the total value of her supplies rising from Rs. 8.08 lakhs to Rs. 17 lakhs. The value of blankets, comprising mostly cheap rugs from Italy, amounted to Rs. 15.55 lakhs, showing a further advance of Rs. 308
lakhs, but in the pibsence of a coprespending increase in the sales, lange stocks are teft over for use in the coming year,

Silks--Tmports of silk were valued at Rs. 9.4 l laths, an increase of Ris. 72 fiakhs, which occurred mostly in reoejpts of yarn from the United Kingdom, Italy and Japan and goods of gill mered with other materials trom Japan and Germany.

Artificial silk.-Foltewing a heavy decline of Rs. 76.08 ladihs in the pre ${ }^{*}$ vious yeaf, impopits of artificiai silk pecovered by Ro. $8 \cdot 15$ laiths to Rs. $22 \cdot 40$ ladks, the bult of the inerease having occuryed in receipts from Japan, whese shate of the totall value was 71 per cent. Theso goods are becoming more and more popular whith the poerer classes on aceount of their cheappess, and are replacing cotton piece-goods to a certbian extent.

Iron and steel.--Imports of iron and steel, which had been continuously on the docline from 1929-30, showed some activity during the year under report, the total receipts amonnting to 59,122 tons valued at Rs. $89 \cdot 59$ lakhs showing an excess of 10,618 tons in quantity and Rs. $18 \cdot 24$ lakhs in value over imports in 1933-34. Both the United Kingdom and the Continent sent more. The imposition of higher protective duties on foreign material helped the United Kingdom, which sent 15,688 tons as against 13,656 tons in 193334, and maintained the second place. Belgium was again the largest supplier with a share of 17,254 tons as against 17,185 tons. Among other important continental countries, Germany supplied 9,607 tons ( $+4,153$ tons), Luxemburg 4,807 tons ( $+1,474$ tons), France 3,690 tons ( +831 tons) and Czechoslovakia 3,082 tons ( $+2,306$ tons). The increase in continental imports in spite of bigher import duties was partly ascribed to a reduction in the prices and partly to large speculative purchases made in the concluding months of the year in anticipation of a rise in the import duties from March 1935. Arrivals from Japan and the United States of America respectively decreased from 1,566 tous and 123 tons to 1,486 tons and 44 tons.

Other Metals.-A considerable expansion in imports of copper was the only noticeable fcature of the trade in other metals. No less than 57,052 cwt. of copper valued at Rs. 16.56 lakhs were received during the year against 28,006 cwt. valued at Rs. 831 lakhs in 1933-34. The bulk of the imports comprised sheets from the United Kingdom, 16,324 ewt. (+6,783 cwt.), United States of America, $17,748 \mathrm{cwt} .(+17,748 \mathrm{cwt}$.$) and Germany$ $14,810 \mathrm{owt} .(+846 \mathrm{cwt}$ ) . The increase was due to an abnormal demand from the Punjab, stimulated to a certain extent by a fall in import prices. The preferential rates of duty helped the United Kingdom in securing larger orders, and the devaluation of the dollar helped to bring in the American product.

Vehicles.-The import trade in motor cars showed a further development, a feature being a large import of light cars, whieh are becoming more popslar on account of lowez prices and general efficiency. The United Kingdom had the largest share in the supply of motor cars, viz., 82 per cent., the bulk of the imports of light cars being from that country. Supplies from Canada and America, generally comprising five seators, also recorded an increase. 232 cars were also received from Bombay, which sent 155 last year. The United States of America sent the largest number of lorries, viz., 281 (+209), the number of Canadian trucks being returned at $136(+2)$. A large number of these were intended for Persia and Afghanistan. A greater demand from upcountry accounted for the increase of Rs. 3.39 lakhs in imports of eycles and parts amounting to Rs. 18.81 lakhs, the United Kingdom's share being Rs. $14 \cdot 15$ lakhs ( + Rs. $2 \cdot 61$ lakhs) and that of Japan Rs. $2 \cdot 76$ lakhs ( + Rs. 7,000 ).

Other Articles.-The total value of apparel decreased by Rs. 74,000 to Rs. 11.07 lakhs, chiefly in receipts of hats, caps and hatter's ware from Germany and Japan. The value of boots and shoes amounted to Rs. I•46 lakhs, showing a contraction of Rs. 43,000 under rubber soled boots and shoes from Japan. Imports of dyes and colours were valued at Rs. 27.95 lakhs, an increase of Rs. $5 \times 20$ lalkhs, which was most noticeable in receipts of alizarine and other coal tar dyes from Germany, intended mostly for the upcountry woollen mills. Imports of glassware and earthenvare appreciated by Rs. $\mathbf{1}^{\bullet 9}$ lakhs to Rs. $18 \cdot 38$ lakhs due to larger supplies of sheet and plate glass by Japan and bottles and phials by Sweden. Increased arrivals of packing paper from Sweden and of old newspapers from the United Kingdom brought about a recovery of Rs. 3.94 lakhs in the total value of paper, pasteboard and stationery, imports of which suffered a set-back to the extent of Rs. $4 \cdot 42$ lakhs in the previous year. Imports of rubber manufactures advanced from Rs. $38 \cdot 50$ lakhs to Rs. 39.78 lakhs. Arrivals of peeumatic motor covers representing about 66 per cent. of the aggregate value under this head showed a small decrease of Rs. 9,000 in the total value amounting to Rs. $25 \cdot 73$ lakhs, but their geographical distribution indicated notable changes. The United Kingdom, which last year greatly improved her position under the stimulus of the preferential treatment, was again able to enlarge her supplies of pneumatic motor covers from Rs. 1445 lakhs to Rs. $20^{\prime 2}$ lakhs, while important decreases were recorded in the case of other sources of supply, particularly the United States of America (-Rs. $2 \cdot 48$ lakhs) and Japan (-Rss. 2.24 lakhs). Imports of cement dropped from 7,108 tons to 2,913 tons in quantity and from Rs. 1.83 lakhs to Rs. 1.08 lakhs in value, Japan, which has in recent years entered into competition with Indian cement, having curtailed its supplies from 6,424 tons to 2,195 tons.
10. Class V.-Postal artieles not specified.-Figures for gold and silver thread, cinematograph films, jewellery, precious stones and cigarettes ioported by post are included under their relative heads in the general imports. The value of other articles imported by post increased by Rs. $11 \cdot 30$ lakhs to Rs. $36 \cdot 58$ lakhs to which the United Kingdom contributed Rs. $32 \cdot 23$ lakhs. The number of parcels dealt with was 84,671 as against 84,174 in the previous year. In addition, 63,237 letter packets were assessed to duty as against 64,955 . The total amount of import duty realised on all articles imported by parcel post rose from Rs. 9.70 lakhs to Res. $10 \cdot 71$ lakhs and that on articles contained in letter packets from Rs. $1-13$ lakhs to Rs. $1 \cdot 52$ lakhs.

## Exports.

## Indian Produce and Manufactures.

11. Agricultural Conditions.-As the bulk of the export trade of the port consists of agricultural produce, a brief review of the weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces is given below.

Sind.-According to the information supplied by the Chief Engineer in Sind, the Lloyd Barrage and the new canals worked satisfactorily during the year undor report. Approximately $1,57 \ddagger, 000$ acres were brought under kharif eultivation in the barrage zone, of which 600,000 acres were under cotton, the corresponding figures for the previous year being respectively $1,569,739$ and 567,388 acres. Conditions in the non-barrage zone were, however, not satisfactory. The river was late in rising, and it fell in September, when water is mostly needed for bringing the crops to maturity. In consequence, a large shrinkage is likely to occur in the cultivated area under kharif on the inundation canals. Taken as a whole, the outturn of the cotton crop is estimated to fall between 65 to 85 per cent. of the normal, and is expected to show an increase of 46 per cent. over the corresponding estimate of last year. As regards the rabi season, the area sown with wheat in the British districts has registered a decline owing to deficiency of water supply in the Upper Sind Frontier district, unfavourable inundation in the non-barrage areas and absence of floods for bosi cultivation. The cold wave in January had an adverse effect on the non-irrigated wheat crop, and the recent hail-storm is reported to have done some damage to it, both in the field and in the threshing yard in Thar Parkar district. The outturn is estimated at 43 per cent. of the normal in Karachi district and between 65 to 85 per cent. of the normal in the remaining districts.

In the Punjab, the area under hharif sowings was somewhat ourtailed - owing to insufficient rains and inadequate irrigation supplies on many canals -at sowing time. The rainfall in July and August proved beneficial to the standing crops, but deficient rains in the subsequent three months adversely affected the yield. The outturn of the cotton crop is estimated to be about 12 per cent. higher than the final estimate of last year. The rabi sowings were also carried out under unfavourable conditions on account of absence of rain and insufficiency of moisture in the soil. The winter rains, however, proved beneficial to the crops. The yield of the wheat crop is expected to be normal to above normal on irrigated and generally normal on unirrigated areas.

In the United Provinces, timely and sufficient rains in June greatly helped the kharif sowings, but excessive rains in August and Scptember and a scanty fall in October adversoly affected the yield. The outturn of the cotton crop is estimated at 70 per cent. of the normal, and is expected to be about 27 per cent. less than the corresponding estimate of the previous year. Absence of rain and insufficiency of moisture in the soil at sowing time retarded the rabi sowings, and the crops sufferred from frost, cold and hail-storms in certain places. The outturn of the wheat crop is estimated at 83 per cent. of the normal.

The following table gives the area and yield of the three most important erope in Sind, the Punjab and the United Provinces for the past two seasons, the figures being taken from the crop reports published by the Directors of Agriculture for those provinces.

## Foreign Rxports.

(Food-grains.)
Wheat.-A considerable rise in world prices due to the damago done by drought to the American wheat crop and to unfavourable weather conditions in Europe brought Indian wheat within oasy reach of the compotitive basis of other grades for a short period during the year under report, when business to the extent of 8,587 tons was done with the Unitod Kingdom. The Indian prices subsequently went out of export parity, and no further business was possible. The local price of white whoat ruled at Rs. 2-5-3 per cwt. on 3rd April, which was the lowest quotation of the year. A gradual upward movement, however, soon followed, Rs. $2-8-6$, Rs. 2-9-6 and Rs. 2-10-6 being quoted at the end of April, May and June, respectively. July witnessed an easier feeling, the prices declining to Rs. 2-8-9 on the 10th and to Rs. 2-7-9 on the 3Ist of that month. The market once again adopted a much firmer tone, and the prices rose sharply from Rs. 2-10.6 in the first week of August to Rs. 2-12-0 towatds the middle of that month. This level was, however, not long maintained, and a gradual downward course lowered the prices to Rs. 2-7-3 on the 25th September. The subsequent few weeks noticed minor fluctuations, but a strong upward trend from the third week of November carried the prices to Rs. 2-11-3 at the end of that month, to Rs. 2-13-6 in the beginning of December, to Rs. 2-13-9 in the first week of January and to Rs. 3-1-6 on the 22nd January, which latter was the highest quotation of the year. A weakening set in during the next two months, and the closing price on the 26th March was Rs. 2-10-9.

Wheat Flowr.-A reduction in the demand from Aden chicfly accounted for the decline in shipments of wheat flour.

Barley. -The increase in shipments of barley was due to crop failures in America and certain other countries, which led to an enquiry for Indian barky from the United Kingdom, almost the entire quantity exported during the year being purchased by that country.

Other Food-Grains. -The decrease under gram is explained by the fact that France, which took 18,216 tons valued at Rs. $15 \cdot 21$ lakhs in the first nine months of the previous year, entirely ceased to be a buyer during the year under report. As stated in the last year's report, the imposition of a heavy import duty on gram in that country has successfully prevented any business being done since the last quarter of $1933-34$. The United Kingdom increased its purchases from 397 tons to 11,499 tons, and the Netherlands, which made no purchases last year, took 4,111 tons. The increase in exports of rice was due mainly to a better demand for boiled rice from Arabia.

Foreign Exports.

Cotton.-Shipments amounting to 250,148 tons have surpassed all previous records, and show an excess of nearly 45,000 tons over the previous record total of 205,150 tons reached in $1929-30$ and of 49,744 tons over exporte in 1933-34. Both Japan and the United Kingdom took record quantities. The main factor contributing to the improvement in the position was the relatively low parity for Indian cotton, which greatly stimulated exports. The increase in shipments to Japan was also partly the result of the Indo-Japanese Trade Agreement, and that in the case of the United Kingdom indicates the extent to which efforts are now being made in that country to encourage the Lancashire mills to use more Indian cotton. in shipments to Germany was due to the import restrictions introduced in that country on account of financial difficulties.

The demand for wool was greatly curtailed owing to large surplus stocks left over from the heavy shipments made last year under the stimulus of rising prices. Moreover, the almost continuous decline in Liverpool prices during a greater portion of the year under report created a feeling of uncertainty among the Indian shippers and prevented business being done to a larger extent.

Raze Rides.-Txperits of hides decreased oy 179 tons in quantity and Rs. k .8C lakks in value. The decrease was more martikel in ${ }_{4}^{c}$ shipments to Germany, whese purchases were severely curtaided owing, to difficulties of finance.

Raw Shins.-The derrease under this bead followed an increase in the previous year, and was due to a lack of đemand for goat skins frem the Onited States of Amepica, whose tannens already beld large stocks. Low prices offened during the year also restricted business to a great extent.

Misceltaneous.-The valhe of experits of bones iand bonemeal increased by Ms. $1 \cdot 43$ ladehs to Res. $11 \cdot 42$ lakhs, to which tones conbributed Rs. 8.11 lakhs and bonemeal Rs. 3.3a. lakitis: Bones were dangely purchased by Belgium (Ris. $5: 47$ lakdis), Gemmany (Rs. I'41 lakes) and Trance (Rs. 1.02 lalkhil, and bonomeall went largely to the Tnited Kingdom䍚is. 1.96 lakhsy and Ceylon (Rs. स ladik). IExperts of raw sitk, which last year stood at Rs. $1 \cdot 49$ ladchs, fell to Rs, 0.64 lakbs, ewing to reduced talkings of chasam or waste silk by the United Kingdem and Italy. The value of exports of charonite (chaeme inen ore), a product of Baluclistap, amounted to Rs. 3.23 lalikh as agaiast Res. 3:50. Takhs, Norway talking the most, viz., Rus. 2.61 takhs.

## 

Leathes:- Bxports of leatior, the most important article in this class; declined slightly from Rs. 298 lakhs to Rs. $2 \cdot 30$ lakhs, of which Rs. F 33 lakhs represented the value of dressed sheep) skins to the Dnited Kingdom, Germany and Japan, and Rs. 0:89 lakds, the voilue of tanned goat skins, mostily to the United Kingdem.

The decrease in exports of foreign wool, mostly Kandahar wool, was due to reduced shipments to the United Kingdom and the United States of America. The reasons given in paragraph 15 for the decline in exports of Indian wool are applicable in the case of foreign wool also. Exports of woollen manufactures, consisting chiefly of Persian carpets, again suffered a setback due to smaller takings by European Turkey and the United States of America. Raw skins re-exported largely comprized Persian lamb skins, the United Kingdom again being the sole purchaser. Sugar went to the Bahrein Islands (Rs. 2.85 lakhs) and Arabia (Rs. $1 \cdot 67$ lakhs), while purchases of fruits, mostly dried fruits, were made chiefly by Syria and the United States of America. The value of metals, mainly representing re-exports of iron and aluminium scraps to Japan, practically retained the last year's level at Rs. $3 \cdot 08$ lakhs.

TABLE No. 30.

- Shipping.-The average tonnage per ateamer rose from 2,862 tons to 2,864 tons. The sailing vessels engaged in the foreign trade were country' craft trading with the ports in the Persian Gulf, Zanzibar, Kenya colonyr Madagascar, Ceylon and Maldives.

Freight.-The rate to the United Kingdom on a wheat basis (i.e. per 18 cwt.), which opened at 21 s . on the 4 th April, retained that level until the second week of May, when it declined to 20 s . It remained firm at that figure up to the end of June, but in July it regained the level at which it atood in April, and continued to show an upward tendency during the next five months, the quotations ranging between 22 and $23 s$. Thereafter there was a relapse, $21 s$. being recorded at the end of December and about 20 s . in January. The concluding two months of the year witnessed an upward trend, the rate rising to 21s. in the first week and to $22 s$. in the second week of February, and to 23 s . during the greater portion of MarchThe rates for rapeseed were $1 s$. below those for wheat.

## Trafle by Air.

24. There were six regular weekly services tumning to and from England, France, Holland, Dutch East Indies and French Indo-Chins and intervening conntries. 422 aeroplanes called at Karachi Air Port in 1934-35 as against 332 in 1933-34, an incresse of 27 per cent. There was an increase in: the number of private flights to and across India by persons of different nationalities, i.e., British, Indian, French, Egyptian, Roumanian, Australian, Danish, American, German, Portuguese and Czechoslovakian: The chicf feature during the year was the bi-weekly gervice London-KarachiCalcutta by the Imperial Airways Ltd. in conjunction with Indian Tranecontinental Airways and the extension of London-Singapore service to " Australis

## GENERAL SUMMARY.

1. During the year 1935-36, the sea-borne trade of the Province of Sind, considered as a whole, continued to make a steady, if not spectacular, recovery, though the pace was much slower than in the preceding year, and the recovery did not embrace all branches of the trade. Trading conditions during the year continued to be difficult, and no striking improvement in the position could be expected in view of the manifold hindrances to international trade, such as bigh tariffs, quotas, exchange restrictions, etc., which have in recent times been so conspicuous a feature of the economic policies of nations. The Italo-Abyssinian war, which broke out in October, 1935, caused, particularly in its jnitial stages, a considerable amount of anxiety and uncertainty in the international political situation, which bad ite inevitable repercussions on international trade. It is, therefore, a matter of some satisfaction to be able to record that, in spite of such adverse conditions, the value of the entire trade of the Province increased by Rs. 1.88 crores, or 4 per cent., the share of the foreign trade in the total increase being Rs. 54 lakhs and that of the coasting trade Rs. 134 crores. The improvement in the foreign trade was, however, confined solely to the export side, imports having as a matter of fact suffered a set back. As outstanding event of the year of special importance to the import trade was the application by the Government of India at the instance of the League of Nations of financial and economic 'Sanctions' against Italy. Imports from Italy were prohibited from the 18th November, 1935, except of goods actually consigned before that date. It is difficult to gauge precisely the effect on trade of the extinction of Italian imports following 'Sanctions ' during the last quarter of the year, but on the assumption that the import trade with Italy during this period would have been on the same scale as in the corresponding period of last year, the loss in the import trade of this port may be roughly evaluated at about Rs. 5 lakhs. At the same time, partly as a result of the countor-embargo orgauised by Italy against imports from Sanctionist countriee and partly on account of her financial embarrassments, her purchases at this port during the coucluding three months of the year showed a reduction of about Rs. 34 lakhs as compared with the last quarter of 1934-35. The effect of the Ethiopian war was no less marked in other directions; it caused a spurt in the prices of most of the articles imported from the Continent in wholesale lots, and some extra buying was also done, inspired mostly by fears of a world war.

Foreign Imports (Vide Table 1) decreased by Rs. 81 lakhs or 5 per cent., the articles primarily responsible being cotton manufactures (-Rs. 50 lakhs) and woollenmanufactures (--Rs. 49 lakhs). Cautious buying of British goods in anticipation of a reduction in the rates of import duty was mainly responsible for the decreased turnover of cotton manufactures. The other articles adversely affected were sugar, artificial silk, soap, motor cars, motor lorries, chemicals and coal tar dyes. Imports of mineral oils and metals, on the other hand, showed a substantial improvement, and increases on a smaller scale also occurred under pneumatic motor covers, liquors, hardware, instruments, dates, glassware, provisions and cycles.

Foreign exports increased by Rs. 1.34 crores or 8 per cent., of which raw cotton, the leading article, claimed Rs. 83 lakhs. It is gratifying to note that shipments of this commodity at 255,416 tons ( $1,430,324$ bales) established a new record during the year under report. Raw wool was also in great demand, and its value appreciated by Rs. 59 lakhs. Notable jncreases were also recorded under raw hides and skins, dried fruits, wheat flour, bones and rice, but the trade in rapeseed, gram, other sorts of pulis, barley and wheat remained greatly depressed

Coasting imports advanced from Rs. 8,60 lakhs to Rs, 9,19 lakhs or by 7 per cent., owing mostly to increased movements of petrol, grey cotton piece-goods (Indian coloured cotton piece-goods (foreign), spices, matches and kerosene and lubricating oils.

Coasting exports increased from Rs. 7,88 lakhs to Rs. 8,64 lakhs, or by 10 per ceat., heavy shipments of cotton being partiy offset by reduced shipments of whent. The Salt Industry of Karachi made further progress, shipments to Calcutta at 93,475 tons showing an excess of 10,134 tons over exports last year.

The gross collections of Customs duty decreased from Rs. 5, 39 lakhs in 1934-35 to Rs. 5,01 lakhs in 1935-36.

Eritish Empire.- The total value of imports from the United Kingdom decreased by Rs. 88 lakhs to Rs. 7,14 lakhs, but that of exports thereto
increased by Rs. 93 lakhs to Ks. 4,85 lakhs, the nef result being an increaser of Rs. 5 lakhs in the total trade. The share of the United Kingdom in ther total import trade of the Province dropped from 52.58 to 48.84 per cent., while that of the export trade rose from 23.87 to 27.23 per cent. Ameng the imported articles, cotton piece-goods, forming 38 per cent. of the total imports, showed the largest decrease, viz., Rs. 58 lakhs, and woollen yarn and knitting wool, woollen piece-goods, soap, chemicals, sugar machinery;copper sheets, motor cars, sewing and knitting machines and old newspapers. were among the other principal articles adversely affected. Imports of prime-movers, iron and steel, pneumatic motor covers, beet sugar, provisions, electrical instruments and whisky, on the other hand, showed 'an' improvement. On the export side, raw cotton, the largest single item, representing 67 per cont. of the total exports to the United Kingdom, claimed the bulk of the incrqase, viz., Rs. 90 lakhs, and substantial inoreases were also recorded under wool and dried fruits, offiset partly by reduced shipments of rapesced, barley, gram, other sorts of pulse, wheat and woollen carpets. As regards trade with other countries in the British Empire, the total value (Rs. 20 lakhs) of imports-from Ceylon, consisting mainly of copra seed, Rs. 13 lakhs ( + R̨s. 6 lakhs), and coconunt oil, Rs. 7 lakhs ( + Rs. 4 lakhs) doubled itself, the percentage share rising from 0.66 to $1-40$ per cent., in consequence. Exports to Ceylon, amounting to Rs. 18 lakhs, contracted by Rs. 1 lakh, owing mainly to smaller takings of food-grains. Her purchases of dry salted fish maintained the previous year's level at Rs. 8 lakhs, while those of fish manure increased from Rs. l lakh to Rs. 2 lakhs. Imports from Canada contracted by Rs. 4 lakhs, motor cars, motor lorrics and. pneumatic motor covers being the principal articles responsible fos the decline. Imports from the Straits Settlements were valued at Rs. 6 lakhs, showing a further advance of Rs. 2 lakhs, notably in receipts of unwrought. tin, spices and copra sced. Fuel oil and coal were respectively the only articles imported from British Borneo and the Union of South Africa. The value of fuel oil increased from Rs. 2 lakhs to Rs. 3 lakhs, but that of coal decreased from Rs. 4 lakhs to Rs. 3 lakhs.

Europe.-On the import side Germany not only maintained its leading position, but also increased its share from 8.23 to 10.64 per cent., owing to a further advance of Rs. 30 lakhs in the total value of the goods supplied. The bulk of the increase ocourred in receipts of iron and steel. Electrical machinery, electrical instruments, petrol and coal were also imported in larger quantities, but supplies of sugar machincry, coal tar dyes, woollen. shawls and woollen piece-goods were in defect. On the export side, Germany displaced Italy, and captured the premier position with a share of 8.44 as against 6.32 per cent. last ycar. The total value of her parchases stood at Rs. 1,50 lakhs, an increase of Rs. 46 lakhs, to which raw cotton alone contributed Rs. 44 lakhs. Minor increases were also recorded under raw hides and rapeseed. Imports from Italy, amounting to Rs. 25 lakhs, showed a deficiency of Rs. 16 lakhs, about one-third of which took place during the last quarter of the year, as a result of the application of Sanctions against her. The articles, which suffered the most, were woollen blankets, potatoes, coloured cotton piece-goods, cotton and artificial silk piece-goods, lace and embroidery and silk yarn. The position on the export side was also highly disappointing. Raw cotton forms by far the largest item in India's exports.
to Italy. Her purchases thereof were greatly curtailed, and shipments of raw hides and skins and rapeseed also remained restricted, with the result that the total value of the export trade during the yoar fell steeply from Rs. 1,46 lakhs to Rs. 85 lakhs. Her share of the total export trade declined in consequence from 8.92 to 4.75 per cent. and that of the import trade from $\varepsilon 40$ to 1.73 per cent. France curtailed her supplies of woollen piecegoods ( - Rs. 3 lakhs) and purchased less rapeseed (-Rs. 2 lakhs) but more cotton ( + Rs. 3 lakhs), the net result being a decrease of Rs. 3 lakhs in the total trade. Imports from Belgiun at Rs. 27 lakhs did not show any marked variation. Her supplies of iron and steel and diamonds were slightly reduced, but those of sheet and plate glass increased somewhat. Belgium's relative position in the export trade, on the other hand, abowed a remarkable improvement. Exports thereto advanced from Rs. 71 lakhs to no" less than Rs 1,24 lakhs, and the percentage share from 4.31 to 6.96 per cent., mainly the result of increased orders for cotton. The total value of imports from the Netherlands showed no great variation from the previous year's figure of Rs. 11 lakhs, reduced arrivals of white cotton piece-goods being counter-balanced by larger receipts of ale and beer. Exports thereto amounting to Rs. 33 lakhs showed a shortage of Rs. 9 lakhs, shared by rapeseed and gram. Kerosene oil was practically the only article imported from Russia, and its value increased from Rs. 37 lakhs to Rs. 49 lakhs. As regards the noticeable variations in the trade with other countries in Europe, exports to Spain, consisting chiefly of cotton and raw hides, contracted by Rs. l lakh to Rs. 29 lakhs. Poland sent no beet sugar though she supplied Rs. 3 lakhs worth last year and sent less iron and steel but more yarn and knitting wool. Her purchases, confined solely to cotton, increased by Rs. Il lakhs. Czechoslovalicia secured fewer orders for iron and steel and Roumania supplied less fuel oil but more kerosene oil.

Asia.-After the United Kingdom, Japan was Sind's most important customer under both imports and exports. The total value of her transactions, however, registered a decline of Rs. 68 lakhs, to which imports contributed Rs. 11 lakhs and exports Rs. 57 lakbs. Consequently her share of the import trade receded slightly by $\cdot 3$ per cent., while that of the export trade dropped by nearly 3 per cent. The shrinkage in the import trade was most marked under woollen piece-goods (-Rs, 13 lakhs), yarn and knitting wool (-Rs. 11 lakhs), coloured cotton piece-goods (-Rs. 3 lakbs), artificial silk piece-goods (-Rs. 3 lakhs), and cotton hosiery ( - Rs. 2 dakhs), partly counterbalanced by increased arrivals of grey cotton piece-goods ( + Rs. 8 lakhs), white cotton piece-goods $(+$ Rs. 11 lakhs), iron and steel ( + Rs. 2 lakhs) and pneumatio motor covers ( + Rs. 1 lakh). Raw cotton, the only important article purchased, was responsible for the fall under exports. The gradual curtailment in the demand for foreign sugar, which has been a noticeable feature of the sugax trade in recent years, caused a decrease of He. 7 lakhs in the imports from Java. Iran and Iraq improved their position in the trade with the province, the former because of increased supplies of fuel and kerosene oils and the latter on account of larger despatches of dates. Chima, on the other hand, lost ground owing to a greatly restricted demand for cotton.

Ameriea. The total value of imports from America, smounting to Rs. 79 lakbs, showed a further advance of Rs. 6 lakhs, fubricating oils, motor carss

## 7

motor loxies and azms, ammunition and military stores being the principal articles which quarticipated in the imppovement. On the other hand, there Twas a decline in the supplies of cepper sheets and second-hand clothing. The position on the export side was muck more oncouraging. The total Value (viz., Rs. 1,49 laklus) of exports thereto slioxyed an increase of no less than to3 per cent. over the figures for the previous year, and tras, higher than thiat secorded in any of the preceding five years. America's shate in the export trade thus rose from 446 to 8.36 per cent. The expansion Was most martiked under ras goat skins, wool and cotton, and shipments of: woollen carspets, rapessed and dịied fruits also showed a considerabler development.

The total value of imports of Government stores decreased by Rs. 6 lakhs to Rs. 97 lakhs, mainly in receipts of arms, ammunition and military stores and aeroplanes and parts from the United Kingdom and fuel oil from Iran. There was, on the other hand, an improvement in imports of railway locomotive engives and tenders, chiefly from Germany and railway carriages from the United Kingdom.

As explained in previous reports, Indian sugar, the production of which has in recent years increased considerably under the shelter of a protective tarifi, is gradually ousting foreign sugar from the market. Imports. declined further from 62,052 tons valued at Rs. $43 \cdot 62$ lakhs to 43,612 tons valued at Rs. $37 \cdot 54$ lakhs, Java sugar alone being affected by the falling off in demand. The United Kingdom, on the other hand, secured larger orders particularly at the outbreak of the Italo-Abyssinian war, when some extra buying was done under the stimulus of the favourable prices at which sugar was then offered by that country.
The local price of white Java, which opened at Rs. 12-14 per cwt. on the 2nd April, proved to be lowest quatation of the year. An upward movement soon followed raising the prices to Rs, 13-3-6 on the 30th April, Rs. 18.6-0 on the

Foreimn Importa, (hiquors.)
28th May and Rs. 13-7-0 on the 4th June. A slight weakening set in theraafter, the prices declining to Rs. 13-5-6 on the 18th June, and to Rs. 13-2-0 in the last weeks of July and August. The end of September again witnessed a revival, and the prices, after touching Rs. 13-6-0 on the 24th of that month, rose sharply to Rs. 14-7-0 on the 22nd October, which was the highest quotation of the year. This level was not long maintained. The succeeding two months saw a downward tendency, Rs. 14 being registered on the 6th November, Rs. 13-8-0 on the 26 th November and Rs. 13-3-0 on the 30th December. During the concluding three months of the year, the prices ruled steady in the neighbourhood of Rs. 13-4-6, which was also the closing price on the 31st March.

Ale, Beer and Porter,-Imports decreased in quantity, but increased in value. The shortage of 30, 134 gallons in
quantity occurred in arrivals from the United Kingdom ( $-33,442$ gallons) and Japan ( $-19,862$ gallons), though
larger quantities were received from Gormany ( $+1,374$ gallons) and tho Netherlands $(+16,082$ gallons $)$. The increase in value was due to a general rise in the prices, especially of the United Kingdom products. British beer, despite prefecential treatment, was dearer than Continental boer, while the Japanese product failed to maintain its quality and lost its position in the market.

Spirits.-The increase of 5,452 gallons in imports of whisky, mainly from the United Kingdom, followed a corresponding decrease in the previous year. A better demand from the Punjab, Kashmir and Sind accounted for the improvement in arrivals of brandy, mainly from France. The denatured spirit shown as imported was rectified spirit from Java denatured at the Custom House on arrival. As explained in previous reports, increased distillation in India, resulting from the establishment of sugar factories, is gradually leading to the elimination of foreign spirit.

Wines.--Imports of wines, which suffered a set-back last year, showed a partial recovery, chicfly in despatches of sherry from Spain and vermouth from France and Italy. Larges orders were placed with Italy in anticipation of the Sanctions recently applied against that country.

Tobacco.-The total value, amounting to Rs. 1.62 lakhs, showed no recovery from the low level to which it has fallen in recent years. Cigarettes from the United Kingdom formed as usual the bulk of the imports.

Fruits and Vegetables.-Imports under this head, consisting mainly of dates and potatoes, increased in value by Rs. 2.36 lakhs to Ra. $19 \cdot 81$ lakhs. Dates, as usual, came largely from fraq, and their value rose by Rs. $3 \cdot 09$ lakhs to Rs. 16.34 lakhs. A larger crop in Iraq and the resultant low prices stimulated imports. The value of potatoes, almost wholly from Italy, on the other hand, receded from Rs. 3.51 lakhs to Rs. 242 lakhs, owing chiofly to a restricted local derrand for seed potato, the area under the crop having been curtailed on account of scarcity of water. The application of Sanctions against Italy also partly affected imports.

Provisions.-The total value of imports of provisions rose from Rs. 32.51 lakhs to Re. 33.97 lakhs. The United Kingdom maintained its leading position with a share of Rs. $24 \cdot 52$ lakhs as against Rs. $22 \cdot 95$ lakhs in the previous year. The variations in the quantities of some of the principal descriptions are shown in the following statement:-

Tea.-Imports of tea, amounting to $866,353 \mathrm{lbs}$. Falued at Rs. 4 "Il lakhs; showed a shoritage of 27,1167 lbs. in quantity and Rs. 28,000 in value, green tec forming the bull of the imports. The decrease occuree in receipts of green tea from China, which sent 102,669 llas. as against 155,007 lbs. lastfear, theugh dapan increased its supplies from $710,107 \mathrm{lbs}$. to 736,876 lbs. This variefy of tea is: mostly re-exported from here to Afghanistan. It is fepertea that the levy of a municipal terminal tax on imported tea at this: port is activg as a check on the imports of this commodity, and is tending to divent the transit trade in it wia Bombay, where no such tax exists. Blach tec, mositly from Ceylon, which has been unable to compete with Indion tea during the last twe years on acconnt of its higher price, is fast dasmppoaring from the market, the tetal value recorded boing only Rs. $17,000^{\circ}$ as against Rs. 19,000 last year.

Foreign Imporfr. (Mineral oils.)

Mineral Oils.-The total imports of kerosene oil, both foreign and Indian, registered a further rise of 25 per cent. in quantity and 20 per cent. in value, and were the highest in the quinquennium. The consumption, however, did not show a corresponding increase, with the result that large stooks remained on hand at the close of the year. Roumanian Kerosene oil, which had vanished from the Indian market during the provious year, re-entered the market on sccount of its lower price. A feature of the trade in other mineral oils was a considerable expansion in the imports of petrol (foreign and Indian), tuel oil and lubricating oil, each of which created a record during the year under report. The expansion in the aggregate imports of petrol, both foreign and Indian, was the natural result of the ever increasing growth of motor traffic, which in this province was greatly assisted by the development of the Sukkur Barrage areas. Out of 17 million gallons of fuel oil received during the year, 15 million gallons were from Iran and the remainder from British Borneo. Here again consumption failed to keep pace with imports, and large stocks remained unsold at the end of the year. The improvement under lubricating oil occurred mainly in the receipts from United States of America.

Coal.-Coal is imported here mainly for bunkering purposes. The total quantity of foreign coal imported increased from 26,925 tons to 42,423 tons and its value from Rs. 3.96 lakhs to Rs. 6.21 lakhs, the chief sources of supply being the Union of South Africa (18,716 tons), Portuguese East Africa ( 12,742 tons) and Germany ( 10,008 tons). Imports of Bengal coal amounted to 62,660 tons valued at Rs. $9 \cdot 10$ lakhs, a decrease of 7,457 tons and Rs. 93,000.

## 9. Class III.-Articles Wholly or Mainly Manufactured.

Cotton Piece-goods.-The total imports of cotton piece-goods contracted by 6 per cent. in volume and 11 per cent. in value as compared with the previous year. The piece-goods market remained in a state of lively suspense throughout the year owing to the rumoured reduction of at least 5 per cent. in the rates of import duty on British goods. This uncertainty was responsible for some unsteadiness in the market, and the prices showed a tendency to fall. In consequence, the dimand for British goods remained restricted, the dealers adopting a policy of cautious buying. The position was further aggravated by the policy of price-cutting followed by Japan during the year under report. The highly competitive rates quoted ensbled that country to improve her position considerably at the expense of the United Kingdom. It will be noticed from the figures given in table No. 10 below that, while the United K'ngdom's contribution to the total imports amounting to 158 million yards valued at Rs. 2,73 lakhs decreased by 16 per cent. in quantity and 18 per cent. in value, that of Japan aggregating 62 million yards valued at Rs. 86 kakhs increased by 40 per cent. in quantity and 24 per cent. in value as compared with imports in 1934-35.

Grey Goods.-Japan was, as usual, the largest supplier of grey goods. The total value of the goods supplied, viz, Rs. 30.80 lakhs was the highest in the quinquennium, and as compared with the previous year, it showed an increase of Rs. 8.02 lakhs, to which longoloth and shirtings contributed Rs. 5.50 lakhs and drills and jeans Rs. 1.51 lakhs. The increase is attributable mainly to the fact that some of the local firms, which.formerly imported their requirements through their Bombay branches, made direct imports this year. British grey goods also increased in value by Rs. 0.76 lakh to Rs. 6.46 lakhs. Among the principal varieties imported, bordered dhutis came in larger quantities, but the supplies of mulls fell short of the previous year's figure.

White Goods.-The United Kingdom continued to be the chief supplier of white goods, but her share of the total yardage supplied fell from 89 to 82 per cent., owing mainly to a considerables reduction in the demand for mulls. The other varieties adversely affected were jaconets, longcloth and shirtings and checks. Japan's share of the total volume of business done during the year, on the other hand, advanced from 10 to 17 per cent., the supplies of longeloth and shirtings and mulls showing a considerable expansion. It is understood that British coarse mulls and shirtings are being gradually replaced by Japanese products, the prices of which compare very favourably with those of British goods in spite of the higher rates of import duty to which they are subject.

Coloured Goods.-The share of the United Kingdom in the total yardage of coloured goods imported during the year dropped from 78 to 71 per cent., but that of Japan rose from 20 to 28 per cent. The United Kingdom supplied 14 million gards of cloth less, printed goods showing the largest decrease. Japan, on the other hand, sent 2 million yards more. Japan's competition in prints is being increasingly felt by the United Kingdom, and although the latter country has, in its efforts to counter this competition, introduced cheaper varietics, Japanese goods are making much headway, thanks to the ability of her manufacturers to place on the market designs similar to the United Ringdom products at highly competitive rates. The extent of the price-cutting by Japan may be judged from the fact that, while the total imports of coloured goods from Japan increased by 14 per cent. in quantity, their value actually decreased by 11 per cont.

Woollen Goods.-The total value of imports of yarn and knitting wool, intended mostly for the Amritsar market, fell by Rs. 16.99 akhs to Rs. $21 \cdot 90$ lakbs, to which Japan contributed Rs. 17.92 lakhs (-Rs. 10.97 lakhs) and the United Kingdom Rs. 2.31 lakhs ( - Rs. 6.62 lakhs). The decrease is due to the fact that a good deal of the abnormal imports of the previous year could not find a ready market, with the result that large stocks remained unsold at the close of that year, and several Amritsar dealers were involved in heavy financial losses. Imports of woollen piece-goods, amounting to Rs. 19.80 lakhs, suffered a set-back to the extent of Rs. 21.75 lakhs, which again was due to a large unsold carry-over from the previous year's import's. Japancse goods suffered the most, and their total value roceded from Rs. 17.93 lakhs to Rs. $5 \% 26$ lakhs, the decrease being also partly due to the low quality of the goods and the unreliability of their colours. British
10. Class V.-Postal Articles not specified.-Figures for gold and silver thread, cinematograph films, jewellery, precious stones and cigarettes imported by post are included under their relative heads in the general imports. The value of the other articles imported by post decreased by Rs. 6.03 lakhs to Rs. 30.54 lakhs, to which the United Kingdom contributed Rs. $27 \cdot 18$ lakhs. The number of parcels dealt with was 77,302 as against 84,671 in the previous year. In addition, 58,722 letter packets were assessed to duty as against 63,237 . The total amount of import duty realised on all articles imported by parcel post declined from Rs. 10.71 lakhs to Rs. 8.79 lakhs and that on letter packets from Ra. 1.52 lakhs to Rs. 0.93 lakh.

## " Exports.

## Indian Produce and Manufactures.

11. Agricultural Conditions.-As the bulk of the export trade of the port consists of agricultural produce, a brief review of the weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces is given below.

Sind.-According to the information supplied by the Chief Engineer in Sind, the Lloyd Barrage and the now canals continued to work aatisfactorily during the year 1935. The approximate area brought under kharif cultivation in the Barrage zone rose by 1.25 lakhs acres to 17.45 laklas acres, cotton oultivation in particular showing a considerable expansion. The area under the crop was about 8.18 lakhs acres against 6.76 lakhs acres during the previous year and 2.83 lakhs acres in the whole of Sind in the pre-Barrage days. The development of cotton cultivation in Sind is reported to be tending more and more towards an expansion of the area under the superior types of American cottons, for the cultivation of which the irrigation and soil conditions in large tracts of the Barrage areas are eminently suitable. Conditions in the non-Barrage zone, which is dependent upon the inundation of the river Indus for irrigation supply, were, however, not favourable. The river rose late in June and fell in September very abruptly. This affected adversely some of the canals, and the crop suffered a good deal. Taken as a whole, the outturn of the cotton crop is expected to show an increase of 20 per cent. over the corresponding estimate of last year. In the rabi season large areas were put under wheat. Though the crop suffered slightly in certain districta from insufficient moisture and scanty rainfall, soattered showers at the end of February proved beneficial. The crop has germinated well and is reported to be in a fairly good condition on the whole, except in the Larkana district where it is reported to be only fair.

The Punjab.--The monsoon was fairly active during July, and gave well distributed and ample rainfall over the greater part of the Province. Supplies in all the canals were sufficient, and conditions were therefore generally favourable for the sowing of the kharif crops. The area under cotton is reported to be 23 per cent. above the area of last year. Supplies of water from the canals were also adequate for the maturing of the

## Forèign Exporfs.

(Agricultaral Conditions.)
crop, and the yield is estimated to be 20 per cent. higher than in the previous year. The rabi crops were, however, somewhat adverscly affected on account of insufficiency of rains at sowing time and unfavourable climatic conditions. The rainfall in January, February and March proved somewhat beneficial, and the ontturn of the wheat crop is expected to be normal on irxigated and below normal to normai on unirrigated areas.

The United Provinces.--The late arrival of the monsoon greatly retarded the kharif sowings and was mainly instrumental in bringing about a curtailment to the extent of 16.6 per cent. in the area under cotton. The decrease is also partly ascribed to the slump in prices and a general tendency to devote more area to sugarcane growing. The rainfall was unevenly distributed in most places, bit the September rains, on the whole, proved beneficial to the standing cotton crop, and the outturn is estimated at 78 per cent. of the normal against 70 per cent. last "year. Insufficient moisture in the soil adversely affected the rabi sowings. The wheat crop suffered from drought, white-ants and hail-storm in a number of districts. The rainfall in February was, however, general and was above the normal in many districts. The condition of the wheat crop is reported to be fairly good, and taking the province as a whole, the outturn is estimated at 80 per cent. of the normal.

The following table gives the area and yield of the three most important crops in Sind, the Punjab and the United Provinces for the past two seasons, the figures being taken from the crop reports published by the Directora of Agriculture for those provinces :-

Wheat.-As in rocont years, internal consumption kept the prices of Indian wheat well above the export level for most of the year, which resulted in an almost complete absence of demand from the foreign consuming centres. The small quantity of 6,055 tons exported to the United Kingdom was purchased by that country during the three months September, October and November, when prices in Europe had risen sufficiently high to make it remunerative for the Indian exporter to enter the British market. The local price of white wheat, which opened at Rs. 2-10.9 per owt, on the 2nd Aprit, showed a rising tendency, Rs. 2-12-0 being recorded on the 23rd of the same month and Rs. 2-13-6 townsds the middle of May. A weakening, however, set in thereafter, and the prices came down to Rs. 2.10-10 at the end of June. July witnessed a partial recovary, the highest figure quoted being Rs. 2-12-10 on the 30th of that month. The prices eased off again in the following month, and Rs. 2-10-3, the lowest quotation of the year, was registered on the 20th of August. A sharp-upward trend, helped by some export enquiries, was, however, soon in evidence, the prices rising to Rs. 2-14-4 on the 20th September and to Rs. 3-4 6 on the 2 2nd October, which latter was the highest quotation of the year. In the succeeding three months, the prices, though firm, kept a slightly lower level, Rs. 3-3-1 being quoted on the 5th November, Rs. 3-1-3 on the 3rd December and Rs. 3-0.7 on the 21st January. In February they ruled in the neighbourhood of Rs. 2-14-0, The concluding month of the year witnessed a sightly higher level, and Rs. 3.0-9 was the closing prioe on the 25th March.

Wheat Flour.-The increase was due to a better demand from Aden and Arabia.

Barley.-The smallness of the Indian crop coupled with a better internal demand kept the prices well above export parity, and business on a larger scale was not possible. As in the previous year, almost the entire quantity exported during the year was purchased by the United Kingdom.

Other Food-Grains.-For reasons similar to those given above for the falling off in the exports of barloy, the exports of gram received a severe setback during the year. The principal countries, which ourtailod their requirements, were the United Kingdom (-Rs. 9•13 lakhs) and the Netherlands (-Rs. 3.25 lalihs). Shipments of rice increased as the result of a better demand from the Bahrein Islands, which purchased 4,512 tons valued at Rs. 6.30 lakbs as against 2,870 tons valued at Rs. 3.77 lakhs in 1934-35. Arabia, the largest customor, took 17,026 tons valued at Rs. $17 \cdot 24$ lakhs as against 17,133 tons valued at Rs. $17 \cdot 48$ lakhs in 1934-35.

Miscellaneous.-The total value of fruits and vegetables, the most important item in this group, advanced from Rs. 3.43 lakhs to Rs. 1050 lakhs, owing mainly to increased purchasos of dried fruits by the United Kingdom ( + Rs. $2 \cdot 49$ lakhs), the United Statos of America ( + Rs. 3.33 lakhs) and Syria (+Rs, I• 19 lakhs).
15. Class II.-Raw materials and Produce and Articles maitly unmanufactured.

Cotton.-A study of tie export figures given in the above table together with these relating to the crop in Table No. 15 will give an idea of the increasing importance of Sind as a producer of raw cotton since the completion of the Lloyd Barrage and of Karachi, Sind's natural outlet, as an exporting centre. It will be noticed that the area sown with cotton in Sind, which onfy four yeass ago, i.e., in 1931-32, was only about 263,000 acres, has rapidy mounted to about 842,000 acres in $1935-36$ and that the total exponts ol cotton to foreign countries, which last yeaf reached the high figure of 250,148 tons vatued at Rs. $12,56 \cdot 49$ latkhs, established a further recorel by advancing to 255,416 tons valued at Rs. 13,3942 ladiths during the year under report. The expansion in exports duaing the year under review was due in laxge measure to the fact that the langer crop of the $\mathbf{4 9 3 5 - 3 6}$ season brought Indian cotton into more favourable parity with American cottion, the prices of whichauled bigh on account of a sheritage in production. The increased off-take by the United Kingdom is also fortily attributable to the propaganda carried on in Jancashine in favour of the extended use of Hadian cotton. It is interesting to note, howover, that the total exports of cotton to foreign countries from the Bombay Presidency declined by 20,759 tons to 303 , 713 fons duning the fear under report. The fear's record, though higlily satisfactery, would have been better still, had it not poen for the fact that Jopan, our largest customer, took 11,486 tons less on account of abnoman purchases in the previens year. A contributony cause is stated to be that a good deal of cotton which, in the normal course, would have come to Karachi fer shipment to Japan, was sent to Bombay on account of favourable rates of railway freight, and also because the freight rates from Bombay to Japan are cheaper than from Karaehi to Japan. Italy and China also reduced their purchases considerwliy, the former on account of her frianciat difficulties, and the latter oypiug to a good domestic crop.

Wool-Exports of raw wool showed an expansion of 41 per cent. in quantity and 62 per cent. in value as compared with the previous year. A reduction in the stocks in the consuming countries, combined with a further decline in the world's wool clip in 1935-36, created a brisk demand for Indian wool, and the resultant advancing prices stimulated exports to a great extent. A substantial improvement in machinery activity in the United Kingdom and the United States of America brought about a favourable position for the opening of the $1935-36$ selling season for wool, and it is understood thats there was no accumulation of stocks at the end of the year in spite of the heavy imports made by these countries.

Rayeseed is the most important seed exported from this Province. It is disappointing to record that the export business in this seed again remained greatly depressed. The total quantity exported, viz., 18,499 tons was the lowest during the last thirty-five years, and as compared with the previous year, it showed a decrease of 49 per cent. A smaller crop of the toria variety sept the prices above export parity, and the crushing industry abroad relied mostly on Plate rapeseed, which was
took toria at the end of the season, when the Plate rapeseed was practically exhqusted.

Rath Hides.-The increase of 293 tons in gatantity and of Ris. 2.83 ladws in value in the exports of taw hides occurred notably in shipments of cono hides to Germany, which had greatly curtailed her purchases in the previous year. The increased demand was also partly due to the fact that the prices of Indian hideas, though dearer than in 1934-35, compared favoutably with those of other origins.

Raw Shins.--Exporters of raxy skins also had a busy year, shipments showring an increase of $\overline{\mathrm{I}}, 662$ tons in quantity and Rs: 20.83 lakhs in value over these in 1934-35. A better domand for goat stins from the United States of Americh and the higher prices öffered stimulated exponts.
ntiscellaneous.-Thie totalualue of exports of bones and bonemeal tmproved further by Rs. 2.33 takhs to Rs. 13.75 taldis, to which bones contributed Rs. 40.53 lawhs and bonemeal Rs. 3.22 lakhs. Bones were laxgely purchased by Beigium (Re. 8.13 lakhs), Germany (Rs. $1 \cdot 58$ lakhsf and France (Rs. 0.66 ladia), and bonemeat by' the Unitee Kingdom (Ris. 1.56 lakhs), Ceylon (Rs. 1.05 lakhs) and the United \$tates of Amenica (Rs. 0.58 ladith). The value of naw sitit practically remained unchanged at Re. 0.62 ladah, the United Kingdom being the largest purchaset. Exports of chronite (chrome iron- ore) increased in vahue by Rs. I- 66 ladis to Rs: 479 latidis, the principal putchasers
 ladelis).

## 16. Class IE-Axticles wholly or mainly manufactured.

Leather.-Exports of Leather, the most important aricicle in this class, declined further from Rs. 2.90 lakhs to Rs. 178 lakhs, representing the value of tanned goat skins (Rs. 0.71 lakht to the United Kingtom, dressed sheep slicins (RRs. 0:47 lakht to the United Kinglom and Japan, and deessed cow hides (Rs. 0.42 takin\% mostly to the United Kingclom.

The expansion in re-exports of foreign wool, mostly Kandakar wool, occurred mainly in shipments to the United States
of America ( + Rs. 7 lakhs) and partly to the United Kingdom ( + Rs. $0^{-} 55$ lakh). The reasons given in paragraph 15 for the improvement in exports of Indian wool are applicable in the case of foreign wool also. The decrease under woollen manufactures, which consisted mostly of Persian carpets, was due ta reduced orders from the United Kingdom and European Turkey. Raw skins, mainly comprizing Persisn lamb skins, were exported almost wholly to the United Kingdom. The falling off in exports of sugar was the result of a poor demand from the Bahrein Islands, which took only 110 tons valued at Rs. 0.30 lakh as against 1,073 tons valued at Rs. 2.85 lakhs last year. Shipsments to Arabia, on the other hand, increased from 611 tons valued at Rs. 1.67 lakhs to 804 tons valued at Rs. 2.08 lakbs. Reduced takings of dried fruit by Syria and the United States of America mainly accounted for the dectine of Rs. $1 \cdot 16$ lakhs in the value of fruits and vegetables re-exported during the year. As in the previous year, the bulk of the re-exports of metals consisted of shipments of irom and aluminium scraps to Japan.

## MMPORTS.

Indian Merchandise.-Cotton yarn and piece-goods and cigarettes were imported mainly from Bomhay, coal, iron and steel and gunny bags from Bengal, mineral oils and timber from Burma, fruits and vegetables from Kathiawar, Madras and Bombay, copra from Madras and Travancore, groondnuts from Kathiawar and Bombay, spices from Madras, Travancore and Bombay and matches from Bengal, Burma and Bombay.

Foreign Merchandise.-Imports of cotton yarn and piece-goods, cigarettes, motor cars and motor lorries were mostly from Bombay.

## EXPORTS.

Indian produce and Manufactures.-Jowari and Bajri were exported largely to Cutch and Kathiawar, pulse to Madras, Cutch and Kathiawar, gram to Madras, rice to Bombay, Cutch and Kathiawar, wheat to Bengal ( 63,253 tons), Bombay ( 23,038 tons), Cutch ( 4,214 tons), Burma (3,153 tons) and Madras (2,424 tons), wheat flour to Madras, Bombay, Burma, Bengal, Kathiawar and Portuguese ports, sall to Bengal ( 93,475 tons) cotton to Bombay ( 40,672 tons), Madras ( 10,826 tons), French ports ( 1,514 tons) and Bengal ( 946 tons), seeds to Kathiawar, Bengal, Madras, Bombay and Cutch, fish to Burma and fodder to Bombay, Cutch, Kathiawar, Portuguese ports and Madras.

Foreign Merchandise.-Carriages and carts went mainly to Bombay, dried fruits to Bombay, Madras and Kathiawar, sugar to Baluchistan and cotton piece-goods to Bombay and Baluchistan.

## SUBORDINATE PORTS.

22. Keti Bandar, Sando Bandar and Shahbandar.-The total value of the entire trade of these threa ports, which is confined to the coasting trade, declined from Rs. 376 lakhs to Rs, 3.51 lakhs, to which Keti Bandar contributed 72 per cent., Shahbandar 19 per cent. and Sando Bandar 9 per cent. Rice is the chief article of trade. Keti Bandar, Sando Bandar and Shahbandar respectively exported 86 tons, 268 tons and 530 tons of rice to Cutch. Keti Bandar also exported firewood worth Rs: 29,376 to Kathiawar, Rs. 21,162 to Cuteh and Rs, 1,136 to Karachi, and Shahbandar sent Rs. 1,213 worth to Kathiawar.

TABLE NO. 30.

Shipping.--The average tonnage per steamer rose from 2,864 tons to 2,962 tons. The sailing vessels engaged in the foreign trade were country craft trading with the ports in the Persian Gulf, Zanzibar, Kenya. Colony and Aden.

Freight.-A dull and bfeless market with meagre bookings was the main feature of the first half of the year. The rate to the United Kingdom on a wheat basis (i.e., per 18 cwt .), which opened at 21 s . in the beginning of April, witnessed a progressive decline of neatiy $1 s$. in each of the four succeeding months, and stood at 17 s . at the end of August. The market; however, commenced to rise towards the middle of September, and active interest was shown in Liner tonnage till about the third week of January. Fair bookings took place during that period and near space was scatce. As a result, the rate, which had reached the low level of 17 s . in August, rose sharply to $22 s .6 d$. on the 18 th September, and continued to increase till it reached $35 s$. at the end of October. The first two weeks of November wit--nessed a slight relapse, but a further upward trend raised the rates to 36 s . and 40 s . in the third and fourth weeks rospectively of that month. During the period from the second week of December to the third week of January, the rates ranged between $36 s$. and $34 s$., but dropped sharply to $23 s$. at the end of January, and at the close of the year regained the level at which they had stood at the beginning of the year. The rates for rapeseed were $1 s$. below those for wheat.

## TRAFFIC BY AIR.

24. The following aircraft services were regularly in operation to and from Europe-India-Australia and the intervening countries :-m
(1) London-Karachi-Singapore (Weekly)
(2) London-Karachi--Singapore-Australia (Weekly)
(3) Paris-Karachi-French Indo-Chinã (Weekly̆)
(4) Amsterdam-Karachi--Dutch East Indies (Bi-weekly)

In sill 560 aeroplanes called at Karachi air port in 1935-36 as against 422 aeroplanes in $1934-35$, sn increase of 33 per cent. There were numerous private flights to and across India by persons of different nationalities, i. e., British, Indian, French, German, Polish, Japanese, Italjan, Czechoslovakian and Danish. A notable event of the year was the conversion of the weekly Amsterdam-Karachi-Batavia service operated by the "K. L. M" into bi-weekly service.

## GENERAL SUMMARY.

1. The total Sea-borne trade of the Province of Sind during 1936-37 at Rs. 58.04 crores registered an improvement of Rs. 670 crores or 13 per cent over the figures of the previous year. The improvement was steady and the pace was faster than in the previous year, though the recovery was very much one-sided, being confined to the export trade. The value of the foreign trade, amounting to Rs. $40 \cdot 92$ crores, apprecisted by Rs. 7.41 crores while that of the Corasting trade, amounting to Rs. 17.11 crores, depreciated by Rs. 71 lakhs.

Trading conditions, particularly in regard to the import trade, continued to be difficult and, although the European gold bloc countries devaluated their currencies and Germany introduced the barter system of rebates, there was a feeling of uncertainty regarding the fulfilment of orders for manufactured goods, owing to the disturbed political state of affairs in Europe. The conclusion of the Abyssinian affair and the subsequent removal of Sanctions against Italy, with effect from the 15th July 1936, did not ease the situation, as civil war broke out in Spain and prolonged the causes which made overseas trade difficult. The heavy rearmament programmes which the nations speedily took in hand did, hpovever, provide a powerful stimulus both to internal and international commerce by raising the level of prices; it influenced greatly the volume and direction of the many ancillary trades supplying materials and machinery. It is yet too early to gauge their full influence, but it is clear that they accelerated the pace of exports of raw materials from India; in the case of wheat and rapeseed, a futher stimulus was provided by the disasters to crops in the United States of America and Argentine and the ruin of harvests in Spain. Increased expenditure on armaments, while increasing industrial activity in European countries, resulted in some cases in restricting supplies to India; for example, in the case of base metals, the demand in the European countries was so great that as compared with last year, there was little surplus left for export to India. Amongst the internal factors which affected foreign imports, may be mentioned the continued growth of Indian industrial activity, particularly in textiles, iron and steel and sugar industries, and the measures passed in various provinces for the relief of rural indebtedness, resulting (for the time being) in a contraction of credit.

Foreign imports were on the whole more than last year ( + Rs. 8 lakhs) but this was due to larger arrivals of gold and silver, valued Rs. $73 \cdot 18$ lakhs ( + Rs. 65.70 lakhs), of which silver alone accounted for Rs. 55.77 lakhs ( + Rs. 48.87 lakhs). The valuc of private merchandise at Rs. 14.03 crores decreased by Rs. 59 lakhs or 4.5 per cent., the articles primarily responsible being eotton manufactures (-Rs. 40 lakhs), sugar (-Rs. 32 lakhs) and metals and ores (-Rs. 24 lakhs). Among other articles adversely affected were rubber manufactures, liquors, artificial silk, hardware, glassware, chemicals and soap. Imports of arms and ammunition ( + Rs. 17 lakhs), machinery ( + Rs. 13 lakhs), and copra ( + Rs. 8 lakhs), on the other hand, showed a substantial improvement, and increases were also recorded under cycles, instruments and appliances, petrol, provisions and fruits and vegetables.

Foreign exports (including treasure and Government stores) at Rs. 25.21 crores were more by Rs. 7.33 crores. The value of private merchandise amonnting to Rs. $25 \cdot 16$ crores, represented an increase of Rs. 7.35 crores or 41 per cent., to which raw cotton, the leading article, contributed Rs. $3 \cdot 72$ crores and wheat Rs. 199 crores; shipments of the formerat 295,684 tons, registered a fresh record. An appreciation in raw wool prices coupled with continued demand for the article, raised the level of its exports to Rs. $2 \cdot 21$ crores ( + Rs. 69 lakhs). Notable increases were also recorded under rapeseed, gram, bones, wheat flowr, dried fruits, raw hides and barley.

Coasting imports advanced from Rs. 9.19 crores to Rs. 1005 crores or by 9 per cent owing mostly to increased arrivals of grey cotton piece-goods (Indian), white and coloured cotton pieec-goods (Indian and foreign), kerosene oil, provisions and iron and steel. Petrol, spices and cigarettes came in smaller quantities.

Coasting exports receded from Rs. $8 \cdot 64$ crores to Rs. $7 \cdot 06$ crores or by 18 per cent due chiefly to reduced slipments of cotton, seeds, wheat and gram. The salt industry of Karachi made further progress, shipments to Calcutta having expanded from 93,475 tons to 119,516 tons or by 28 per cent.

The gross collection of Customs duty decreased from Rs.5,01 lakhs in 1935-36 to Rs. 4,54 lokbs in 1936-37.

TABLE No. 1-conta.

## B. Coasting Trade.

TABLE No. 2.
2. Geographical Distribution.-Table showing the distribution during 1936-37 of the foreign trade in private merchandise by countries.

British Empire.-The total value of imports from the United Kingdom furthar decreased by 8.2 per cent. from Rs. 7,14 lakhs to Rs. 6,56 lakhs,
while exports rose from Rs. 4,85 hakhs to Rs. 9,25 lakhs i. e. by 90.7 per cent. The share of the United Fingdom in the total import trade of the Province dropped from 4884 per cent. to 4673 per cent. while in regard to exports it increased from 27.23 per cent. to 36.75 per cent. Amongs the imports, cotton piece-goods, constituting 35 per cent. of the total imports, showed the largest rlecrease, ciz., Rs. 42 lakhs; beet sugar, iron and steel, prime-movers, pheunatice motor covers and tubes, chemicals, whisky, soap and. sewing and knitting marhines were also among the other articles alversely afiected. Imports of arms and ammunition, electrical machinery, cycles, electrical instruments, wireless apparatus and old newspapers, on the other hand, showed an increase. On the export side raw cotton, representing 52 per cent. of the total exports to the United Kingdom, claimed the bulk ofthe increase, aiz., Rs. 1,56 lakhs; substantial increases were also recorded principally under wheat, rapeseed, wool raw, woollen carpets and dried fruits, while a decrease occurred in shipments of saltpetre and pulses (other sorts). Imports from Ceylon, consisting mainly of copra valued at Rs. 21 lakhs ( + Rs. 8 lakhs) and cocoanut oil at Rs. 7 lakhs, rose from Rs. 20 lakhs to Rs. 29 lakhs, thereby raising Coylon's share in the import trade of the Province from $1 \cdot 40$ per cent. to $2 \cdot 07$ per cont. Exports to Ceylon, amounting to Rs, 18 lakhs appreciated by Rs. 0.34 lakh, duo to larger purchases of bonemeal and fish manures, while food grains and dry salted fish showed a fall. Among other British possessions imports from Canada contracted by Rs. 0.29 lakh, pneumatic motor covers, motor lorries, provisions and motor cars being the principal articles responsible for the decline; imports from Straits Settlements were valued at Rs. 4.58 lakhs showing a decrease of Rs. $1 \cdot 35$ lakhs notably in receipts of murrought tin; the Union of South Africa increased its supply of coal from Rs. 2.67 lakhs last year to Rs. 3.14 lakhs, while British Borneo, which had sent Rs. $3 \cdot 34$ lakhs worth of fuel oil, lost ground completely and did not register any trade in that article,

Europe.-In regard to inports, Germany contimued to maintain her leading position by inereasing her share from 10.64 per eent. to 11.31 per cent., owing to a further advance of Rs. 3 lakhs in the total value of the goods supplied. Increases occurred mainly in receipts of electrical machinery, prine-movers and printing paper; while iron and steel showed the largest decrease, coal tar dyes, petrol and cycles also came in smadjer quantities. On the export side, Germany lost some ground, and her share declined from 844 to 5.67 per cent. Tho value of shipments to that country showed a fall of Rs, 8 lakhs; the decrease would have been larger had the redueed purchases of raw cotton and rapesecd not been counterbalaked to some extent by increased shipments of wheat, bones and raw hides. Imports from Italy at Rs. 16 laklis were short by Rs. 10 lakhs, while her share in the total import trade which was 2.70 per cent. in 1934-35 and 1.73 per cent. in $1935-36$ stood at $1 \cdot 11$ per cent. during the year under report. Woollen blankets slowed the greatest fall but potatoes, haberdashery, vermouth, chamicals and silk yarm also arrivel in smaller quantities. There was, lowever, an improvement on the export side and Italys takings increased from Rs. 85 lakhs to $\mathrm{Rs} .1,0$ lalkhs, mostly under raw cotton and rapesed. Jnports from Frunce increased from Rs. 19.93 lakhs to Rs. 2006 lakhs and exports thereto from Rs. 85 lakhs to Rs. 1,10 lakhs. The important
articles contributing to the increase under imports were jewellery and aircraft parts while those under exports were gram, cotton and rapeseed. Belgium curtailed her shipments from Rs. 27 lakhs to Rs. 25 lakhs mainly under iron and steel, a and mining machinery while she sent more of diamonds, and sheet and plate glass. Exports to Belgium improved from Rs. 1,24 lakhs to Rs. 1,55 lakhs, but her sfiare in the total export trade, though it was the highest amongst continental countries, declined from 6.96 per cent. to 6.18 per cent. The chief increase was under cotton; but bones, rapeseed, cocoanut oilcakes and wheat also contributed to that result. Imports from the Netherlands increased from Rs. 11 lakhs to Rs. 13 lakhs due to larger arrivals of white cotton piece-goods, provisions, and ale, beer and porter; and exports thereto rose from Rs. 33 lakhs to Rs. 41 lakhs, mainly under cotton and rapeseed. That country however curtailed slightly its orders of raw hides. Kerosene was the main article imported from Russia and its value decreased from Rs. 49 lakhs to Rs. 36 lakhs. Amongst the other European countries, Switzerland increased her supplies to this port from Rs. 14 lakhs to Rs. 24 lakhs, mainly under white and coloured cotton piece-goods and spinning machinery, while her takings amounted to Rs. 995 only. Czechoslovakia sent Rs. I5 lakhs worth of goods, chiefly arms and ammunition and iron and steel, against Rs. 6 lakhs in the previous year. Poland sent less of yarn and knitting wool but took more of cotton. Swedish imports registered a decline from Rs. 18 lakhs to Rs. 12 lakhs, for which packing and printing paper, iron and steel, implements and tools and builders' hardware were all responsible.

Asia.-As in the previous year, Japan's share in the import and export trade, at $12.75(+0.23)$ and $24.95(-1 \cdot 84)$ per cent. respectively, was next only to that of the United Kingdom. Imports from that country however declined in value from Rs. 1,83 lakhs to Rs. 1,79 lakhs while exports thereto improved from Rs. 4,77 lakhs to Rs. 6,28 lakhs. The contraction under imports was most noticeable in receipts of grey and white cotton piece-goods (-Rs. 7 lakhs); decreases occurred also under artificial silk piece-goods (-Rs. 151 lakhs), woollen piecegoods ( - Rs. $1 \cdot 45$ lakhs), electrical instruments and appliances (-Rs. $1 \cdot 36$ lakhs), glass bottles and phials (-Rs. 1.31 lakhs) and iron and steel (-Rs. $1 \cdot 29$ lakhs), while cotton handkerchiefs and coloured cotton piece-goods showed a substantial improvement ( + Rs. 8 lakhs). As regards exports, Japan considerably enlarged her purchases of cotton and old iron, which mainly accounted for the increase in her trade. Import trade with Java further dwindled from Rs. 21 lakhs to Rs. 6 lakhs owing to the heavy fall in receipts of sugar from that country, while that with Iran ( + Rs. 24 lakhs) and Iraq ( + Rs. 5 lakhs) improved on account of larger arrivals of petrol and kerosene oil from the former and dates from the latter. Export trade with Maskat etc. did not show any marked variation; French Indo-China recorded an increase, and China a decrease, under cotton exports.

America.-The import trade with America amounted to Rs. 82 lakhs, an increase of Rs. 2 lakhs as compared with the previous year. The chief articles which showed improvement were photographic instruments, wireless apparatus, iron and steel, second hand clothing, mining and
refrigerating machinery and toilet requisites, while the following, viz., metal lamps, pneumatic motor covers and lubricating oil, were amongst those which registered a decline. Exports to America further expanded in value from Rs. 1,49 lakhs to Rls. 1,87 lakhs, being the highest since 1929-30; the chief improvement was under cotton and bonemeal; goat skins and woollen carpets were, however, purchased in smaller quantities this year.

| Other artioles . . | 40.88 | $24 \cdot 62$ | 30.08 | $31 \times 97$ | 31.45 |
| Treasure |  |  |  |  |  |
| Total Imports | 1,36.26 | 78.91 | 1,01.05 | 93-17 | $95 \cdot 13$ |
|  |  |  |  |  |  |
| Treasurs |  |  |  |  |  |
| Total Exporta | $1 \cdot 64$ | $1 \cdot 37$ | $1 \cdot 60$ | $4 \cdot 31$ | 0.78 |
| Total Govermment Transactions | 1,37-60 | 80.28 | 1,03-25 | 97-48 | 95.91 |

The total value of imports of Government stores amounted to Rs. $95 \cdot 13$ lakhs showing an increase of Ks. $1 \cdot 96$ lakhs over previous year's figures. There was a fall in receipts of railway locomotive engines and tenders from Germany but this was offset by the improvement which occurred in arrivals of aeroplane parts and firearms from the United Kingdom and wagons from Belgium.

[^17]7. Class I.-Food, Drink and Tobacco.
TABLE No. 7. Sugar.

'As explained in previous reports, Indian sugar, the production of which has rapidly increased in recent years, under cover
of a protective tariff, is steadily eliminating foreign sugar from the market. There was a further marked decline in imports
which receded by Rs. $3 \mathrm{I} \cdot 78$ lakhs (from 43,612 tons valued at Rs. 37.54 lakhs to 6,753 tons valued at Ias. $5 \cdot 76$ lakhs); the
loss was almost wholly borne by the United Kingdom (-Rs. $15 \cdot 84$ lakhs) and Java (-Rs. $15 \cdot 11$ lakhs).
The local price of White Jawa, which ruled at Rs. $13-4-0$ per cwt. on the 28 th April 1936 , proved to be the highest
quotation of the year. A slow downward movement soon followed lowering the prices to Rs. 13-3-6 and Rs. 13-3-0 on
the 12 th and 19 th May respectively, Rs. 13-2-6 and Rs. I3-2-0 on the 9 th and 16 th June respectively, and Rs. 13-0.0 on the 1st September. The last quotation-the lowest in the year-continued till the 26 th Japuary, when it registered a rise to Rs. 13-3-0. There were no further fluctuations in the rate during the remaining months of the year.

[^18]Spirits.-Arrivals of whisky (mainly from the United Kingdom) and braudy (mainly from France), recorded a decrease of 9,352 and 2,067 gallons respectively, owing to a combine formed by several local importers in the latter half of 1935 . The combine became fuily effective in 1936, and, is consequence, a great deal of competition and uncontrolled importation was elimizated. Of the 10,165 gallons of denatured spirit imported from Java, 8,765 gallons represented rectifed spirit denatured at the Custom House on arrival. As previously reported, increased distillation in India, resulting from the establishment of sugar factories, is gradually rephacing foreign spirit.

Wines.-The partial recorery noticed last yoar was not maintained and a falling off in imports of vermouth from France and Italy accounted for the decrease.

Tobacco.-The total value, amonnting to Rs. $1 \cdot 68$ lakhs, indicated a slight increase of Rs. 0.07 lakh as compared with the figures of the previous year, but there was no substantial recovery from the low level of imports in recent years. The receipts of cigarettes from the United Kingdom, which is the chief supplier, decreased in quantity by 330 lbs. but increased in value by Rs. 0.05 lakh. A noticcable feature was that Japan sent $5,344 \mathrm{lbs}$. as against 617 lbs . only received last year.

Fruits and Vegetables.-The value of imports under this head inproved by Rs. $2 \cdot 10$ lakhs to Rs. $21 \cdot 91$ lakhs. Dates, as usual, came largely from Iraq and their value rose by Rs. 3.97 lakhs to Rs. 20.3 lakhs owing to the superior quality sent. The value of potatoes, almost wholly from Italy, on the other hand, receded from Rs. $2 \cdot 42$ lakhs to Rs. 0.88 lakh.

Provisions.-The progressive increase in imports of provisions noticed in recent years continued, the total value recorded, viz., Rs. 35.45 lakhs being Rs. $1 \cdot 48$ lakhs more than in the previous year. The United Kingdom was, as usual, the main supplier, having despatched goods worth Rs. 25.55 lakhs as against Rs. 24.52 lakhs in 1935-36. The variations in the quantities of some of the principal descriptions are shown in the following statement:-

| Provisions. | Quantity. |  |
| :---: | :---: | :---: |
|  | 1935-36. | 1936.37. |
|  | Cwts. | Cwte. |
| Farianosous foods ${ }^{\text {a }}$ - | 9,505 | 10,645 |
| Canned or bottled fruits | 6,770 | 8,472 |
| Oonfeotionery - | 5,660 | 6.826 |
| Bistuite and cakes | 5,842 | 6,602 |
| Jams and jellies | 3,524 | 3,512 |
| Tinned or Canned fish | 3,447 | 3,382 |
| Brcon and hams | 2,897 | 3,361 |
| Cherese | 2,180 | 2,670 |

| Vegetable products . . . | ${ }^{362}$ | 430 |
| Other sorts'. | 17,695 | 18,317 |

Tea.-Imports of tea, amounting to $1,025,587 \mathrm{lbs}$. valued at Rs. $4 \cdot 90$ lakhs showed an appreciation of 159,294 Ibs. in quantity and Rs. 79,310 in value. Receipts of green tea (intended mostly for Afghanistan markets) from Japan at $801,419 \mathrm{lbs} .(+64,543 \mathrm{lbs}$.$) and China at 205,867 \mathrm{lbs} .(+103,198$ lbs.) formed the bulk of the imports and accounted for the increase. Black tea mainly from Ceylon, on the other hand, registered a further decline by $7,434 \mathrm{lbs}$. to $15,433 \mathrm{lbs}$. in quantity and Rs, 3,077 to Rs. 11,239 in value. Owing to a greater demand for Darjeeliag and Nilgiri Indian grown teas, Ceylon has, as noticed in recent years, been gradually losing ground in the Indian market.

Foreign Imports, (Mineral oils.)
8. Ciass IL.--Raw materials and produce and articles mainly unmanufactured.
Mable No. 9.
Mineral oils.

Mineral Oils.-Total imports of kerosene oil (foreign and Indian) exhibited a drop of 6.5 per cent in quantity and 7.5 per cent in value: the net decrease in the total imports ( -1.5 million gallons) is made up of Russian kerosene ( -2.5 millions), Roumanian Kerosene ( $-0 \cdot 2$ million), Iranian kerosene ( +0.5 million) and Burmese Kerosene ( +0.7 million). The very large reduction in the imports of Russian and the disappearance of Roumanian kerosene altogether is ascribable to varions causes: at the opening of the year under report, very large stocks of kerosene were on hand; this coupled with the fact that there was some reduction in up-country demand and the Southern Punjab and the United Provinces markets were being largely supplied from Bombay, explains the drop in the imports of European kerosene to a considerable extent. Moreover, as the year advanced, there were rumeurs of delayed shipments and lack of freight facilities to Indian ports from European oil producing countries; these obstacles did not affect the Iranian and Burmese products where regularity of output and supplies was maintained; accordingly the kerosene from these countrics (particularly from Iran) made substantial headway in the markets served by Karachi. Large quantities of petrol also arrived from Iran while a reduction was noticed in receipts from Burma. On the whole there was an increase of $1,311,286$ gallons of petrol, attributable to general increase in consumption. Fueb oil came in smaller quantities owing to restricted purchases. Iran sent more than in the previous year, but supplies from British Borneo vanished. The decrease under lubricuting oil occurred in receipts mainly from the United Statrs of America and also from the United Kingdom.

Coal.-Coal is imported here mainly for bunkering purposes. The total receipts of foreign coal decreased from 42,423 tons to 35,665 tons and its valte from Rs. 6.21 lakhs to Rs. $5 \% 5$ lakhs, as several of the outgoing steamers which went fully loaded with cargoes of merchandise did not take their normal provision of coal from here. The sources of supply this year were the Union of South Africa ( 21,90 tons), Germany ( 12,720 tons) and the United Kingdom ( 1,045 tons). Imports of Bengal coal amounted to 57,748 tons valued at Rs. 8.13 lakhs, a decrease of 4,912 tons in quantity and Rs. 0.97 lakh in value.

## 9. Class III.-Articles Wholly or Mainly Manufactured.

Cotton piece-goods.-The total imports of cotton piece-goods contracted by 15 per cent in quantity and 11 per cent in value compared with the previous yoar. Receipts from the United Kingdom amounted to $127 \downarrow$ million yards valued at Rs. 2,31 lakhs, showing a decrease of 19 per cent in quantity aud 15 per cent in value while those from Japan accounted for $58{ }_{4}^{3}$ puillion yards valucd at Rs. 82 lakhs, showing a decrease of 5 per cent both in quantity and value. In spite of the reduction in the duty, the United Kingdom products have not been able to capture the markets which they held till comparatively recently and the prices have remained largely beyond the reach of the Indian purchaser. In the early part of the year, the market was steady and eventless but in the latter months, with the upward trend of cotton prices, both Lancashire and Japanese rates advanced appreciably. The volume of business, however, suffered, as the high level of prices was considered uncertain and dealers lesitated to carry large stocks. The IndoJapanese Trade Agreement expired on the 31st March 1937 but arrangements were made for its reuewal.

Grey Goods.-Grey goods arrived from the United Kingdom and Japan, the latter being, as usual, the chief supplier. Compared with the previous year, the value of imports from Japan recorded a decrease of Rs. 4:86 lakhs to which longeloth and shirtings contributed Rs. 3.55 lakhs and drills and jeans Rs. 094 lakh; and the imports from the United Kingdom were down by Rs. 0.97 lakh, to which bordered dhuties contributed Rs. 0.70 lakh and jaconets Rs. 025 lakh, the reason in both cases being the increased production of Indian cloth which was able to satisfy domestic requirements.

White Goods.-The share of the United Kingdom (the chief supplicr) further receded from 82 per cent to 80 per cent of the total yardage imported: longcloth and shirtings and mulls were the chief varieties affected ; the other descriptions adversely affected were nainsooks, dhuties, saris and scarves, and drills and jeans. Embroidered allovers from Switzerland came in larger quantities. The share of Japan slightly advanced from 17 per cent to 18 per cent but the actual quantity imported fell short of the previous year's supplíes by 21 . million yards, mainly in longcloth and shirtings. As in the case of grey goods, the grosith of Indian mill industry was mainly responsible for the fall in the imports of eloth under this head.

Coloured Goods.-Imports of colotred groods depreciated in quantity from 60 million yards to $52 \frac{3}{4}$ million yards, to which the United Kingdom contributed 63 per cent and Japan 34 per cent as against 71 per cent and 28 per cent respectively, in the previous year. The total yardage reeeived from the United Kingdom shrank by $9 \frac{1}{2}$ million yards while that from Japan appreciated by $1 \frac{1}{2}$ million yards. The increase in the imports from Japan was in spite of direct shipments to Mekran and Baluehistan of goods intended for those markets but which used formerly to go through Karachi. The decline in imports from the United Kingdom occurzed under all the three heads, viz., printed, dyed and woven coloured, the first head showing the greatest falls due to keen competition from Japan. The principal descriptions which contributed to the decrease were shirtinge, printed, dyed and woven coloured and cambrics, printed and dyed.. Receipts of Italian cloth and sateens from the United Kingdom, on the othor hand, showed some improvement. The increase of imports from. Japan occurred mainly under printed drills and jeanṣ.

An interesting feature of the import trade in textiles with Japan, was the abnormal increase in receipts of cotton handkerchiefs in the piece for which no quota certificates were required. The total number of handkerchiefs in the piece from Japan which in $1935-36$, stood at 728,844 valued at Rs. 1 (0) labhs rose during the year under report to $3,670,077$ valued at Rs. 544 lakhs.

Woollen Goods.-The continued rise in prices of wool was well brought out by the increase in the total value of imports of yarn and knitting uool from Rs. 2190 lakhs to Rs. 23.06 lakhs, i. e., by 5 per cent, in spite of a decline in quantity from $1,339,240 \mathrm{lbs}$. to $1,209,481 \mathrm{llss}$., $i$. e., by 10 per cent. Japan continued to maintain its recently acquired leading position and its shave rose from Rs. 1792 lakhs to Rs. 19.78 lakhs, while imports from the United Kingdom declined from Rs. $2 \cdot 31$ lakhs to Rs. $2 \cdot 23$ lakhs. Imports of woollen piece-goods at I million yards valued at Rs. 19.76 lakhs showed a set back
of $333 ; 000$ yands in quantidiy and Rs. 0.04 lakh in value. The share of the United Kingelom amounted to 636,081 yands ( $-138,29$ a yards) while that of Japan was 291,626 yardsy (-219, 273 yards), the larger fall in the latter indicating that Japanese goods have not been very pepular -with cousthuers. Germany on the other hand was able to dincrease her supplies by Rs. 0.93
 system of barter कebates. Blankets, consisting mainly of cheap augs from Italy, àclinea in vodue finom Rs. 7.84 lakhs to Rs. 5.95 ladchs; Japan inqueved her total pesition ander this, heat to 褱s. 0.53 lakh, i.e., an increase of Tss. 0. 19 lakkh.

Sille-Imports of silk vere valued at Rs. $5 \cdot 76$ lakhs, a decrease of Rs. I-58 lakhs, which occuryedwin receipts of yarn from Sapan, Italy and the Winted Kingdom, piece-goods fom Goughoig, and goods of silk mived with other materials fivem Japan.

Adtificial Sillw. The turn over of impert trade jn, grtificial sill goeds showned no vecovery and teceipts of piece-goods of pure artificial silk (the chief item wader this liead, mainly from Japan) deckined from Rs. 805 ilaklis to Iss. 6.68 lakhs. Puechases continued to be made througli Bombay and that affected the imperts here ; the dechine was fucther accentuated by the fact that goods intended for Mekan and Baluchistan are now being sent direet to those phaces. Fmperts of goods of artificiai sitk mixed with other nuterials aiso decreased further by Rs. $1 \cdot 11$ Jakhs to Rs. $4 \cdot 29$ lakhs, mainly in arrivols firem the United Kingdom which at Rs. 0.60 lath showed a fall of Res. 1.62 dakis. Germany's supplies liowever rose from Rs, 0.58 lakh te Ths. 1.d2 !aichst.

Iron and Steel.-Compared with the previous year there was a sharp deeline in the imports of iron and steel, but compared with the figures for 1931-32 to 1934-35, the imports appear to be in normal quantities. Last year the imports were abnormally high and large stocks were carried over, in anticipation of rising prices following the hostilities between Ethiopia and Italy. An important factor contributing to the decrease in imports during the year under review was the sudden increase in the demand for European re-armament purposes, which caused a shortage of raw material, an increase in prices and a consequent restŕiction of supplies.

The total receipts amounted to 58,172 tous valued at Rs. 82.31 lakhs showing a decrease of 15,652 tons or 21 per cent in quantity and Rs. $24 \cdot 35$ lakhs or 23 per cent in value; the decrease was chiefly in receipts from Germany and the United Kingdom. Belgium was the largest supplier, with a share of 15,277 tons as against 16,772 tons last year, while Germany, coming next, sent only 14,960 tons ( $-9,098$ tons) ; the receipts from the United Kingdom, with the large expansion in its home demand, amounted to 14,151 tons ( $-5,441$ tons). Despatches from other countries also registered a fall, the only noticeable exceptions being the United States of America and France which sent 1,524 tons ( $+1,429$ tons) and 5,809 tons ( +865 tons) respectively, The bulk of the decrease was under tubes, pipes and fittings, wrought, from Germany ( $-5,944$ tons) and the United Kingdom ( $-2,890$ tons); the drop was accelerated by a fall in the discounts allowed, during the latter part of the year. Tinned plates recorded a huge curtailment in supplies by the United Kingdom from 2,323 tons valued at Rs. 6.48 lakhs to 70 tons valued at Rs. 0.24 lakh, due to the fact that practically the entire domestic requirements are now met by the works of the Indian Tinplate Company. Other noticeable decreases occurred under galvanised plain sheets mainly from Belgium, Japan and the United King. dom, hoops and strips mainly from Belgium and France, nails, rivets and washers mainly from Germany and Belgium, and fencing material mainly from Germany, while an increase was recorded under beams, channels, etc., from France, the United Kingdom and Belgium. Of the total quantity ( 58,172 tons) of iron and steel imported during the year, 33,135 tons paid the protective duties.

Other Metals.-A remarkable advance in the price of copper led to the value of its imports xising from Rs. 6.97 lakhs in 1935-36 to Rs. 8.50 lakhs ( + Rs. $1 \cdot 53$ lakhs) by 22 per cent while the quantity advanced from 22,854 tons to 23,474 tons ( +620 tons) by 2.7 per cent only. Receipts of copper sheets, mainly from Germany, appreciated by Rs. $1 \cdot 12$ lakhs to Rs. 685 lakhs in value but contracted by 267 tons to 19,161 tons in quantity. Another important article which showed a considerable drop was mixed or yellow metal for sheathing, from the United Kingdom and Germany.

| Other sorts | 11.61 | 15.93 | 14.74 | $19 \cdot 28$ | 17.30 |
| Total | 1,1276 | 1,27.16 | 1,02-17 | 1.01 .97 | 1,14.65 |

Machinery.-.The total value of machinery imported increased by Rs. 12:68 lakhs to Rs. 1,14.65 lakhs which is attributed to the greater buying power of the provinces served by the port of Karachi due to improved agricultural conditions and the beginnings of industrialisation, particularly after the constitution of the North Western Frontier and Sind as separate Governor's provinces. The increase was most noticeable in receipts of electrioal machinery mainly from the United Kingdom and Germany, which expanded by Rs. 10.49 lakhs to Rs. 33.36 lakhs and textile machinery, mainly from Switzeriand and Germany, which expanded by Rs, 8 lakhs to Rs. 16:15 lakhs in value. Arcivals from the United Kingdom under the latter item (of which it was the largest supplier) at Rs. 3.81 laklus showed a decline of Rs. $1 \cdot 13$ lakhs as compared with the previous year. The improvement under mining and sugar machinery was due to the extension of the connected activities in India. The decrease under prime-movers (other than electrical) was accounted for by reduced arrivals of railway locomotive engines and tenders and parts from the United Kingdom. Oil engines from Germany, on the other hand, showed a rise due mainly to importations of Diesel engines for the electric undertakings incorporated during the year and for extensions to those already in the field. The contraction under sewing and lnitting machones both from the United Kingdom and Germany was due, to some extent, to the reduced demand following the Quetta earthquake. The fall in the case of Germany was not so marked as in regard to the United Kingdom, because the b"arter system of discounts introduced in the former gave some impetus to imports from that country by reducing the landed cost of the goods.

Cutlery, hardware, implements and instruments.-The total value under this group amounted to Rs. $1,01 \cdot 31$ lakhs, an increase of Rs. 2.62 lakhs, which was accounted for by larger arrivals of telegraph and telephone
instruments and apparatus pud wireless apparatus from the United Kingdom. Receipts of the latter (ryom the United States of America also showed an inerease. On the othier hand, cinema films from the United Kingdon, electric bulbs from the Nethertands and Japan and metal lanups from the Unitecl States of Ameriea cqme in smaller quantities.

Chemicals, drugs and medicines.-Imports at Rs. 46.66 lakhs showeed a decrease of Rs. 2.55 laths mosthy under caustic sodu from the | Jnited King |
| :--- | dom which sufferecl to some extent on account of larger receipts of cheap setid caustic seda frem Jraman. Trade with the United States of America in eaustie soda-assumed its nermad propertions after diversion to the United Kingdom in $1935-36$, with the resultethat arrivals from that country slowed an impyevement. Ap ingeense was also noticed in imports of sodium carbonate from the United Kingdom which is attwibuted partly to speculative buying due to nusettled international velations and partly to in increased dennand leth for industriah and washing purposes.

Foreign Imports.

Vehicles.-The imports of motor cars increased from 839 valued at Rs. 16.74 lakhs to 904 valued at Rs. 18.49 lakhs. The United Kingdom with an increase of 26 cars in number and Rs. 0.76 lakh in value was, as usual, the chicf supplier, although its share in the total trade fell from 82 per cent in 1934-35 and 78 per cent in 1935-36 to 75 per cent during the year under report. Supplies from the United States of America and Germany also recorded an increase while Italy from where imports had entirely ceased in the previous year, sent 6 cars valued Rs. $0 \cdot 12$ lakh. Receipts from Bombay amounted to 272 cars as against 267 last year. The increase in the imports of motor cars is due, to some extent, to the public preference for the small ear which is reflected in a reduction in the number of motor cycles imported. The continued fall in arrivals of motor omnibuses, vans and lorries was due to complete cessation of despatches from Canada and a decline in receipts from the United Kingdom. Whilethe number of vehicles from the latter country went down by 52 per cent, their value fell by 66 per cent, indicating that the vehicles received from that country were of the lighter type. Imports from the United States of America, the largest supplier, at 310 as against 311 in the previous year, showed little change while those from Bombay amounting to 297 recorded an increase of 85 . The upward movement in the cycle trade which has continued without interruption since 1931-32, broke a fresh record and the number of cycles received went upto 39,251 valued at Re. $11 \times 18$ lakhs, to which the United Kingdom alone contributed $36,843(+11,138)$ valued at Rs. 10.94 lakhs (+Rs. 3.37 lakhs). Japanese shipments, however, fell from 2,497 valued at Rs. 0.27 lakh to 2,176 valued at Rs. 0.18 lakh.

Other Articles.-The total value of imports of apparel increased by Rs. $1 \cdot 48$ lakhs to Rs. 11.87 lakhs, notably in receipts of second-hand clothing from the United Kingdom and the United States of America. The value of boots and shoes amounted to Rs. $1 \cdot 18$ lakhs showing a contraction of Rs. 0.25 lakh owing to reduced supplies of leather footwear by the United Kingdom and rubber-soled footwear by Japan. Imports of dyes and colours remained depressed, the total value further receding from Rs. 26.61 lakhs to Rs. 25.72 lakhs, chiefly in receipts of coal-tar dyes from Germany. A large carry over of unsold stock from the previous year deterred importers from making fresh purchases on any extensive scale. The value of glassware and earthenware amounting to Rs. $18 \cdot 48$ lakhs recorded a decline of Rs. 1.49 lakhs due mainly to a reduction in supplies of soda water bottles from Japan. Imports of paper, pasteboard and stationery appreciated in value by Rs. 0.73 lakh to Rs. 35.02 lakhs, the increase being accounted for by larger arrivals of old newspapers from the United Kingdom. Increases were also recorded in receipts of writing paper ( + Rs. 0.33 lakh) mainly from Germany and Norway, pasteboard, millboard and cardboard ( + Rs. 025 lakh) from Germany and stationery ( + Ra. 0.07 lakh) from Japan. Decreases were noticed in receipts of packing paper (-Rs. 0.38 lakh) from Sweden and printing paper (-Rs. 1.03 lakhs) from Sweden and Finland. The total value of imports of rubler manufactures declined from Rs. 43.92 lakhs to Rs. $37 \cdot 17$ lakhs; a major portion of the imports, viz., Rs. $23 \cdot 17$ lakhs (-Rs. $7 \cdot 05$ lakhs) was accomited for by pneumatic motor covers. The United Kingdom was, as usual, the largest supplier of this article, but its shipments declined from Re. $25 \cdot 11$ lakhs last year to Rs. 20.60 lakhs owing to the fact that some rubber companies have set up factories in India. American and Canadian tyres
continued to lose ground owing to the preference accorded to the United Kingdom product while the supplies from Japan contracted by Rs. $0 \cdot 47$ lakh to Rs. 1.34 lakhs. Receipts of solid rubber tyres entirely from the United Kingdom appreciated by Rs. 0.16 lakh to Rs. 0.45 lakh. Imports of cement rose from 1,472 tons to 1,976 tons in quantity and Rs. 0.96 lakh to Rs. 0.99 lakh in value, both Japan and the United Kingdom contributing to the increase. Due to extensive advertising, more and more of this material is being now used for constructional purposes. Quantitatively, Japan nearly doubled its supplies as compared with the previous year, owing to the cheapness of its product which is used chiefly in tile making. Imports from the United States of America showed a slight decrease.

## 10. Class V.-Postal Articles and Baggage not Specified.

Postal Articles.-Figures for gold and silver thread, cinematograph films, jewellery, precious stones and cigarettes imported by post are included under their relative heads in the general imports. The value of other articles imported by post further decreased by Rs. 0.75 lakh to Rs. 29.79 lakhs, to which the United Kingdom contributed Rs. 26.99 lakhs. The number of parcels and letter packets dealt with was 77,039 and 45,581 as against 77,302 and 58,722 respectively in the previous year. The total amount of import duty realised on all articles imported by parcel post remained more or less the same as in the previous year, viz., Rs. $8 \cdot 79$ lakhs while that on letter packets rose from Rs. 0.93 lakh to Rs. $1 \cdot 14$ lakhs.

Baggage.-Figures for baggage (other than arms and ammunition) passed free are not recorded while those for arms and ammunition, and dutiable wireless sets, instruments, apparatus and appliances, liquors and spirits, furniture, carpets, jewellery, silverware, platedware and vehicles are included under their relative heads in the general imports. The value of other dutiable articles imported as baggage amounted to Rs. 0.86 lakh, of which arrivals from the United Kingdom, Gulf ports and Iraq accounted for Rs. 0.37 , Rs. 0.21 and Rs. 0.12 lakhs respectively.

## Exports.

## Indian Produce and Manufactares.

11. Agricultural Conditions.-As the bulk of the export trade at Karachi consists of agricultural produce, a brief revinw of the weather conditions during the year and of the area and yield of the prineipal cropsin Sind and the neighbouring provinces is given below.

Sind.-According to the information supplied by the Chief Engineer in Sind, the Lloyd Barrage and the new canals continued to work quite satisfactorily during the year 1936. The inundation season was most favourable for the inundation canals in Upper Sind but not for those in Lower Sind, below Pinyari canal, on account of scour in the bed of the river. The Fuleli and Pinyari canals--two of the most important canals in the luower Sind-inad a very good year.

The area under cotton, the chicf kharif crop, is estimated at 976,000 acres which is 16 per cent above the area of the last year. The increase is chiefy attributed to the availability of assured water supply and the enhanced interest taken by zamindars in cotton growing on account of its greater profit yielding capacity. The yield is estimated at 433,000 bales, au increase of 26 per cent over the previous year's yield of 343,000 bales. The crop was damaged by jassid and red-leaf blight to varying extents at a few centres.

In the rabi season, the area under wheat was curtailed owing to low and brief inundation and scanty rainfall. The crop is reported to be in fair condition, except in Larkana and Upper Sind Frontier Districts where it was adversely afiected by hailstorm. The showers received in the second week of Fobruary proved beneficial to the crop.

The Punjab.-The conditions were generally favourable for khanif sowings. Light rain fell during April, while the month of May was dry except for light showers in some places. The monsoon burst in the second week of June which was earlier than usual. These rains were good throughout the Province except in a few westeril districts where the fall was light. Supplies in canals were sufficient. The area under cotton was reported to be $3,692,000$ acres which is 5 per cent above the area of last year. Supplies of water from canals were also sufficient for maturing the crop and the yield is estimated at $1,746,000$ bales as compared with $1,565,000$ bales last year, or an increase of 12 per cent.

In the rabi season, except for light showers at places, the weather during October and November was dry. Supplies of water from canals were sufficient at sowing time and a larger area was put under wheat than in the previous year. The rainfall in Febritary was above normal. Rain received in March proved beneficial. The crop was damaged by hailstorm to a considerable extert in parts of some districts. Rust and smat attacks are also reported from some places. The yield is expected to be ahove normisl on irrigated and below normal on mirrigated areas.

The United Provinces.-Sowing of cotton generally commenced all over the province in very good time under favourable conditions. Contimous and heavy rains in most districts during July and August adversely affected the cotton crop, specially in low lying areas. Further hoavy rain in many districts during September accentuated the damage locally. The first three weeks of October were practically rainless, but there was general rain in the fourth week. The area under cotton is reported to be 695,000 acres which is 17 per sent above the area of last year. The yield is estimated at 174,000 bales as eompared with 195,000 bales last year or a decrease of 11 per cent. Ample moisture in the soil helped the rali sowings, Germination of wheat is reported to have been good. General rain was received in the last three weeks of February. Damage by haistorm and frost is reported from a number of districts, the loss being considerable within localised areas. The condition of the crop is, on the whole, reported to be good and the outturn is estimated at about 80 per cent of the normal.

The following table gives the area and yield of the three most important crops in Sind, the Punjab and the United Provinces for the past two seasons,
the figures being taken from the crop. Eeports pullished by the Divectors of Agriculture for these provinces :-

Foreign Exports.
(Wheat.)

Wheat.-Disasters to crops of North American spring wheat and in Argentine, together with other factors, induced principally by uncertainties in international relations, combined to create a strong position in the wheat market from which India benefited considerably; the exports through Karachi in 1936-37 were accordingly the highest since 1927-28. The exports would probably have been even higlier had it.not been for the huge carry-over of Camaian stocks which were made available during the year. Indian wheat prices came into parity with the world prices from June 1936 onwards, about which time exports of wheat actively commenced. The total quantity exportm in $1936-37$ monnted to 249,079 tons, of which the United Kingdom took 209,256 tons.

The local price of white wheat' which opened at Rs. 2-15-6 per maund on the lst April 1936 remained easy till the 26th May when it declined to Rs. 2-13-9; this proved to be the lowest quotation of the year. The price then hardened and rose, with slight fluctuations, to Rs. 2-15-4 on the 24th June, Rs. 3-3-7 on the 28th July, Rs. 3-9-1 on the 5th August, Rs. 3-10-9 on the 22nd September, and Rs..3-12-6 on the 13th October, representing the highest figures for those months. The month of November did not record any rise and the price actually fell on the 10th of that month to Rs. 3-8-0. Subsequently there was a recovery and it rose to Rs. 4-1-7 on the 5th January 1937. The remaining months did not show any marked variations and, after falling to Rs. 3-13-10 and Rs. 3-13-4 on the 2nd and 9th February, it rose firmly to Rs. 4-0-6 on the 16th March and Rs. 4-5-0 on the 30th March. The last quotation was the highest during the year and appeared to show that the prices were gradually approaching 1929 levels.

Wheat Flour.-The increase under this head was due to a better demand from Aden and Arabia.

Barley.-Owing to smaller crop in Argentine, India supplied the deficiency and exports through Karachi rose from 3,494 tons valued Rs. $2 \cdot 10$ lakhs in 1935-36 to 9,738 tons valued Rs. 6.38 lakhs, of which the United Kingdom, the chief purchaser, took 4,783 tons valued Rs, 3.14 lakhs. Belgium and the Irish Free State which had taken nothing in the previous year also came in for a share of 1,384 tons valued Rs. 0.00 lakh and 3,459 tons valued Rs. 225 lakhs respectively.

Other Food Grains.-A strong fillip was given to the exports of gram after the set-back noticed in the previous year, by the heavy purchases made by France. Compared with 1935-36, the total quantity exported amounted to 18,803 tons ( $+16,301$ tons) valued Rs. $16 \cdot 29$ lakhs ( + Rs. $14 \cdot 30$ lakhs), of which France alone took 16,672 tons, valued Rs. $14 \cdot 56$ lakhs. The United Kingdom, Aden and Ceylon curtailed their requirements. Shipments of rice increased as a result of better demand from the Gulf ports and Aden which took 24,168 tons valued Rs. $24 \cdot 97$ lakhs and 2,051 tons valued Rs. $2 \cdot 14$ lakhs against 21,538 tons valued Rs. 23.55 lakhs and 363 tons valued Rs. 0.42 lakh respectively, in the previous year.

Miscellaneous.-The total value of fruits and regetables, the most importantitem in this group advanced from Rs, 10 b0 lakhs to Rs. 17.28 lakhs, owing mainly to increased purchases of dried fruits by the United Kingdom amounting to Rs. $11 \cdot 49$ lakhs ( +6.75 lakhs).

Cotton.-THe quantity of cotton exported in 1936-37 at 395,684 tons, broke a fresh record ovee the previous year's figute of 255,416 tons, while
 Conpared with 1930-36, the area ander cotton in Sind and the Punjab was greaties duang 1936-37 ly 132,000 aces and 1733,000 acves respectively; the consequentiad juerease in output-which was 96 per cent in Sind and 12 per cent in the Pungats-aturally improved the export of cetton from Karachi, which is the chief pert for these two provinces. Moreover the year was
 reorganising its interual conditions and there was at the same time a general imprevement in the textide industry the world over; futher, the "Sind Desi" variety of cetton was especially in demand for mixing with wool, as the price of the latter reached a considerably high revel; all these factors centriduted towards improving the deuand for Indian cetton and the export of it from Kamachin accordingly reached very satisfactory dimensions. The shate of the United Kingdem in the total guantity cepported increasca from $23 \cdot \frac{3}{3}$ per cent last year to $27 \cdot \$$ per cent and that of Japan, "tue to forward bookings at lower rates, from $3 \mathrm{~A}^{\circ}$ per cent to 35.3 per cent. Germany took less but this was efiset to some extent by the larger quantities sent to Belginum.
TABLE No. 21. Wool.

Wool.--The improvement in the raw wool markets noticed in 1935 was continued and there was a keen demand with an upward tendency of prices, with the result that exports of Indian wool which were the highest since $1929-30$ showed a further expansion by 17 per cent in quantity and 49 per cent in value compared with the previous year. The $1935-36$ wool. clips were disposed of without difficulty and developments after the opening of the 1936-37 wool selling season showed general progress. The British takings rose by 24 per cent in quantity and 58 per cent in value, due to the increased activity in the wool textile industry in that country, while the American purchases declined in quantity (though not in value) owing to the reported diversion of business to the Liverpool market.

[^19]TABLE No. 23.
Hides and Skins, Raw.

Raw hides.-Strengthened by Europeau reamament and better exchange facilities, the traxie in hides continued to be active; the raw hides exported increased by 714 tons in guantity and Rs. 426 lakhs in volue, notably in shipments of cow hides to Germany, Greece, the Uvited Kingdom and Egypt, valued at Rs. 6, 1•77, $1 \cdot 59$ and $1 \cdot 29$ laklis respectively and buffalo hides to Greece, valuet Rs. 1.29 lalkhs. Despatches of cow hides to Spain deckined from Rs. 2.34 lakhs to Ris. $0 \cdot 26$ lath owing to eivil war in that comntry.

Raw skins.- Shipments declined by 660 tons in quantity dut appreciated loy Rs. 0. 28 lakh in value. Of the total gatantity expertel, viz., 4,944 tons, Goal shins accounted for 4,591 tons and sheep stins for 335 tons.

Phiscelianeous.-The totad valute of experts of bones and benemeal innproved further by Rs. 9.26 lakhs to Rs. 23.01 lalchs, to which bones centributed Rs. $18 \cdot 77$ lakhs and bonemeal Rs. 4.84 dakhs. Benes were largely puxchased by Belgium (Rs. 12:35 lakhs), Germany (Rs. 405 Takhs), Netherlands (Rs. 0.63 ladh) and France (Rs. 0.53 lakh), and bonemeal by the United Kingdem (Rs. $1 \cdot 49$ Jakhs), Ceylon (Rs. $\mathbf{1 - 4 8}$ Tokdis) and the United States of America (Rs. 1.27 lakks). The value of razo sild fell from 3 . 0.62 lafk te Rs. 0.41 lakh, the United Kingdon being again the latgest purchaser. Exports of chomite (elveme iron ore) declined from Rs. $4 \times 9$ lakhs to Rs. 2.04 lakhs, the prineipals purchasers being Norvay (lias. 1.56 lakhs) and the United Kingdom (Rs. 0. 39 lakh).
16. Class III. Articles wholly or mainly manufactiored. -

Leather.--Experts of leather, the most important article in this class, rose fyom 思s. 178 lakhs to Rs: 232 lakhs, to which dressel shoep shins, to the United Kingdom and Japain contributed IRs. $1 \cdot 22$ lakhs and tonned goat skins aud dressel conv hides, mostly to the United Kingdom, Rs. 0.78 lalkh and Rs. 0.25 lakh respectively.
17. Foreign Merchandise, Re-exported.

The decline in the quantity of foreign wool (mostly Kandahar wool) re-exported, was due to reduced shipments to the United States of America (-518, 660 lbs .). The United Kingdom hovever increased her purchases ( $+10,094$ lbs.), while Germany, which took nothing in $1935-36$, had a share of $132,496 \mathrm{lbs}$., valued Rs. 0.56 lakh. The share of the United Sitates of America and the United Kingdom, in terms of value, amounted to Rs. 13.6 ; lakhs and Rs. 3.54 lakhs as against Rs. $12 \cdot 89$ dakhs and Rs. 2.98 lakhs respectively, in the previous year. The increase under wcollen manufactures, which consisted chiefly of Persiun carpets, was due to larger purchases by the United Kingdom. Raw skius, mainly comprising Persian lamb skins, were exported almost wholly to the United Kingdom. Large shipments of sugar to Somaliland Trotectorate (which had taken nothing in the previous year) at Rs. 3.66 lakhs, and Aden at Rs. 2.25 lakhs ( + Rs. $2 \cdot 18$ lakhs) accounted for the increase under that head. Exports to Arabia, on the other hand, declined from Rs. $2 \cdot 08$ lakhs to Rs. $1 \cdot 44$ lakhs. The expansion under metals and ores was due to larger despatches of old iron and steel to Japan. Dried fruits formed the main item under exports of fruits and vegetables, to which the United Kingdom alone contributed Rs. $1 \cdot 06$ lakhs ( + Rs. 0.88 lakh).

## IMPORTS.

Indian Merchandise.-Cotton yarn and piece-goods and cigaretles were imported mainly from Bombay, coal, iron and steel and gunny bays from Bengal, mineral oils and timber from Burma, cement from Kathiawar, matches from Bengal and Burma, groundnuts from Kathiawar and Bombay, copra from Travancore and Madras, fruits and vegetables from Kathiawar, Bombay and Madras, provisions and. oilnbers stores from Bombay, Madras and Kathiawar and spices from Travancore, Madras and Bombay.

Foreign Merchandise.--Imports of cotton ywrn and plece-goods, cigarettes, molor cars and molor lorries were mostly from Bombay.

## EXPORTS.

Indian Proluce and Manufactures.-Gram and raw hides and skins were exported largely to Madras, salt to Bengal (119,516 tons) Jovari and Bajri to Cutch and Kathiawar, pulse to Madras, Cutch and Kathiawar, rice to Bombay, Cuteh and Kathiawar, wheat to Bombay ( 99,441 tons), Bengal ( 15,719 tons), Madras ( 2,592 tons), Burms ( 1,845 tons), Cutch ( 2,763 tons) and Kathiawar ( 443 tons), wheat flour to Madras, Bombay, Burma, Bengal, Kathiawar and Portuguese ports, fish to Burma and Bombay, seeds to Kathiawar, Bengal, Madras, Bombay and Cutch, cotton to Bombay ( 26,345 tons), Madras ( 14,147 tons), French ports ( 1,027 tons) and Bengal ( 897 tons and fodder to Bombay, Cutch, Kathiawar, Madras and Portuguese ports.

Foreign Merchandise.-Carriages and carts went mainly to Bombay, sugar to Baluchistan, dried fruits to Bombay and Madras, kerosene oil to Cutch and Kathiawar and cotton piece-goods to Bombay and Baluchistan.

## SUBORDINATE PORTS.

22 Keti Bandar, Sando Bandar and Shahbandar.-The total value of the entire trade of these three ports, which is confined to the coasting trade, further declined from Rs. 3.51 lakhs to Rs, $3 \cdot 16$ lakhs, to which Keti Bandar contributed 69 per cent, Sando Bandar 9 per cent and Shahbandar 22 per cent. Rice is the chief article of trade. Keti Bandar, Sando Bandar and Shahbandar respectively exported 255 tons, 251 tons and 708 tons of rice to Cutch. Keti Bandar also exported firewood of the value of Rs. 15,151 to Cutch, Rs. 19,353 to Kathiawar and Rs. 1,878 to Karachi while Shahbandar sent Rs. 1,867 and Rs. 144 worth to Kathiawar and Cutch respectively.

Table showing the number of vessels, other than country craft, of each nationality that entered the port of Karachi.

Shipping.-The average tonnage per steamer entered and cleared in the foreign trade rose from 2,962 tons to 2,996 tons. The sailing vessels engaged in the foreign trade were country craft trading with the ports in the Persian Gulf and Arlen.

Freight.-A dull market with meagre bookings was the main feature of the first quarter of the year. The rate. to the United Kingdom on a wheat basis (i.e. per 18 cwt .), which opened at 21 s . on the first April continued to remain the same until the second week of May when it declined to $20 s$. Thercafter it fluctuated between 18 s . and 20 s . up to the third week of August when it rose to $22 s$. The succeeding months witnessed a progressive improvement in the market up to the first week of January when the ruling rate rose to $36 s$. There was a slight relapse in the second week but this was followed by a rise in the third week when the ruling figure was again 36s. Substantial bookings in the beginning of August led to a scarcity of liner tonnage for near shipments, which, however, was remedied by the additional tomnge made available. Bookings continued with slight variations to be good up to the end of December when they showed a tendency to slacken. The rate registered a fall in the fourth week of January which continued progressively till it reached $29 s$. in the third week and 26s. in the fourth week of February. The reduction in rates led to fair bookings for cotton in March and the year closed on an active tone in the market. The rate which appreciated to 29 s . in the first week of March stood at 33s, on the 31st of that month. The rates for rapeseed were $1 s$. below those for wheat.

## TRAFFIC BY AIR.

24. The following aircraft services wero regularly in operation to and from Europe-India-Australia and the intervening countries:-
(1) London-Karachi-Singapore-Australia (Bi-weekly)-
(2) Paris-Karachi-French Indo-China (Weekly)-
(3) Amsterdam-Karachi-Dutch East Indies (Bi-weekly).

Altogether 612 aircrafts, including 7 Government flying boats and 2 French Government planes, called at Karachi Air port in 1936-37 as against 560 in 1935-36, an increase of 9 per cent. There were several private flights to and across India by persons of different nationalities, i.e., British, British Indian, French, Austrian, Czechoslovakian, Dutch, German, Philipino, American, New Zealand and Latvian. A notable event of the year was the conversion of the weekly London-Karachi-Australia service into a bi-weekly service.

## INTRODUCTORY.

1. The report for the yerf $1937-38$ is issued in a revised fopm approfed. by the Centrat Boand' of Revenue, the aim being to give information in a clearer and mexe acceptable form tilan has been the case in the past. It is divided into twe parts. Pant If devoted to a general weviery of the trade of Sind. Part II provides a series of statistical tables and appended to them will be found explanations setting out the causes of statistical wariations rappeaxing in the tables. Comparisens have been made with the Ggures for the fous previous years ondy and in the tadle showing the percentage vaciations in the prices of some of the principal commedities, the year $\mathbf{1 9 2 7 - 2 8}$ has been talien as the base year.
2. Commulhities have been dealt with with reference to their importance and value in the trade of the Province, while generad paragraphs in Part I summarise the cemmedities of minor significance, in each branch of trade. Comparisons in the text of this report are with the figures of the previous year, i.e., 4936-37.
3. From the ${ }^{2 s t}$ of April 1937 , the foreign trade tables include trade with Burms, white from the same date this trade has beon semoved from the coasting trade tables. Fer the pucpese, hewever, of afiording some means of comparison, speeial tables have been added under imports and exports showing the trade figures relating te Buma in respect of the mere imporitant commodities during each of the five yerss, 1933-34 to 1937-38.

## PART I.

## GENERAL SUMMARY.

1. In reviewing the conomic situation for the year 1937-38, it will not be out of place to recall to mind the unanimity of the four Custom Houses of British India in the expression of their views on the trend of trade in 193637. Trade in general had shown a remarkable revival, but the most notieeable feature of that revival had been the phenomenal recovery in India's. export trade in comparison with the much slower progress recorded in respeot of her imports. The main intcrest, on the other hand, of the trade statistics of the year under review lies in the gradual reversal of the economic tendencies of 1936-37. The flourishing condition of the export trade was maintained for a short time but with each succeeding month the situation began to deteriorate and by the end of 1937 the outlook became somewhat bleak and chilly. Conditions in the cotton export trade have been stagnant for some months past while prospects are anything but promising in certain other branches of the export trade. On the other hand, the import trade has improved rapidly from month to month during the year under review and the situation at the end of March 1938 is in surprising contrast to the conditions prevalent barely twelve months previously. What are the reasons, for this turning of the scales against exports and in favour of imports during the comparatively short space of one year? A glance at international developments during this period provides an adequate answer to the question. The rapid and widespread recovery in the commodity markets of the wond during 1936 and in the early months of 1937 added substantially to the purchasing power of the Indian people who were thus able to excercise a decisive influence in the recovery of the import trade of the country daring 1937. Unfortunately a wave of speculation swept over the world in the first half of 1937 and was naturally succeeded by a collapse of commodity prices. Events in the political sphere added to the general confusion, and with war raging in Spain and the Far East, piracy rife in the Mediterranean and nations feverishly arming to the teeth against each other, it is no wonder that statesmen and economists talked less about recovery and more about recession, a word which sounded less ominous to the ear than depression. Prices slumped and business activity rapidly contracted, natural results attendant on the disappearance of confidence. India's export trade has suffered heavily by the outbreak of hostilities between Japan and China. The bumper American cotton crop has had an equally diasstrous effect. And with the multiplicity of trade barriers still rampant in Europe it has been impossible for India to seek compensation in that area. Thrown back on her own resources, she has attempted to intensify her industrial development which is the explanation of her record imports of machinery and millwork during the year under review. To prophecy about the trend of trade in the coming months would be rash, but it will not be a sign of temerity to express the hope that 1938-39 will wituess a more even balance between India's exports and imports than has been the case in the two previous years.

The total Sea-borne trade of the Province of Sind during 1937-38 mounted to Rs. $64 \cdot 13$ crores, thus registering an increase of Rs. 6.09 crores or $10 \cdot 5$
per cent., by comparison with the previous year. The walue of tho Foreign trade, including trade with Burma, came to Rs. 45.56 crores, an increase of Rs. 2.78 crores, while the value of the Coasting trade, excluding trade with Burma, was Rs. $18 \cdot 57$ crores, an increase of Rs. $3 \cdot 31$ crores.

## FOREIGN TRADE.

## Imports.

2. General review of import trade.-The total value of private merchandise imported into the Province of Sind from foreign countries, including Burma (vide tables Nos. 1, 6 and 23) was Rs. $19 \cdot 58$ crores, an improvement of Rs. 4 crores or over 25 per cent, as compared with the previous year. The total value of private treasure (gold and silver) came to Rs. 10.55 lakhs, a decrease of Rs. $62 \cdot 64$ lakhs or nearly 86 per cent. The increases under merchandise occurred under almost all the main heads, but the principal articles contributing to it were arms and ammunition ( + Rs. 58.13 lakhs), machinery and millwork ( + Rs. $56 \cdot 30$ lakhs), cotton manufactures ( +Rs . 49.96 lakhs), metals and ores ( + Rs. 43.65 lakhs), vehicles ( + Rs. $43 \cdot 37$ lakhs) and woollen manufactures ( + Rs. $36 \cdot 85$ lakhs).
3. Articles of minor value or importance.-Variations in the more important articles (vide table No. 6) have been separately commented upon in part II. Among the articles of minor value, the following are dealt with in this paragraph :-

Arms and amnunition.-The increase under this head (+Rs. 58 lakhs) chiefly in respect of firearms and other sorts of arms, occurred in receipts from the United Kingdom and Czechoslovakia. The principal item under wood and timber ( + Rs. $6 \cdot 60 \mathrm{lakhs}$ ) was teak wood from Burma. Under artificial silk ( + Rs. 10.72 lakhs), imports of piece-goods of artificial silk (the chief item, mainly from Japan) appreciated by Rs. 482 lakhs to Rs. $11 \cdot 50$ lakhs, wbile imports of goods of artificial silk mixed with other materials, mainly from Japan and Germany, increased by Rs. $4 \cdot 16$ lakhs to Rs. $8 \cdot 45$ lakhs. The improvement in the receipts of silk ( + Rs. $1 \cdot 16$ lakhs) occurred in regard to yarn from Italy and Japan and goods of silk mixed with other materials from Germany. Copra ( $+\mathrm{Rs} .2 \cdot 94$ lakhs) came from Ceylon. Under fruits and vegetables (-Rs. $0 \cdot 87$ lakh), dates, mostly from Iraq, formed, as usual, the main item, although their value decreased by Rs. 3.06 lakhs to Rs. 17.25 lakhs. The value of potatoes, entirely from Itsly, increased by Rs. 2.09 lakhs to Rs. $2 \cdot 97$ lakhs. The expansion in the imports of glass and glasswure ( + R.s. 3.96 lakhs) occurred under bottles and phials from Japan and Czechoslovakia and sheet and plate from Belgium and Czechoslovakia. The increase in the imports of paints and painters' materials ( + Rs. 0.39 lakh ) occurred in respect of blue paint and paints, other sorts. Under dyeing and tanning substances ( + Rs. 340), alizarine dyes, chiefly from the United Kingdom and Germany, declined from Rs. 4.22 lakhs to Rs. 3.71 lakhs, while other coal tar dyes appreciated from R. 7.91 lakhs to Rs. 8.69 lakhs. The expansion in the case of apparel ( + Rs. 0.82 lakh) occurred in receipts of gold and silver thread from Germany aund hats, etc., from Japan and Italy. The chief item under lubberdushery and millinery ( + Rs. 172 lakhs) was lace and embroidery from Italy. The
decrease under soap (-Rs. 0.23 lakh) was due to reduced supplies of household and laundry soap from the United Kingdom and Japan. Imports of tobacco, including those from Burma, appreciated by Rs. 0.84 lakh, cigarettes, mainly from the United Kingdom, showing an expansion of 19,009 lbs. in quantity and Rs. 0.73 lakh in value. Under coal, which is imported here mainly for bunkering purposes, the total quantity of foreign cosl received increased from 35,665 tons to 39,113 tons and its value from Rs. $5 \cdot 25$ lakhs to Rs. 7.23 lahhs; the sources of supply this year being the Union of South Africa ( 28,440 tons), the United Kingdom ( 8,037 tons) and Germany ( 2,636 tons). Imports of Bengal coal amounted to 72,718 tons valued at Rs. $12 \cdot 08$ lakbs, an increase of 14,970 tons in quantity and Rs. 3.95 lakhs in value. Imports of tea smounting to $662,253 \mathrm{lbs}$. valued at Rs. 3.68 lakhs, showed a decrease of $363,334 \mathrm{lbs}$. in quantity and Rs. 1.22 lakhs in value. Reduced arrivals of green tea (intended mostly for the Afghanistan market) from Japan amounting to 477,042 lbs. ( $-324,377 \mathrm{lbs}$.) and from China to the extent of $166,900 \mathrm{lbs}$. ( $-38,967 \mathrm{lbs}$.) formed the bulk of the imports and accounted for the decrease. Black tea came mainly from Ceylon, $8,237 \mathrm{lbs}$. ( $-7,196 \mathrm{lbs}$.) valued at Rs. 6,618 (-Rs. 4,621) and Japan, $8,147 \mathrm{lbs} .(+6,704 \mathrm{lbs}$.) valued at Rs. 6,048 ( + Rs. 5,142 ). Arrivals of cement rose further from 1,976 tons to 3,132 tons in quantity and from Rs. 0.99 lakh to Rs. 1.21 lakhs in value, both the United Kingdom and Japan again contributing to the increase. The value of boots and shoes amounted to Rs. $1 \cdot 03$ lakhs, showing a contraction of Rs. 0.15 lakh, due to reduced supplies of leather footwear from Czechosiovakia and rubber soled footwear from Japan.

Baggage.-The figures for baggage (other than arms and ammunition) which was passed free are not recorded while those for arms and ammunition and dutiable wireless sets, instruments, apparatus and appliances, liquors and spirits, furniture, carpets, jewellery, silverware, platedware and vehicles are included under their relative heads in the general imports. The value of other articles imported as baggage amounted to Rs. 0.91 lakh, of which figure arrivals from the United Kingdom, Gulf ports, Iraq, Honkong and Japan accounted for Re. $0 \cdot 34$, Rs. 0.19, Rs. $0 \cdot 14$, Rs. 0.06 and Rs. 0.05 lakhs respectively.

## Exports.

4. Agricultural conditions.-The bulk of the export trade at Karachi consists of agricultural produce, and a brief review, therefore, of the weather conditions during the year and of the area and yield of the principal crops in Sind and the neighbouring provinces (for details of figures see table No. 24 in part II) is given below :-

In Sind, the Barrage and the new canals continued to work satisfactorily. Due largely to the improvements carried out during recent years and also to timely rainfall, the Fuleli and Pinyari canals, two of the most important in the Lower Sind, had a good year. In Upper Sind, the crops were brought to maturity by judicious rotations. The area under cotton, the chief kharif crop, is estimated at $1,049,000$ acres, showing an increase of 6 per cent. as compared with the corresponding estimate of last year. This increase is due, as previously reported, to the availability of assured
water-sapply and the increasing interest shown by zamindars in the cultivation of this crop, as it has been found to be more paying than other main kharif crops. A notable feature of this development is the increase under cultivation of the Sind-American varieties of cotton. The yield is estimated at 394,000 bales as compared with 521,000 bales, the corresponding estimate of last year, a decrease of 24 per cent. The rabi wheat crop, is reported to be in fairly good condition throughout and a favourable yield is expected. In the Punjab, the total area under cotton is reported to be $3,985,000$ acres which is 8 per cent. higher than the area for last year. The increase is attributed chiefly to the high prices received for cotton last year, favourable climatic conditions and a satisfactory supply of canal water at sowing time. The yield is estimated at $1,513,000$ bales as compared with $1,921,000$ bales last year, or a decrease of 21 per cent. Climatic conditions were unfavourable for the sowing of wheat, but its yield is expected to be normal to above normal on irrigated and normal on unirrigated areas. In the United Provinces, sowing of cotton commenced throughout the Province in good time although in a few districts it was delayed on account of insufficient rain. The area under cultivation is reported to be 581,000 acres which is 17 per cent. smaller than the area of last year. The yield is estimated at 197,000 bales as compared with 175,000 bales last year, an increase of 13 per cent. The rabi wheat crop is reported to have been sown in time, but owing to insufficient moisture, irrigation had to be applied in about half the number of districts. The outturn for the Province as a whole is estimated at 88 per cent of normal.
5. Genetal review of export trade.-The value of private merchandise (Indian and foreign) exported from the Province of Sind to foreign countries, including Burma (vide tables Nos. 1, 26 and 34), amounted to Rs. 23.90 crores, a decrease of Rs. 1.50 crores or 5.9 per cent., and that of private treasure (gold and silver) was Rs. 17.29 lakbs, an increase of Rs. 14.49 lakhs, or 5175 per cent. The decrease under merchandise occurred mostly in exports of cotton (-Rs. 4.69 crores) and wool, raw, Indian and foreign, (-Rs. 19 lakhs), but the effect of this on the total exports was countered by increased shipments of wheat ( + Rs. $2 \cdot 45$ crores), hides ( + Rs. $31 \cdot 62$ lakhs) and wheat flour ( + Re. $22 \cdot 23$ lakhs).
6. Articies of minor value or.importance. The principal articles of the export trade and the entire re-export trade (vile table No. 26) have been noticed in detail in Part II. Among the artieles of minor value, the following are dealt with in this paragraph:-

Bones and bomemeul ( +Rs .592 lakhs): the total value of exports namely, Rs. 28.93 lakhs, is made up of Rs. $22 \cdot 98$ lakhs for bones ( + Rs. $4 \cdot 81$ lakhs) which were exported largely to Belgivm (Rs. $15 \cdot 65$ lakhs), France (Rs. 2.71 lakhs), Germany (Rs. 2.50 lakhs) and the Netherlands (Rs. 1:26 lakhs) and Rs. $5 \cdot \% 5$ lakhs for bonemeal ( + Rs. $1 \cdot 11$ lakhs) despatched mostly to Ceylon (Rs. $2 \cdot 31$ lakhs), the United Kingdono (Rs. 1.54 lakhs) and the United States of Ameries (Rs. 1.57 lakhs). The value of exports of fruits and vegetables fell from Rs. $17 \cdot 28$ lakhs to Rs. $11 \cdot 41$ lakhs, due mainly to reduced purchases of dried fruits by the United Kingdom, which came to Rs. 6.49 liukhs (-Rs. 5 lakhs). The chief items under fish exports, Rs. 13.74 lakhs (-Rs. 0.33 lakb), were dry-salted fish (Rs. $6 \cdot 88$ lakhs), mostly to Ceylon, and
dry unsalted fish (Rs. $5 \cdot 42$ hakhs), mostly to Burma. Exports of chromite (chrome iron ore) expanded from Rs. $2 \cdot 04$ lakhs to. Rs. $9 \cdot 19$ lakhs, the principal purchasers being Norway (Rs. 4.34 lakhs), the United States of America (Rs. $2 \cdot 16$ lakhs), Sweden (Rs. $1 \cdot 20$ lakhs) and the United Kingdom (Rs. 0.96 ladh). Despatches of leather decreased from Rs. $2 \cdot 32$ lakhs to Rs. $1 \cdot 98$ lakhs; tanned goat skins, to the United Kingdom, amounted to Rs. 0.79 lakh and dressed sheep skins and cow bides, to the United Kingdom and the United States of America, to Rs. 0.6 l lakh and Res. 0.24 lakh respectively. The value of raw silk exports appreciated from Rs. 0.41 lakh to Rs. 0.73 lakh, the United Kingdom again being the largest purchaser.

## Coasting trade.

7. Imports-(Vide tables Nos.'1, 23 and 36). The value of imports of private merchandise (Indian and foreign) in the coasting trade, exclusive of imports from Burma, amounted to Rs. 8.59 crores, an increase of Rs. 26 lakhs or 3 per cent. while imports of private treasure (silver) came to Rs. $6 \cdot 50$ lakhs, a decrease of Rs. 0.26 lakh or 3.8 per cent. The principal articles responsible for the increase were copra, carriages and carts, iron and steel, white cotton piece-goods (Indian), gunny bags, cement, coal provisions, fruits and vegetables, and groundnuts and spices. The imports of matches and grey (Indian) and coloured (Indian and foreign) cotton piece-goods, on the other band, showed a substantial decrease.
8. Exports.-(Vide tables Nos. 1, 34 and 38). The vahue of exports of private merchandise (Indian and foreign) in the coasting trade, excluding exports to Burma, came to Rs. 9.84 crores, an increase of Rs. 3.06 crores or $45 \cdot 1$ per cent. while the value of private treasure (gold and silver) was Rs. $2 \cdot 10$ lakhs, a decrease of Rs. 0.75 lakh or 26.3 per cent. The increase occurred chiefly under cotton, but other articles, e.g., seeds, wheat, rice and kerosene oil (foreign) also contributed towards'it. Decreases occurred under wheat flour, hides and skins, raw, fodder, white cotton piece-goods (foreign) and sugar.

## Miscellaneous.

9. Freight.--The year opened with bookings of new crop wheat and cotton and liner space for new positions was strictly limited. A little later, pressure cased off and the freight market became lifeless in tone and remained in the doldrums for the greater part of May and June. The rate during this period remained in the neighbourhood of 35 shillings to the United Kingdom (wheat) : seeds were a shilling lower. At the end of June, due to general listlessness, rates slumped further to 32 shillings for both wheat and seeds and remained at that level till the end of September. Reviving interest in wheat shipments sent freight rates up to 35 shillings and 40 shillings, for a brief period, but this did not last long and the market slumped to 26 shillings by the end of December, as the result of the absence of business. Freight rates remained at 26 shillings for the first three months of 1938 and at the end of March, a further drop to 23 shillings occurred. Rates for seeds were about a shilling lower than for wheat. The year under review has been a fairly dull one in the Karachi freight market.
10. Air traffic $m$ During the jeat under feview; the following air sexvices were in regular opesation bebween Eutope, India, Frendh-Indo-Elina, Butch Bast Indies and Australia and between Karacti and other cities in 种dia:-

- (i) London-Karachr-Cslcutta-Singapore-Austratia (Bi-weelkly).
(2) Paris-Katachi-Calcutts-Rreneh tado-China (weetly).
(3) Ansterdari-Karachi-Caleutta-Dutch East Indies. (Three times a week).
(4) Earachi-Bhuj-Bombay-Madras (Bi-weekly).
(5) Karachi-Latione (Birweelly).

Alvogetiner 738 commercial and private aeroplanes (excluding those fluging between inland centres in British India and Karachit were ontered at Karachi Air-Port and Karachi Sea-plane Poat in 4937-38, as against . 622 in 1936-37, an increase of 21 per cent. There were several 'private flights to' and across India by fliers of vatious nationslities, namelly, British, British Indian, French, Australian, Crechoslovalian, Dutch, German, American, Italian, Japanese and Jaatrian. A notable event of the year was the convetsion of the bi-weekly Amsterdam-Karachi-Dutch Bast Indies service into a tri-weekly qne. In addition, the Empire Air mail scheme was inaugurated in the last week of February 1938 and comonenced operations with four Air mail services in each directien between Lendon and Cateutita every weet. The service between Calcutta and Singapore continued to to bi-weekly as before. Simultaneously Messrs. Tata Sons and Messrs. Indian Nationsi Airways who operate the Karachi-Bombay-Madias and Karachi-Lahore xoutes respectively increased their services to four per weeli in connection with the East and West bound Empire airmail services between London and Karachi.
11. Revenue.-The gross collcction of Customs duty increased from Res 4,54 lakhs in 1936-37 to Res. 6,01 lakths in 1937-38.

British Empire.-The total value of imports from the United Kingdon increased from Rs. 656 lakhs to Rs. 778 lakhs or by $\mathbf{1 8 \cdot 3}$ - per cent. while exports fell from Rs. 925 lakhs to Rs. 908 lakhs or by 1.8 per cent. ; the net result being an increase of Rs. 103 lakhs in the total trade. The share of the United Kingdom in the total import trade of Sind dropped from 42.05 to 39.60 per cent., while in respect of exports, it rose from $36 \cdot 40$ to 37.98 per cent. Among the imported articles, cotton piece-goods, forming 32 per cent. of the total imports, showed the largest increase in value, viz., Rs. 20 lakhs; iron and steel, firearms, aircrafts and parts, chemicals and drugs, sewing and knitting machines and parts, woollen piece-goods, old newspapers and provisions also registered an improvement. On the other hand, imports of clectrical instruments, paeumatic cycle covers and tubes and mining and sugar machinery showed a decrease. On the export side, raw cotton, the largest single item, representing 39 . per cent. of the total exports to the United Kingdom, was the article most adversely affected, showing a fall of Rs. 133 lakhs, but woollen carpets, dried fruits and pulse (other sorts) were also exported in smaller quantities. The full effect of the decline in the commodities noted above was offset to a large extent by increased shipments of wheat, rapeseed and barley. As regards trade with other countries in the British Empire, the share of Burma in the total imports depreciated by Rs. 17 lakhs, chiefly in respect of petrol and kerosene. Lubricating oil, teak wood and matches, however, came in larger quantities.e Exports to Burma, amounting to Rs. 37 lakhs, appreciated by Rs. 13 lakhs, due to larger purchases of wheat flour, wheat and fish. Receipts from and despatches to Ceylon appreciated by Rs. $0 \cdot 65$ lakhs and Rs. $1 \cdot 40$ lakhs. respectively, the principal commodities under imports being copra and caconut oil and under exports, fish, fish manure and food-grains. Bahrein increased its share under imports from Rs. $2 \cdot 44$ lakhs to Rs. $10 \cdot 17$ lakhs, chiefly in regard to supplies of kerosene and petrol, while the share of the Straits Settlements rose from Rs. 4.58 lakhs to Rs. 7.96 lakhs, mainly due to shipments of unvrought tin. The principal commodity imported from the Union of South Africa was coal, valued at Rs. $5 \cdot 15$ lakhs ( + Rs. $2 \cdot 01$ lakhs) while provisions came from Canada to the value of Rs. $2 \cdot 24$ lakhs ( + Rs. $0 \cdot 44$ lakh). Imports of pneumatic motor covers from Canada this year amounted to Rs. 0.35 lakh as against Rs. 0.04 lakh, in the previous year.

## Foreign Countries.--

Europe.-On the import side, Germany not only maintained her leading position, but even increased her share from 1017 to $11 / 28$ per cent. The increase was general and was distributed ovet several heads, the most noticeable ones being metal lamps, sewing and knitting machines and parts, woollen shawls, electrical instruments, builders' hardware (e. g., locks, hinges, door bolts, etc.), drugs, refrigerating and sugar machinery and cycks and parts. Copper sheets and electrical machinery, howeven, were imported in smaller quantities. On the export side, Germany displaced Belgium for first place, her share being $11 \cdot 10$ per cent as against 561 per cent last year. The total value of her purchases amounted to Rs. 265 lakhs (an increase of Rs 123 lakhs), to which whiat exports alone contributed Rs. 147 lakhs ( + Rs. 138 lakhs) ; decreases, however, occurred under cotton, bones, raw hides and rapeseed. The value of imports from Italy appreciated by IRs. 43 lakhs but that of exports to that country decreased by. Rs. 20 . likhs. Larg!?
arrivals of woollen blankets and rugs and piece-goods, haberdashery and potatoes, though partly ofiset by smaller purchases of coloured cotton piecegoods, accounted mostly for the improvement under imports, while a reduction in the demand for raw cotton was in the main responsible for the fall under exports. Crechoslovakia increased her share in the import trade by Rs. 31 lakhs, chiefly under arms and ammunition ( + Rs. 22 lajks), iron and and steel and glassware. Imports from Switzerland also rose by Rs. 8 lakhs, naainly under white and coloured cotton piece-goods, while the shares of these two countries in the export trade rose by Rs. 30.79 lakhs and Rs. 186 lakhs respectively, due to larger purchases of cotton. Imports from Belgiun amounted to. Rs. 29.54 lakhs.in value, an increase of Rs. $4 \cdot 17$ lakhs, to which the improvement in the value of imn and steel, the chief article, contributed Rs. 1.89 lakhs and glass shect and plate, Rs. 0.37 lakh. The export trade with Beljium fell by Rs. 43.lakhs, due mainly to the curtailed demand for cotton, ofiset to some extent by increased purchasos of bones, coconut oilcakes and rapesced. France improved her share in the value of import trade in respect of supplies of iron and steel and brandy, but she sold less aircraft, parts and jowellery. On the export side, France purchased less cotton, rapesced and gram but more:bones. Among the other European countries, imports from Swieden increased by Rs. 6.72 lakhs, under packing and printing paper, iron and stecl, builders' hardware and implements and :tools. As regards the Netherlands, imports from that country appreciated by Rs. 5002 lakhs, but exports deolined by Rs. 2.35 lakhe. Provisions, vegetable product and ale, beer and porter contributed to the increase in imports while raw cotton and rapeseed were mainly responsible for the decline in exports, though this was partly offset by increased purchases of raw hides and bones. Kerosene was the main article imported from Russia, but imports deelined from Rs. $35 \cdot 85$ lakhs to Rs. $16 \cdot 46$ lakhs. Poland sold more yarn and knitting wool to Sind, but bought less Indian cotton.

Asia.-Next to the United Kingdom, Japan was once again Sind's most important customer in respect of both imports and exports, her share in the former trade being 11.96 per' cent and in the latter, 17.64 per cent. Imports from Japan appreciated by Rs. 5537 lakhs, noticeably under white and coloured cotton piece-goods ( + Rs. 25 lakhs), yarn and knitting wool ( + Rs. 9 lakhs), artificial silk and woollen piece-goods ( + Rs. 7 lakhs) and ( + Rs. 5 lalkhs) respectively, iron and steel ( + Rs. 3 lakhs) and cotton handkerchiefs (+Rs. 2 lakhs). Exports to that country declined by Rs. 206.07 lakhs, maiuly due to reduced sales of cotton (-Rs. 209 lakhs), although the value of scrap iron, buffalo and cow hides and some minor articles purchased this year by Japan was more. The import trade from Iran improved by Rs. 24.23 lakhs on account of larger arrivals of potrol and kerosene, but purchases from Iraq declined by Rs. 4.61 lakhs, due to reduced imports of dates from that country. Imports from Java appreciated by Rs. 6.54 lakhs, principally under sugar. The cotton export trade to China recorded an increase, but a decrease occurred in despatches of that article to Freach IndoChina. Smaller supplies of pearls from Mascat accounted for the deorease in imports from that country.

North and South America.--Imports from American countries amounting to Rs. 115 lakhs in value showed an increase of Rs. 34 lakhs. Arrivals from the United States of America of electrical instruments, motor cars and
lorries, lubricating oil, mining machinery, pneumatic motor covers and iron and steel showed an improvement. On the other hand, imports of copper sheets and oil crushing machinery received a set-back. On the export side, reduced exports of wool aud cotton were counterbalanced by an increase in shipments of raw goat skins, the net result being a decrease thje year of Rs. 9 lakhs, which follows an increase of Rs. 38 lakhs, in the previous year.

## TABLE No. 3.

Prices.-Table showing the variations in the average prices of certain important articles.

## -TABLE No. 4.

Government transactions.-Table showing the values of the more important Government transactions in the Foreign brade.

* For the share of these totals, representing figures for Burma, see tables Nos. 23 and 34.

Govemment transactions.-The increase of Rs. 72:55 lakhs in the total value of imports of Government stores (including imports from Burma), as compared with the corresponding figures for the previous year, is distributed over nearly all the heads, but the bulk of it occurred under "Arns, ammunition and Military stores, other sorts" from the United Kingdom and under Railway locomotive engines and tenders from the United Kingdom and Germany.

## Cotton piece-goods.

General.-Total imports of cotton piece-goods appreciated by 2 per cent. in quantity and by 14 per cent. in value, as compared with the previous year. The share of the United Kingdom was nearly 125 million yards valued at Rs. 2.51 crores, showing a decrease of 2 per cent. in quantity but an increase of 9 per cent. in value, while that of Japan was nearly 64 million yards valued at Rs. $1 \cdot 01$ crores, showing an increase of 9 per cent. in quantity and 23 per cent. in valuc. The market ruled firm in the early part of the year and good business was done at advancing prices; aut the subsequent fall in the prices of raw cotton changed the outlook bnd a downward movement set in, involving importers in losses. The Sino-Japanese war was anticipated, at first, to excrcise a bullish effect on the market by restricting the supplies, but this did not materialise, as with the loss of the large Chinese market, Japan dumped her goods on the Indian markets at greatly reduced prices; as a result, total imports exceeded those of the previous year. The falling off in the receipts of British piece-goods is to be attributed to higher prices.

Grey goods.-Grey goods arrived from the United Kingdom and Japan, the latter being, as usual, the chiof supplier. Compared with the previous yér, the value of imports from Japan recorded a decrease of Rs, 5.78 lakhs, to which longcloth and shirtings contributed Rs. 4.57 lakhs and drills and jeans Rs. 0.67 lakh. Imports from the United Kingdom were down by Rs, $1 \cdot 92$ lalkhs, to which bordered dhuties contributed Rs. $1 \cdot 04$ lakhs and jaconcts Rs. 0.85 lakh. The decline is due to keener competition from Indian mills.

White goods.-The United Kingdom continued to be the chief supplier but while her share of the total yardage supplied fell from 80 per cent. to 73 per cent., that of Japan appreciated from 18 per cent. to 23 per cent. Of the principal varicties, mulls from the United Kingdom depreciated in quantity by $3 \frac{1}{2}$ million yards to $60 \frac{3}{4}$ million yards but appreciated in value by Rs. 4.03 lakhs to Rs. 97.36 laklis, while mulls from Japan expanded by $6 \frac{1}{2}$ million yards to $13 \frac{1}{1}$ million yards in quantity and by Rs. 8.83 lakhs to Rs. 17.21 lakhs in value. Supplies of longeloth and shirtings from the United Kingdom amounted to $17 \frac{1}{2}$ million yards valued at Rs. 44.01 lakhs as against $18 \frac{1}{4}$ million yards valued at Rs. 42.32 lakhs. Longeloth and shirtings from Japan amounted to $13 \frac{1}{2}$ million yards valued at Rs. 23.59 lakhs as against $13 \frac{1}{4}$ million yards valued at Rs. $22 \cdot 14$ lakhs, in the previous year. Embroidered allovers from Switzerland improved by $\frac{3}{4}$ million yards to $3 \neq$ million yards in quantity and by Rs. 4.87 lakhs to Rs. $14 \cdot 76$ lakhs in value. The expansion in this line is due partly to the increasing popularity of such goods in the Punjab and partly to purchases being in excess of demand.

Coloured goods.-The share of the United Kingdom in the volume of coloured goods decreased from 63 per cent. to 60 per cent. while that of Japan advanced from 34 per cent. to 37 per cent. The principal varieties contributing to the increase in the total imports were shirtings, printed, from the United Kingdom and drills and jeans, printed, from Japan.

The total number of handkerchiefs in the piece from Japan amounted to $5,642,208$ valued at Rs. $7 \cdot 44$ lakhs as against $3,670,077$ valued at Rs. $5 \cdot 44$ lakhs reported last year.
table no. 9.
WOOL, RAW and woollen goods.

Woollen goods.-Japen was the chief suppiler of yarm and knsting wool
 Rs. $28 \cdot 48$ lalkhs, shoxwing an increase of $168,672 \mathrm{lbs}$. in quantity and Rs. 8.70 lakhs in volue, as compared with the figures of the previous year. Poland adso slightty increased its sales but Gexmany sent less. Receipts from the United Kingđom "amounted "to $84,633 \mathrm{lbs}$. 6 - $\mathrm{l}^{\prime 2}, 503 \mathrm{lbs}$.), valued at Rs. 2.62 lakhs (4Rs. 0.39 lakh). Although the prices of faw wool were high during the frrst few months of tihe year, the prices of woollen piece-goods rere not consespondingly raised; as a result, dealers weafe tempted to augment their purchases and total imports registered an improvement of Rs. $10 \cdot 10$ lakhs, both the United Kingdom and Japan contributing to the increase. Italy also improved jts share but Gernany sold slighthy less. Tmperts of blankets from Italy, consisting mainly of cheap puga, rese in value from Ras 4.72 lathis to Rs. 13.90 lakbs, while those from Japan declined from Rs. 0.53 lakh to Res. 0.04 lalsh. Shawls and lolis came chiefly from Germany and Japan, their sales amounting to TRs. 7.29 lakhs ( + Rs. 3.66 lakhs'), and Rs. $2: 81$ dakhs $4+$ Rs. $1: 68$ lakhs zeapectively. Receipts from France decreased by Rs. 0. I2 takh to Rs. 78 onf

*Kerosene from Burma in bulk and in tins not separately recorded prior to lat April 1937.

Dineral oils.-Imparts of kerosene oil showed a slight diminution of 0.5 per cent. in quantity and about 6 per cent. in value. The net decrease in total imports ( - 141,000 gallonst is made up of Russion kerosene ( -5.4 milliens), Burmese kerosene ( $-\mathbf{k}$ milhon), Iranian kerosene ( 13 millions), Sumatra kerosene ( 12.6 milions), and Bahrein kerosene $(+0.7$ nullhon). Imports from the last two mentioned places representeia a special new feature of the year's trade and taken together with awivals frem fran were responsible for the decreasc in imports from 焣ussia and Burma. Under getrol, the decrease in receipts from Burma was offset to some extent by imports of Babirein petrol, which came here for the first time, during the year under report, and of Iranian petsol. Fucl oil came, almest whelly from Han ( $17,505,585$ gallons) and the Bahrein Islands ( 886,324 gallons): The in: crease under lubricating oit occurred mainly in receipts from the United States of America and Burma.

Iron and steel.-Imports of iron and steel registered a fall of 1.88 per cent. in quantity but an increase of 44 per cent. in value, as compared with the figures for the previous year, the rise in prices being indicative of the boom conditions prevalent in the iron and steel industry abroad during the year under report. The decline in the quantity imported, which can be attributed to the restriction of supplies on account of the great demand in Europe for rearmament purposes and also to the competition of the Indian iron and stecl industry, occurred chiefly in receipts from Germany and Belgium. The United Kingdom was. the largest supplier, with a share of 18,095 tons ( $+3,944$ tons), while Germany, coming next, sent 12,265 tons ( $-2,695$ tons), Belgium 10,716 tons ( $-4,561$ tons) and France 4,583 tons ( $-1,221$ tons). Imports from Japan and the United States of America at 2,653 tons $(+439$ tons) and 2,498 tons ( +974 tons) and certain other countries like Luxemburg, Italy and Sweden recorded an increase. Among the articles where decreases occurred were sleepers and keys for railways from the United Kingdom ( $-1,539$ tons) and Belgium ( -603 tons), steel angles and tees from Belgium ( $-1,443$ tons) and France ( -904 tons), iron and steel sheets and plates, galvanised, from the United Kingdom ( $-1,303$ tons) and Belgium ( -591 tons), beams, channels, etc., from France ( $-1,047$ tons), Germany ( $-1,054$ tons) and Belgium ( -421 tons), tubes, pipes and fittings and nails, rivets and washers from Germany ( $-1,153$ tons) and ( -245 tons), wire other than fencing from France (-506 tons) and wire nails from Belgiun (-183 tons). On the other hand, improvements are to be recorded in the inports of steel bars from Frante ( $+609^{\circ}$ tons) and Luxemburg ( +237 tons), iton and steel hoops and strips from France ( $+1,144$, tons) and the United States of America ( +395 tons), tubes, pipes and fittings from the United Kingdom ( $+1,650$ tons) and the United States of America ( +350 tons). Further, the United Kingdom increased her supplies of beams, channels, ete., $(+2,208$ tons), tin plates $:(+1,596$ tons) and steel angles and tees ( +599 tons). Iron or steel galvanised plain sheets from Japan, screws from Sweden and wire nails from Italy and Japan also arrived in larger quantities this time. Of the total quantity ( 57,077 tons) of iron and steel imported during the year, 28,638 tons paid the protective duties.

Other metals.-The bulk of the imports of copper occurred within the first few months of the year when prices ruled high,; this resulted in their total value rising from Rs. 8.50 lakhs to Rs. 8.91 lakhs ( + Rs. 0.41 lakh); but their quantity decreased by 4,132 cwts. to 19,342 cwts. Reccipts of copper sheets, mainly from Germany, decreased by $9,60 \mathrm{~S}$ cwts. to 8,714 cwts. in quantity and by Rs. 2.77 lakhs to Rs. 3.77 lakhs in value while imports from, the United Kingdom àppreciated by $3,812 \mathrm{cwts}$, to $3,944 \mathrm{cwts}$. in quantity and by Rs. 1.70 lakhs to Rs. $1 \cdot 78$ lakhs in value.

-Velincles.- Imports of motor curs increased from 904 in number valued at Res. 18.49 lakhs to $1,0 \% 1$ ralued at Rs. 22.39 ladis. The United Kingdom was, as usuad, the elinef supplier, but while the number of 3 ritish cars decrensed by 12 , their value went up by Rs. 0.51 lakch. The share of the Onited Kingdow in the total trade fell forther from 82 per cent: in 1934-30, 78 per cent. in $\mathbf{2 9 3 5 - 3 6}$ and 75 per cent. in 1936-3\% to 63 per cent. during the year under review. The United States of Ameriea, increased its sales and the share of that country appreciated from 20 per cent. in 1936-37 to 28 per cent. in, the review yent. Imports from Germany and Italy also recopded an increase. Amrivals from Bombay amenated to 341 cars as against 272 last year. The increase unter American ams is attributed to a demand by the wealthier classes for bigger and more powerful machines whife the poprilanity of German cors may be ascribed to their lighter weight and cheaper running costs. Imiports of notor onnibuses, bans and lorries, were the highest during the tast quinguenuium. The share of the United States of America came to 5 絞 yeliches valued at Rs. $1+35$ Indths, and that of the United Kingdem to 23 vebieles, valued at Rs. 1 - 15 lakhs, while arrivals from Bombay amountece to 452 as against 297 last year. The upward movement in the bicycle trade which has continued without interruption since 1931-32, again set urp a fresh record during the meview year and imports from the United Kingdom, the chief supptier, rose from 36,843 . cycles, valued at
 hand, shipments wem Jupan further fell fome 2,174 cyetes vatued at Rs. 0.28 laflh te 603 volued at Res. $0 \cdot 07$ Lakh.

TABLE No. 14:
INSTRUMENTS AND APPARATUS.

* Separately recorded from April 1036 .

Instruments amd apparatus.-The increase in the imports of electrical instruments occurred in receipts from the United States of America, Germany and Japan and may be attributed in part to war seares. Purchases from the United Kingdom, declined by Rs. $3 \cdot 69$ lakhs to Rs. 13.81 lakhs. The improvement under musical instruments mainly in mports from Japan, is due to the fact that dealers find a ready market for gramophones made up in India out of imported rarts. Under the head photographic instruments, cinema talkie apparetus come Iargely from the United States of America, cinematograph films from the United Kingdom and other kinds of photographic instruments from the United Kingdom and the United States of America : the total imports under this head registered an increase of Rs. 259 lakhs, which is due to the latest improvements in cameras and fims, the growing popularity of photography as a hobby and competetive prices offered by the trade. Wireless apparatus was irrported mostly from the United States of America, Rs. 3.20 lakhs ( + Rs. 0.57 lakh), the United Kingdom, Rs. 1.61 lakhs (一Rs. 0.99 lakh) and Germany Rs. 1.51 lakhs ( + Rs. $1 \cdot 15$ lakhs): these figures indicate a marked increase in the demend for German sets.

| Total | 32-40 | 36.11 | 38.96 | 36.07 | 4737 |

Hardware.--Very good business was done in this line due to better prices offered. Germany, the chief supplier, increased her sales considerably specially under the head "Metal lamps", some new brands of which have now been introduced in the market. The imports of these lamps from Germany amounted to Rs. 8.64 lakhs ( + Rs. 4.47 lakhs), while those from the United States of America and Austria came to Rs. 0.30 lakh ( + Rs. 0.04 lakh) and Rs. 0.27 lakh ( - Rs. 0.06 lakh) only. Implements and tools came mostly from Germany, Rs. $2 \cdot 66$ lakhs ( + Rs. 0.41 lakh), the United Kingdom, Rs. $2 \cdot 48$ lakhs ( + Rs. 0.39 lakh), the United States of America, Rs. 1.92 lakhs ( + Rs. 0.13 lakh) and Sweden, Rs. 1.59 lakhs ( + Rs. $0 \cdot 15$ lakh). Builders' hardware was imported mainly from Germany, Rs. 4.75 lakhs ( + Rs. $1 \cdot 84$ lakhs) and Sweden, Rs. $2 \cdot 60$ lakhs ( + Rs. $0 \cdot 49$ lakh).

| Other morts . | 31,407 | $6 \cdot 03$ | 34,846 | 6.53 | 34,479 | 713 | 32,427 | 6.62 | 36,608 | $7 \cdot 45$ |
| Total Spirits | 154,502 | 24:39 | 146,303 | 23-39 | 149,030 | $25 \cdot 62$ | 131,689 | 22-82 | 158,270 | 24.73 |
| Winee | 39,716 | 5.09 | 32,765 | 4'63 | 36,565 | $5 \cdot 05$ | 31,310 | 4.65 | 31,030 | 4.45 |
| Total tiquors | 806,076 | 42-83 | 854,689 | 42.26 | 831,082 | $48 \cdot 19$ | 750,583 | 41.96 | 872,679 | 46.53 |

Ale, beer and porter.-Increases occurred in arrivals of bottled beer from the Netherlands ( $+37,227$ gallons), the United Kingdom ( $+35,865$ gallons) and Germany ( $+26,313$ gallons). Japan's share was, however, reduced from 17,755 gallons to 14,444 gallons. Imports of bulk beer, mostly from the United Kingdom, registered a decrease of 4,787 gallons.
to 20,840 gallons showed no marked variation, France being, as usual, from the United Kingdom, recorded an increase of 5,716 gallons, which previous year. In the case of denatured spirit, mainly from Java, 26,703 gallons as against 10,165 gallons in the previous year; but while the quantity of rectified spirit denatured at the Custom House on arrival, which is included in the above figures, amounted to 8,765 gallons or 86 per cent. in $1936-37$, it was 14,103 gallons or 53 per cent. during the gear under report; the fall in the percentage figure indicates that larger quantities of spirit denatured at Java are now being imported to compete with the spirit locally denatured.
champagne and vermouth from France.

Provisions. -The value of the imports of provisions further rose by Rs. 7.29 lakhs to Rs. $42 \cdot 74$ lakhs. The
United Kingdom maintained its leading position with a share of Rs. 28.20 lakhs, as against Rs. 26.55 lakhs, in the ?revious year. The increase under most of the principal items occurred in receipts from the United Kingdom, while that under vegetable products was due to larger arrivals from the Netherlands. Milk, condensed and preserved, came brgely from Canada and the Netherlands.

Paper and Pasteboard.-The increase under paper was distributed ovor all the main heads but the main increase occurred in receipts of packing and wrapping paper, mostly kraft paper, from Sweden, printing paper from Austria and
Sweden, writing paper from Austria and the United Kingdom and old newspaper from the United Kingdom. The decline under pasteboard was due chiefly to reduced imports of straw boards from the Netherlands.

Chemicals, Drugs and Medicines.--The increase may be attributed partly to speculative buying due to distarbed political conditions and partly to increased demand. Under chemicals, the improvement occurred mostly in receipts of other sorts of chemicals from Germany and the United States of America, caustic soda from the United Kingdom and the United States of America and sodium carbonate from the United Kingdom. Japan's share in the imports of caustic sods, however, fell from Rs. 55,404 in $1936-37$ to Rs. 1,506 during the year under report. The expansion under drugs and medicineß occurred mostly in purchases of "Other sorts of drugs and medieines" and proprietary and patent medicines from the United Kingdom and Germany.

Postal articles-not specified.-Figures for gold and silver thread, cinematograph films, jewellery, precious stones, cigarettes and, with effect from April 1936, watches, imported by post, are included under their relative heads in the general imports. The value of other articles imported by post further decreased by Rs. 0.55 lakh to Rs. 29.24 lakhs. Imports from the United Kingdom came to Rs. 26.23 lakhs. The number of parcels and letter packets dealt with was 76,307 and 50,395 , as against 77,039 and 45,581 respectively in the previous year. The total amount of import duty realised on postal parcels and letter packets declined by Rs. 0.77 lakh to Rs. 8.02 lakhs and by Rs. 0.57 lakh to Rs. 0.87 lakh respectively.

Cotton, =The year opened well for the cotton trade and total exports of foreign countries up to November 1937 were highet than in the cortesponding period of the previous year. A number of factors, however, operated to nullify the progress made and the year's shipments which stood at 208,549 tons, showed a reduction of 87,135 tons, as compred with the figures for 1936-37. Among the factots wish affeeted exponts, the fellowing may be mentioned. Abumper Ametican cetton crop side by side twith a much poozer crep-in Sindand the Punjab, vide table No. 24, fnot to mention the growing demand of the Indian millst was respousible for Meeping Indian cotton prices above the woyld paxity. The'falling of in the Japanese demand for Indian cotiton on aecount of that country's exchainge restrictions and its militany commitments in China was also anether main contributing factor to generai decline in Indian cotton exports. 僯may be noted that total experts of cotton to foreign coupitries from the Bombay Presidency also declined by 143,683 tons to 242,059 tons, dusing the year under report. The share of the United "Kingdom in the total quantity exported from Karachir decreased from 27.8 per cent. to 27 ? y per cent. and that of Jopon fiom $35 \cdot 2$.per cent. to $31 \cdot 1$ per cent. Czechoslovakid and China took more but alf the other important countries took tess. Exports to Bombay, however, increased from 26,345 tons to 60,256 tons and to Whadras from 14,347 tons to 14,583 tous,

Whast.-Exports of wheat to foreign countries, including Burma, which in 1936-37, were the highest since 1927-2s, appreciated further during the year under xeperit to 452,271 tons, valued at Bis. $4^{\prime \prime} 52$ crores, an increase of 221,317 tons in wotume and Ris. $2 \cdot 45$ crorestin walue. The favourable result was brought about 市y the partial failure, due to adverse weather, of European and North American crops; as a result, Indian wheat prices remained at or near export parity throughout the year. The local market price of white wheat which was quoted at Rs: 4-7-3 per maund on the 6th April 1937 (the highest level during the year) fell to Re. 3-14-9 by the 27th Apmil. The tendency in May and early June was in the downward disection and about the midale of the latiter month the price stood at Rs. 3-9-3. A partial reco* very oceuxped and the price rose to iis. 3-14-6 in the middle of July but there was a huather relapse and, after, some fluctuation, it fell to Rs. 3-8.0 in December. The remaining months of the review year did not witness any recovery at all. La lact by the end of the period auder wien wheat prices slumped further to Rs. 2-24-2, the lowest quotation of the year, as compared with Rs. 4-7-3 trative montis previously.
, Wheat flour.-The increase was due to enhanced exports to Burma, Gulf Ports, Aden, Anglo-Egyptian Sudan and Egypt.

Barley.-The increasing popularity of Indian bandey for cattle-feed and malting accounted for the expansion under this head, which occurred chiefly in exporks to the Whited. Kingdom, 11,820. tons ( 17,037 tons) valued at Hes. 9.49 lakish (+Rs. 6.35 lakhs) and the Irish Triee State, $6,3 \mathrm{H} 3$ tons ( $+2,854$ tons) valued at Rs. $6 \cdot 05$ lakhs ( + Rs. 280 lakhs).

Other food grains.-Shipments of rice chiefly to Guif Ports ( 24,730 tons Talued at Ris. 26.9 lakhsp and to Aden (2,282 tons valued at Ris. 263 lakisis), trecorded an increase of 1,088 tons in quantity and Rs. $3 \cdot 01$ lakhs in value. The principat buyer of grath was once more France, whose share was 13,335 tons ( $-3,337$ tons) valued at Rs. 12.25 lakhs (-mRs. 2:3I latabi). The United Kingdom which came next, took as much as 1,842 tons valued at Ris. i.84 lakhs, as against only Rs. 12 werth in the previous year. Ceyton also purchased 1,276 tons ( + Rs. 267 tens) valued at Rs. $1 \cdot 12$ lakhs (4Rs. $0 \cdot 30$ Jalkh). Aden curtailed its requinements trom 394 tons valued at Rs, 0.30 lakh to $27{ }^{\prime}$ tons vafued at Rs. 0.22 ladh.
TABLE No. 30.
Wool.

Wool. -The buoyancy of the raw wool market in 1936-37, continued for some time into the gear under review and considerable shipments were effected at high prices during the first few months. The uncertainty of the international situation, however, caused the prices to recede and a falling off was noticed in exports during the latter part of the year. This is reflected in the statistics which show that while the total quantity shipped, viz., $26,961,000 \mathrm{lbs}$. decreased by $28 \cdot 1$ per cent., the value amounting to Rs. 187.71 lakhs fell by only 7.5 per cent. British takings rose by 4.8 per cent in value, but declined by 21.3 per cent. in volume. This was due to poor offtake in the English Market which brought about a large accumulation of ansold stocks in Liverpool. American purchases were smaller both in quantity and value.
Hides and Sking, Raw.

TABLE No. 39.
Exports of the more important articles (Indian and Foreign) at the subordinate ports of the Province of Sind.

## IMPORTS.

Indian merchandise.-Cotton yarn and piece-goods and cigarettes were imported mainly from Bombay, coal, iron and steel and gunny bags from Bengal, cement from Kathiawar, matehes from Bengal and Bombay, provisions and groundnuts from Kathiawar and Bombry, fruits and vegetables from Kathiawar, Madras and Bombay, and copra and spices from Madras and Travancore.

Foreign merchandise.-Imports of cotton yarn and piece-goods, cigarettes, motor cars and motor lorries came mostly from Bombay.

## , EXPORTS.

Indian produce and manufactures.-Gram and hides and skins were exported chiefly to Meadras, fish to Bombay, salt to Bengal (100,509 tons), fodder to Bombay, Cutch and Kathiawar, jowar and bajra to Kathiawar and Cutch. Pulse went to Madras, Kathiawar and Cutch, rice to Bombay, Cutch and Kathiawar and wheat to Bombay ( 48,327 tons), Cutch ( 4,095 tons), Kathiawar ( 3,245 tons) and Madras ( 2,541 tons). Wheat flour was exported to Madras, Bombay, Kathiawar, Goa and Bengal and seeds to Bombay, Kathiawar, Cutch and Madras. Shipments of cotton, the most important article in coasting trade, amounted to 66,256 tons to Bombay, 14,583 tons to Madras, 2,021 tons to Bengal, 2,743 tons to French Ports, 850 tons to Kathiawar and 29 tons to other coasting ports.

Foreign merchandise.-Carriages and carts went mainly to Bombay dried fruits to Bombay and Madras, kerosene oil to Kathiawar and Cutch and cotton piece-goods and sugar to Bombay and Baluchistan.

## SUBORDINATE PORTS.

Keti Bandar, Sando Bandar, Shah Bandar and Sokhi Bandar.-The total value of the entire trade of these four ports, which is confined to the coasting trade, increased from Rs. $3 \cdot 16$ lakhs to Rs. 6.28 lakhs, to which Keti Bandar contributed 42 per cent. Sando Bandar 5 per cent., Shah Bandar 23 per cent. and Sokhi Bandar 30 per cent. Rice is the principal article of trade. Sokhi exported 130 tons of rice (not in the husk) to Cutch and 1,093 tons to Karachi, while Keti Bandar, Sando Bandar, and Shah Bandar sent 182 tons, $3 \dot{3} 2$ tons and 1,337 tons, respectively to Cutch.

## TABLE No. 40.

Table showing the number of vessels, other than country craft, of each nationality that entered the port of Karachi,

Shipping.-The average tonnage per steamer entered and cleared in the foreign trade rose further from 2,996 tons to
3,027 tons. Sailing vessels engaged in the foreign trade were country craft trading with ports in the Persian Gulf, Kenya Colony, Zanzibar, Aden, Maldives and Somaliland Protectorate.

Miscellaneous.
(Imports and exports by air).

62

## TABEE No: 42.

Table showing the watues of imperts and exports by air for the last five years :-

## Cuspom Housis,

Karacer;
274 May 1938.

[^0]:    L (vi) 217 - 2

[^1]:    1. (rv) $217=4$
[^2]:    - Not separately available.
    $\dagger$ Agaigst the Collector oniy, Gedures for those ngsingt Assistant Cullectors beigh not av rilatle.
    $\ddagger$ For details see paragraph 32 of the.teport

[^3]:    *This includes Rs. 1,77,766 on account of refunds on goods made to Kashmir Darbar upto date-

[^4]:    Wheat.-The depression which characterised the wheat trade last year continued throughout the year under report, and the causes which operated to bring it about were much the same. The carryover from the previous season's crop was again small, and as the outturn for the season 1925-26 was also below the average and the internal demand heavy, there was a considerable reduction in the amount available for export. Moreover large purchases of Sind and Punjab wheat were made during the year by the Bombay flour mills as a result of poor crops in the districts which normally supply them. The varions reasons mentioned above helped to keep the price of Indian wheat above the level of world prices which continued to be easy on account of another favourable crop in America and Australia. Indian wheat could not, therefore, compete successfully in foreign markets, and exports stood practically

[^5]:    * This change was not made by an amendment of the Indian Tariff Act, but by the issue of a Government of India, Finance Department (Central Reventes), Notification Ne. 36, dated 25th September 1926, under section 23, Sea Customs Act.

[^6]:    The prices realized in Liverpool suction sales were about 30 to 40 per cent. below those of the previous season. This fall was largely due to the lack of American support during the latter half of the year. It is also reported that depreciation in the Chinese exchange, which reaulted from the fall in the prices of silver, enabled China wool to compete successfully

    Seeds.-The following table compares the quantity and value of the different kinds of seeds exported to foreign countries during the past five years. Rapeseed is the most important seed exported from this province. Increased internal consumption accounted for a fall in the quantity shipped.

[^7]:    The heavy decline in re-exports of foreign wool, mostly Kandahar wool, was due to the reasons given in paragraph 15 for the falling off in exports of Indian wool. Woollen manufactures re-exported consisted, as usual, almost entirely of Persian carpets to the United Kingdom and the United States of America. The notable expansion under rubber manufactures was due to large re-exports of rubber tyres and tubes to Iraq and Persia. Re-exports of metals consisted mainly of scrap iron shipped to Japan. All the wheat re-exported was Australian wheat.

[^8]:    (a) Inolusive of Exaise du'y.

[^9]:    Custom House,
    Karachi, the 20th May 1931. MGIPC—S:-88 CUKaracki 7.7.31-200.

[^10]:    Raw Hides.-The decrease was due to a continual decline in prices and the resultant lack of confidence, buyers
    restricting their purchases to immediate requirements.
    Raw Skins.-Shipments of raw skins decreased by 6 per cent. in quantity, but lower prices reduced the value by 24 per cent. A restricted demand for raw goat skins by the United States of America accounted for the deficiency.
    and demand for raw goat skins by the United States of America accounted for the deficiency.

[^11]:    There has been a considerable decrease, both in the quantity shipped to the United Kingdom for sale by auction, as
     The prices obtained in the Liverpool market were again unremunerative.

[^12]:    "tA" Representa Indian Produce.
    $f^{\prime \prime}$ B" Represonta Foroign Produce.

[^13]:    Ale, Beer and Porter.-Imports of bulk beer, almost wholly from the United Kingdom, decreased by 55,606 gallons to 314,899 gallons, but those of bottled beer increased by 35,753 gallons to 294,698 gallons, chiefly in supplies from Japan. whisky was partly due to the introduction of cheaper brands in the market and partly to a reduction in the home prices. The denatured spirit shown as imported was rectified spirit from Java denatured at the Custom House on arrival. The quantity imported showed a further decline of 4,641 gallons. Increased distillation in India, which'followed the establishment of sugar factories, and the imposition of a heavy vend fee of annas 12 per gallon on methylated spirit are gradually bringing about a restriction in foreign imports.

[^14]:    The downward trend in imports of foreign sugar noticed in recent years as the result of the growth of the sugar industry in India, protected by a high tariff, continued during the year under report. The total quantity imported, viz., 62,052 tons was less than one-fourth of the quantity ( 227,809 tons) received only four years ago, i.e., in 1930-31. The continuous fall in prices during the year was another factor which rendered business for forvard delivery difficult to a very great extent.

    The local price of white Java, which opened at Rs. 13-11-0 per cwt. on the 3rd April, proved to be the highest quotation of the year. A gradual downward tendency soon followed, Rs. 13-8-0 being quoted at the end of April, Rs. 13-4-6 at the end of Mtay and Rs. 13-3-9 at tho end of June. The subsequent three months witnessed a partial recovery, the rates ruling in the neighbourhood of Rs. 13-5-0 up to the third week of Scptember, but weakness set in onco again and the prices fell abruptly

[^15]:    Rapeseed is the most important seed exported from this Province. The decline of nearly 50 per cent. in the quantity exported during the year was due to a smaller orop and restriction on imports into most purchasing countries.

[^16]:    ""A ${ }^{\text {B }}$ " Represents Indian Prodace.

[^17]:    *Figure日 for laggage not included before 193c-37.

[^18]:    Ale, Beer and Porter.-The decrease occurred in receipts of both bulk and bottled beer from the United Kingdom $-70,277$ and $-4,393$ gallons respectively) and of bulk beer only from tite Netherlands ( $-1,300$ gallons). Imports of bottled beer from the Netherlands $(+9,581$ gallons), Japan ( $+7,865$ gallons) and Germany ( $+3,176$ gallons), on the other hand, registered an increase. The increase of 79.5 per cent. in the imports of the Japanese product was remarkable, indicating that it is regaining its position in the market on account of its cheapness.

[^19]:    Rapeseed is the most important export under this head from this Province. The export trade showed signs of returning activity and the quantity shipped rose from 18,499 tons in the previous year, representing the lowest figure for the last thirty six years, to 37,030 tons. Rapeseed is preferred to other oilseeds on account of its high quality edible oil and it was therefore easily given preference in consequence of the poor olive crop in the Mediterranean countries and the ruin of harvest in Spain owing to the civil war.

[^20]:    ""A" Represents Indian Produce.
    (a) Reprecentes trado with Gopaipur whioh yas fon merly inchuded nuder Madras.

[^21]:    For the sharo of this total roprosentiug exports to Burma see table No. 34.

[^22]:    Rapeseed is the most important export under this head from this Province. Total exports decreased owing to a poorer crop in India but the British takings showed an improvement owing to the increased activity of oilseed-crushing and oilrefining industry in that country. The fall in exports occurred chiefly in shipments to France and the Netherlands. Belgium took more this year.

[^23]:    * For the share of this total ropresenting re.exports to Burma, see table No. 34.
     shipments to the United States of America and the United Kingdom, amounting to 2,062, 534 lbs. ( $-716,748$ lbs.) and $125,314 \mathrm{lbs}$. (-643,748 lbs.) respectively. Germany, on the other hand, raised her purchases to 166,656 lbs. $(+34,160$ Ibs.). The decreases under wool manufactures, consisting chiefly of Persian carpets and raw skins (mainly Persian skins), were due to reduced purchases by the United Kingdom. The further increase in value recorded under metals and ores occurred in despatches of old iron and steel to Japan and in exports of metals, unclassified, to Belgium, Japan and the United Kingdom. Dried fruits formed the main item under fruits and vegetables; shipments to Burma came to Rs. 2 lakhs, to Egypt Rs. $1 \cdot 08$ lakhs, to
    
     Rs. 1.60 lakhs (-Rs. 0.64 lakh ) and to Bahrein, Rs. 0.04 lakh (-Rs. 0.10 lakh) and the entire cessation of shipments to Arabia (which had taken Rs. $1 \times 44$ lakhs worth of goods in the previqus year) accounted for the decrease under this head,
